The Political Economist.

...OULD NOT THE CHANCELLOR OF THE ...EQUER *IN HIS CAPACITY OF BANKER* ...UBLISH A WEEKLY ACCOUNT LIKE THE ...NK OF ENGLAND?

...s of the public are not altogether prepared to hear ...e Chancellor of the Exchequer, the Minister primarily ...ed with the national income and the national expen... ...a great banker. Yet it is not the less true that, ...newhat disguised form, he manages the greatest ...k of deposit in England, and perhaps in the world; that ...money left in his charge are twice as great as those left ...charge of the Bank of England; that he is in conse... ...power of importance in the money market.

The funds of which we speak are the funds of the Savings ...ks. Of their magnitude there can be no doubt. On the ...th November, 1860, the last period respecting which we ...ve an accurate statement, the deposits in the hands of the ...missioners were:—

		£	s	d	£	s	d
Great Britain—Savings Banks		39,348,999	13	8			
Ireland	ditto	2,144,479	10	4			
					41,493,479	4	0
Great Britain—Friendly Societies,	59 Geo. 3	1,815.578	12	6			
England	ditto	ditto			83,391	14	3
Great Britain	ditto	13 & 14 Vict.			140,982	12	1
					2,039,952	18	10
					43,533,432	2	10

...nd as the deposits of the Bank of England, both private ...nd public, are only 17,000,000*l*, it will be seen how vast ...s the fund at the disposal of the Chancellor of the Ex...equer.

...It is true that the apparent control of these deposits is in the ...hands of a Board of which the Chancellor of the Exchequer is ...but a single member. By Act of Parliament, the management ...of the Savings Bank moneys is vested in a Commission, ...consisting of the Speaker of the House of Commons, the ...Chief Baron of the Exchequer, the Master of the Rolls, ...the Accountant-General of the Court of Chancery, the ...Chancellor of the Exchequer, the Governor and the ...Deputy-Governor of the Bank of England, of whom ...any three may form a quorum. But, as usual ...in England, the theoretical constitution of these matters ...is a startling contrast to the real and practical one. The ...Commissioners meet only once a quarter, and then almost ...wholly for purposes of pure form. The practical regulation is in the hands of the Chancellor of the Exchequer, who directs sales or purchases of stock, or Exchequer bills, or other securities, at his pleasure. Even at the regular quarterly meeting, no additional members save the Governor and Deputy-Governor of the Bank are commonly present, and it is not customary for them on that occasion to interfere much. Practically and really, the entire control of this vast sum,—the regular investment, and the occasional repayment of it,—the purchase of securities when it is augmenting, and the sale of such securities when it is diminishing,—is entirely in the hands of Mr. Gladstone, Sir G. C. Lewis, or Mr Disraeli, or whoever else may be the Finance Minister for the time being.

And this is quite right. The nation has incurred a vast responsibility in receiving these deposits from the humbler classes: it has incurred a vast loss by managing them. It has invested when securities were dear: it has sold out when securities were cheap: it has paid more interest than it has received. In return for this large loss and this vast responsibility it is entitled to a recompense. It is entitled to whatever use it can make of the Savings Bank money to aid its own financial operations—to save it from borrowing in the open market, to postpone its so borrowing, or in any other convenient mode whatever, subject always to its paramount duty to the depositors to keep their money in an available shape, and with a proper banking reserve. This temporary convenience, though not inconsiderable, is probably not a sufficient compensation to the Government for the risks it has undertaken in respect of the Savings Bank moneys and the losses it has undergone in consequence. Still, it is the only compensation which the State can receive—which the peculiarities of the case permit.

We might have anticipated that the exercise of this financial power by the Chancellor of the Exchequer would have been very popular. It is to the interest of the public that the financial operations of the Executive Government should be in every way facilitated. A few great capitalists may desire the opposite, but their interest is exceptional and sinister. Upon the whole, two more plain propositions cannot be stated, than that it is to the public advantage that the pecuniary operations of our Exchequer should be helped and aided, and that the handy use of a large sum like this of the Savings Banks tends to aid them.

Yet in fact this power is not popular. The "City articles" of half the days in the week are filled with hypothetical grumblings such as these: 'It is believed that the Chan-'cellor of the Exchequer has been buying Exchequer bills': 'it is believed that he has been selling stock, &c., &c.': 'it 'is much to be wished,' such is the moral always drawn, 'that 'these peculiar transactions should be prohibited by Parlia-'ment.' And, whether wise or unwise, these reflections indisputably embody a very prevalent and influential opinion.

The explanation of the anomaly is that these operations are *secret*. No one knows from week to week or from month to month what is doing, why it is done; what is not doing, why it is not done. At the end of the year a Parliamentary paper may be laid on the table of the House of Commons, but the interest of everybody in the transactions to which it relates has entirely faded. It is a sort of history which might fairly be called an old almanac, for it is the dry enumeration of petty figures of which the significance has long been past. It is the contemporary history that would

be instructive. At present the Chancellor of the Exchequer has a *latent* power over the money market, and, like all latent powers, its exercise is unpopular and its magnitude is exaggerated. If the true facts were known while they could still be appreciated and would still be studied, the odium attached to a secret influence would be removed. The true extent of it could be measured, the natural popularity belonging to its inherent usefulness would return to it.

We have heard that in former times, when the accounts of the Bank of England were not regularly published, it was regarded with the same sort of vague disfavour that the Chancellor of the Exchequer now is. "The Bank is operating" was then, we understand, a phrase in the discount market, just as "The Chancellor is operating" at present is a constant phrase in the stock market. Let us take the same remedy, and we may expect the same effects. As the Chancellor of the Exchequer is a great but unpopular banker, let him recover his popularity, like other great bankers, by a timely publication of the good he is doing.

The form of the account would be very simple. The liabilities of the public would appear as we have above stated them. The assets would be as follows:—

Securities held by the Commissioners.	On Nov. 20, 1860.	Price.	Value.	Total.
	£ s d		£ s d	£ s d
Consolidated 3 per Cents	12,690,467 6 6	93⅜	11,849,723 17 3	
Reduced 3 per Cents	6,046,627 7 7	91¼	5,547,780 12 4	
New 3 per Cents	18,229,621 7 10	91½	16,702,890 12 0	
New 2½ per Cents	31,900 0 0	77¼	24,722 10 6	
New 3 per Cents, Ireland	1,031,588 13 7	91¾	945,193 2 6	
	38,030,204 15 6	...		35,070,310 14 1
Exchequer Bills	1,828,100 0 0	Capital	1,828,100 0 0	
		Interest	22,176 9 1	
Exchequer Bonds	1,000,000 0 0	Capital	1,000,000 0 0	
		Interest	1,250 13 8	
Turkish Guaranteed 4 per Cent Bonds	82,000 0 0	101½	83 230 0 0	
				2,934,637 2 9
Total Stock. Ex. Bills, Ex. and other Bonds	40,940,304 15 6	...		38,004,967 16 10
Uninvested balance				786,490 14 0
Excess of liabilities over assets*				4,741,973 12 0
				43,533,432 2 10

If this information were given week by week, we should hear no more of the "anomalous operations of the Chancellor of the Exchequer."

* The Stock held by the Commissioners has always been valued in these accounts at the prices on 20th November in each year. If those prices be higher at one period than another, in the same degree will the value of the securities appear to be greater or less, and so of the balance deficient. The prices of stock on 20th November, 1859, and 20th November, 1860, were as follows:—

	1859.	1860.
Consolidated 3 per Cents	95⅞	93⅜
Reduced 3 per Cents	94⅝	94⅜
New 3 per Cents	...	91¼
New 2½ per Cents	79⅜	77¼
New 3 per Cents, Ireland	94⅝	91¾

Upon this principle the balance deficient on 20th November, 1860, is made to appear £4,741,973 12s, while the same principle made it appear £3,469,643 0s 11d on 20th November, 1859.

THREATENED FAMINE OF COTTON.

It is impossible to predict the conduct of men from the most accurate knowledge of their interests, even when those interests are enormously strong and indisputably obvious. Men's passions are an "unknown quantity,"—and are influential enough and uncertain enough to upset the clearest and most careful calculations. Therefore, though we may feel very sure that it is unwise in both sections of the American people to fight at all, and will be utterly ruinous to them to fight for long, yet it would be rash to conclude that the deadly conflict which seems imminent will not take place, or that, once begun, it may not be continued for months, or possibly for years. We do not *expect* this;—but no man can pronounce it to be improbable. We do not, indeed, think it likely that large armies will march Southward or that great land battles will be fought; but, considering the vast wealth and naval strength of the North, and the comparative weakness of the South both in money and in ships, we may not shut our eyes to the fact that the blockade of the Southern ports may be made complete and effective, and may continue long enough to shut up for a year at least all their exportable produce. More than this is *not* likely: further than this we need not speculate. But the ports from which cotton can be shipped to Europe are few in number and can easily be guarded:—the ships of Western nations, we may assume, *will not* break the blockade, and the privateers of the Southern Confederation *cannot*. It is, therefore, undeniably possible and almost probable that for the space of a twelvemonth we may be deprived of the whole, or nearly the whole of our usual supply of the raw material from America. We have received a our share of last year's crop already: the next year's cr would not come forward in any quantity till the end of 18 or the beginning of 1862. If the war be ended and t blockade raised by February next, we shall scarcely feel it all. If it be prolonged till next summer, we may be ab 2,000,000 bales short of our usual supply. This is the improbable contingency which we have now to look in face as calmly, and to meet as sagaciously and energetica as we may. When we called attention to this matter January last, it was a remote and merely conjectural po bility: it has now become an imminent and a far from fa ful danger. We trust it may yet be averted, but in meanwhile let us look at our position and its chances with either foolish confidence or exaggerated alarm.

And, *first*, let us clearly fix in our minds that the conju ture we have to meet is a *temporary* and an *immediate* o If America were sunk in the sea, or from any cause about to cease for ever to furnish us with cotton, we sho know at once what to do, and should lose no time in doing it. We should set about stimulating the growth of the needed article wherever it now exists, and planting it wherever else soil, climate, and population offered any prospect of growing it with advantage. But this is not our case. We have—on our hypothesis—to provide against the stoppage of our supply for *one* year, and that the very *next* year. We want instant, not ultimate relief. We must, therefore, it is obvious, direct our exertions and confine our hopes to *drawing the greatest possible amount from quarters where it already exists* and is the regular staple production of the land. This and this only can save us from distress *in* 1862: by 1863 and 1864, when newly-organised sources of supply would begin to tell upon our market, the vast crop of America (we may reasonably and confidently assume) will be again at our disposal. In 1860 we consumed 2,600,000 bales in all; bu then 1860 was a year of singularly brisk and profitable trade. No one, looking at the condition of America and India, anticipates anything like it this year or next. For 1861-2, then, we may assume that 2,300,000 will supply our current wants.

The price may naturally be expected to rise so high, on the withdrawal of the American supply, as to stimulate the merchants and producers in every other quarter to send us every bag they can pick, purchase, and convey. The price will be such as amply to meet every conceivable cost of conveyance: in fact it will be such a price as we have not seen in the lifetime of the existing generation. We may be certain, therefore, that *at the very least*, every country will send us as much as they have ever done *in their best year* in recent times. Now we find that

	bales.
Brazil in 1857 sent us	168,000
Egypt in 1852	189,000
West Indies, &c. in 1857	11,000
	368,000

The Brazilian growth has not increased of late years, and perhaps that country will never send us more than she has done. The supply from Africa, Australia, and the Antilles is still insignificant and can only increase slowly. That of Egypt fluctuates greatly, but is capable of considerable augmentation. But, on the whole, it would not be safe to reckon on more than 400,000 bales from all these miscellaneous quarters.

On India we must place our chief reliance. She once, in 1857 (when the price of Surat reached 5½d), sent us 680,000 bales. What she would send us under the unprecedented stimulus of 12d per lb remains to be seen. She is known (vaguely) to grow enormous quantities of cotton. The question is how much does she grow, and how much of that growth could she spare us when goaded and allured by the high prices we could offer? We will not delude our readers with any affectation of correct figures where no such exactness is attainable, but will content ourselves with placing before them what is actually known upon the subject, and, in the absence of positive knowledge, the most trustworthy opinions extant. First, then, nothing *positive* can be safely predicated as to the cotton crop of India. The quantity *manufactured* there, exclusive of that exported, is variously estimated, by General Briggs at less than 2,000,000 bales

(of 400 lbs each), by Dr Wight at 7,500,000 bales, and by Dr Forbes Watson, who is considered an authority, at upwards of 5,000,000 bales. The entire quantity grown Dr Watson estimates at 6,000,000 bales. This may be a correct guess, but it is merely guess. We may, however, we think safely conclude from a comparison of these various opinions, that the cotton crop of India is at least equal to that of America, and that it is amply sufficient to supply our wants, if only the natives can be induced by the prices offered, and enabled by the means of transit provided or providable, to send us what we require—*i.e.*, to export it instead of manufacturing it.

There are two *facts*, and so far as we are aware only two, to be further stated as bearing upon our prospects; and neither of them is encouraging. The *first* is that, not only is our usual Indian supply drawn mainly from the districts comparatively near the coast and within easy means of transport (as might have been anticipated), but that any increased supply, which we suddenly need and call forth by high prices, comes not by draining remoter districts, but by more thoroughly exhausting the old ones. Thus the annual supply from Surat, Cutch, and Broach, which from 1852-55 only averaged 220,000 bales, sprung up under the stimulus of the high prices of 1857 to 500,000 bales;—while the more inland districts (Candeish, Sattara, Dharwar, Kurnool, &c.), which from 1852-55 furnished on an average 210,000 bales, sent no more than 235,000 in 1857. The *second* fact is that the greatly increased supply which reached England from India in 1857, was furnished to some extent at least by diminishing the usual export to China and other quarters, rather than by interfering with the quantity retained for home consumption. It is impossible to say to what extent a very eager demand for export may induce so sagacious and money-making, but at the same time so *routine*, a population as the Hindoos, to change their habits for a year and sell their raw cotton instead of spinning and weaving it as usual. It is equally impossible to calculate with any certainty what price will meet and repay the *unknown* cost of transporting the cotton (on bullocks) from *new* districts to the port of shipment. Yet upon these two elements depends, it is obvious, the answer to the inquiry "How much more cotton "than usual will the anticipated high prices bring us from "those quarters"? All things considered, however,—the *unprecedented* advance of prices which our hypothesis implies, and the considerable period during which this advance has been hanging over us for merchants to be guided by in sending agents and orders into the interior,—we do not think it over sanguine to suppose that the 680,000 bales which India sent us in 1857 will be swelled to 1,000,000 in 1862. Our entire supply from all quarters, exclusive of America, would then be 1,400,000 bales, to meet a *probable* demand for 2,300,000.

But will 2,300,000 bales be required? Scarcely, even at present prices:—at the prices which will rule as soon as the idea of a withholding of the entire cotton crop of America has been fairly realised by our merchants and manufacturers, assuredly not. Even now a considerable proportion of the mills in Lancashire and Cheshire are working at a loss so heavy that a resort to "short time" is already contemplated. Any further rise in the price of raw material, which is never followed either immediately or *pari passu* by a corresponding rise in the price of the finished article, will infallibly drive numbers of our spinners to four days a week. All practical men know how difficult and slow a process it is to persuade distant customers to give more for any description of goods than they have been accustomed to give. They "hold off," as the phrase is; that is, they decline buying either because they cannot afford to buy, or because they prefer to await the chances of a fall. Stocks accummulate, capitalists become embarrassed, and prices *do* fall (as calculated) unless the cause of the original advance is not only valid but permanent. A rise in cotton lasting a couple of years *is* followed by a rise in calicoes and yarns and shirtings all over the world:—a rise in cotton lasting *or expected to last* only three months, or six months, is *not*—or only partially and after a long interval.

The diminution of demand, therefore, as well as the diminution of supply—a dull trade as well as a short crop—will drive our cotton spinners to short time. When to this consideration we add another, equally familiar to the trade, that those goods into which the raw material enters most largely will soonest and most surely become unprofitable, and that in consequence every producer will turn to lighter fabrics, demanding less cotton but employing as much labour, we think we are fully warranted in coming to this conclusion—not a satisfactory one certainly, but still not an appalling one either,—that *such a high price of cotton as would naturally follow a year's deprivation (or expected deprivation) of the American supply, will bring us from other quarters a sufficient quantity to enable our mills to work four days a week (or two-thirds time)*;—and further, that *such a high price of the manufactured article as would ensue, must so curtail the demand that only two-thirds our usual production could be disposed of in the aggregate markets of the world.* This seems, therefore, taking into account only the elements we considered hitherto, the maximum of the calamity which threatens us.

But there is another and far more conjectural element to be allowed for, which may upset the most cautious and well-based calculations. We are satisfied that, if the price of cotton rises to a sufficient height, or to such a height as would be indisputably warranted by the withdrawal of the American supply for even one year, it will attract enough from other quarters to enable our mills to work four days a week. But WILL the price reach this height? WILL cotton go up fast enough and far enough to produce the desired result? Clearly *not*, unless merchants and manufacturers can be brought to believe in the actual loss of the American crop;—and not only at present do they *not* believe in this, but they can scarcely even be induced to entertain it as a supposition. The universal answer made both in Liverpool and Manchester, and even in London, to any one who broaches the conjecture, is:—"Oh, it will never come to "that. They will make it up before Christmas. Or we "shall break the blockade or compel a peace—or something. "We shall get their cotton *somehow*." No one, however, attempts to suggest *how*.

We are not surprised either at the slowness of merchants to realise the menaced calamity, or at their caution in acting upon its probability. The chance for every speculator lies between riches or ruin. It is and must be to a great degree a *gambling* matter. If the United States crop was known to be *destroyed*, there could be no doubt what the effect would be on the price of cotton and on the consequent operations of merchants. Every man would know what to do and what he might safely venture. But as the crop is merely *withheld*, and might any day be liberated and come forward, no one knows how to act or how far to venture. To make the matter plain, let us assume some conjectural figures. Say, that if we are not to have the United States crop, the fair price of uplands would be 18d per lb. The consumer buys at this rate; the merchant sends out his orders to Egypt and Bombay at these or corresponding limits. If war is persisted in and the blockade continues strict and effective, the operators make large profits. If the belligerents make up their differences, get sick of the dispute, or accept the mediation of England and France, and the blockade is raised—and no one can say that this is not any and every day upon the cards—the price of cotton falls inevitably to 9d,—and the operators are utterly ruined. No wonder that men of character and wealth decline committing themselves to so terrible a risk.

They remember 1825, when middling Orleans, which was 9d in January, rose to 18d in May, and fell again to 9d in December. The ruin that ensued was frightful, and the terrible warning has not been forgotten. The plain truth is that the future of cotton is so *thoroughly and hopelessly uncertain and incalculable*, that only reckless men dare meddle with it boldly;—and, in consequence, the price is advancing far too slowly and timidly to meet the emergency—if that emergency should occur. It is too low to command the cotton we shall want from India, if the American crop really fails us; and it will remain too low as long as the calamitous hypothesis we are considering is considered by the commercial community as problematic or improbable. *This is in reality our greatest danger*, and we do not see how it can be averted. As the months roll on, and bring no prospect of a settlement—when December arrives, and the blockade continues as strict, and the passions of the combatants as exasperated as ever (if such should be the course of events)—*then* we shall take the alarm and cotton will run up to fabu-

lous rates. But then it will be too late for even those rates to bring the augmented Indian supply to mitigate our famine.

We have written these remarks in no alarmist spirit. We are only anxious that our friends in the North especially should not shut their eyes to a contingency which—however difficult it may be to realise or to believe in anything so calamitous—is by no means unlikely,—indeed is, according to present appearances, more probable than otherwise. We must postpone some observations we had wished to make as to the chances of averting it, till our next issue.

THE EMPEROR'S CONCESSIONS TO CIVILISATION.

The Emperor of the French has not unfrequently fulfilled the aspirations expressed in his "Napoleonic ideas" of enabling France "to cast into the scales of all treaties her sword of "Brennus on the side of civilisation." He did this when resisting the onset of Russia in 1854,—in encouraging the rally of Italy in 1859,—in discouraging the secular power of the Pope; and now he does it again, and does it after the same odd, half-reserved manner, in finally,—as we hope,—declaring against the French form of the Slave Trade which has been so long carried on on the Coast of Africa. But always he throws in this "sword of Brennus" after the same cautious fashion, as if he were more anxious to retard too rapid a progress, than to accelerate one too slow. Indeed, we do not know whether the Crimean war did not altogether, in the Emperor's estimation, fall under this retarding head. In his confessed writings, Louis Napoleon had professed himself the deepest admirer of Russia as the only power except America which was working out a great destiny with full capacity; and possibly, in his own secret policy, it was more because he deprecated the *too rapid* encroachment of Russia on Turkey than because he believed this to be ultimately fatal to civilisation, that he threw the sword of France at length into the same scale with England, withdrawing it, however, eagerly enough at the earliest practicable moment. In all his policy, both for France and other countries, there is, we believe, an honest dread of too rapid a progress. In Italy he had scarcely gained the first great step, than he not only drew back, but became by far the most efficient drag on the movement of Italian unification. And even in regard to the Slave Trade he seems to display the same excessive caution. Two years and a half ago Portugal had her famous dispute with France concerning the slave ship *Charles et Georges*, which had been caught in the fact in Mozambique. It was then that the Emperor, after carrying the French case with a high hand and actually forcing Portugal to surrender the confiscated ship, wrote the well-known letter to his cousin, in which he told him that, "as to the principle of the engagement of "the Negroes, my ideas are far from being settled. If, in "truth, labourers recruited on the African Coast are not "allowed the exercise of their free will, and if this enrol-"ment is only the Slave Trade in disguise, I will have it on "no terms, for it is not I who will anywhere protect "enterprises contrary to progress, to humanity, to civilisa-"tion." Yet two years and a half have elapsed since the decision of the Commission, that this was in fact a form of the Slave Trade, was presented to the Emperor, and only now at length he is taking final action in the matter. He states, indeed, that in 1859 he prohibited the African immigrant system on the East Coast. But if he did so, we fear that neither in Zanzibar nor Mozambique were his orders really carried out. If, as the Imperial letter also states, he has "restrained" the immigration system on the West Coast, the restraint put upon it has not been nearly sufficient, for we have evidence that the famous French contractor's, M. Regis's active operations have quite recently produced a practical Slave Trade there. And even now we cannot feel sure that the Imperial mind is at last in earnest.

But there is some reason to hope that it is. In this matter at least, the real "retarding" influence cannot have been any fear that the Slave Trade should die away too fast. But there has been, we think, a jealousy of English influence in the matter,—a disinclination to defer to our representations or to accept our implied rebukes. Till France had obtained some equivalent, the Emperor was not willing to seem too eager to adopt our advice. The French have almost felt inclined to apologise for the Slave Trade since we accused them of encouraging it,—and of this feeling the Emperor has been quite aware. It would have been said that he was sacrificing the welfare of the few French sugar colonies to the caprice or obstinacy of England.

Now, however, this can no longer be said. The Emperor has secured from England the right to import labour from British India under the same restrictions which we have laid down in our own colonies. This will not only more than take the place of inefficient African labour, but it will be something to show the French nation in place of concession to our urgent pressure. We have conceded to France all the advantages which we possess ourselves for supplying her thinly-peopled colonies with labour,—and after such a concession no one can regard the measure as one of cowardly deference to England. Even now this concession to civilisation is provisional on the concession of England to France. As soon as the treaty for hiring Coolies from India comes into operation,—namely, in July, 1862,—then, and not sooner, is the engagement of labour on the Coast of Africa by French contractors to cease and determine. For another year M. Regis may bribe the African Chiefs to bring him his "free immigrants" for Martinique or Guadeloupe. After that time he must either transfer his ships to the less lucrative operation of transporting Hindoos from British India under strict regulation, or embark in a completely new line of trade.

The whole proceeding has been very characteristic of the Emperor's profound sympathy with the sensitive egotism of the French nation. In all his dealings, both with England and Italy, the Emperor has never made any great concession without providing some form of demonstration that his concession was absolutely voluntary, and in no way constrained by the pressure of others. The conviction that any failure in self-assertion would be deeply resented by the people whom he rules, has explained many of the most curious aspects of his policy. He has always strictly followed his own rule to seize the moment of an apparent victory for a necessary deference to the force of an opinion which he deems the best. Thus, both in the Crimean and Italian wars, he chose the moment of France's most splendid success to make peace; and it was only after the mortification of Cavour by the annexation of Nice and Savoy, that he ventured to permit the progress of Italian unification to go on. And the same rule has been followed even in smaller things. When Italy seemed to be subsequently gaining a victory over France in the annexation of Naples, he waited to acquiesce until after that odd demonstration against Gaeta, by which he presented France in the light of a perfectly free agent, acting in opposition to both the remonstrances of her ally and the prayers of her dependent. Again, in the dispute concerning the Slave Trade, the Emperor chose the moment of his diplomatic victory over England in the Tagus to give up the point at issue; and in his dispute with his own people about free trade, he did not venture to act till he could put it in the form of a successful negotiation with England, by which she seemed to have yielded far more than she had gained.

In acting thus, we cannot doubt that the Emperor shows his full knowledge of Frenchmen. The concession of Nice and Savoy was little real gain to France, and it alarmed the whole of Europe. Yet Napoleon knew well that his own people would never have permitted him to yield so much to Italy without taking some nominal spoil for France. And even now it is quite obvious, by the jealous tone in which the most liberal papers speak of the abandonment of the right of hiring African emigrants for the French colonies, that this concession to the spirit of "humanity, civilisation, and progress," without securing an equivalent from England, would have been a most unwelcome step. France loves to show that she can "interpret" the wants of the age,—but she loves still more to prove that she takes her own time, and follows only her own lead, when she announces what those wants are.

THE PROPOSAL OF THE EDUCATION COMMISSIONERS.

We showed the week before last that the principle upon which grants for the purposes of education are now given by the Committee of the Privy Council was the principle of

giving something to those who bring something,—the principle of granting additional money to those who have already collected some money,—the principle of helping those who can help themselves. It is evident,—and we were so far from disguising it that we insisted on it,—that an exclusive adherence to this rule of action inevitably prevented the present grants for educational purposes from reaching the most destitute places: we showed that they could not reach a town district without a respectable inhabitant, or a country district without a resident proprietor; we remarked on the evident necessity that places where there was nobody to subscribe, where perhaps there was little to subscribe, would derive no benefit from a system of education which is nevertheless *called* national.

We also showed that the adoption of this method of aiding education is, in the present circumstances of this country, inevitable, or at least that the antagonistic methods which are ordinarily placed in competition with it present fewer advantages and would occasion greater evils. Those methods are two. First, we may give the whole sum required for the national education from the yearly revenue of the country; we may pay what is necessary at once out of the readiest money which comes into our hands, and we may hope and believe that the final result would justify the immediate outlay. But though we may try to hope this, there is no reason whatever to believe it. We should be sure to spend very much money, and we should be nearly sure to get an extremely bad education. The expense of a local outlay from the Imperial revenue has always been an object of dread and apprehension to the Chancellor of the Exchequer as far back as financial tradition extends. He has always had a dread of defraying the special wants of a district in any other way than by a special tax on that district; he has always been aware that those wants would increase with what they fed on, if that food were provided from a distance. This has been felt even as to the most definite and palpable of wants—the subsistence of the people. The late Mr Ricardo laid it down amidst general applause, that nothing but the local check of local taxation had prevented the burden of the poor rate from becoming greater than even we, rich as we are, could bear. Much more would this be the case with the most metaphysical, indefinite, impalpable of wants—education,—a want which no two persons will agree in limiting in the same manner,—a want which is in reality vague and infinite. We might spend untold millions from the Imperial revenue, and yet be told after all that the nation was not educated; that it was only half educated; that we had spoiled the coarse natural man, but had not produced the refined and cultivated man; that we had spent our money with no result, or with a poor result, and, as the most eloquent of our opponents would be sure to say, with a pernicious result. And in all probability we should not have achieved anything very beneficial. A delicate, diffused, undetectable, or nearly undetectable quality, such as the education of a people, peculiarly requires local care, local energy, and local superintendence. Unless you interest the persons on the spot in the work to be done on the spot, the funds which are sent from London will be wasted, and the superintendence of London will be unavailing. No one, indeed, proposes to exempt the locality from some peculiar burden, some peculiar responsibility in the matter of its own education; the cost of doing so would be too extravagant.

On the other hand, we showed the week before last that a compulsory taxation of each district by itself for the purpose of its own education would not answer the end desired, but that, on the contrary, we should in that case have the minimum of education which it would be possible to imagine or to endure. Half of the rate-payers do not know in the least what education is—certainly do not know what a good education is; no small part of them do not in their inmost thoughts and real hearts in the least care what it is;—but they all know what a rate is. The plan of supporting education by a parochial rate may be defined as a plan for directing a class of people, who are very keen as to money, by an Act of Parliament to spend that money on what they do not care for, do not appreciate, and would decidedly rather not have. The precise object of the plan being that *these* people shall [illegible] *how much* money is to be paid, we need not any further [illegible] *merits.*

There is a further objection to any scheme of parochial rating—the religious objection. It has happened that the principal force which has prevented the adoption of a systematic plan of popular education in the country has been religious zeal, and the principal force which has provided a substitute for any such plan has been religious zeal also. Half a dozen great schemes of popular education have been proposed in England: we have now got tired of proposing any. They have been foiled from a single cause—from the consistent indisposition of the great bulk of the English people to any plan which would either omit religion from education altogether, or would merge disputed points in a vague, a general, and an undefined teaching of it. The ineradicable belief of the English people is, that the education of their children should be founded on the distinct inculcation of the precise religion which they themselves believe. They will sacrifice all other parts of education to obtain that; they will consent to no plan which does not provide that. This unalterable, irremoveable conviction has prevented the adoption of any uniform system of national education,—of every such system as France has or Prussia has. On the other hand, it has created the education which now exists. The local subscribers, the local managers, whom the Privy Council have aided by their grants, have, speaking broadly and generally, been stimulated not so much by a secular motive as by a religious motive. They have been more anxious to diffuse the belief and the understanding of certain religious convictions, than to aid people in getting on in this world,—than to give them information which might be useful in the management of their bodies,—than to give them intellectual tastes which might restrain them from gross vice,—than to give them an intellectual taste for truth itself. The motive of our educators (it is written on every line of our system of education, and we are far from saying that it is a reproach,) is not the diffusion of mere knowledge, but the spread of that which the inculcators believe to be the religious truth. The first result of this denominational zeal is the impossibility of any parochial system, of any truly *local* system of education. A parish would not endure to see its money distributed among all the religious sects composing it; it would not endure to see religion omitted from school teaching; it would in a vast multitude of cases not endure that the religion of one sect should be taught to the exclusion of the religion of all other sects. The parish would split into sectarian divisions, intensified by the narrowness of the locality and by the keen bitterness of controversial animosity: no money would be voted: education would become impossible.

But how, it will be asked, do the Commissioners propose to evade these difficulties? They have proposed an intermediate plan which they think is exempt from the difficulties either of the parochial system or of the existing system. It is in its essence and apart from incidental technicalities this:—They would retain the present system in its main essentials, and supplement it by a grant from the county rate. They propose that there should be County Boards of education, composed mainly of the magistrates for the county—a committee of quarter sessions, in a word, with a slight addition,—and that these Boards should have power to appoint examiners of schools, to pay to every clean and well-ventilated school, to every school in fact in good *physical* condition, a certain rate per head for every child who attends that school. The Commissioners hope that as the County Boards are in some sense local authorities, they will have the watching power and superintending efficiency of local authorities: they hope that as their power extends over a considerable area they will be exempt from the narrowness of sectarian zeal: they are confident that as they are composed of gentlemen they will be exempt from the ignorance and the incompetence of purely parochial authorities: they wish to give us the economy of a local system without its evils, and the benefits of a general system without its costliness.

It is truer to say that the Commissioners' scheme would be as dear as a national scheme and as bad as a local scheme. The County Boards would have no motive to be economical, and no means of being economical which the Committee of the Privy Council does not possess and does not feel. A county is an historical aggregate, and it may be a Parliamentary constituency. But there is no magic in either of these peculiarities; there is nothing in either of them which

will enable county magistrates to scrutinise distant parishes, to check peculation in outlying schools, to discourage unintelligent zeal, to develop and encourage intelligent economy. Under a truly parochial system there is the reasonable hope of a preservative check: the spenders are spending their own money: the economisers are economising their own money: but no county magistrate would ever feel his income diminished by the excess of educational expenditure in a distant parish; he would not be able to realise the proportion of his income so abstracted from him; he would never be conscious of it and never regret it.

As a special instrument for providing an adequate supplement to the shortcomings of the present plan, the Commissioners' plan is, therefore, an evident failure. It does not reserve for poor and apathetic parishes any help which the Committee of the Privy Council could not give. They have no means of checking any waste of money which the Privy Council has not now. If the mode of paying schools in proportion to the attendance be good, let the Council do it; if it be bad, do not let the County Board do it. If it tend to lavish outlay in the one case, it will do so in the other. Whether the money to be lavished comes from the county rate or from the national revenue is a minor peculiarity; though of the two, it is better that all the wealth of the country should equally contribute to it, than that it should be thrown by arbitrary selection exclusively on the possessors of a single kind of property.

The plan, too, of the Commissioners has other evils. A county, though too large an area for economical watchfulness, is not too large an area for religious controversy. We might say without offence that it is small enough to encourage local busy-bodies, and large enough to confer on those busy-bodies a diffused reputation. Countless, so called, but badly called, *religious* squables would be brought before an accessible committee of neighbouring squires, which would never venture before an impassive "Council" in a distant metropolis. The Privy Council Office, too, has served a long apprenticeship in dealing with those delicate topics: it has acknowledged rules of action,—a recognised series of precedents. In place of these we should have conflicting decisions, which would fluctuate and differ in different counties, according to the varying dispositions, the latent prejudices, or the overt beliefs of various country justices.

And the apparent temptation to the plan of County Boards is not a very satisfactory one. The Commissioners naturally like the idea of the local gentry voting the expense of the local education. But it is to be remembered that the county rate is one of the oddest of English imposts. It is, in fact, an arbitrary assessment by a committee of squires over the real property of a whole county. Confined in its objects as the county rate now is, regulated by public opinion and local watchfulness as this arbitrary power now is, in practice it works well, though in theory it is questionable. But if it cease to be so confined; if, instead of being watched over by local scrutiny, it should be opposed by local passion, we should fear for the result. The county rate is levied now exclusively for unexciting objects of no popular interest; but education is an exciting subject; religious zeal, religious conviction, religious prejudice, touch it on every side. A county rate for such an object might become an object of very eager discussion. Could a County Board endure that discussion? Would it not be weakened by the inevitable unpopularity of a despotic assessment? Should we not hear many cries from the rate-payers that taxation and representation must go together? Although we think it very improbable that the recommendation of the Education Commissioners would in the least improve our national education, we are inclined to believe that it might probably destroy the financial structure of our county society. The Commissioners would not secure anything which they avowedly wish; but they would probably ruin something which they evidently admire.

GRAND TRUNK RAILWAY OF CANADA.

MEASURES OF RECOVERY AND REORGANISATION.

At the end of this article we insert the scheme of reorganisation which has just been promulgated to the bond and shareholders and the public, in a Second Report dated 9 July, inst., by the Select Committee appointed at the large meeting at the London Tavern of 2 January last. Of that Select Committee, Mr Crawford, M.P. for the City, and Mr Newmarch, have acted as chairman and deputy-chairman. As far as we can learn, the scheme has been well received by the parties concerned in the line and by the public, and is likely, therefore, to receive the hearty assent of the meeting to be held on the 19th inst., for the purpose of considering it. There seems, therefore, to be at length some definite likelihood that the 15 millions sterling of capital spent upon the Grand Trunk Railway since 1853 will begin to yield results in some sense solid and satisfactory.

The scheme of the Committee rests upon four bases, viz.:—(1) Thorough equipment of the line according to, but not beyond, present necessities. (2) A temporary concession by all parties for the five years 1862-66 of some part of their annual claims, so as to enable the concern fairly to establish itself in public confidence. (3) Large and fundamental changes in the constitution of the Company, intended to bring English public opinion effectually into play, as regards its results and management, by removing the domicile of the Company from Canada to London, establishing the supreme audit in London, and conferring votes upon a considerable portion of the bondholders; and (4) an immediate and radical change in the local management of the Company in Canada, by replacing the Board of Directors at Montreal by a Delegated Commission of three persons, one of which should attend in person each half-yearly meeting held in London.

It may seem to some persons that these measures amount to a revolutionary remedy of the most extreme kind, and, therefore, of very doubtful prudence; but this opinion, although natural perhaps upon a first hearing of the case, will scarcely be retained when the full gravity of the crisis is understood. The urgent liabilities of the Company consist of three parts—first, a sum of 500,000*l* is required to equip the line with sidings, improved stations, wharfs, weighing apparatus, grain "elevators," and more rolling stock; and with a track reasonably repaired in one or two of the sections where defects exist. In the second place, a sum of nearly 2½ millions is required to pay off judgment, simple contract, and other floating creditors; and in the third place, at the close of 1861 a sum of, say, 700,000*l* will be due for arrears of unpaid rents of leased lines and unpaid interest on debentures. With an accumulation of liabilities like these, and with a large constituency of bond and shareholders suffering from the suspension of all returns whatever upon their investments, the Select Committee will hardly be blamed for coming forward with a scheme of relief so vigorously framed that it must produce a decisive effect. Upon this point they use very plain language. They say at page 18 of their Report: "The Committee are fully "convinced that in the crisis at which the affairs of the "Company have now arrived, it would have been unjustifiable conduct on their part if they had brought before "their constituents any plan which did not in its scope and "outline present *complete and effective* means by which the "financial embarrassments, the legal confusions, and the defective management of the concern may be removed, terminated, and improved." And they add that "any scheme "contemplating *no more than mere pecuniary relief* would be "mistaken and delusive."

The Committee rest the financial part of their plan on three proposals, viz.:—(1) that the 500,000*l* required for equipment, and required therefore *wholly* for the purpose of earning more revenue for the benefit of every order of encumbrancers, shall be raised in England on the principle of the Drainage Acts, now so well understood and so popular,—that is to say that the money so raised shall constitute an absolutely prior charge, and come *before* all existing engagements and liabilities:—(2) the 2½ millions of floating debts shall be dealt with by applying to the Canadian Government to capitalise at 1½ millions cash, for 25 or 30 years, the annual sums payable to the line for postal and military conveyance—the 1½ millions cash advanced to be applied in paying a present cash dividend of 10s in the pound on the floating debts—the remaining 10s being satisfied by a creation of preference stock:—and (3) the 700,000*l* of arrears of rents and interest at the end of 1861 to be funded and added to the principal of the securities.

In the event of the scheme as a whole being accepted by the bond and shareholders, it seems to be probable that the equipment half million will be taken in this country.

funding of arrears also may be assumed as likely to be agreed to. There remains only the application to be made to Canada to capitalise the postal subsidy for 1½ millions; and this is a point which cannot at present be positively ascertained. The Committee have concurred in sending over to Canada, as a negotiator, Mr Watkin, of the Manchester and Sheffield Railway, and perhaps no better person could have been chosen for the purpose. On the whole, it seems to be a reasonable assumption that Canada, in exchange for so complete a measure of reform in the administration of its main line of railway, will even on the narrow grounds of immediate financial gain, be well disposed to entertain favourably the scheme of capitalisation. The interest of the 1½ millions would be no more than, if so much as, the annual cost of the postal service, and some provision may be made for a sinking fund to be available at the end of the 25 or 30 years.

For the five years 1862-66, the Committee have reduced the annual charges for lease rents and bond interest to, say, 360,000*l*. They very prudently abstain from committing themselves to any estimate or figures of the probable annual net earnings of these five years. But they point out, as they are fully justified in doing, that the financial results of the *last* five years cannot be regarded as any measure of the five years to come. The five years 1857-61 have been in every respect years of suffering, experiment, and difficulty for the *Grand Trunk* in Canada. Financial embarrassment, a line partially open, the Victoria Bridge unfinished, the management unsettled, and the nature of a new traffic to be discovered,—have all conspired with commercial crises and deficient harvests to render success almost impossible. The future career of the Committee will start from a new point, and with a fund of experience bought at a prodigious price; and unless commercial rules and maxims have in this instance wholly lost their efficacy, we cannot resist the conclusion that the future results must be far more favourable than the results hitherto obtained.

Looking back at the origin of the difficulties of the *Grand Trunk*, it is perfectly plain that from the very outset of the Company, early in 1853, three fundamental errors were committed:—first, the provincial contribution of three millions to a line of 1,100 miles ought to have been seven or eight millions:—second, the amount of bonds and shares *bonâ fide* taken in the Province was absurdly small,—so small indeed that there has never been a body of persons in Canada sufficiently numerous and sufficiently involved in the line to exercise a real supervisioe over it:—third, it ought to have been an express stipulation that all materials and stores imported into Canada for the purposes of constructing the Railway should be admitted free of Customs duty.

It is not inopportune to insist upon these oversights, for just now an effort is being made to raise funds here for a line from Halifax (in Nova Scotia) to Quebec,—a line in itself most desirable,—but a line which, apart from the most careful and stringent stipulations in defence of English subscribers, will never pay back a single sixpence of any money they may embark in it.

The following are the extracts from the Committee's Report setting forth the principles and outline of the scheme of reorganisation:—

PRINCIPLES OF PRESENT ADJUSTMENT.

1. To adopt *the five years*, 1st January, 1862, to 31st December, 1866, as the period of all concessions, on the ground that in all probability *five years* will so largely develop the line and the country it supplies as to leave few, if any, difficulties at the end of the period.

2. To call upon *every class of claimants* and creditors to make present concessions to continue for these five years.

3. To regard the, say 500,000*l* sterling cash required for equipment, sidings, elevators, stations, wharfage, and rolling stock, and required therefore *wholly* to earn more revenue, as a charge to be FIRST, and *next* after ordinary working expenses, and to stand therefore *before* leases and all other obligations.

4. To regard the entire present and augmented *postal and military subsidy* as the means by which relief is to be sought from the Canada Government.

5. To consider that it is politic and necessary for *all* the claimants on the line to agree among themselves as regards a definite plan of relief, to be addressed to the *new* Canadian Parliament.

6. To consider that such definite plan must be based on four principles, viz.:—(*a.*) The raising *in England* of 500,000*l* to equip the line. (*b.*) A scheme of general concession for the five years, 1862-66. (*c.*) A plan of reformed and efficient management; and (*d.*) a consolidation, in the simplest form, of all the statutes and legal technicalities affecting the line.

7. To consider that such a scheme may be best brought before the share and bondholders, and the public, by means of a second report of a Select Committee of share and bondholders appointed on 2nd January last.

Guided by these principles of adjustment, the Committee have framed the following:—

OUTLINE OF PLAN OF REORGANISATION AND RELIEF NOW RECOMMENDED TO ALL THE CLAIMANTS ON THE COMPANY.

8. That 500,000*l* be raised *in England* at 5 or 6 per cent., for equipment, to be called an "Equipment Mortgage;" the debentures to be for, say, ten or fifteen years; the interest to be payable half-yearly, *in London*, in sterling money, and to be a charge *before* the leases, and next after working expenses; stringent provisions to be made for remitting *at short periods* to credit of a separate account in London, a sum which will fully provide the interest due at the end of each half-year. The Equipment Mortgage Bonds to be offered in the first instance to present bondholders in the line.

[Immediate measures, if possible, to be taken, so as to provide more stock for the traffic of the coming Autumn of 1861.]

9. The *lease rents* of the *Atlantic and St Lawrence line* to be reduced to 5 *per cent. per annum* for the next five years: and as regards the *Detroit and Sarnia* lease, a special reference to be made to the person to be placed in temporary charge of the Company in Canada with a view to the adoption of some mutually equitable and satisfactory arrangement.

10. The *Preference Bonds* (1st and 2nd) to be reduced to 5 per cent. per annum for the five years, 1862-66; and the holders to have the option of converting the bonds into "*First and Second* "*Priority Stock*," carrying votes—the priority of the *first* over the *second* being preserved.

11. The "*Ordinary Bonds*" to be converted into "Perpetual "Preference Stock," and carry votes.

12. The *ordinary bonds* (or preference stock) to be reduced to 3 per cent. per annum 1862-66, and after 1866 to bear 5 per cent. in *perpetuity*.

The 500,000*l* *ordinary bonds* (due in October, 1862,) to have *priority* over the rest of the *ordinary bonds* (or preference stock, as provided for in section 11), and to bear 4 per cent. per annum 1862-66.

13. The dividends on "Share Capital" to be also subject to the same reductions in 1862-66 as the ordinary bonds or stock (section 12).

In the event of the available earning of the line in any year before the close of 1866 being more than sufficient to meet the rents and payments of interest and dividends authorised by this scheme, the surplus shall be applied towards providing for the liquidation of the 500,000*l* equipment mortgage (section 8).

14. All arrears of interest on *preference and ordinary bonds*, to end of 1861, to be capitalised in bonds or stock of the respective classes; but the bonds or stock for such capitalised arrears *shall not begin* to bear interest till 1st January, 1865, when, for the two years 1865-66, the rate shall be 3 per cent. per annum.

All arrears of interest on *debts*, to end of 1861, to be capitalised in preference stock (sec. 11) and to *begin* to bear interest at the time and at the rate just stated. All arrears of *rents* of the *Atlantic and St Lawrence Railway*, to end of 1861, to be funded and added to the capital of the lease, bearing 5 per cent. per annum in the five years 1862-66.

If arrears of interest accrue during the five years 1862-66, to be funded, *at end of each year*, in bonds or stock of the respective classes, so as to enable holders to possess a negotiable security in exchange for arrears due to them.

15. The legal domicile of the Company to be *in London*, and the supreme Board and Audit to be also in London.

16. The Company in Canada to be managed by a "Delegated Commission" of three persons—the nomination of one of these persons to be offered to the Canada Government, one to be suggested to the London Board by the first-standing bondholders, and a third similarly to be suggested by the preference and ordinary stockholders. One of these two last-named persons to hold the office of auditor and treasurer, and to be specially charged with the duty of ensuring the regular remittance of revenue to London. A weekly statement of *working expenses*, as well as traffic, to be published.

17. Each half-yearly meeting in London to be attended by one of such delegated Commissioners, and the form of the half-yearly published accounts to be assimilated to the best examples among the English companies.

18. A Consolidation Bill to be carefully prepared in London for submission to the Canadian Parliament, and to contain provisions clearly defining the interests of the different classes of claimants, so as to prevent future uncertainty and litigation.

19. Subject to the adoption of this scheme, all legal proceedings in Canada, of all kinds, to be stopped, and remain in *statu quo*, and efficient measures of defence to be taken against harassing local litigation, until the fate of the plan be finally ascertained.

20. Judgment and simple contract creditors to accept a dividend of not less than ten shillings in the pound in cash on the

principal of their debts, taking the balance of the debts in the form hereinafter described in section 22.

The foregoing stipulations set forth the concessions to be made by the bond and shareholders in the line, and by its creditors. In consideration of these concessions, the following application to be made to the Canada Government:—

21. The Canadian Government to be applied to, to advance at once to the Grand Trunk Company, in Province Bonds bearing 5 per cent. per annum payable in London, and for a term of, say, 25 or 30 years, a sum of *one and a half millions sterling*—such *one and a half millions* to be the capitalised payment for the 25 or 30 years of the total annual amounts to be due to the Company for postal and military subsidy—reasonable provision being, of course, made for the imposition of limits as regards the extent of service to be required by the Province.

22. Out of the proceeds of these one and a half millions the judgment and simple contract creditors to be paid a present cash dividend of not less than ten shillings in the pound, as mentioned in section 20, giving up any bonds, &c., at present held as collateral security. The balance of such debts to be funded in a stock to take rank after the preference bonds (1st and 2d), and after the 500,000*l* bonds, due in October, 1862, and to form a *pari passu* part of the *ordinary bond* (*or preference stock*, section 11) *debt*, and bearing therefore 3 per cent. per annum for the next five years, 1862-66.

Agriculture.

WOOL AND MUTTON.

SHEEP, as objects of agricultural enterprise in this country, are every day becoming of greater importance, both for the sake of the fleece and the carcase. Draining is year by year extending the area upon which sheep may be profitably kept, while the climate of the United Kingdom will always secure for the native farmers a superiority in certain classes of wool over all their competitors. The quantities of wool exported from this country are increasing, and with the progress of free trade on the Continent must continue still further to increase. From the Board of Trade returns for five months to 31st May, 1860, it appears that 41,751,513 lbs of foreign and colonial wool were imported, of which 9,605,525 lbs were again exported. During the corresponding period ending 31st May of the present year, 39,579,629 lbs of foreign and colonial wool were imported, of which no less than 16,250,117 lbs were re-exported. This shows that there must have been a considerably less quantity retained for home consumption in 1861 as compared with 1860, which is no doubt to be accounted for by the various causes which of late have affected our commerce and manufactures. These will be only temporary. The point we would direct attention to is the greatly increased export of native wool from this country, and to the way in which the British farmer will be thereby affected. Now, besides the increased export of colonial and foreign wool, there was a vast increase in the export of British wool. For the five months ending 31st May, 1860, the export of British wool was 3,148,123 lbs; and during the same period 1861, 5,488,904 lbs, or nearly double the quantity, were exported.

Now it is a question of some interest to the English flockmaster what are the kinds of wool for which such a rapidly advancing demand exists. In this connection a paper lately read by Mr Caird, M.P., at a Council meeting of the Royal Agricultural Society of England, affords suggestions of much value. Mr Caird mentioned the vastly increased imports of wool during the last twenty years—*i.e.*, from 45 millions of lbs in 1842, to 133 millions of lbs in 1859; and our Australian and African colonies and the East Indies show a vast increase, while from Spain and Germany, the original sources of fine wools, there has been during the same period a great diminution. Yet the home-grown wools have also greatly increased; according to Mr Caird's estimate, from 100 millions lbs to 120 millions. In 1859, 6,000,000 lbs British and 12,000,000 lbs colonial wool were taken by France alone.

But the practical point to which he directed attention was "the change which has taken place in the relative prices of the different kinds of wool, and the importance of the knowledge of this to the British farmer." The softer and finer wools come in great perfection from Australia, the East Indies, South Africa, and South America, and besides the unlimited capacity for additional supplies which there exists, the British farmer can never compete with the flockmasters of those regions in the production of fine wool. But the wools now most in demand are "lustrous long wools," and nowhere are such wools produced in so large quantities and so good as in the British Isles. This sort of wool comes from the Cotswold and the Lincoln, and their crosses, and is known as "long combing wool." Formerly, Down and Cheviot wools were worth two or three times as much as the long wools, but now Lincoln long wool is dearer than that from the short-woolled breeds. This arises partly from the foreign demand for long wool; but still more from the changes which have taken place in our own clothing. "The two kinds of wool," says Mr Caird, "are used in the manufacture of different classes of goods. Coburgs (this is information that I received from an eminent manufacturer in Yorkshire, having no personal acquaintance with the subject myself) are made from Australian, merino, Down, and other fine short wools, of which there is a constantly increasing supply. Orleans and alpacas are made from the lustrous long wools, for which there is a constantly increasing demand, and a limited area of supply. In the short fine wools there is no lustre whatever; in the long wool, lustre is a most important quality. Alpaca and mohair are introduced to a slight extent to produce lustre in the cloth; but as the supply of that description of wool is only two per cent. of the whole import, it will be obvious how little that will affect the price of home-made lustrous wools. There is a great and increasing demand for Orleans and mixed alpacas, and of lustrous goods in which the object is not merely fineness to the touch, but a lustrous appearance. Besides the British demand, there is an increasing French demand both for that kind of wool and for the goods manufactured from it. The French manufacturers already take the most of the long, lustrous wool of Ireland." The practical conclusion he deduced was "that the British wool-grower should develop as much as possible that kind of wool which is least subject to foreign and colonial competition, and for the production of which he fortunately possesses both the most suitable soil and climate, and the supply of which can be best increased by good farming, liberal feeding, and with a large frame of mutton, as well as a heavy fleece of wool." Lincoln and Leicester sheep, he said, combine in the greatest degree the qualities of length, lustre, strength, and fineness.

But it is not in all parts of England that the long-woolled sheep can be kept with advantage. They require a full supply of succulent food, and they must be continually well kept, for it is found that if sheep are at any time short of food their wool will at once indicate it. Thus, Colonel Macdougal stated, as a well-known fact, "that if you feed the animal pretty well as a lamb, and then at any period of its life by accident it is stopped from feeding, the wool immediately shows it and becomes deteriorated; it breaks in the manufacture."

Mr Fisher Hobbs, whose experience as an agriculturist, as a judge at stock shows both in England and France, is equal to that of any man of the present day, said that in early life he lived in Leicestershire, and became well acquainted with the long-woolled sheep of that district. After that he lived close to the late Lord Western, who made many experiments in reference to various breeds of sheep, and "who," says Mr Hobbs, "had his merino flock, his cross-bred merino, Cotswold, and other breeds. I had at that time a flock of Southdowns in the neighbourhood, and also a flock of pure Dishley Leicesters. We tried various crosses in various ways—housing them, keeping them in yards, and grazing on arable land—and I think we came to the conclusion that all the different breeds and crosses required special treatment. But the one thing which particularly controlled them was climate. I think we are apt to run from one part of England to another for this breed and that breed, without taking climate into consideration. I once went to a great expense to get a good flock of pure Leicesters, and I found, after a few years, that the fleeces had quite altered their character. Instead of being of an open curly nature, and partaking of the lustre which which was not so fashionable at that time as it is now, they assumed a closer texture, assimilating to the character of Southdown. I at once offered to have experiments upon a portion of my flock that should be kept as pure Leicesters, and that in seven years these pure Leicesters should produce one hundred fleeces of wool that should be by the same treatment, and selecting rams with wool of a close character, go into the market and be equal to an average lot of Southdown fleeces. I found that my Leicester flock at first had a heavy fleece, of curly, lustrous character; but in the course of a year or two I found that those curls had more the character of hair, and the fleeces were the lightest I ever had."

The Southdowns and their crosses are thus best suited for the light lands where sheep are travelled long distances for folding; though we may observe that on the Yorkshire and Lincolnshire wolds long-woolled sheep are almost universal. And Mr Hobbs mentioned that the flockmasters who keep Southdowns, as well as the woolstaplers, are anxious to increase the length of the Southdown wool. He also recommends better feeding for sheep in the spring of the year: "Nothing would pay the flockmaster better than feeding the sheep in the spring of the year with generous food, especially with oilcake," but then he must keep on with the oilcake till after clipping, or the wool will tell of it.

In reference to this subject, the dispersion by final sale of Mr Jonas Webb's (of Babraham) Southdown flock, which took place on Monday last, is of some interest. They were sold to all parts of the world. In all 968 sheep were sold; 99 two-year-old and aged rams fetched 3,052*l* 7*s*, 110 shearling rams realised 2,710*l* 1*s*, 199 shearling ewes made 2,113*l* 19*s*, 105 two-year-old ewes were sold for 813*l* 15*s*, and 455 older ewes realised 2,142*l*. The total produce of the sale was 10,922*l*, averaging 11*l* 5*s* 8*d* each. Mr Hudson, of Castle Acre, Norfolk, gave 260 guineas for one ram, and Sir Thomas Lennard bought five yearling ewes for 170 guineas—34 guineas each. This is probably the culminating sale of Southdowns, and Mr Webb is perhaps aware that other kinds are likely henceforth to prove more profitable.

THE BANK ACT OF 1844. Free Trade in Gold not Incompatible with our Standard of Value, and the True Remedy for Ruinous Fluctuations in Prices and in the Bank Rate of Discount. By HENRY BROOKES, late Editor and Proprietor of the "Bankers' Circular." Effingham Wilson, Royal Exchange.

MR BROOKES has added another to the not very useful class of speculative pamphlets on the subject of the currency. After the discussion which this subject has undergone, a new treatment of it, if it is to be useful, must have extraordinary merit, and this Mr Brookes's treatment of it does not possess. His system is as follows:—

We propose, therefore, whilst maintaining the law which compels the purchase of all gold *at* 3*l* 17s 9d, to abolish the law which virtually prohibits its purchase above that price, and so to re-establish in this country a real market and a market price for gold at 3*l* 17s 9d and upwards.

We do not propose to make the slighest change in the standard itself, but inasmuch as that standard, being essentially composed of a saleable commodity, is not, and never can become perfect, we propose to supplement, or aid it by a "gold note," or "bullion note," which shall always represent gold at 3*l* 17s 10½d per ounce, neither more nor less, whatever may be the price of gold in our own or other markets.

This bullion note representing gold at 3*l* 17s 10½d would in fact becomd the representative of our standard of value; and inasmuch as it coul) never rise or fall, or vary in value (as does the gold on which it is based, it would constitute the absolutely fixed and perfect standard, which has hitherto been so much and so long desiderated, and in vain. It would be of exactly the same value as the present sovereign, the present bank note, and the present twenty shillings in silver, therefore would produce no alteration whatever in prices.

It is proposed that the bullion note shall be issued by the Mint (as after mentioned), that the Bank of England notes shall be called in and cancelled, and that the bullion notes shall supersede or replace them in the circulation.

At the present time the sovereign, the bank note, and in fact all our currency represent value measured by gold at 3*l* 17s 10½d, and under the proposed change the bullion note and all the currency in the realm will continue to represent the same value precisely, with the single exception of the gold coin, and that coin will be an exception, only at those times when the market price of gold happens to rise materially *above* the Mint price, and then for that time only the gold coin may bear a premium. This would be the only inconvenience (if inconvenience it should involve, which the public would be subjected to, in order to accomplish a change) which it is not too much to say, may effect the saving of capital and labour, now wasted, to the extent of many millions a year, and which will affect beneficially the interests of every man, woman, and child in the realm.

REMARKS ON BANKRUPTCY RELIEF AND ITS ABUSES, in Two Letters to the Rt. Hon. Lord Brougham and Vaux, on the Bankruptcy Bill, now pending, June, 1861. Reprinted from the "County Courts Chronicle" for May and June, 1861. By ARTHUR JAMES JOHNES, Esq., Judge of the Midland Wales County Courts. James Wildy, London.

MR JOHNES has here brought together in a concise and distinct form the results of his experience as a County Court Judge in Bankruptcy and Insolvency, which are exceedingly valuable just now when it is proposed to extend most of the peculiarities of Bankruptcy to every species of Insolvency.

GENERAL LITERATURE.

TEN WEEKS IN JAPAN. By GEORGE SMITH, D.D., Bishop of Victoria (Hong Kong). London: Longmans. 1861.

THIS is a very timely and interesting work, from a competent and careful hand. Dr Smith's previous residence in China put him at considerable advantage in judging of the neighbouring Empire of Japan, and his personal observations (which he frequently compares with those of previous travellers, in whose works he appears to be well versed) have every appearance of being reliable. His visit was made in the summer of 1860, five weeks of his stay being spent at Nagasaki, the chief Southern port, and a shorter period at Yeddo, the secular capital of Japan. Of the physical characteristics of the country he speaks with great admiration, and presents a very attractive picture of its steep volcanic mountains and fertile valleys, its magnificent trees, its various and abundant crops, its luxuriant gardens and blossoming hedges, where the floras of the temperate and the torrid zones seem mingled together. "The soil, favoured with a genial temperature and watered by frequent showers of fertilising rain," is so fruitful that "an endless and uninterrupted succession of cereal crops seems to produce no prejudicial effects" on it; and the climate is wholesome, even for Europeans.

Of the natives and their peculiar civilisation, Dr Smith gives a very full account. There is something which irresistibly attracts our interest in the sight of a social system which has held its place in the world so long, and has such undoubted claim to be ranked as a system of real civilisation, and which yet is so entirely different from our own, and which has for the last two hundred years kept the whole Christian world at arms' length. Dr Smith thinks that this exclusion of foreigners originated in political, rather than in religious fears, and he points out that it is a comparatively modern policy on the part of the Japanese, who previously mixed freely with other nations. At present, the common people seem to be mostly very well disposed to us, and the obstructions to free intercourse and trade all come from the influence exercised by the large party of conservatives among the Daimios, or territorial princes. These Daimios (of whom there are 264) are the ancient aristocracy of the empire, and enjoy a considerable amount of independent power; and Dr Smith states that the conservative party among them "vainly endeavoured to prevent the conclusion of a treaty with foreign powers by reviving the old prerogative of the spiritual Emperor, and by endeavouring to procure a veto upon the acts of the secular Emperor and his council from the sacred city of Miako." Their intrigue proved ineffectual, but their power is evidently still formidable. Unfortunately, there is no influential middle class between the landowners and the lower orders. "Traders and merchants, however prosperous and wealthy, occupy one of the lowest steps in the social scale, and stand some degrees beneath artisans, carpenters, and stonemasons in popular estimation." Dr Smith adds that "it is probably this feeling which leads them to underrate the importance of commercial privileges and to misunderstand the policy of European nations in seeking new outlets for our trade." One fact should be named here, which outweighs many deficiencies in social development, viz., that there appears to be no class of prædial serfs attached to the soil and capable of being transferred by sale. "The nearest resemblance to a servile caste is to be found in the existence of bondmen who from poverty or debt have sold themselves into a temporary period of apprenticeship."

There is a systematic character in the Japanese civilisation which commands respect. All the distances in the empire are computed from a bridge in the capital city of Yeddo, and are marked by mile-stones at intervals (called *ri*) of 2½ English miles. A strict system of registration prevails throughout the country, births and deaths being punctually recorded, and a register of the inhabitants of every street being entered upon a record kept at the principal municipal office of each district. With respect to the administration of justice, it is usually severe, but seems to be watchful and active. "The *law* is obeyed, and extends equal protection to all;" and Dr Smith is of opinion "that Japan enjoys the pre-eminence of possessing one of the most efficient Governments for the repression of crime throughout the pagan world." On the other hand, the universal employment of Government espionage is a dark blot against the character of both rulers and people, and detracts from the manliness which our traveller describes as usually distinguishing the Japanese.

The relations of this island empire to the neighbouring empire of China naturally occupied a good deal of Dr Smith's attention. He says that "not the slightest similiarity exists between the spoken languages of the Japanese and the Chinese. Their physiognomy and their speech alike prove them to belong to widely-differing branches of the human family." Nevertheless, Japan has "borrowed spontaneously, and without the compulsory pressure of a conquering race, not only the written symbols of the Chinese character, but also the whole circle of Chinese Confucian literature, and at a more recent period the whole of the Chinese national authorised Lexicon of the Emperor Kanghe, with all the elaborateness, difficulty, and almost infinite variety of this newly-imported written language of her continental Asiatic neighbour. At the present time the Chinese classics have supplanted every pre-existing mode of writing and national type of thought, as the foundation of their literature and the basis of their system of ethics," and "Chinese terms are to the Japanese language what Greek and Latin words are to modern English—the roots of all scientific terms and the basis of all technical phraseology." In moral character, Dr Smith decidedly gives the preference to the Japanese. The position of women, he says, is certainly superior in Japan to what it is in China. "The ideas which prevail among the Chinese of the misfortune of having female children do not seem to exist among this people," whose daughters "appear to receive an equal amount of paternal care and attention with that bestowed on their male offspring." The Buddhist priests are taken from a relatively higher social class in Japan than in China, and command more respect. The national religious services are not left to female devotion alone, but have a large proportionate interest for the men, who "appear generally exempt from that insincere, heartless, and unimpressible scepticism which prevails in China." It must not, however, be supposed that Dr Smith regards Japan as a sort of paradise of innocence and purity; far from it. He says that the intemperance (though far less than that of England) exceeds that of most Asiatic countries, and that licentiousness prevails to a fearful amount, "slaying its tens of thousands," and that it appears to be rather encouraged by governmental arrangements. On the whole, the character of the people, both for good and evil, seems to be less Oriental than that of most Asiatic races, and to approach, in several directions, the virtues and vices of the West. Their very hatred of Christianity is that of vigorous natures, whose opposition is more welcome than passive receptivity, as indicating far deeper capacity. Dr Smith communicates a remarkable fact on this subject, which was reported to him "by some foreign gentlemen fully competent by their official standing and personal opportunities of observation to

authenticate their statement," viz., that in the city of Ao-yama "there are now in existence a hundred families congregated in one spot and dwelling by themselves, the descendants of a hundred native Christians," who, during the persecution of 200 years ago, "had renounced the Christian faith, and had their lives spared on condition that they and their descendants in all time should retain a knowledge of the abjured religion in order to qualify themselves to act in every age as a body of religious detectives and inquisitors for discovering and destroying the hated and proscribed sect. Supported by the Emperor and released from all other labour for their subsistence, they form a separate body even to the present time, and receive a daily payment of five rations of rice for each family from the imperial treasury." This sounds almost incredible, but Dr Smith evidently believes it, and he may be right in trusting the evidence he heard. One curious fact he gives, on which no doubt can rest, and which strikingly illustrates the repugnance felt in that quarter of the globe to European ideas. In the year 1850, Dr Smith, calling at Loo-choo on a sailing trip, happened to be confined for a day or two by temporary indisposition to his lodging, at the residence of a solitary missionary at Napa, a medical gentleman named Bettelheim. This circumstance having reached the Loo-chooan authorities, they were greatly alarmed by the fear that the Bishop was going to be left behind by the ship, and the Vice-Governor of the island forthwith despatched a petition to the captain of the "Reynard" to protest against such a proceeding. After enumerating divers reasons which rendered the Loo-chooans unable or indisposed to trade with any foreigners except the people of Tuchara (in Japan), he comes to the question of religion, as follows:—

Now as to the religion of the Lord of Heaven (the popular term by which Christianity, or rather the Roman Catholic form of Christianity, has been known), we have from ancient times attended to the doctrines of Confucius, and found therein principles wherewith to cultivate personal morality and to regulate our families, each according to our circumstances and condition in life. We endeavour also to carry out the government of the country according to the rules and maxims which have been handed down to us by the sages, and are calculated to secure everlasting peace and tranquillity. Besides, our gentry, as well as the common people, are without natural capacity; and although they have attended exclusively to Confucianism, they have as yet been unable to arrive at perfection in it. If they should now also have to study, in addition, the religion of the Lord of Heaven, such an attempt would surpass our ability, and the heart does not incline to it. The people of Tuchara also are attached to the Confucian religion and classics, and bestow great study upon them. Should they hear that we are studying a new religion, viz., that of the Lord of Heaven, they would most certainly desist from all intercourse with us.

This our regular and clear petition, with knocking of heads, we submit to the penetrating investigation of your excellency. Look down in pity on us; cease to send people to remain here; and desist from an attempt to trade with us and to teach us Christianity. Thus the whole country, Government officers and people, will be thankful for ever.

Dr Smith communicates much that is interesting respecting the national religions of Japan, Buddhism and Sintoism. His remarks on religious subjects are occasionally interpolated by passages of conventional clericalism, but his tone in speaking of paganism is uniformly candid and discriminating. If he has not the impassioned zeal of some missionaries, neither has he the obstrusive narrowness of others, and few preachers to the heathen are, we should think, likely to be, on the whole, more serviceable to the interests of Christian civilisation at the present day. His remarks on the dangers which still threaten our relations with Japan are written in an admirable spirit. He points out "the unfortunately true fact" "that Europeans in every part of the world too often carry with them a contemptuous dislike of the aboriginal natives, and demean themselves with the air of a superior and conquering race even in countries where they are strangers barely tolerated by the governing powers and are regarded (sometimes with the semblance of real truth) as inferiors in civilisation." He advises that large powers be vested in the foreign consuls for checking the earliest symptoms of this spirit, and also that the consuls themselves should be very carefully selected for their office.

We will conclude by extracting an account of one of the Bishop's rural excursions in the neighbourhood of Nagasaki:—

There is something exquisitely beautiful and attractive in the appearance of these rural landscapes in Japan,—the green lanes lined with overhanging hedgerows of honeysuckles and flowering shrubs of every variety and hue, the hill-tops covered with fir plantations, the valleys sheltering in their irregularly winding nooks the cottages and homesteads of a peaceful and orderly population, the peasant's hut peeping forth from amid the clustering branches and mantling shade of the gently-waving grove of bamboos, the fields covered with cereal crops, and the light-hearted thrifty villagers engaged in tilling the soil or in the various other pursuits of agricultural labour. The roads over the hills and through the more retired villages are usually of rude and primitive construction, mere causeways of two or three feet in breadth piled with loose stones between the growing crops, or in the more hilly rising ground consisting of deep rut-ways hollowed out by the natural action of the descending mountain torrent. In some parts a regular flight of stone steps helped to relieve the fatigue of the toiling pedestrian. Alternate hill and valley,—deep-shaded ravine and open pathway,—secluded, bare and desolate aspect, and busy merry crowds of peasants,—succeeded each other by turns. Irrigating machines, water-courses, narrow rills bubbling with the turbid stream, and rough implements for thrashing and winnowing grain, were to be seen in the vicinity of their dwellings. There were farm-houses of neat exterior, and public wells with their primitive apparatus for hauling up the water. The prevalent Eastern mechanical contrivance of a swinging beam moving on a pivot and balanced by a heavy attached stone at one end, served to economise labour in raising water, and was a frequent appendage to their gardens. Sometimes a well-wooded avenue of cedars conducted us by a silent and less frequented pathway to a village shrine or some rustic temple consecrated to the popular divinities of the district. The villagers were everywhere well-behaved and respectful, and readily set us right when once or twice we lost our way.

We should add that the volume contains a map of Japan and eight beautiful plates, among which are some very curious portraits and scenes from Japanese interiors.

THE DUBLIN UNIVERSITY MAGAZINE. Hurst and Blackett.
THE ENGLISH WOMAN'S JOURNAL. W. Kent and Co.
THE ST JAMES'S MAGAZINE. W. Kent and Co.

THIS is a fair average number of the "Dublin University Magazine." Many of its articles are good; but none of peculiar merit. The best, perhaps, are those on the "Work-a-day World of France," from which it would seem that French manufactories are not superior to English ones in the accommodation they provide for the working population; a short geological paper, and one on the Irish Poor Law. "A Straightforward Paper," in answer to the "Roundabout Paper" of the last "Cornhill;" "A Saturday Night in the Black Country," and others, are pleasantly written.

"The English Woman's Journal," in pursuit of all that concerns the industrial employments of women, draws attention to the pernicious effects of emerald green in the manufacture of artificial flowers. No woman, we think, would purchase flowers or wreaths adorned with this brilliant and powdery green if she knew the suffering, disease, and premature death its use entails upon the workwomen and children.

The "St James's Magazine" is perhaps a trifle better than usual this month. We scarcely know which is the most extravagant, Mrs S. C. Hall's tale or its illustration. The slight story by the author of "Paul Ferrol," shows but few marks of its writer's genius. "The Plagues of Egypt," a forcible but one-sided picture of Eastern travel, and Mr T. Adolphus Trollope's "France in Italy," are entertaining and well-written articles.

SKETCHING RAMBLES; or, Nature in the Alps and Apennines By AGNES and MARIA E. CATLOW, Authors of "Popular Conchology," "Popular Botany," "Scripture Zoology," &c. Illustrated by Twenty Views, from Sketches by the Authors. 2 Vols. London: James Hogg and Sons.

THESE thick volumes record certain portions of the Miss Catlows' travels in Switzerland and Italy, which appear to have given great pleasure to the narrators, and which may perhaps be interesting to their personal friends. But the book is not marked by any features of general interest which might distinguish it from the vast quantity of similar travels that are constantly appearing before the public. The frequent insertion of historical anecdotes that "every schoolboy knows," and the diffuse fulness of detail concerning every Swiss mountain and Italian church, unrelieved by any originality of mind or piquancy of style in the narrative, make the book very heavy. The best parts of it are the chapters on the "Botany of Switzerland," and on "Animal and Vegetable Life in Italy." The illustrations are in chromo-lithography, and are very graceful and pretty.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

The grand event of the moment in the financial world is the issue of a new batch of railway bonds by Government in virtue of the law of the 23rd of June, 1857. Some years back, when the construction of what is called the secondary network of the French railway system—that is, of lines which are embranchments on, or prolongations of, the great trunk lines—was resolved on, the Government undertook to pay certain subventions to the Companies which were to make those secondary railways. But th

obligation it was incapable of fulfilling, and it therefore obtained authorisation from the Legislative Body to raise the money required by an issue of bonds to be paid off by annual drawings in the space of thirty years. A new instalment of the promised subventions has become due, and, besides, the Government has entered into new engagements to assist in the making of other lines forming what is called the third-rate network. From, however, the lavish manner in which it conducts the public expenditure, it has not the means of paying what falls due this year, and accordingly it has resolved to make a new issue of bonds which are to be redeemed in twenty-eight years. This issue is to consist of 300,000 bonds at 440f, but to be paid off at 500f. It is made directly by the Government at the Public Treasury at Paris, and in the offices of the principal receivers of taxes all over the country. The issue has commenced this day and is to close on the 16th. Subscribers are to pay 40f down, 100f on the 12th October, 100f on the 12th January, 100f on the 12th April, and 100f on the 12th July. The bonds are to bear 4 per cent. interest. The Minister of Finance calculates that by being issued at 440f, they, if paid at once, would be equal to 3 per cent. *rente* at 66f. "But," says he, "the delay in the payment allowed to the subscribers, and the fact that the interest on the bonds is to run from the 20th of the present month, will procure them a marked advantage, which may be estimated at 7f 23c, so that the real price of the bond is reduced to 432f 77c, which is equal to 3 per cent. *rente* at 64f 91c." In addition, the difference between the price at which the bond is issued and that at which it is to be paid off constitutes also a great advantage to the subscriber. On the whole, then, the Minister doubts not that the bonds will be duly subscribed, and doubtless he will not be mistaken. Indeed, as I write, the Ministry of Finance is surrounded by a crowd of people (all, of course, of the lower classes) waiting to offer their money, and a friend who has just come up from the country tells me that the Government is making such vigorous efforts to obtain subscriptions, that even in the meanest villages it has had bills stuck up announcing that the bonds are offered, and that it is compelling the authorities of such villages to point out to the peasants the benefit they will secure by investing their money in them.

But in the financial circles the issue of the bonds is made the subject of grave objection. In the first place, taking into account all the advantages offered, the Government will have to pay for each bond at the rate of 5 per cent. within a fraction; and to borrow money at 5 per cent. is a costly operation in the present state of the money market. In the second place, the bonds constitute a new species of debt,—a terminable one; and the remark is made that France has already debts enough with her consolidated and floating ones. Thirdly, though the issue of the bonds relieves the Government from embarrassment for the present year, it will increase its burdens in following years by the necessity in which it will be placed of raising funds for the paying off of the bonds by means of annual savings. A fourth objection is, that when the Government grants such very favourable terms to subscribers, the railway companies will find great difficulty in raising money on reasonable conditions for the lines they have to execute;—and the amount they have to obtain is, it must be remembered, considerably greater than the subventions the Government has to pay. Lastly, it is said, and not without reason, that the creation of the new class of security will tend to discourage investments in the ordinary 3 per cent. *rente*, and that therefore a decline in the quotation of *rente* must be expected. Such a decline would, it is needless to say, produce one in shares and other securities, and would have a depressing effect on commerce generally. Taken altogether, the expedient to which the Government has had recourse in the issue of these bonds is regarded as about as bad a piece of financial statesmanship as could well be perpetrated.

It is worthy of remark that of the bonds which the Government has already issued—that is, in 1858 and 1859—one batch of 200,000 is held by the Caisse des Depots et Consignations, and another of 42,000 partly by the Caisse and partly by the Orleans Railway Company; and no doubt these two establishments will carry them to market the moment they find a favourable opportunity.

The railways to which the funds about to be raised are to be applied are those from Caen to Flers, Mayenne to Laval, Epinal to Remeremont, Luneville to St Die, Rennes to Brest, Toulouse to Bayonne, Perpignan to Port Vendres, Grenoble to Montmelian, Thonon to Collonges, Aix to Annecy, the railway round Paris, Chateaulin to Landerneau, Napoleon-Vendée to La Rochelle, and lastly, from Algiers to Blidah.

The trial of M. Mires, the great Israelite speculator, has, after several days' duration, been brought to a close, and has ended by his being condemned to five years' imprisonment and 120*l* fine on the charges of embezzlement, swindling, and distributing fictitious dividends. The same condemnation has been pronounced on his co-accused Solar. As to the members of his Council of Surveillance who were tried as responsible for the distribution of the fictitious dividends, one—Count Simeon—has been declared responsible; the others—Messrs de Pontalba, de Chassepot, and Poret—have been acquitted. The trial has led to some curious revelations respecting the manner in which great "societies of credit," like the Caisse Generale des Chemins de Fer of Mires *may* be conducted when they fall into the hands of dishonest men. Thus it appears that the manager may make speculations on the Bourse, and when they are successful take the profits to himself, when they are unsuccessful leave the losses to the shareholders; that he may in settling his balance-sheet leave out losses though amounting to scores of thousands and exaggerate profits; that he may as agent for his Company obtain concessions of railways, coal-pits, &c., and sell them to the Company infinitely dearer; that they may at one fell swoop take 200,000*l* from paid-up calls in an enterprise and say nothing about them; and, lastly, that (as Mires did to Pontalba) he may send a friend to Marseilles, or Rome, or anywhere else, on pretence of doing business for the Company, and may undertake to pay him the enormous sum of *eighty-six thousand pounds sterling* of the shareholders' money for his services!

The following are the quotations of the Bourse:—

	Thursday, July 4.		Thursday, July 11.

Do. do. 500f, 3 —	457	50	455	0

It is to be observed that the quotations of the Mobilier, Northern, Southern, and Austrian Companies are ex-dividend, coupons having been detached on the 6th as follows:—Mobilier, 25f; Northern, 40f 50c; Southern, 25f; Austrian, 22f 50c.

The following details respecting the cotton trade at Havre may be interesting at the present moment:—

	Stock on 1st January.	Arrivals in the 6 months ending 30th June.	Sales in the 6 months ending 30th June.	Stock at end of June.
	bales	bales	bales	bales
1861	105,020	524,340	318,800	310,560
1860	45,130	505,680	296,610	254,200
1859	136,690	227,840	260,860	103,670
1858	82,600	317,210	241,910	157,900
1857	46,800	304,135	241,185	109,750

The prices per 50 kilogrammes (about 1 cwt) on the 30th June of each of the following years was:—

	1861.		1860.		1859.		1858.		1857.	
	f	f	f	f	f	f	f	f	f	f
New Orleans	94 to 132		66 to 115		92 to 127		87 to 126		107 to 131

Hayti	82	92	63	74	80	89	75	85	99	110

On the subject of the grain crops, which excites much attention just now, our agricultural journal says that those in the South, the reaping of which has been commenced, have caused some disappointment, the yield being likely to be only that of an ordinary year, whilst in the centre and in the district of Paris only, an ordinary yield is expected, notwithstanding an improvement which has lately taken place.

The following is an account of the markets:—

FLOUR.—Owing to heavy rains, a rise in price has taken place at *Paris*. Yesterday, the quotation was 71f to 75f the sack of 159 kilogrammes. In four marks, however, the current month was 73f 25c; August, 73f and 72f 75c; August and September, 72f. Business not active.

WHEAT.—At *Paris*, yesterday, the quotation was 38f to 41f the sack of 120 kilogrammes, and choice 41f 50c. In foreign grain, in which transactions in the Paris market are assuming a certain importance, Hamburg and Baltic, good qualities, were 40f to 41f; American, 39f to 42f—the whole taken at Havre or in English ports: Odessa was 38f 50c to 39f; and German, 40f to 40f 50c delivered at Paris. Of the French provincial markets, 42 present a rise of from 11c to 1f the hectolitre, 50 a fall of from 7c to 1f 30c; 19 are reported firm, 36 without variation, 18 calm.

COTTON.—Business at *Havre*, in the week ending Friday, was important, the sales having amounted to not less than 22,845 bales. Prices rose from 3f to 4f for very low qualities, 3f for low, and 2f to 3f for all others. Low New Orleans was consequently 109f the 50 kilogrammes, and very ordinary ditto 115f. The arrivals were only 1,021 bales. On Monday and Tuesday in the present week business was calmer, but without any change in prices. Yesterday, the sales were about 3,000 bales, and prices were very firm.

COFFEE.—At *Havre*, in the week ending Friday, the market was calm. 366 sacks Hayti Port-au-Prince went at 76f to 76f 50c the 50 kilogrammes in bond; 342 sacks ditto Cape, 78f 50c; 500 sacks Rio not washed, 68f; a small lot of Guadeloupe "habitant," 135f 50c duty

paid; and another small lot of ditto for delivery, 135f. In addition, 617 sacks Ceylon damaged were sold by auction at 94f to 99f. The arrivals exceeded 5,000 sacks and 300 casks. The stock on the 1st July was 7,211 tons; at the corresponding date last year it was 4,518 tons, and of the year before 3,169. This week, Rio washed has been 75f to 83f; not washed, 63f to 66f. At *Bordeaux*, last week, a small quantity of Santiago was taken at 91f to 96f the 50 kilogs, and a large quantity at different prices; 1,400 sacks Mysore went at 105f duty paid; 100 sacks Rio washed, 87f; 836 ditto not washed, 75f; 176 sacks Guayra *grage*, 85f in bond. This week, Rio washed has been at 87f; not washed, 77f 50c. At *Nantes*, last week, nothing was done, and there have been no sales this week.

SUGAR.—Business at *Havre*, in the week ending Friday, was not very active. 130 casks French West India went at 47f 25c the 50 kilogs duty paid; 331 ditto for delivery, 47f to 47f 25c; 400 Havana disposable, 34f in bond; 1,500 ditto for delivery, same price. Some small quantities of damaged Martinique and Havana were sold by auction. The arrivals were nearly 4,000 casks of different sorts. The stock of French West India on the 1st was 8,660 casks. This week, French West India has been at 47f 25c, Havana 34f to 34f 50c, Mauritius 50f, Reunion 50f. At *Bordeaux*, last week, 572 French West India went at 46f; 138 ditto, "usine," 53f; 3,225 bales Reunion, 50f; 794 casks Cochin China, 49f. This week Reunion (inferior) has been at 44f 50c. At *Nantes*, last week, about 300 casks Reunion went at 51f 25c to 54f 25c; 1,934 sacks Mayotte, at 49f 75c; 49 casks French West India at 49f; some small lots of "usine" ditto at 50f to 52f 50c, and one ditto at 60f. This week some small sales of French West India and of Reunion have been made, but prices are not given.

INDIGO.—The business at *Havre*, in the week ending Friday, consisted only of the sale of 15 cases Bengal at established prices, and the arrivals were only 16 cases. The stock on the 1st was about 1,200 cases of different sorts. This week, some Bengal has been disposed of at prices kept secret. At *Bordeaux*, last week, the sales were 42 cases Bengal, 4 Madras, 2 Velore, 18 Kurpah; prices not stated. This week, a small lot of Bengal has been sold.

HIDES.—At *Havre*, last week, there were no sales whatever,—an unusual circumstance. By auction, however, some small quantities of damaged Buenos Ayres and Pernambuco were disposed of. The arrivals exceeded 13,000. This week, Buenos Ayres has been 95f; New York salted, 49f. Some lots of damaged Pernambuco, Bahia, New Orleans, and other sorts have likewise been sold.

WOOL.—At *Havre*, in the week ending Friday, there were no sales of wool, but 51 bales La Plata sheepskins went at from 77½c to 1f 50c the kilogramme, and some lots of different sorts damaged were also sold. The arrivals did not amount to 1,000 bales. This week, Buenos Ayres unwashed has been 1f 17½c to 1f 42½c; Monte Video unwashed, 2f 55c.

TALLOW.—There were no sales and no arrivals at *Havre* in the week ending Friday, and the stock on the 1st was only 550 casks. This week, New York has been at 63f, New Orleans at prices kept secret. At *Paris*, yesterday, the 100 kilogs were 125f 50c—a new decline.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, disposable, was 90f to 91f the hectolitre; Montpellier of 86 deg., 120f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 115f; beetroot, first quality, 90f.

Correspondence.

THE COMPARATIVE SUPPLIES OF SOUTH AMERICAN AND BRITISH EAST INDIAN COTTON AT HOME FOR THE MONTHS OF MAY, 1860 AND 1861.

TO THE EDITOR OF THE ECONOMIST.

SIR,—In the month of May, 1860, the quantity of raw imported cotton into this country from the United States of America (so far as the landing Customs accounts have been made up) amounted to 1,233,749 cwts, whilst during the month of May of the present year (viz., 1861) the quantity of cotton imported into this country from the above settlements has been diminished to 985,521 cwts, showing a deficiency of 248,228 cwts; whilst our total receipts of the same material imported from our East Indian possessions in the month of May, 1861, has proved less than the deficiency experienced in the importation of American cotton in the month of May of the same year by 16,895 cwts.

Now, at this rate of calculation, the amount of cotton grown in our East India possessions cannot possibly supply enough of the material to satisfy the demand of our markets at home, and taking at the same time into consideration that we have received in May, 1861, from the Brazils, Egypt, and other countries, a gross total of 53,741 cwts. This, added to our former East Indian receipts (viz., 167,140 cwts), will make the utmost we have received during the month and year adverted to 220,881 cwts. This fact tends to show that we are almost wholly dependent upon America for our cotton supplies, and should the same be found to fail, the distress occasioned thereby throughout a portion of our manufacturing districts must prove most disastrous, as the cotton looms would become necessarily unemployed.

And this foreboding prospect is likely to be realised, for it is currently reported by each American mail which reaches us that the negroes in the Southern States are effecting a fugitive exodus as fast as they can from the estates of their task-masters; and should "slave-labour" eventually fail, the growth and cultivation of the cotton crops must thereby be very seriously, if not summarily, suspended. The approaching prospect must at once convince the cotton-interested community how imperatively necessary it is for them to lose no time in encouraging the cultivation of the above commodity throughout such districts in our East Indian Empire as may prove favourable to its growth. There can be no doubt of complete success attending upon so desirable and important an enterprise; whilst it is very probable that in the course of a few years our cotton speculatists would prove to a great extent, if not wholly, independent of any supply whatever of the above-named material from the Transatlantic continent. Let the cotton merchants and manufacturers of Manchester be assured that the trade is already in their own hands. India is now an open country for the admission of European capitalists at large. The door which was so long bolted and barred against "uncovenanted" adventurers is now thrown open to welcome useful enterprise. If it is desired that cotton should be grown to a greater extent than it now is in India, it is necessary only to improve and encourage the "labour market" of the country. The soil will not prove ungrateful for the attention which may be bestowed upon it. The excited nerve of energy must be sustained by stimulating encouragement, or it will relax and decline into a state of listless prostration.—I am, Sir, your most obedient servant,

ONE WHO LOOKS BEFORE HIM.

Whitehall place, July 9.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following notice, in reference to the Bank of England circulation, has appeared in the *Gazette*:—"It having been represented to Her Majesty in Council, by the Governor and Company of the Bank of England, by a memorial sealed with the seal of the said Governor and Company, and dated the 30th day of May, 1861, that certain bankers in the said memorial named, who, on the 6th day of May, 1844, were issuing their own bank notes to the extent of sums amounting in the aggregate to the sum of 267,749*l*, have ceased to issue their own bank notes; and the said Governor and Company thereupon humbly made application to be authorised, under the provision of the Act passed in the 7th and 8th years of the reign of Her Majesty, cap. 32, intituled 'An Act to regulate the issue of bank notes, and for giving to the Governor and Company of the Bank of England certain privileges for a limited period,' to increase the amount of securities in the issue department of the Bank of England, and to extend the issue of their own bank notes to an amount not exceeding two-thirds of the amount which the bankers, so ceasing to issue, were authorised to issue under the provisions of that Act. Now, it is ordered by Her Majesty, by and with the advice of Her Privy Council, that the said Governor and Company shall be, and they are hereby authorised and empowered to increase the amount of securities in the issue department of the Bank of England to the extent of 175,000*l* beyond the total sum or value of 14,000,000*l* in the said Act mentioned, and of the further sum of 475,000*l* authorised by Her Majesty's Order in Council, dated the 7th day of December, 1855, and thereupon to issue additional Bank of England notes from the said issue department, in manner in the said Act mentioned, to the amount of 175,000*l*."

The following monetary and commercial news is dated Calcutta, June 3:—Money Market.—Money is again somewhat easier in the bazaar, the opium speculations having been closed; the amount locked up in them has been set free, and can now be obtained on easier terms. At the banks it can be obtained upon good security at previous rates. Freights.—Owing to the discouraging news from home, coupled with the great scarcity of produce in the bazaar, inquiries for England have been extremely limited, and a decline of 7s 6d to 10s per ton has been established; and, to induce business, further concessions by agents will have to be submitted to, especially for light goods. Produce Market.—Supplies in first hands appear very limited, and to this may in a great measure be attributed the limited transactions of shippers. Import Market.—Business is almost at a standstill, and the past week has, if possible, been duller than many previous. No business whatever is being transacted in imports at present.

From Bombay, we have received the following under date the 12th ult.:—Money continues in an easy state, and the Bank of Bombay's rates have been reduced 1 per cent., making 5 per cent. for loans on State paper, and 7 per cent. on other securities. Government securities are steady, and we quote the Fours at 82½; Fives at 96½; and the Five-and-a-Half at 102½. In imports a fair but purely speculative demand has been felt, and prices, chiefly of grey shirtings, have experienced further improvement. This inquiry, however, has now greatly abated, and the market is relapsing into a quieter state. Cotton has gained a material advance. During the last day or two the market has undergone little fluctuation, while they are at present sellers, but few buyers at the quoted rates. Seeds, principally owing to very limited supplies, have risen in value.

The following returns shows the state of the note circulation of the United Kingdom during the four weeks ending June 1, 1861, compared with the previous month:—

	May 4, 1861.	June 1, 1861.	Increase.	Decrease.
	£	£	£	£
Bank of England	20199961	19850426	...	349535
Private Banks	3358126	3209275	...	148851
Joint Stock Banks	3067043	2942162	...	124881
Total in England	26625130	26001863	...	623267
Scotland	3987945	4533809	545864	...
Ireland	6524185	6329831	...	194354
United Kingdom	37137260	36865503	...	271757

And, as compared with the month ending the 2nd of June, 1860, the above returns show a decrease of 2,094,441*l* in the circulation of notes in England, and a decrease of 2,632,546*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks, the following is the state of the circulation:—The English private banks are below their fixed issue 1,151,178*l*, the English joint stock banks

below their fixed issue 360,195*l*.—total below fixed issue in England 1,511,373*l*; the Scotch banks are above their fixed issue 1,784,538*l*, the Irish banks are below their fixed issue 24,663*l*. The average stock of bullion held by the Bank of England in both departments during the month ending the 29th of May was 12,354,858*l*, being a decrease of 697,700*l* as compared with the previous month, and a decrease of 3,304,388*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month ending the 1st June:—Gold and silver held by the Scotch banks, 2,668,751*l*; gold and silver held by the Irish banks, 2,221,777*l*; total, 4,890,528*l*; being an increase of 20,853*l* as compared with the previous return, and a decrease of 157,890*l* when compared with the corresponding period last year.

An Account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 29th day of June, 1861:—

Name and Title.	Authorised Circulation.	Average Circulation.	Average Amount of Coin held.
	£	£	£

Increase in the present year by canals	468	15

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, June 29.—The market for State and Western flour has been characterised by dulness and depression during the past three days, in view of which holders have had to submit to a further material reduction in prices, in order to sell to any considerable extent. The receipts are tolerably heavy, and more than meet the requirements of the trade. Canada flour has met with a steady fair demand, though at somewhat reduced rates for the lower grades. The demand for Southern flour has been light, and the market has ruled dull and heavy, though prices are without essential change.

EXPORT from 1st to 25th June.

	1861. barrels	1860. barrels
Wheat Flour	205,948	134,157

The market for wheat retains the same features which have prevailed for some time. The demand has been fair both for local milling and export, but with liberal receipts and not very encouraging reports from abroad, the market has been more or less depressed, and nearly all kinds have depreciated from 3 to 7 cents per bushel. The sales for the three days foot up 760,000 bushels. Corn is in steady fair demand, and our previous quotations are fully supported.

EXPORT from 1st to 25th June.

	1861. bushels	1860. bushels
Wheat	2,646,712	628,338
Corn	673,734	849,225

LONDON MARKETS.

STATE OF TEH CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Very limited supplies of English wheat have been on offer, this week. For good and fine samples, the demand has ruled steady, at, in some instances, an advance in the quotations of 1s per quarter; but low and damp qualities have moved off slowly, on former terms. Although the show of foreign wheat has been extensive, most descriptions have been in improved request, and prices have had an upward tendency. Both English and foreign barley has commanded very little attention. In the quotations, however, no change has taken place. Most descriptions of malt have moved off slowly, at late currencies. Good sound oats have sold at full prices; but other qualities have commanded very little attention. Both beans and peas have met a dull inquiry; but the demand for most kinds of flour has somewhat improved.

The latest advices from New York state that very little change had taken place in the value of either wheat or flour, and that the export trade was less active. The supplies on offer were large for the year. On the Continent, produce, almost generally, is a dull sale.

Very favourable accounts continue to reach us from all parts of the United Kingdom in reference to the appearance of the grain crops. In some of the most forward counties, wheat cutting will be commenced in about three weeks. Potatoes are looking remarkably well.

In Scotland, wheat has commanded very full prices; but the demand for spring corn has been much restricted.

The Irish markets have been devoid of animation; nevertheless, very little change has taken place in the value of any article.

At Mark lane, to-day, notwithstanding that the supply of English wheat was very small, the trade,—owing to the large imports of wheat and flour from abroad, as well as from the favourable accounts respecting the crop,—was in a most inactive state; indeed, so little was passing, that prices must be considered nominal, although in some instances they were with difficulty maintained. Fine oats were scarce, and their value was quite supported. Inferior samples, together with barley, beans, and peas, were a dull inquiry, yet no material change took place in the quotations. Most kinds of flour were much neglected, and prices ruled next to nominal.

Mr E. Rainford thus reports on the trade in floating cargoes:—Since the 5th instant there have been 48 arrivals off coast for orders up to last night, comprising 29 cargoes of wheat, 13 maize, 10 barley, and 5 miscellaneous, viz.:—Wheat, 10 from New York, 1 Philadelphia, 1 Santander, 1 Valparaiso, 1 Berdianski, 2 Alexandria, 2 Taganrog, 1 Sulina, 1 Treiste; maize, 4 New York, 1 New Orleans, 2 Sulina, 3 Galatz, 1 Ibraila, 1 Varna, 1 Trieste; wheat and flour, 1 Montreal; wheat, &c., 1 Montreal; rye, 1 Odessa; barley, 1 Sulina, 4 Ismail, 1 Galatz, 1 Venice, 3 Ibraila; beans, 2 Mazagan. Of these some were previously sold. The following are the transactions in cargoes afloat since this day week. It will be perceived that the demand for the Continent has been less active:—Wheat, arrived, per 492 lbs, Odessa Ghirka (2 cargoes) 44s 6d, 44s 10½d, and (for the Continent) 48s 6d; per 480 lbs, for United Kingdom, Ibraila, 37s 9d; Indiana, 53s; red American, equal to 48s 9d; white and red American, 59s; Milwaukee, 49s 3d; Saide, 34s 6d; ditto (not perfect) 33s; for the Continent, amber Iowa, 51s; white Spanish, 59s; maize, arrived, per 492 lbs, Odessa, imperfect, 24s 6d; Galatz, 30s 6d, and 3 cargoes, 30s 9d; per 480 lbs, white American, 30s; Western mixed, 28s; Ibraila, 30s; Egyptian, supposed 27s; on passage, mixed American, 27s 6d; Giurgevo, by steamer to Waterford, 30s; for shipment in August, per 492 lbs, 5,000 quarters Odessa, 30s. Barley, on passage, per 400 lbs, a large cargo, nearly 4,000 quarters, June shipment, at 22s.

The London averages announced this week are:—

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 10th day of July, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	25,421,435	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	10,771,435
		Silver Bullion	..
	25,421,435		25,421,435

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,616,202
Rest	3,344,194	Other Securities	19,900,591
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	3 255,613	Notes	5,263,940
Other Deposits	13,914,598	Gold and Silver Coin	902,864
Seven Day and other Bills	616,192		
	35,683,597		35,683,597

Dated the 11th July, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,778,687	Securities	29,613,793
Public Deposits	3,255,613	Coin and Bullion	11,674,299
Private Deposits	13,914,598		
	37,943,898		41,288,092

The balance of Assets above Liabilities being 3,344,194*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£89,694
A DECREASE of Public Deposits of	4,036,231
An INCREASE of Other Deposits of	1,822,116
A DECREASE of Government Securities of	364,000
A DECREASE of Other Securities of	1,501,069
A DECREASE of Bullion of	397,473
An INCREASE of Rest of	36,879
A DECREASE of Reserve of	316,888

In the present return the notes issued against securities show an increase of 175,000*l*, the previous account giving 14,475,000*l*, and the present one 14,650,000*l*. The diminution in the reserve and bullion is attributable to the payment of the dividends. The other securities exhibit a very large decrease, occasioned by the repayment to the Bank of the advances on stock during the shutting. The reduction in the Government balance is in some degree counterbalanced by the increase in the private deposits.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 21,366,029	£ 21,625,188	£ 22,575,737	£ 22,641,854	£ 20,773,687
Public deposits	4,319,348	2,525,291	4,871,793	4,120,050	3,255,613
Other deposits	10,440,830	15,616,388	16,364,798	15,388,935	13,914,598
Government securities	13,464,021	10,587,486	11,420,480	9,714,574	9,616,202
Other securities	12,389,725	15,620,435	17,802,911	19,616,568	19,900,591
Reserve of notes & coin	7,826,680	10,590,306	10,704,261	8,803,965	6,166,804
Coin and bullion	14,017,655	16,898,666	17,941,791	16,232,810	11,674,299
Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	4 p. c.	6 p. c.
Price of Consols	96⅞ xd	95⅛ xd	95¼ xd	93⅜ xd	90⅜
Average price of wheat	43s 6d	43s 4d.	46s 9d	57s 9d	50s 10d
Exchange on Paris (shrt)	24 97½ 25 2½	25 2½ 10	25 5 10	25 7½ 15	25 40 45
— Amsterdam ditto	11 16 16½	11 15	11 11 12	11 14½ 15	11 18½ 19
— Hamburg (3months)	13 7¾	13 6¼ 7	13 3½ 3¾	13 5 5¼	13 10¼ 10½

In the corresponding week of 1851, the Ecclesiastical Titles Bill had passed the House of Commons, and had been read a first time in the Lords. The Inhabited House Duty Bill had also gone through the Commons. A grand entertainment had been given to the Queen and Prince Albert by the Lord Mayor and Corporation of London, in honour of the Great Exhibition. A commercial treaty had just been concluded between England and Sardinia, the object of the latter being to make as great an approach as possible to free trade. The accounts of the revenue of Great Britain and Ireland for the financial year ending the 5th April, 1851, had been made up, and showed a surplus of nearly three millions

In 1858, the arrivals of gold were large, and money very easy. The Queen was about to visit Cherbourg.

In 1859, capital was also abundant; the rate of discount at the Bank was 2½ per cent., and in Lombard street 2¼. The preliminaries of peace had been signed between France and Austria.

In 1860, intelligence had been received of the outbreak of the massacres in Syria. The Prince of Wales had left England on his visit to the British American colonies and the United States. The Great Eastern had arrived from New York. Garibaldi continued to make steady progress in the liberation of the Two Sicilies. In Parliament, the chief business had been the privilege resolutions in the Commons on the paper duty question, and the votes for the war in China.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 1,948,895*l*; in 1858, a deficiency of 4,047*l*; in 1859, a deficiency of 1,438,113*l*; and in 1860, a deficiency of 4,227,633*l*. In 1861, the deficiency is 5,985,993*l*.

DISCOUNT AND MONEY MARKET.—With the payment of the dividends there has been greater ease in the discount market, and the rate in Lombard street was yesterday 5¾ per cent, with exceptional transactions at a fraction less. On the Stock Exchange, loans for a few days are obtainable at 3½ to 4 per cent., but for longer periods the terms are 4½ to 5 per cent. To-day there has been a slightly increased demand, owing to the deposits for the Indian loan, but no change took place in the general rates.

The following are the rates of discount in the principal cities of the Continent, showing no alteration:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5½
Berlin	4	2½
Frankfort	3	2
Amsterdam	3	3
Turin	6	5½
Brussels	3	3
Hamburg	...	2¾
St Petersburg	6	...

ENGLISH FUNDS.—The release of the dividends has been followed by further investments by the public, and Consols have experienced a fresh rise. The price for the August account was yesterday as high as 90⅝ to ½, but a reaction then took place to 90¼ to ⅜, which was the closing quotation this evening. For money the last transactions were at 90 to ⅜, being a quarter per cent. above last Friday. The principal purchases, however, have latterly been in Reduced and New Three per Cents., which, although they carry three months' extra dividend, are about a half per cent. lower than Consols.

The tenders for the new Indian loan of 4,000,000*l* were sent in to-day, and proved very numerous, the total applications being for more than 21,000,000*l*. The Government *minimum* was fixed at 98½, and the price at which applicants will receive a full allotment is 98*l* 18s 6d. The tenders at 98*l* 18s will get about one-third. Among the unsuccessful bids is one from Messrs Rothschild for 1,500,000*l* at 98¾. The highest tender was at 99*l* 8s. The price of the stock advanced considerably this morning, and transactions were recorded at 99¼. There was then a reaction, and the last official price was 99 to ¼. After regular hours a further downward tendency was shown, and the latest bargains were at 98⅞ to 99⅛.

Owing chiefly to the recovery in the funds, a corresponding movement has taken place in Exchequer bills, the March issue improving to 7s to 3s discount, and those of June to 2s discount to 2s premium. India bonds are steady at 15s to 10s discount.

FOREIGN STOCKS.—Another important rise has taken place in Turkish Six per Cents., and although some check has since been experienced, the present price shows a further rise of between 1 and 2 per cent. After marking as high as 62¾, a reaction has since occurred to 61¼ to ¾. The loan of 1854 has also advanced, but to a less extent. A general opinion appears to prevail that the financial reforms announced by the new Sultan will be faithfully carried out. At the same time it is known that the Turkish Government are for the present in great pecuniary difficulty. Mexican has risen on the statement of Lord John Russell that he will assist the bondholders in pressing their claims. Russian descri[illegible]

continue to decline, the confidence formerly entertained in the finance of that Empire being now much weakened. Buenos Ayres bonds have receded on some sales, caused by the late warlike news from the Argentine Confederation.

The last price from Paris this evening of French Three per Cents. was 67f 85c, or the same as last Friday.

The monthly return of the Bank of France, published to-day, shows an increase in the bills discounted of 1,810,000*l*, in the circulation of 700,000*l*, in the deposits of 580,000*l*, and in the advances of 220,000*l*. On the other hand, there is a decrease in the bullion of 1,190,000*l*, and in the treasury balance of 120,000*l*.

A deputation of Mexican bondholders waited upon Lord John Russell at the Foreign Office on Monday, to lay before him a memorial as agreed upon at the general meeting last Thursday. Mr David Robertson, M.P., the chairman of the committee, explained the chief objects of the memorial, and mentioned that there were four points upon which a satisfactory settlement is especially required. First, the robbery by General Miramon of the 660,000 dollars; second, the carrying out of the decrees or conventions assigning a certain portion of the customs revenues to the bondholders; third, the appointment of interventors to receive that amount; and fourth, the disappearance of the church property, the whole of which appears to have been frittered away without producing any good result to the finances of the country. The proposal of naming interventors had been approved at the time by Lord Malmesbury, but from some mismanagement had not been carried out. In his reply, Lord J. Russell allowed that the robbery of 660,000 dollars ought to be made good. The continued breaking of pledges by the various Mexican administrations has caused the French Government, whose subjects are also interested in the question of the debt, to see the necessity of speaking firmly, and Her Majesty's Government will probably do the same. The appointment of interventors he was not prepared to deal with at present. After a few more remarks, the deputation withdrew. At a general meeting of bondholders held on Thursday, these assurances of Lord John Russell were considered satisfactory, and resolutions were carried accepting the same, and expressing confidence in the Government. It was also determined to add some more members to the present committee, and to request Messrs Baring to act as the agents for the bondholders.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

RAILWAYS AND OTHER SHARES.—The market for British railway stocks was rather dull at the commencement of the week, but the fineness of the weather and the comparatively favourable traffic returns subsequently caused a better feeling. An additional impulse was also given yesterday by the sudden death of a well-known and successful speculator in Leeds, who is believed to have a large amount open for the fall, which it will now be necessary to close. The stocks chiefly influenced by this event have been Great Northern, London and North-Western, and Midland, especially the former. The general transactions continue very limited, the dealers having in consequence the market almost entirely in their own hands.

In the colonial department, Indian guaranteed stocks have shown firmness, partly on the success of the new loan. Grand Trunk of Canada has improved from the publication of a further report by the Select Committee of Bond and Shareholders, in which some valuable financial suggestions are contained.

There have been few transactions in foreign shares, but prices have been generally steady. French descriptions are rather firmer. Pernambuco, on the other hand, have declined. American railway securities are without alteration. Labuan Coal shares are quoted 2½ to 3 prem., and Natal Land par to ¼ prem. There have been some inquiries for Ottoman Bank.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

	RAILWAYS. Closing prices last Friday.	Closing prices to-day.
Bristol and Exeter	95 7	95 7

FOREIGN EXCHANGES.—There has been no change of importance in the rates this week.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley on the movements in bullion during the week, and the transactions in Indian rupee paper:—

Gold.—The export to America still continues, the Asia having taken 109,650*l*, and the Glasgow 189,761*l* to New York; a portion only of these amounts has been withdrawn from the Bank in sovereigns, the remainder consisted of gold coin received from the Continent, from whence we have had some large sums during the past few days. The Bank has purchased about 163,000*l* since the date of our last circular, there not being sufficient demand for export to take all the gold that has arrived. The Celt has taken 10,000*l* to the Cape, the Magdalena 7,084*l* to Brazils, and the Euxine 5,300*l* to Alexandria and Bombay. The Bride has arrived from New Zealand, with about 11,000*l* in gold.

Silver.—A slight improvement in the price of silver occurred for what could be shipped to Bombay by the 10th instant; the market is not now, however, quite so firm, and we quote the price as 60½d to 60¾d per oz standard. The Magdalena has taken 14,500*l* to the Brazils; and the Euxine 166,428*l* to Bombay, 71,963*l* of which was on Government account.

Mexican Dollars.—The reduction in price mentioned in our last circular has had the effect of bringing in many buyers for the Continent, and has caused a slight firmness in the price, which we now quote as 58½d to 58⅝d per oz.

Exchange on India for Banks' drafts, Bombay and Calcutta, 60 days' sight, is 1s 11⅝d to 1s 11¾d; Madras the same, with a possibility that better rates might be obtained by buyers. Bills with documents, 1s 11d to 1s 11¼d.

India Government Loan Notes remain very steady at an advance of ½ per cent. on last week's quotations, present prices being 94¼ to 94¾ for 5 per Cents., and 100¾ to 101¼ for 5½ per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 10d per oz std; bar gold refinable, 77s 10½d per oz std; Spanish doubloons, 77s 6d to 78s 0d per oz, last price; South American doubloons, 73s 6d to 73s 9d per oz, last price; United States gold coin, scarce. Silver—Bar silver, 5s 0⅛d to 5s 0¼d per oz std, last price; bar silver, containing 5 grs gold, 5s 0⅜d per oz std, last price; fine cake silver, 5s 4⅞d per oz, last price; Mexican dollars, 4s 10½d to 4s 10⅝d per oz, last price; Spanish dollars (Carolus) in demand, scarce.

The Canadian steamer North American, which sailed yesterday from Liverpool for Quebec, took 65,815*l*.

The Bank purchased about 40,000*l* in gold yesterday, and 12,000*l* to-day, making a total of 52,000*l* since making up the last return.

Failures and Mercantile Embarrassments.—A meeting of creditors of Messrs John Duncan and Co., flax spinners, who failed on the 19th ult., was held at Dundee on Wednesday, when a balance-sheet showing debts, exclusive of some claims which are now abandoned, 36,600*l*, with assets estimated to realise 1,800*l* only. An offer of 2s in the pound was made in instalments at 6, 12, and 18 months, but referred to a committee of investigation.

The accounts from New York mention the failure of Messrs William A. Salo and Co., and of Messrs Crocker and Warren, two firms of high position in the East India trade, and of Messrs George W. Brainerd and Co., wholesale grocers, whose credit was lately unquestioned. The liabilities are believed in every case to be heavy. Other suspensions are apprehended.

The suspension is announced of the Marseilles houses of M. Clerian and of Pagliano de Mathieu. The business of the latter has been established sixty or seventy years, and he enjoyed a position of high respectability. His operations were chiefly in the Italian trade, and he was connected with an establishment at Naples, but it is not known if that house will be compromised by the present event.

The failure is announced at Dundee of Messrs R. Milne and Co., spinners and manufacturers, but the liabilities are only about 3,000*l*.

Public Companies.—The half-yearly meeting of the Union Bank of London was held on Wednesday, and the proceedings were more satisfactory than usual. The profit realised in the past six months was 95,617*l*, being the largest ever gained since the commencement of the bank, and has been derived from pure banking business and from no exceptional source. The total return for the financial year ending in June was 162,000*l*, equal to 27 per cent. on the working capital. The considerable profits of the last six months arise partly from the high rate of interest, and hence future half-years may on this ground appear to be less productive. Every branch of business of the bank has increased, the deposits being nearly 700,000*l* more than a year ago. A comparison with the year 1851 shows that in the ten years since then the number of the proprietors has advanced from 640 to 1,240, the deposits from about three millions to more than ten millions, and the annual profit from 40,000*l*, then considered very good, to 162,000*l*. In reply to questions having reference to the late fraud at the branch of the Commercial Bank, it was explained that a perfect supervision is kept over the branches, and that the accounts and securities are frequently examined by the directors and managers. The general accounts have also been strictly audited, and the various securities verified. The available balance at the present meeting was 126,087*l*, of which 36,000*l* was taken for a dividend of 12s per share, leaving 90,087*l* to be carried forward. The latter amount will go towards making up the 120,000*l* capital written off for the Pullinger frauds, the directors considering the replacement of this sum of paramount importance; and it is expected that the other 30,000*l* will be obtained from the profits of the current half-year.

The Oriental and General Marine Insurance Company, established for effecting the general insurance of shipping and cargoes, is commencing its business, and the managers are confident that the field on which they are proposing to operate has still room for them.

The National Company for Boat Building by Machinery (limited). This company is started for the application of the patents of Mr Nathan Thompson, which are exceedingly ingenious, and of the extensive practicability of which some very good judges are very sanguine.

It is stated that the Danish concession upon which the project of the North Atlantic Telegraph is founded, with surveys, &c., is about to pass into new hands through the medium of a debenture subscription, as the basis of a proprietary company, preliminary to the establishment of a working company for laying down the cables. These debentures, for from 15,000*l* to 30,000*l*, are expected to be taken up privately by capitalists and others interested in telegraph enterprise.

A meeting of the East and West India Dock Companies took place to-day, when the report was adopted and a dividend declared at the proposed rate of 3 per cent. for the six months ending in June, free of income tax. There has been an increase of 50 in the number of loaded ships entering the docks in the past half-year compared with 1860, but a decrease in the tonnage of 10,020 tons. The goods in the warehouses have, however, augmented, especially the more valuable descriptions, and the position of the Company is considered in every point satisfactory. With regard to the late fire, explanations were given, showing that an efficient brigade is kept, together with powerful engines of the best and latest description, and that every precaution is taken against such a calamity as has lately occurred near London bridge. It has been discovered that overcharges have been made upon the Company in respect of builders' works during the past nine years to the amount of 13,000*l*, and proceedings have been taken in Chancery to recover this sum.

The Directors of the Union Bank of Australia, at the general meeting on Monday, will declare a dividend of 12 per cent. per annum, being at the same rate as in the previous half-year.

The Directors of the Commercial Bank of London announce a return of 10*l* per share, being one-half of the paid-up capital.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 5 per mille premium, and the short exchange on London is 25.37½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 3-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 426½ per mark, and the short exchange on London is 13.8 per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 1 per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 105½ to 106 per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves little or no profit on the transmission of gold to the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The show of English wheat at Mark lane, to-day, was limited; nevertheless, both red and white qualities were a dull inquiry, at about Monday's prices. In foreign wheat—the supply of which was large—very little was doing, on former terms. All kinds of spring corn were a dull inquiry, at late currencies. The flour trade was in a most inactive state, at Monday's quotations. This week's imports from abroad amount to 29,440 quarters of wheat, 1,290 barley, 16,710 oats, 40 sacks and 27,870 barrels of flour.

At Liverpool, to-day, prices generally have been supported.

The wheat trade at Alexandria has been decidedly firm, owing to a reduction in the rates of freight to Liverpool, for which port engagements have been taken at 4s per quarter. Saide wheat, private trade produce, has sold at 28s 9d to 30s; Beheireh ditto, Pasha's produce, white, 29s 9d; ditto, private trade produce, 27s 6d to 28s 6d; Saide beans, private trade, 27s 6d to 28s 6d; ditto, Beheireh, 24s to 25s; ditto Pasha's produce, 25s 8d; barley, private trade, 17s 6d to 18s 6d; ditto, Pasha's produce, 19s 10d; and lentils, private trade produce, 24s to 24s 3d per quarter, free on board. The demand for beans, we may observe, has been heavy, and prices have declined.

This week's total sales in the Liverpool cotton market sum up to 81,000 bales, and include 68,000 bales to spinners, the remaining 13,000 bales being divided between speculators and exporters. Quotations generally are raised ⅛d per lb for the week. To-day the market closes steady, but with less animation than at the commencement of the week. Sales 10,000 bales.

Messrs Briggs and Co., writing from Alexandria on the 26th ult., report as follows with regard to the trade in cotton:—Prices of good cotton are not only well sustained but considerably higher, when it can be met with. The arrivals from the interior are, however, so trifling, and the stock on hand is so small, that very little is being done, and steamers have been obliged to reduce their freights very much, and to take whatever goods are offered. The week's sales have been:—182 bales low ordinary, at 6 4-10d to 7d; 126 bales ordinary to middling, 7½d to 7 87-100d; 541 bales good middling to fair, 7 94-100d to 8 16-100d; and 215 bales fair, 8 30-100d to 8 44-100d per lb. Freights.—By steamers ¼d per lb, in full, with grain ballasts at 4s per quarter. Exchange.—For very first-class paper, 95¾ tariff piastres per £ sterling.

Good and fine raw sugars have moved off freely at, in some instances, an advance in the quotations of from 6d to 1s per cwt. Low and damp parcels have moved off slowly on former terms.

There has been a fair demand for most descriptions of coffee at very full prices. Cocoa, however, has commanded very little attention.

The transactions in the rice market have been much restricted, at about previous currencies.

The public sales of indigo have been held. Madras qualities have sold at a decline of from 3d to 4d per lb; but Kurpahs have been in request, at full quotations. Several lots have been taken for export. Of the total quantity which has now passed the hammer (5,592 chests), 1,580 have been withdrawn, and 1,057 bought in, leaving 2,955 sold.

There is a slight improvement in the demand for most kinds of tea, and prices are well supported.

IMPORT and DELIVERY of TEA in London, from Jan. 1 to June 30, 1860 and 1861, with STOCK on hand on July 1, 1860 and 1861.

"We have still nothing favourable to report as to silk," observe Messrs Durant and Co. "The transactions of the month have again been of the most limited character—even the occasional days of comparatively good business have been wanting. The prospects of the European crop are felt to be rather less disastrous as to quantity than was at one time feared. In Italy at least the total yield is expected to be in excess of last year, although the quality may be worse; and the prices mentioned for the new silk are 20 to 25 per cent. below the exaggerated notions of last year. This, however, has been without any quotable effect upon the prices of China and Bengal silk, which are fairly supported—recent advices inducing the idea that the supply from both these countries may prove materially less than for the season now closing. Chinese thrown silk remains unnoticed. In Brutia and Persian silk, nothing."

The next public sales of colonial wool will commence on Thursday, the 18th inst. Since the last sales about 73,678 bales have arrived, viz.:—18,535 bales from Sydney and Moreton Bay, 22,279 from Port Philip and Portland Bay, 8,948 from Tasmania, 5,041 from Adelaide, 10,771 from New Zealand and Swan River, and 8,104 from the Cape of Good Hope.

There has been less doing in rum; nevertheless, prices have been well supported.

Brandy and grain spirits have ruled about stationary.

In reference to the exports of brandy from Charente to the United Kingdom, Messrs Clark and Sons observe:—"We have received the list of shipments of brandy from Charente to the United Kingdom during the last twelve months, from 1st July, 1860, to 30th June, 1861. The total quantity amounts to 14,045 puncheons and 129,905 cases, the whole estimated to contain 1,873,580 gallons, of which 870,000 were shipped by the two leading houses, Martell and Co., and Hennessy and Co. The shipments are smaller than usual; in the previous year they amounted to 24,177 puncheons and 176,761 cases."

The transactions in saltpetre have rather increased.

English tin has further declined 4*l* per ton, and foreign parcels are very dull. Iron has changed hands to a fair extent, at full quotations.

Linseed oil has changed hands to a fair extent, at 30s 6d per cwt on the spot. Other oils are dull. Spirits of turpentine are worth 51s to 51s 6d, with large arrivals. Tallow has moved off slowly. P. Y. C. on the spot, 49s 6d to 50s, and for delivery during the last three months, 49s 6d per cwt. Town tallow, 49s 6d net cash.

We extract the following from the New York *Shipping List* of the 29th ult.:—There is nothing new or particularly interesting in financial or commercial circles. The plethora of money continues, and there is as little desirable employment for it as ever, while rates continue comparatively low for loans on call, with undoubted collaterals. In business circles we have but to report little prospect of improvement. The volume of trade since our last has been small. In rates of discount there is no essential change. It has become so difficult to determine what names may be regarded as "prime" or first-class, that rates quoted below are necessarily unreliable. We quote:—

	Per cent. per annum.
Loans on call, stock securities	4½ to 5
Do. bond and mortgage	6 7
Prime endorsed bills, 60 to 90 days	6 7
Do. 4 to 6 months	10 ...
First-class single signatures	7 ...
Other good bills	... ...

The dry goods market still retains the same features of dulness and depression, and we can discern few indications of an encouraging nature for the coming season. About the only noticeable characteristic of the times is the change which it has been determined to inaugurate in the credit system—a shortening of credit from eight months and longer to six months. A feeling of uncertainty and apprehension continues to pervade dry goods' circles, and little confidence is felt in the future, which is at present very unpromising. In army goods, however, there continues a fair business, and some of the manufacturers are kept busy in fulfilling contracts for the Government. The demand for domestics for shipment has formed about the only exception to the general dulness, and has prevented an accumulation of goods. Prices of all goods are nominally unchanged. The market for foreign goods remains quiet, and but few sales have been effected, except to the city trade and in a retail way. We do not learn of any important change in prices, which may be considered nominally unchanged.

The demand for cotton continues moderate, but the market has increased in strength, and sales to any extent would not be made except at an advance of fully $\frac{1}{4}$c per lb, to which we conform our quotations. The stock is estimated to be only about 35,000 bales. The sales for the three days foot up 2,200 bales. We quote:—

The business done in cotton has again been extensive this week, all classes of buyers having operated freely. Prices have undergone little alteration, the supply being equal to the demand, though for a good class of American cotton very extreme rates have been paid. Egyptian are again slightly dearer, especially in the lower qualities. Brazil have not varied. East India have advanced $\frac{1}{2}$d during the week. The sales to-day are 10,000 bales. The market is quiet. The reported export amounts to 25,190 bales, consisting of 5,880 American, 220 Brazil, and 19,090 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

In most of the markets held in the manufacturing districts, this week, an increased amount of business has been transacted, both for home use and export, and in some instances the quotations have had an upward tendency. For the time of year, the stocks are only moderate. There is a good demand for iron, at extreme rates; but coals continue a dull sale.

MANCHESTER, July 11.—There has been a steady but not animated continuance of the improvement which set in last week. The rather better accounts from India, the fineness of the weather, and the advancing tendency of cotton, have operated to this result. That a turn has been arrived at which should either limit the production or enhance prices has become the current conviction, which, however, has been as yet too recent to affect demand from distant quarters. The largest dealings of this week seem to have been in 8 to 9 lb shirtings for China and elsewhere, and orders have in some cases been given for very extended delivery at full rates. A few like sales of water twist have occurred. Quotations, as a rule, are advanced.

BRADFORD.—There is a little doing in English wools, but in such small quantities that the market may be said to be in a quiescent state. Colonial and foreign wools are entirely stagnant, but that is nothing unusual before the heavy July sales. There has been something doing in yarn at prices merely nominal. Orders are only given out in case of necessity, and to spinners who are willing to make a slight concession. The general tone of the market is unaltered. There is very little alteration in the piece market, as nothing has occurred to alter the state of things. Foreign buyers have mostly purchased fancy goods out of stock, and a few additional orders have been out for France, but altogether business presents the same dragging character as before.

LEEDS.—There are not many buyers in the town, and comparative quietness prevails in the cloth warehouses, but the continuance of splendid weather, which makes the harvest prospects exceedingly encouraging, imparts a more cheerful tone to our staple trade. A few parcels of favourite winter goods met with a tolerably ready sale. The manufacturing districts are still but indifferently employed, though prices keep very firm.

ROCHDALE.—Again we have to report unfavourably of this market, there being few exceptions to the absence of business which was the rule of the market. The firmness in the wool market causes merchants to hold to late quotations, nor can any expectation be held out of any possible lowering of quotations. Yorkshire manufacturers have still to complain of extreme flatness, their goods being literally out of demand. Quotations, however, are upheld, save in some cases, where realisation is necessary.

BELFAST.—The bleaching of webs during the past six months has been carried on at the principal establishments to an extent hardly ever exceeded. Many of the smaller manufacturers having been unable to dispose of their goods in the brown state had them finished, in the hope of facilitating the sale, and thus bleaching concerns, which might otherwise have been inactively employed, were kept in full work. There has not been any improvement in the home trade. To the distant markets the sendings have been rather more liberal in amount.

LEICESTER.—Some branches of the hosiery trade are rather more active than they have been for some time past, and business generally has assumed a rather more healthy appearance. In the adjoining districts, and at Loughborough and Hinckley, trade is for the most part flat. Stocks are pretty generally kept down. There is no important change in the price of yarns, but spinners are rather better employed, There is not much doing in wools.

NOTTINGHAM.—The *trifling improvement* perceptible in the lace market a week ago continues. A few foreign buyers have been looking round, and some sample orders given for France and small orders for Germany. The plain net trade is without material change; goods are purchased at a very low price. The cotton fancy trade remains dull. Business for the home market is flat. There is a fair business doing in certain classes of silk goods. The foreign branch of the hosiery trade is extremely depressed. Yarns are dear.

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 0s, at the works; best bars, 8*l* 0s; sheets, 8*l* 10s; doubles, 10*l* 0s; nail sheets, 8*l* 0s; latten, 11*l* 10s; boiler plates, 8*l* 10s; best and best best in proportion; common rods, 7*l* 0s; hoops, 8*l* 0s; gas strip, 7*l* 10s; Canada plates, 11*l* 10s; and all other sorts in proportion. Second and third-class makers are selling below these rates. Current prices of pig iron:—Staffordshire cold blast, 4*l* 5s; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, 4*l*; Old Windmill End, second quality, Nos. 1 and 2, melting pig iron, 3*l*; Old Windmill End Mine forge pig iron, 3*l* 5s to 3*l* 7s 6d; best native hydrate pigs, 3*l* 7s 6d to 4*l*, according to the brand; first-class All Mine grey forge pigs, 3*l* 5s to 3*l* 7s 6d; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2s 6d; Seend Mine melting pigs, 3*l* 10s to 3*l* 15s; good mine pigs, with a modicum of flue cinder, 2*l* 10s to 2*l* 15s; mine pigs, deteriorated by cinder, 2*l* 7s 6d to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; Barrow hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; Workington hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; grey forge cinder pig iron, 2*l* 5s to 2*l* 10s; white forge cinder pigs, 2*l* 2s to 2*l* 7s 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of mine melting iron, 3*l* 2s 6d to 3*l* 15s, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Gadlys (Aberdare, South Wales), No. 1 foundry pig, cold blast, 4*l* 10s f.o.b. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12s 6d to 3*l* 15s delivered; Northern hæmatites from 3*l* 2s 6d to 3*l* 7s 6d, according to brand or quality.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The demand has *improved this week*, and *some kinds* have sold at 6d advance. *Refiners show more desire* to extend their operations: low brown sugars go off freely, and several floating cargoes of foreign have sold at slightly enhanced rates. The heavy stocks, however, still prevent *speculative operations of any magnitude*. There were 4,030 casks West India sold in the three days, including the various parcels by auction. 329 casks Barbadoes went as follows: brown, 33s to 34s; low heavy to fine yellow, 34s 6d to 41s 6d. 346 casks 250 barrels other kinds: St Lucia, brown to good middling greyish yellow, 32s to 37s 6d per cwt. *The stock* amounts to 68,115 tons, against 71,200 tons last

year at the same date. 60,800 baskets Java are declared for sale by the Netherland Trading Company on the 30th instant.

Mauritius.—9,804 bags principally found buyers at former rates: semi-grainy kinds, 37s 6d to 40s; crystallised brown to good yellow, 33s to 37s 6d; brown, 28s 6d to 33s per cwt. Some business is also reported by private contract.

Bengal.—1,154 bags by auction sold at and after the sale: fair to good Cossipore, 42s to 43s 6d, one lot 44s; soft brown, 39s 6d per cwt.

Madras.—850 bags bright yellow native have sold at 32s 6d per cwt.

Penang.—1,600 bags sold steadily: low to very good yellow, 34s 6d to 40s 6d; low brown, 29s to 29s 6d per cwt.

Foreign.—Five floating cargoes of Havana have sold for the United Kingdom, Nos. 12 to 12½, 25s 6d to 26s; No. 9, 23s 6d; 13¾ to 14, 26s 6d; one of clayed and muscovado at 22s 6d. 1,000 boxes Havana to arrive, No. 11 to 11½, 25s 3d; one at 25s 3d, if for the United Kingdom, or at 26s 4½d if for a continental port; one for Antwerp, No. 10½, at 24s. 500 casks Cuba, by auction, partly realised 32s 6d to 37s 6d. 750 boxes Havana, fine yellow to fine strong greyish, 40s 6d to 44s 6d; low grey to good yellow, 36s to 40s. 970 casks 362 barrels Porto Rico partly sold: brown and low yellow, 34s to 36s; low middling greyish to fine, 36s 6d to 45s. Several parcels foreign muscovado have changed hands by private contract. 2,300 bags brown Bahia at 32s. 180 tons brown Surinam realised 34s per cwt.

Refined.—There has been a steady demand by the trade, and prices are firmer. Common dry goods, 49s to 49s 6d per cwt. Crushed and pieces are about the same as before.

MELADO.—44 casks sold at 23s. 388 casks sugar and melado were chiefly taken in at 26s to 27s 6d per cwt.

MOLASSES.—320 puns low to good Antigua have sold chiefly at 16s to 16s 6d. 376 casks 50 barrels clayed, by auction, were bought in at 15s 6d per cwt. 120 casks Madras treacle are reported at 14s 6d per cwt.

RUM.—The market is quiet, and prices unchanged. Bengal has sold at 1s 8d per proof gallon. Some few contracts have been made in Jamaica upon former terms. 52,000 gallons were taken by the Government on the 3rd inst., but the exact particulars do not transpire. The stock is 27,710 puns 5,200 hhds, against 27,750 puns 7,005 hhds at the same time in 1860.

COCOA.—All kinds sell slowly at previous quotations. A Government contract for 150 tons is declared for the 17th instant. 55s per cwt has been accepted for Guayaquil by private coutract.

COFFEE.—Liberal supplies of plantation Ceylon have been brought forward, viz., 1,225 casks 247 barrels and bags, and the greater part sold at full prices: fine ordinary and small berry to good, 67s 6d to 76s 6d. 35 casks 40 barrels 1,030 bags native found buyers at 60s to 63s 6d for low and small berry to good. 691 bags East India chiefly sold: pale and Malabar kind, 65s to 66s 6d; Singapore bought in at 60s. 270 bales 36 half-bales Alexandria Mocha were withdrawn above the value. 45 cases Cochin sold at 72s to 74s 6d for small to middling bold. 54 casks 169 barrels and bags Jamaica brought 62s to 69s. 4,257 bags Rio were chiefly bought in at 50s to 60s. Privately some transactions have occurred in Bahia at 50s, and in East India at previous rates.

TEA.—Since the public sales last week the market has remained in a quiet state, and general quotations are about the same as before.

RICE.—A few parcels have changed hands, by private contract, on previous terms for white Bengal, Ballam, and Necrancie Arracan. 681 bags middling white Bengal, by auction, sold at 11s to 11s 6d; and 555 bags pinky Madras; low broken to good, but small, 9s to 9s 6d; some lots, 10s per cwt.

IMPORTS and DELIVERIES of RICE to *July 6*, with STOCKS on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

SAGO.—359 boxes about two-thirds sold: fair medium at 18s. Fine has sold at 20s to 21s per cwt by private contract.

SALTPETRE.—The transactions, privately, have continued upon a very limited scale.

IMPORTS and DELIVERIES of SALTPETRE to July 6, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	6950	7800	10600	6120
Delivered	6200	6600	9710	7850
Stock	4100	5075	3800	4950

Deliveries last week 161 tons.

SPICES.—38 cases brown nutmegs chiefly sold at full prices: small to fine bold mixed, 1s 1d to 1s 6d. 666 bags pimento sold more readily at 2⅝d to 2¾d for ordinary to good. 100 bags Batavia pepper, 3⅜d. 1,200 bags Penang realised 3½d by private contract. 344 cases cassia lignea partly met with purchasers: good, at 89s; ordinary and coarse bought in at 85s to 86s. 200 cases from Bombay, 78s to 86s for low mixed and mouldy to common pile 1. Of 99 barrels Jamaica ginger, a few lots sold at 3*l* 10s to 5*l* 3s. 34 chests common Cochin brought 43s per cwt.

COCHINEAL is steady.

OTHER DRYSALTERY GOODS.—Cutch has been firmer, a parcel of good selling at 22s. Dark and heated Gambier realised 15s 3d per cwt.

LOGWOOD.—A floating cargo of St Domingo recently sold for a continental port at 5*l* 15s per ton.

SHELLAC is in good demand. D. C. Orange, 10*l* 15s to 11*l* per cwt.

LAC DYE.—323 chests were partly sold: good marks, 1s 5d to 1s 5¼d; 1, 1s 8½d to 1s 9d per lb. Other kinds chiefly bought in.

RUBBER.—A parcel of good East India was bought in at 1s 4d per lb.

METALS.—There have been very moderate transactions this week, and the prices of several kinds still show a downward tendency. The smelters have again reduced the quotations of British tin 4s, viz., common blocks, 118s; but foreign keeps lower in proportion and very quiet. Straits, 112s to 114s per cwt. Some few sales have been made in spelter at 15*l* 15s to 16*l*, principally the former, and the market remains inactive. British copper has been unsettled. No variation can be quoted in manufactured iron. Scotch pig steady at 50s 3d per ton for mixed Nos.

JUTE.—The public sales held on Wednesday comprised only 1,731 bales, of which 1,200 bales found buyers at full prices: ordinary to good, 13*l* 2s 6d to 19*l* 15s per ton.

LINSEED.—Prices have risen 1s, and the market is active: Bombay, 55s to 55s 6d; Calcutta, 52s 6d to 53s 6d. Numerous cargoes of Black Sea and Azoff afloat have sold at 53s per quarter for the United Kingdom.

OILS.—Sperm is inactive at 94*l* to 95*l* per tun. Other sell slowly at quotations. Olive has been neglected: Gallipoli, 57*l* 10s; other kinds, 47*l* to 56*l* per tun. A large business has been transacted in cocoa-nut at a recovery of 1s: Ceylon, 43s; Cochin, 44s 6d; Fine palm commands ready buyers for export at 44s 6d per cwt. There has been an active demand for linseed oil, and the diminished supply enables holders to obtain 30s 6d. Owing partly to the less favourable anticipations of the continental seed crops, the demand for rape oil is improving; foreign refined, 41s to 42s 6d; brown, 39s to 39s 6d per cwt.

TURPENTINE.—We are without arrivals of rough; indeed, none can be expected until some change takes place in American affairs. A large business has again been done in spirits; 52s 6d per cwt was paid for American in barrels early in the week, which has brought out more from outports than our market can carry, and purchases could now be made at 51s so 51s 6d. The deliveries from our warehouses average 600 barrels per week, and our stock is reduced to 6,000.

TALLOW.—The market is inactive, and there has been rather a limited business done by private contract during the week. This morning, 1st sort Petersburg Y. C. is quoted 50s; to arrive in the last three months, 49s 6d, being 1s to 1s 6d per cwt lower.

PARTICULARS OF TALLOW.—Monday, July 8.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The comparatively small quantity offered by auction to-day sold at the advance previously established. Three more floating cargoes were reported for the United Kingdom: Nos. 12 to 12½, at 26s; one of white, 32s 6d, for the Baltic. Some 3,500 bags brown native Madras reported at 30s 6d to 31s per cwt. 4,935 casks West India have sold for the week.

COFFEE.—398 casks 156 barrels and bags plantation Ceylon sold at previous quotations. 381 cases 96 bags Neilgherry, at 68s to 72s 6d; 4,982 bags new crop Costa Rica found buyers at extreme rates: good ordinary to good, 64s 6d to 75s per cwt; and some few parcels of East India at full rates. 214 bags African were mostly bought in at 80s 6d, one lot selling at 85s per cwt.

SPICES.—178 cases nutmegs partly sold: brown, 1s to 3s 2d. 21 cases mace realised 10d to 1s, being cheap for the better sorts. 350 bags Zanzibar cloves, 3⅝d to 3¾d, one lot 3¼d. 470 bags Penang pepper were mostly bought in at 3½d. 208 bags white withdrawn at 6d per lb. 101 cases common Cochin ginger, 44s; 86 bags African, 31s to 34s per cwt.

SAGO.—416 boxes sold: good to fine small, 19s 6d to 20s per cwt. 180 bags sago flour bought in at 16s 6d per cwt.

RICE.—100 tons Ballam sold at 9s 6d per cwt.

SALTPETRE.—370 bags Bengal: refraction 13½ were taken in at 34s per cwt.

GAMBIER sold at 16s 6d for good quality:

SAFFLOWER steady.

SHELLAC advanced 2s 6d to 5s per cwt.

OIL.—By auction, Cochin cocoa-nut sold at 44s to 44s 3d; Ceylon, 42s 9d to 43s; Sydney, 38s to 42s. Of 985 casks palm, a few lots realised 42s 6d to 45s.

TALLOW.—144 casks Australian sold at 44s to 46s 9d. 280 cases East India were bought in at 48s 6d. Town was reduced 1s 6d, viz., 50s 6d per cwt. Y. C. unaltered.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been more active this week, at rather improved prices. Treacle unaltered. Dutch crushed continues firm. Ready goods scarce.

GREEN FRUIT.—The trade is taken up with West India pine apples, three cargoes of which have arrived, 20,000, sold by Keeling and Hunt at public sale, realised prices in accordance with size, condition, and quality. Lemons of good and sound quality are in request. Nuts of all kinds dull of sale.

DRY FRUIT.—*No alteration in prices since our last report.*

COLONIAL WOOL.—There is not any change to report. The public sales will commence on 18th instant. Arrivals to date amount to 82,000 bales.

FLAX.—Nothing doing.

HEMP.—Market very quiet, and but few transactions this week.

COTTON.—Sales of cotton, from Friday, 5th July, to Thursday, 11th July, inclusive:—1,600 bales Surat, 6⅜d for good fair sawginned; 6¾d to 6⅞d, good new Broach; 6d, good new Oomrawatty; 4⅞d to 5⅜d, ordinary to middling fair old ditto; 5¼d to 5⅜d, very middling to fully fair Dhollera; 5d to 5⅜d, very middling to good fair Mangarole; 5⅜d to 5 5-16d, middling fair to fair Compta: 600 bales Tinnevelly, 6¼d to 6½d, good fair to good: 900 bales Western Madras, 5¼d to 5½d, 5-16d fair to good fair—total, 3,100 bales. A good demand has prevailed throughout the week, and, considering the small quantity offering, a fair business has been transacted. Surats are again a shade dearer, and for the finer qualities in some cases ⅛d per lb advance has been paid. Tinnevelly of the better kinds have commanded full prices, and Western Madras have advanced about 1-16d per lb, the market closing firmly. Sold for arrival, guaranteed fair:—200 bales new Dhollera at 6¼d; 860 Broach, 6½d; 700 Western Madras, 5⅝d. Yesterday, 1,780 bales wrecked cotton,

more or less damaged and all faults, were sold at public sale at ⅝d to 5⅝d, and 5⅞d. P.S.—Market firm. Sales to-day, 200 Surat at full prices.

TOBACCO.—Demand for most descriptions has been limited, and sales generally quite of a retail character. The market has presented a very firm appearance, and for choice qualities a further advance has been established. Holders continue to operate cautiously, and decline making sales, unless for small lots or parts of parcels.

LEATHER.—No alteration has taken place in the leather market since our report of the 6th. At Leadenhall, on Tuesday, the supply of fresh goods was not large, the demand was of a general character, but not extensive, and no change can be quoted in prices.

METALS.—Nothing of moment has transpired in our market during the week, excepting a fall in the prices of tin. Copper keeps steady in prices, with, if anything, a shade better demand. Iron continues to be quoted a trifle firmer in Wales, although on the whole the trade is still decidedly flat. Tin was reduced in price by the English smelters 4*l* per ton on the 9th instant; business is still heavy in it. Spelter is extremely flat at rather lower rates. Lead continues to be depressed, and tin plates are the same.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	50	6
Fat by ditto	2	7
Yellow Russian	51	6
Melted stuff	34	6
Rough ditto	19	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Bacon market rather dull at the advanced price of 78s f.o.b. Friesland 106s, and all cleared.

METROPOLITAN CATTLE MARKET.

MONDAY, July 8.—The total imports of foreign stock into London, last week, amounted to 9,592 head. In the corresponding period in 1860, we received 11,806; in 1859, 5,939; in 1858, 8,060; in 1857, 5,848; in 1856, 7,629; and in 1855, 4,710 head.

There was a full average supply of foreign stock on offer here to-day, in for the most part somewhat improved condition; sales progressed slowly on easier terms. From our own grazing districts the receipts of beasts fresh up this morning were on the increase, and the general quality of the stock was prime. The Lincolnshire season has opened remarkably well as to quality. Although the attendance of buyers was tolerably good, the beef trade was in a sluggish state, at a decline in the quotations realised on Monday last of 2d per 8 lbs. A few very superior Scots sold at 5s, but the general top figure was 4s 10d per 8 lbs. From Norfolk, Suffolk, Essex, and Cambridgeshire we received about 1,000 Scots, &c.; from Lincolnshire, 500 Shorthorns; from other parts of England, 500 various breeds; from Scotland, 550 Scots and crosses; and, from Ireland, 28 oxen and heifers. With sheep we were fairly supplied as to number; but their general condition was inferior, when compared with several previous weeks. Prime Downs and half-breds were in fair request at full prices; other breeds were a heavy sale at 2d per 8 lbs less money. The best old Downs sold at 5s 4d per 8 lbs. We were well supplied with lambs, which moved off slowly at Thursday's decline in value. Calves, the supply of which was good, moved off heavily at last week's decline in value. In pigs, very little was doing at last week's currency.

SUPPLIES.

	July 9, 1860.	July 8, 1861.
Beasts	3720	4170
Sheep and lambs	25900	26510
Calves	298	322
Pigs	348	330

THURSDAY, July 11.—The supply of beasts on offer in to-day's market was only moderate, and all kinds moved off slowly at Monday's decline in the quotations. We were well supplied with sheep. Prime Downs and half-breds commanded a steady sale at full currencies; otherwise, the mutton trade was in a sluggish state, on former terms. Prime lambs sold steadily, inferior breeds slowly, at Monday's prices, viz., from 5s to 6s per 8 lbs. Calves were in good supply, and heavy request, at barely late rates. There was only a limited business doing in pigs and milch cows, at last week's currency.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	4	3	8	Prime Southdown sheep	5	0	5	4

Lambs, 5*s* 6*d* to 6*s* 0*d*.

Total supply—Beasts, 850; sheep and lambs, 12,680; calves, 440; pigs, 360.
Foreign supply—Beasts, 210; sheep 1,800; calves, 330.

NEWGATE AND LEADENHALL.

FRIDAY, July 12.—The supplies of meat on sale here are moderate, and the trade generally rules heavy. Prime qualities, however, fairly maintain their value, but inferior kinds have given way in price.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d

HOP MARKET.

BOROUGH, Monday, July 8.—The reports of this morning are somewhat diversified. In the Weald of Kent and Sussex, the blight appears to be rapidly progressing, and the plant is going from bad to worse; whilst in the Mid Kent, Farnham, and Worcester districts the strong bine is making an effort to clean, and looks rather more promising. The present estimate of the duty viz., 70,000*l*, meets with but little support, the feeling being more against than in favour. The demand continues very limited, but with a firm currency. Mid and East Kents, 90s, 150s, 210s; Weald of Kents, 80s, 130s, 180s; Sussex, 75s, 90s, 140s; Yearlings, 120s, 160s, 210s.

FRIDAY, July 12.—The accounts from the plantations—although, on the whole, by no means satisfactory—speak of an improvement in Middle Kent, part of East Kent, and in the neighbourhood of Worcester, and the duty is now estimated at from 70,000*l* to 80,000*l*. In most kind of hops a fair business is doing, and prices are well supported.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, July 8.—The supplies of home-grown potatoes since our last report have been steadily increased, and the show of foreign stock is large. Generally speaking the trade is rather inactive, and prices now range from 6s to 10s per cwt. Last week's imports were 5,863 baskets, barrels, and casks from Dunkirk; 8,570 baskets from Rotterdam, 88 baskets from Boulogne, and 35 tons from Jersey.

FRIDAY, July 12.—Full average supplies of potatoes are on sale, and the trade rules heavy for all qualities. New Ware, 110s to 140s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Old meadow hay, 2*l* 0s to 5*l* 5s; new do., 2*l* 10s to 4*l* 0s; old clover ditto, 3*l* 10s to 6*l* 0s; new ditto, 0*l* 0s to 0*l* 0s; straw, 1*l* 10s to 2*l* 0s per load. A short supply.

CUMBERLAND.—Old meadow hay, 2*l* 5s to 5*l* 0s; new ditto, 2*l* 10s to 4*l* 0s; old clover, 3*l* 10s to 6*l* 0s; new ditto, 0*l* 0s; and straw, 1*l* 10s to 2*l* 0s per load. A steady trade.

WHITECHAPEL.—Old meadow hay, 2*l* 0s to 5*l* 0s; new ditto, 2*l* 10s to 4*l* 0s; old clover, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 15s to 4*l* 10s; and straw, 1*l* 10s to 2*l* 0s per load. A fair demand.

COAL MARKET.

FRIDAY, July 12.—Hetton 19s—South Hetton 18s 9d—Kelloe 18s—Braddylls 17s 6d—Shincliffe 16s 6d—Riddells 16s—Hastings 15s 6d—Carr's Hartley 15s 3d—Walker Primrose 11s 9d. Ships at market, 83; sold, 77.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 12.—Our public sales here, which commenced on the 2nd instant, were brought to a close on the 12th instant. About 15,000 bales East India and 9,000 bales and bags of sundry low wool were brought forward. Prices have more or less participated in the recent depression of English wools, and the advance established for East India in our May sales has been entirely lost in the present series. The miscellaneous kinds did not command much attention, and were to a great extent withdrawn.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 12.—Market rather firm; wheat sells quietly at full rates of Tuesday. Flour steady at late quotations. Beans, Indian corn, oats, and oatmeal, in moderate consumptive inquiry at current prices.

METALS.

[FROM OUR OWN CORRESPONDENT.]

FRIDAY, July 12.—At the meeting of Staffordshire ironmasters held this week at Birmingham, the market was characterised by dulness, and the business transacted was only to a limited extent. In Welsh bar iron there is a better feeling, and considerable orders have been given out. The price of Scotch pig iron has been well supported throughout the week. Little doing in either copper or lead. Tin has been reduced 4*l* per ton. Spelter has again declined in price.

The Gazette.

TUESDAY, July 9.

BANKRUPTCY ANNULLED.

J. Collier, Otley, Yorkshire, topmaker.

BANKRUPTS.

H. F. Ovenden, Maidstone, draper.
L. Solomon, London wall, cap manufacturer.
T. J. Moss, Edgware road, jeweller.
G. Davis, Southampton, builder.
J. Ibbott, Somersham, Huntingdon, builder.
T. C. Barber, Gravesend and elsewhere, currier.
G. Hornsey, Southampton, gasfitter.
M. W. Britton, Shoreditch, wholesale milliner.
T. Leeks, Norwood, contractor.
C. Ross, Walsall, butcher.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic receipts of railways in the United Kingdom for the week ending the 29th of June amounted to 568,080l, and for the corresponding week of last year to 563,080l, showing an increase of 5,000l. The grossreceipts of the eight railways having their termini in the metropolis amounted to 257,722l, and for the corresponding week of 1860 to 262,429l, showing a decrease of 4,707l.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, July 8.—The railway market was rather firm at the opening, but soon relapsed, and the final quotations were generally the same as on Saturday. In the colonial market, Grand Trunk of Canada stock was again lower, at 18⅛ to 19. Indian guaranteed descriptions remained steady. There was no change of importance in foreign shares. The Ottoman Railway Company advertise the payment of the half-year's interest at 6 per cent. per annum to the 30th ult. In American railway securities, Illinois Central shares were flat. Mines continued dull. Port Phillip shares, however, were a fraction higher. In joint stock banks, Ottoman and Oriental improved. Miscellaneous descriptions closed the same as on Saturday.

TUESDAY, July 9.—The railway market continued without the slightest animation, but in the afternoon showed a firmer tendency, in sympathy with Consols, compared with yesterday. London and North-Western, Midland, Lancashire and Yorkshire, and Great Western advanced ⅛ to ¼ per cent.; other stocks remained without alteration. Colonial descriptions were dull. Grand Trunk of Canada stock receded to 17¾ to 18¼; and Great Western shares to 10 to ⅛. In the foreign market, Lombardo-Venetian and Pernambuco were heavy. American securities closed without material change. Mines were in little demand, and occasionally showed a decline. Ottoman Bank shares were quoted higher. In miscellaneous descriptions, there was a rise in Red Sea Telegraph.

WEDNESDAY, July 10.—The railway market was inactive the whole day, and, after a few trifling fluctuations, closed at about the same prices as yesterday. London and North-Western, however, and Caledonian slightly improved, while Lancashire and Yorkshire receded on the falling off in the traffic. Business in this department continued very limited. In colonial market there was a recovery in Grand Trunk of Canada stock to 19 to ¼. Great Western shares and Indian guaranteed descriptions were steady. Foreign railways were in more demand, and Lombardo-Venetian fractionally improved. In American railway securities, Illinois Central shares advanced. Mines continued rather flat. In joint stock banks, Union of London shares were dull at 25¾ to 26¼, notwithstanding the satisfactory meeting to-day. Ottoman shares, on the other hand, were firmer. In miscellaneous descriptions, Scottish Australian investment stock was quoted higher.

THURSDAY, July 11.—The railway market was firmer to-day for the fall, and in several stocks a rise took place. Great Northern, London and North-Western, and Midland were especially ½ to 1 per cent. higher. Lancashire and Yorkshire, Berwick, and Caledonian also advanced; whilst South-Eastern and Sheffield were rather flat. Towards the close the market showed a tendency to reaction. In the colonial market, Indian guaranteed descriptions were in better demand. Great Western of Canada shares left off at 10⅛ to ¼; and Grand Trunk stock 19 to ¼, or about the same as yesterday. Foreign shares were steady, especially Lombardo-Venetian. Pernambuco, however, were again lower. No material change occurred in American railway securities or mines.

FRIDAY, July 12.—The operations in the railway share market were limited, but prices showed increased buoyancy. Eastern Counties improved to 49¼ 49⅝. Great Northern to 107¾ 108. Brighton to 120½. North-Western to 94¼ 94¾; and North British to 63 and 63¼. Great Westerns receded to 71 and 71⅜; and South-Easterns to 81½ 81⅝. The foreign and colonial undertakings remained dull. Great Luxembourg realised 8. Grand Trunk of Canada, 19¼ 19½. Great Western of Canada, 10¼. East Indian, 98 to 98½; and Great Indian Peninsula, 95½.

The quarterly meeting of ironmasters has been held this week. Very little business has been done, and manufactured iron has slightly given way in price.

The Economist's Railway and Mining Share List.

FREDERICK DENT,
Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

RUPTURES—BY ROYAL LETTERS PATENT.
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.
Mr WHITE, 228 Piccadilly, London.
Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each: postage, 6d.
WHITE, MANUFACTURER, 228 Piccadilly, London.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

DR. CURTIS'S MEDICAL WORK. "MANHOOD. An Essay on Nervous and Generative Diseases. The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.
REVIEWS OF THE WORK.
"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.
"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.
N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.
Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.
The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 80 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German, Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

FURNITURE CARRIAGE FREE.—Clergymen about to Furnish are most respectfully informed that RICHARD LOADER and Co. have just published an entirely new and elegant "Illustrated Furnishing Guide," comprising 216 well-executed designs of Cabinet and Upholstery Furniture, Iron Bedsteads, &c., which guide they will be happy to forward on application to intended purchasers, Gratis and Postage Free. This valuable Pamphlet also contains an estimate for completely furnishing a moderate-sized Parsonage House, which, it is hoped, may be found of much service to those desiring such assistance. Every article warranted for twelve months, and exchanged if found defective. All orders are Delivered Carriage Free to any part of the United Kingdom.
RICHARD LOADER and Co., Manufacturing Cabinet-Makers, Carpet Warehousmen, and General House Furnishers, 23 and 24 Pavement, Finsbury, London, E.C.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.
CHEAP, LIGHT AND DURABLE ROOFING.
CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates
1st. It is a non-conductor.
2nd. It is portable, being packed in rolls, and not liable to damage in carriage.
3rd. It effects a saving of half the timber usually required.
4th. It can easily be applied by any unpractised person.
5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.
INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.
Price ONE PENNY PER SQUARE FOOT.
CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.
AND
Just published, second edition, price 1s 6d,
CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.
"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.
"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.
"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.
"Mr Hare is, we think, a sound and successful practitioner."—MEDICAL CIRCULAR.
London: John Churchill; and may be had of all booksellers

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced, containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH

is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

DINNEFORD'S PURE FLUID MAGNESIA

has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

ALLSOPP'S PALE OR BITTER ALE.

—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross.
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the table can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

TRADE B/P MARK.

BROWN AND POLSON'S

PATENT CORN FLOUR,

In packets 2d, 4d, 8d, and tins 1s, 5s, and 9s 6d.

Considerable extra advantage is allowed upon the sale of articles similar in appearance, to encourage their being recommended in place of Patent Corn Flour, to support which practice unscrupulous announcements are made use of. It is therefore respectfully suggested that Families should observe that no other kinds are substituted for Brown and Polson's, of which the LANCET states (July 24, 1858), "This is superior to anything of the kind known,"—an opinion indisputably confirmed by scientific tests and public appreciation.

BROWN and POLSON, Manufacturers and Purveyors to Her Majesty the Queen: Paisley, Manchester, Dublin, and London.

DR MARSTON'S LECTURES.—

FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

DR KAHN ON MARRIAGE.—

A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either, from the publisher, J. Allen, 20 Warwick lane: or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

CHUBB'S PATENT SAFES

—the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

FIRE AT LONDON BRIDGE.—

CHUBB'S FIREPROOF SAFES gives the best protection to books, papers, &c., from fire. All sizes, with various fittings, on sale. Copies of testimonials from firms in London, Manchester, Wolverhampton, and other places, whose property has been preserved by Chubb's Safes, with lists of prices, may be had on application.

CHUBB and SON, 57 St Paul's churchyard.

MR LEWIS AND SON,

113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons. Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

THE FRENCH AND GERMAN PROTESTANT COLLEGE,

Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

Under the Patronage of the Governments of Great Britain, Spain, Denmark, Brazil, Russia, &c., &c.

EASTON'S PATENT BOILER FLUID

effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M. steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Kurrachee, and by engineers and manufacturers throughout the country.

Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

KEATING'S PERSIAN INSECT DESTROYING POWDER.

This powder is quite harmless to animal life, but is unrivalled in destroying fleas, bugs, emmets, flies, cockroaches, beetles, gnats, mosquitoes, moths in furs, and every other species of insects in all stages of metamorphosis.

Sportsmen will find this an invaluable remedy for destroying fleas in their dogs, as also ladies for their pet dogs, and sprinkled about the nests of poultry, it will be found extremely efficacious in exterminating those insects with which they are usually infested. It is perfectly harmless in its nature, and may be applied without any apprehension, as it has no qualities deleterious to animal life.

Sold in packets, 1s, 2s 6d, and 4s 6d each, or post free for 14, or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79 St Paul's churchyard, London, E.C.

Take notice, each genuine packet bears the above name and address.

EXTRAORDINARY DISCOVERY—NEW THEORY. (Medicines Superseded.)

NERVOUS DEBILITY AND ITS

train of evils, such as self-distrust, timidity, pimples on the skin, loss of memory, thoughts of suicide, trembling of the limbs, depression and prostration of the system &c., immediately checked and speedily cured by the Newly-Discovered Patent Appliance. Advice and instructions post free on receipt of two stamps, by Dr Watson, U.S., F.R.A.S., President of the Medical Reform Society of Great Britain. No. 27 Alfred place, Bedford square, London. Consultations daily from 11 till 2 and 6 till 8 on all these ailments and infirmities peculiar to youth, manhood, and old age, which tend to embitter and shorten life. For distinguished qualifications vide diplomas.

HOLLOWAY'S PILLS AND OINTMENT.—Health-imparting Medicines.—

In hot climates and our own hot summers, the greatest benefit has been conferred upon mankind by the discovery of these valuable preparations, the excellence of which is universally testified. They stand unrivalled, and may safely be recommended to people of all degrees when suffering from overheated blood, disordered stomach, or biliousness. They act as the gentlest aperients and most reliable alteratives, and have for the last thirty years been noted for these virtues, which they briskly exercise over either sex. For heat spots, freckles, rough skin, and similar disfigurements, Holloway's Ointment has long been successfully used. His medicaments brace, invigorate, purify, and give the heart cheerfulness, and the frame vigour.

TEMPORARY OFFICES.—London, 79 Lombard street, E.C.

PROSPECTUS.

The Company is established for effecting the General Insurance of Shipping and Cargoes, also the Insurance of Bullion.

The Directors, on publishing the prospectus of the Oriental and General Marine Insurance Company, announce that in consequence of the progress made since the registration of the Company, they are in a position to state that the allotment of the shares will be proceeded with at an early date.

A clause in the deed of settlement especially provides that every policy issued shall distinctly bear on the face of it that the capital and property of the Company shall alone be answerable for the settlement of its claims and engagements, and that no shareholder shall be liable beyond the amount of his or her share or shares in the stock of the Company.

Marine Insurance Companies, as a medium of investment, increase every year in public favour. The liberality and promptitude of their settlements, their safety, and the ease with which insurances are effected with them, are now fully appreciated.

The principle of Marine Insurance has been practically tested: its wisdom is now generally recognised, and the averages of hazard can be calculated with the nearest conceivable approximation to accuracy.

During the last few years a very lucrative field for Marine Insurance has been opened by the immense increase in the importation of the precious metals to this country, and their exportation to other parts of the world. The bullion trade, so far as it appears in the late official returns (which take no account of large parcels of gold passing by private hands) had risen to the amount of £72,758,959.

By calculations based on these and other accounts of the Board of Trade, it appears that the field of Marine Insurance is extending at the rate of at least fifteen millions sterling per annum.

The immense profits realised by the old established Companies during the last ten years have greatly increased the value of their shares, as shown by the following list of present prices:—

Alliance, £25 paid, is worth about £60.
Indemnity, £5 13s 6d paid, increased by bonuses to £50, is worth about £170.
London, £12 10s paid, is worth about £42.
Marine, £15 paid, increased by bonuses to £18, is worth about £110.
Royal Exchange (Stock) £100, is worth about £360.

We may fairly assume that the four new Marine Insurance Companies established in 1859 and 1860, tended partially to supply a public want, and the prosperity which has attended them is shown by the accompanying statement of premiums received by each:—

	£
Ocean (from 19th December, 1859)	140,000
Universal (from 23rd January to 31st December, 1860)	526,788
London and Provincial (from May, 1860, to May, 1861)	100,257
Thames and Mersey (to 31st December)	107,700
	874,745

It is evident that the commercial community require greater facilities for effecting Marine Insurances; the Directors, therefore, cannot resist the conviction that there is abundant room for the successful prosecution of the present undertaking.

Application for shares, in the form annexed, will receive immediate attention, but no application will be taken into consideration unless a deposit of 10s per share be paid into the Company's bankers, to be allowed in payment of the first call, or returned in the event of shares not being allotted.

All communications on the business of the office to be addressed to the Secretary, at the temporary offices of the Company, 79 Lombard street, London, E.C.

ORIENTAL and GENERAL MARINE INSURANCE COMPANY.
Incorporated pursuant to Act of Parliament, 7 and 8 Vict., cap. 110.
Capital One Million.
Temporary Offices—79 Lombard street, London, E.C.

FORM OF APPLICATION FOR SHARES.

To the Directors of "The Oriental and General Marine Insurance Company."

Gentlemen,—I request that you will allot me shares of £25 each in the above Company, having paid your bankers the deposit of 10s per share thereon, and in consideration of the allotment, or any less number you may appropriate to me, I hereby undertake to pay any call thereon, and I further undertake to execute the Deed of Settlement when required.

Dated this day of 18

WARM WEATHER.—

RIMMEL'S TOILET VINEGAR will be found a perfect luxury this weather, either used for the toilet or bath, or as a reviving scent for the handkerchief. A special uninflammable sort is prepared to be used in Rimmel's Patent Vaporiser, for purifying the air and fumigating sick rooms. (See Dr Letheby's report.)—Rimmel, Perfumer to the Queen, 96 Strand, and 24 Cornhill, London.

SAFE AND PROFITABLE MINING INVESTMENT.

MR T. E. W. THOMAS,

16 Hackins Hey, Liverpool, transacts business in every description of Mining property, and can recommend at the present time as secure and good stock a few Shares in the best DIVIDEND MINES, as also in Mines promising very early Dividends, which, at the present low prices now ruling in the market, cannot fail to be very profitable to an investor.

Mines inspected and reports furnished.

GLENFIELD PATENT STARCH,

USED in the ROYAL LAUNDRY.

The Ladies are respectfully informed that this Starch is EXCLUSIVELY USED in the ROYAL LAUNDRY, and Her Majesty's Laundress says, that although she has tried Wheaten, Rice, and other Powder Starches, she has found none of them equal to the GLENFIELD, which is the FINEST STARCH SHE EVER USED.

WHEN YOU ASK FOR
GLENFIELD PATENT STARCH,
see that you get it, as inferior kinds are often substituted.
WOTHERSPOON and CO., Glasgow and London.

TEETH.—

No. 9 Lower Grosvenor street, Grosvenor square (removed from 61).—By Her Majesty's Royal Letters Patent.—Newly-invented Application of Chemically-prepared India-rubber in the Construction of Artificial Teeth, Gums, and Palates.—Mr EPHRAIM MOSELY, Surgeon Dentist, 9 Lower Grosvenor street, sole inventor and patentee. A new, original, and invaluable invention, consisting in the adaptation, with the most absolute perfection and success, of CHEMICALLY-PREPARED WHITE and GUM-COLOURED INDIA-RUBBER, as a lining to the gold or bone frame. The extraordinary results of this application may be briefly noted in a few of their most prominent features. All sharp edges are avoided; no springs, wires, or fastenings are required; a greatly increased freedom of suction is supplied; a natural elasticity hitherto wholly unattainable, and a fit, perfected with the most unerring accuracy, are secured: while from the softness and flexibility of the agents employed, the greatest support is given to the adjoining teeth when loose or rendered tender by the absorption of the gums. The acids of the mouth exert no agency on the chemically-prepared India-rubber, and as it is a non-conductor, fluids of any temperature may be retained in the mouth, all unpleasantness of smell and taste being at the same time wholly provided against by the peculiar nature of its preparation.

TO MERCHANTS,

SHIPOWNERS, and FORWARDERS.—For Rates of Freight per Grand Trunk Railway, the most direct and only safe route, to all parts of Canada and the Western States, apply at the Grand Trunk Railway Offices, 21 Old Broad street, London, E.C.

TWENTY-SIXTH REPORT OF

THE UNION BANK OF LONDON.

Sir Peter Laurie, Alderman, Governor.
James Farquhar, Esq., Deputy-Governor.

DIRECTORS.

Peter Northall Laurie, Esq.	Sir J. Musgrove, Bt., Ald.
Charles Lyall, Esq.	Harry George Gordon, Esq.
John Chapman, Esq.	Samuel Beale, Esq., M.P.
Archibald Boyd, Esq.	Fleetwood P. Wilson, Esq.
John Scott, Esq.	John Gilchrist, Esq.
Leo Schuster, Esq.	W. Scholefield, Esq., M.P.

At a General Meeting of the Proprietors, held at the Court room of the Banking house, 2 Princes street, Mansion house, on Wednesday, the 10th of July, 1861, P. Northall Laurie, Esq., in the chair, the following Report was read by the Secretary:—

In presenting the Twenty-sixth Report on the affairs of the Bank, the Directors have the pleasure of stating, that the net profits of the Bank for the six months ending 30th June last, after payment of all charges (including the sum of £107,511 1s 4d for interest paid and due to customers on their current and deposit accounts), and making due provision for all bad and doubtful debts, amount to £95,616 18s 2d, which, with the sum of £30,470 18s, brought forward from the 31st December last, leaves for appropriation £126,087 16s 2d.

The Directors now declare a dividend of 12s per share, clear of income tax, for the six months ending 30th June last, amounting to the sum of £36,000, which will leave a balance of £90,087 16s 2d to be carried forward.

In the early part of the year, John Barnes, Esq., tendered his resignation as a Director, to the regret of his colleagues, with whom he had been so long associated; and, in conformity with the provisions of the Deed of Settlement, the Directors elected William Scholefield, Esq., M.P., a duly qualified proprietor, to fill the vacancy.

The following Directors retire by rotation, viz.:—P. Northall Laurie, Esq., James Farquhar, Esq., and John Chapman, Esq., who, being eligible, offer themselves, and are recommended by the Court for re-election.

London, July 10th, 1861.

THE UNION BANK OF LONDON.
For the Half-year ending 30th June, 1861.

GENERAL BALANCE.

Dr. Liabilities.	£	s	d

	11,168,289	18	2

PROFIT AND LOSS ACCOUNT.

Dr.	£	s	d
Amount of dividend of 12s per share	36,000	0	0
Balance, being undivided profit carried forward	90,087	16	2
	126,087	16	2

Cr.	£	s	d
Profit unappropriated on 31st Dec., 1860	30,470	18	0
Amount of net profit of the half-year ending 30th June, 1861, after deducting all expenses, and interest paid or due (£107,511 1s 4d) allowed to customers on their current and deposit accounts	95,616	18	2
	126,087	16	2

The Chairman then declared a dividend for the past half-year of 12s per share, clear of income tax.

It was resolved unanimously—

That the report now read be adopted, printed, and circulated among the proprietors.

That P. Northall Laurie, Esq., be re-elected a Director of the Bank.

That James Farquhar, Esq., be re-elected a Director of the Bank.

That John Chapman, Esq., be re-elected a Director of the Bank.

That the sincere and cordial thanks of the meeting be given to the Court of Directors for the very successful manner in which they have conducted the business of the Bank.

That this meeting desire to record their feeling of sincere respect for their Governor, Sir Peter Laurie, and that the only subject of regret connected with the proceedings is, that he is prevented giving his personal attendance at this general meeting.

That the thanks of the meeting be given to Mr W. W. Scrimgeour, the General Manager; Mr Barton, the Deputy-Manager; Mr Ingpen, the Manager of the Regent Street Branch; Mr St. Barbe, the Manager of the Charing Cross Branch; Mr Beattie, the Manager of the Temple Bar Branch; and Mr Henry Newmarch, the Secretary, for the zealous and efficient manner in which they have discharged their several duties.

(Signed) P. NORTHALL LAURIE, Chairman.

That the thanks of the meeting be given to P. Northall Laurie, Esq., for his able and courteous conduct in the chair.

(Signed) JAMES FARQUHAR, Deputy-Governor.

Extracted from the Minutes.

HENRY NEWMARCH, Secretary.

N.B. The dividend will be payable on and after Saturday, the 20th instant.

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,

Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr GRANVILLE, F.R.S.—"Dr Granville has found Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LANKESTER, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

MAIDS OF HONOUR.—

A NOVEL.
By FOLKESTONE WILLIAMS.
London: Kent and Co., Paternoster row.

THE LANDS IMPROVEMENT

COMPANY (incorporated by Special Act of Parliament in 1853), 2 Old Palace yard, Westminster, S.W.—To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales, and in Scotland.—The Company advances money, unlimited in amount, for the following works of agricultural improvement, the whole outlay and expense in all cases being liquidated by a rent-charge for 25 years:—

1. Drainage, irrigation, and warping, embanking, enclosing, clearing, reclamation, planting for any beneficial purpose, engines or machinery for drainage or irrigation.

2. Farm roads, tramways, and railroads for agricultural or farming purposes.

3. Jetties or lading places on the sea-coast or on the banks of navigable rivers or lakes.

4. The erection of farmhouses, labourers' cottages, and other buildings required for farm purposes, and the improvement of and additions to farmhouses and other buildings for farm purposes.

Landowners assessed under the provisions of any Act of Parliament, Royal Charter, or Commission, in respect of any publicor general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses of the lands improved.

No investigation of title is required, and the Company, being of a strictly financial character, do not interfere with the plans and execution of the works, which are controlled only by the Government Enclosure Commissioners.

For further information and for forms of application apply to the Hon. William Napier, Managing Director, 2 Old Palace yard, Westminster, S.W.

ROWAN'S NEW PATENT FLAX

SCUTCHING MACHINE.

Messrs JOHN ROWAN and SONS, York street Foundry, Belfast, have just finished and patented a new FLAX SCUTCHING MACHINE, which, in point of cheapness and efficiency, surpasses any machine yet made. It is simple in construction, occupies a small space, is easily driven and attended, and can be attached to any motive power. It is worked by two persons, and will clean from 35 lbs to 40 lbs of flax per hour, in a superior manner, and with a great economy of fibre. Descriptive particulars will be forwarded on application. The extremely low price of this machine brings it within the reach of every flax grower. Price £24, f.o.b., or at any of the Belfast railway termini. The machine can be seen at work on Tuesdays and Fridays, between eleven a.m. and four p.m., at the Foundry.

CONTRACT FOR COALS FOR JAMAICA.
Department of the Storekeeper-General of the Navy,
Somerset place, July 6, 1861.

THE COMMISSIONERS FOR executing the Office of Lord High Admiral of the United Kingdom of Great Britain and Ireland do hereby give notice, that on Tuesday, the 16th instant, at Two o'clock, they will be ready to treat with such persons as may be willing to contract for supplying and delivering into store at Her Majesty's Naval Yard, at Jamaica, 3,000 tons of SOUTH WALES COALS, fit for the service of Her Majesty's steam vessels.

Conditions of the contract and a form of the tender may be seen at the said office. No tender will be received after Two o'clock on the day of treaty, nor will any be noticed unless the party attends, or an agent for him duly authorised in writing.

Every tender must be addressed to the Secretary of the Admiralty, and bear in the left-hand corner the words "Tender for Coals for Jamaica," and must also be delivered at Somerset place, accompanied by a letter signed by two responsible persons, engaging to become bound with the person tendering, in the sum of £1,200, for the due performance of the contract.

ROYAL AGRICULTURAL SOCIETY

of ENGLAND.

LEEDS MEETING.—1861.

PROGRAMME:—

MONDAY, JULY 15.—The Implement Yard open from Seven o'clock in the morning, at an admission charge of 5s for each person.

The Judges to inspect the Live Stock, and to award the Prizes.

At One o'clock (or as soon after as all the Judges shall have delivered in their awards, of which notice will be given) the Cattle Yard will be open without additional payment. Arrangements have been made for distinguishing the Animals that have won the Prizes, immediately the Judges have made their awards. The Show Yard will be closed at Six o'clock in the evening.

TUESDAY, JULY 16.—The General Show Yard of Cattle, Horses, Sheep, Pigs, Implements, Flax, Wool, Cheese, and Butter, open to the Public from Six o'clock in the morning till Six in the evening; admission, 2s 6d each person.

WEDNESDAY, JULY 17.—Public Dinner at Five p.m., in the Town Hall. The Earl of Powis, President, in the Chair. Tickets, 10s each, to be obtained of the Secretary.

The General Show Yard open to the Public from Six o'clock in the morning till Six in the evening; admission, 2s 6d each person.

Public working of the Steam Cultivators, on land in the neighbourhood of the town during such hours as the Stewards may determine.

THURSDAY, JULY 18. } The General Show Yard open
FRIDAY, — 19. } to the Public from Six o'clock in the morning till Six in the evening; admission, 1s each person.

FRIDAY, JULY 19.—General Meeting of the Members in the Town Hall, at Eleven o'clock in the forenoon.

Governors' and Members' Tickets to be had on application to the Secretary.—By order of the Council,
H. HALL DARE, Secretary.

12 Hanover square, London, W., June 5th, 1861.

MERCHANTS HAVING

commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power, in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

Terms of Subscription.

PAYABLE IN ADVANCE.

CEYLON COFFEE ESTATES.—To be Sold by Public Sale, in Colombo, Ceylon, on Friday, September 6th, unless previously disposed of by Private Sale, the NELLA OOLLA COFFEE ESTATE, Kurnegalle, about 20 miles from Kandy, consisting of about 202 acres planted, and 310 of fine forest land, with good stores, machinery, lines, &c.

Also, BOTAWE, a tract of fine forest land adapted for Coffee, adjoining Nella Oolla, and consisting of about 300 acres. These lands are held in fee direct from the Crown, and the soil is among the richest in the Coffee Districts of Ceylon.

Further particulars obtainable from Messrs O'Halloran and Co., 12 Billiter square, London; and Messrs Parlett and Co., Colombo, Ceylon.

FRENCH WINE BOTTLES, Soda Water Bottles, Confectioners' Bottles, Drug, Dispensing, and Castor Oil Bottles, Wine, Ale, and Porter Bottles, from Stock in London or direct from the Works.—AIRE and CALDER GLASS BOTTLE COMPANY, Castleford; Free Trade Wharf, Ratcliff; and 61 King William street, E.C. The Patent Steppered Bottles of all kinds

LOANS ON DEBENTURES.—The London, Chatham, and Dover Railway Company are prepared to receive Tenders for Loans of £100 and upwards, on Mortgage of the Metropolitan Extension Lines, authorised by Act of Parliament, to last for three or five years, at 6 per cent. per annum.—By order,
G. F. HOLROYD, Secretary.
Offices, 3 Victoria street, Westminster, S.W.

A FEW GENTLEMEN OF POSITION, willing to become Directors of a Public Company of the first-class, of the highest possible national importance, and one which the most sensitive and punctilliously honourable public man might feel justly proud of connecting himself with, may obtain full particulars by addressing in confidence E. P., 58 Lombard street. It is a matter which will extort the warm support of Government, and will certainly confer additional influence on even the most influential member of Parliament who would identify himself with its inauguration. The adhesion of a few gentlemen of position has been already secured.

CLERK.—THE ADVERTISER, who has lately returned from South America, is desirous of a re-engagement, either at home or abroad. Has a thorough knowledge of bookkeeping and accounts, and is well acquainted with Spanish.—Address E. G., Messrs Mackie and North's, 29 Threadneedle street, E.C.

A GENTLEMAN, 26 YEARS OF age, who has a general knowledge of business, is desirous of meeting with employment in a Merchant's or Broker's office. Satisfactory references will be given.—Address C. L., care of Messrs Griffiths and Loat, 174 High street, Southwark.

INSURANCE.—FIRE AND LIFE.—A Gentleman of high standing and long experience in the Insurance world, is in a position to establish a London branch of a respectable Provincial Office, or will associate himself with Gentlemen desirous of forming a New Office to check the undue advance of premiums upon merchandise, &c.—Address Cantab, City News Rooms, Cheapside, London.

TO CAPITALISTS.—AN opportunity now presents itself to any person having the immediate command of £16,000, to make six times that amount in a short time, without trouble or relinquishing for a moment the control of his capital.—Apply, with real name and address, to A. B., Messrs Mason and Lott, 55 Coleman street, E.C.

PARTNERSHIP.—AN ELIGIBLE opportunity offers for a Gentleman having at command £1,500 to £2,000, to join the advertiser in an old-established manufacturing business, trading with the wholesale houses. First-class references will be given and required.—Address O.P., 28 Addle street, E.C.

PARTNERSHIP.—A GENTLEMAN with £3,000 to £5,000 desires the above (or to take the place of a retiring Partner), in an established East India or Colonial House, or any first-class mercantile firm.—Address A.B., Mr Alexander Comrie, 30 Regent street, Piccadilly, S.W.

PARTNERSHIP.—WANTED, by a London firm having an establishment abroad and importing first-class colonial produce, a Partner with a capital of £8 to £10,000, which can be partly secured.—Particulars will be given to principals only, or to their solicitors, on application to Messrs Ashurst, Son, and Morris, 6 Old Jewry, City.

PARTNERSHIP OR MANAGER.—A Gentleman thoroughly conversant with and experienced in mercantile business, and who can give the highest references, is desirous of entering a house of good standing as Manager, with a view to an ultimate partnership. He would introduce a first-class and valuable connection, and, if desired, would contribute some capital. A house might thus with advantage supply the place of a retiring partner.—Apply to F. Rolf, Esq., solicitor, 4 Skinner's place, Size lane, E.C.

TO MERCHANTS.—THE Advertiser, age 34, is desirous of employment in a situation of responsibility, where experience derived in Liverpool and London, and in India, whence he had recently returned and where he had for several years entire charge of the affairs of a Mercantile House, might be found serviceable. Satisfactory references can be given.—Address R.T., care of Mr Aird, 18 Exeter street, Strand.

TO BANKERS, BANK MANAGERS, and OTHERS, requiring a confidential and industrious Young Man.—A Banker's Clerk, who has had nearly sixteen years' experience of banking business in London and the country, is desirous of obtaining an appointment in any department of a Banking Establishment or Merchant's Office, where zeal, ability, and integrity would be appreciated. The advertiser is 29 years of age, and can furnish the highest references and testimonials of character, &c.—Address G. C., London road, Peterborough.

TO PRIVATE AND JOINT STOCK BANKS.—A Gentleman, well acquainted with Banking in all its branches, wishes to meet with employment as Manager or Inspector, having had 30 years' experience. Would not object to enter an establishment whose officers might perhaps require supervision. The strictest secrecy guaranteed. References given as to character and ability.—Apply by letter to H. S. M., care of Messrs Bjades and East, 11 Abchurch lane, King William street, E.C.

TO BANKERS, RAILWAY AND OTHER COMPANIES.

BANK NOTES, BILLS OF EXCHANGE, LETTERS OF CREDIT, BONDS, CHEQUES, SHARES CERTIFICATES, &c.

HENRY BRADBURY, WILKINSON, AND CO.

devote their attention exclusively to the production of

BANK NOTES AND ALL DOCUMENTS OF SECURITY,

in which are combined all recent discoveries for the prevention of successful Forgery. A Specimen Book showing the character of work recommended will be submitted, upon application.

12 AND 13 FETTER LANE, LONDON, E.C.

MUTUAL ASSURANCE WITHOUT INDIVIDUAL LIABILITY.

Extracts from the Report of the Directors for the year 1860:—

	£ s d
Number of new policies issued during the year	988
Assuring the sum of	481,231 1 10
Producing an annual income of	16,053 15 7
Making the total annual income after deducting £50,112 annual abatement in premium	238,251 10 4
Total number of policies issued, 25,573	
Amount paid in claims by the decease of members, from the commencement of the institution in December, 1835	1,034,368 5 4
Amount of accumulated fund	1,398,895 14 11

The effect of the successful operation of the society during the whole period of its existence may be best exhibited by recapitulating the declared surpluses at the four investigations made up to this time.

	£ s d
For the 7 years ending 1842 the surplus was	32,074 11 5
— 5 years — 1847 — —	86,122 8 3
— 5 years — 1852 — —	232,061 18 4
— 5 years — 1857 — —	345,634 3 11

The next division of profits will be made up to the 20th November, 1862. Policies effected prior to that date, if subsisting at the time of division, will participate in such profit for the time they may have been in force.

The prospectus, with the last report of the Directors, and with illustrations of the profits for the five years ending the 20th November, 1857, may be had on application, by which it will be seen that the reductions on the premiums range from 11 per cent. to 98¼ per cent., and that in one instance the premium is extinct. Instances of the bonuses are also shown.

Members whose premiums fall due on the 1st of July are reminded that the same must be paid within 30 days from that date. JOSEPH MARSH, Secretary.

June, 1861.

ACCIDENTS OF ALL KINDS,

and from Any Cause, may be provided against by an Annual payment of £3 to the RAILWAY PASSENGERS ASSURANCE COMPANY, which secures £1,000 at death by Accident, or £6 weekly for Injury.

No Extra Premium for Volunteers.

One Person in every Twelve insured is injured yearly by Accident.

£75,000 has been already paid as Compensation.

For further information apply to the Provincia Agents, the Railway Stations, or at the Head office, 64 Cornhill (late 3 Old Broad street).

Annual Income, £40,000.
Capital, One Million.

W. J. VIAN, Secretary.

64 Cornhill, E.C., January, 1860.

LIFE ASSURANCE.—

Special Notice.—The next investigation into the profits of the Life Department of the SCOTTISH UNION INSURANCE COMPANY will be made as at 1st August, 1861, and parties taking out policies before that date will participate in the division.

625 new policies, for £304,705, yielding £9,828 6s 2d of new premiums, were issued during the year ending 1st August, 1860.

Thirty days' grace allowed to renew life insurances and 15 days to renew fire insurances, during which time, on payment of the premium, the Company hold themselves liable.

No extra premium charged for members of volunteer or rifle corps within the United Kingdom.

FREDK. G. SMITH, Secretary to the London Board.
No. 37 Cornhill, London.

THE SCOTTISH WIDOWS' FUND and LIFE ASSURANCE SOCIETY is a purely mutual office, in which the whole funds belong to the members, and the profits are divided among them alone. Since it was founded in 1815, its history has been one of constant and increasing prosperity; and it is now, in point of funds, annual revenue, and number of members, one of the largest Life offices in the world. The security presented by the Society to its members and their representatives is of the most unquestionable character, while the returns made in the form of bonuses are, it is believed, not exceeded by those of any other similiar institution. The following is a

MEMORANDUM OF BUSINESS, BONUSES, FUNDS, AND REVENUE,

Extracted from the Society's detailed Prospectus.

	£
1. Total assurances issued	14,621,724
2. Total bonuses declared	3 033,049
3. Sums assured and bonuses existing	10,886,591
4. Total claims paid exceed	3,600,000
5. Invested funds	3,601,764
6. Annual revenue	425,738

Forms of proposal, detailed prospectuses and reports, and every information may be had at the Head Office, or any of the Society's agents.

SAMUEL RALEIGH, Manager.
J. J. P. ANDERSON, Secretary.

SPECIAL NOTICE.

Proposals dated and lodged at the Head Office, or with any of the Society's agents, during the current year, will secure One Bonus more than those of later date.

LONDON HONORARY BOARD.

George Young, Esq., Mark lane.

SECRETARY—Sir Samuel Bignold.

The whole of the profits divided with the assured.

Ample security offered by an accumulated capital of £2,000,000.

One-half of the first five annual premiums may remain as a permanent charge upon policies granted for the whole duration of life.

The income of the Society is upwards of £227,000.

The amount insured is upwards of £5,078,000.

Since its commencement 32,700 policies have been issued, and £5,666,555 paid to the representatives of 6,854 deceased members.

The bonuses may be applied at the option of the assured as follows:—

As a bonus added to the policy, or the amount may be received at once—that is, its cash value, or it may be applied in reduction of the future annual premium.

The rates of premium are lower than those of some offices by nearly 10 per cent., a benefit in itself equivalent to an annual bonus.

For prospectuses apply at the Society's offices, Surrey street, Norwich, and 6 Crescent, Blackfriars, London.

QUEEN INSURANCE COMPANY (FIRE, LIFE).

Chief Office—Queen Insurance buildings, Liverpool.
Offices in London—83 King William street, E.C.
Capital—Half-a-Million, with power to increase to One Million.

LONDON BOARD.

CHAIRMAN—Henry Bruce, Esq., merchant, Bell court, Mincing lane.
Edward P. Alderson, Esq., (firm, Kelson, Tritton, and Co.), Old Broad street.
Henry Fowler, Esq., (firm, H. and R. Fowler), St Saviour's Dock, Southwark.
Thomas Wm. Kough, Esq., (firm, Jones Brothers), Upper Thames street.
Samuel Lloyd Stacey, Esq., (firm, Corbyn, Stacey, Messer, and Co.), Holborn.

BANKERS—Messrs Barclay, Bevan, Tritton, and Co.

Mercantile and other descriptions of Fire Insurances effected.

Losses promptly and liberally settled.

Life assurance in every branch.

Days of Grace.—Full protection granted under both fire and life policies during the period allowed for their renewal.

W. P. CLIREHUGH, Manager and Actuary.
H. B. TAPLIN, London Secretary.

FREE ASSURANCE.

The Policies of the STANDARD LIFE ASSURANCE COMPANY are relieved from all restrictions as to residence Abroad (except in special cases), and they are otherwise so framed as to afford the most complete security in connection with Family Provisions, Marriage Settlements, Loan Transactions, and the various other purposes in connection with which the protection of Life Assurance is sought.

The STANDARD LIFE ASSURANCE COMPANY was established in 1825, and during the last fourteen years the annual average of New Assurances has exceeded Half a Million sterling, being the largest business transacted in that period by any Life Assurance Office. The new Assurances effected in 1860 alone were upwards of £700,000. The business is a purely home business, the Company having no agencies out of the United Kingdom.

Accumulated fund	£1,856,802 19 4
Annual revenue	£304,161 13 7

THE SIXTH DIVISION OF PROFITS

was made on 9th May last, when it was reported that the Bonus Additions were at the rate of 150 per cent. on the sum assured on Policies effected in 1825; 100 per cent. on Policies effected in 1831; and 50 per cent. on Policies effected in 1840. Next Division of Profits in 1865.

THE INVESTIGATION REPORT,

showing these important advantages, is now ready, and may be had at the Office, or Agencies of the Company.

WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, Res. Secretary.

LONDON ..... 82 King William street.
EDINBURGH..... 3 George street (Head office.)
DUBLIN..... 66 Upper Sackville street.
GLASGOW..... 35 St Vincent place.

The Political Economist.

THE PRESIDENT'S MESSAGE.

Mr Lincoln's message is no exception to a remark we made not long since, that the official documents of a revolution are almost always very unworthy of the magnitude of the revolution itself. They are necessarily an attempt to reduce to law a state of things which has no law; they necessarily comment in the language of jurisprudence upon a tumult in which jurisprudence itself has ceased to exist. There is but little in all Mr Lincoln's retrospective exposition which has not very frequently been said before, or which, except for the exigencies of his official position, need to have been repeated now. Mr Lincoln proves that the South have not, by the constitution of the United States, a right to secede, and he wins in an easy argument a useless victory. George the Third, by similar arguments and with analogous facility, proved that the "North American Colonies" of England had no right to secede from the mother country. And what then? Mr Burke replied that you could not draw "a bill of indictment against a whole nation." The philosopher perceived what the King of his day and the people of his day could not perceive, that if a whole community of armed and civilised men wish to separate from the nation which governs them, they will separate. National pride, military power, financial strength are useless against the united resources of a whole people. George the Third failed, not because England was not strong enough or rich enough to conquer an American army or ten American armies, but because England would not have been strong enough to retain, and was too wise even to wish to retain, in perpetuity, a compulsory authority over a scattered, a hostile, and a martial people. Mr Lincoln will fail, for a like reason: the North is strong and rich, but it is neither so strong nor so rich as the England of George the Third; the South is neither so weak nor so poor as the "United States" of Jefferson and Washington.

It is plain that Mr Lincoln wishes to carry on the war earnestly. But for what is he fighting? For some months past this has been a topic of perpetual discussion in this country. Since Mr Lincoln's inaugural address there has been no authentic exposition of the intentions of the American Government. Accordingly the large party in this country who are opposed, and rightly opposed, to the continuance of slavery, hoped that the war was more or less a war for the abolition of slavery. In the absence of official statements, it was not easy to confute them; it was impossible to say that they *might* not be right in a conjecture which had philanthropy, if not probability, on its side. We ventured, however, on several occasions to indicate our doubts. We did not believe that the Northern community, where the doctrine of abolition was only a year since bitterly unpopular, had in a few months become *crusading* Abolitionists. Now we have an authentic exposition of the intentions of the American Government. And what does it say? It does not suggest or hint that the cessation of Negro slavery may be a *consequence* of the war: it does not say that the abolition of that slavery is the *object* of the war:—it says as distinctly as words can say it, that Mr Lincoln is fighting to bring back the South—the South as it stands, with its angry population and with its slaves into a union with the North: it says that Mr Lincoln is desirous of conquering certain seceding communities: it implies that having conquered them, he is willing to continue the old federal union with them, but it does not say that he intends to set free their slaves. Unquestionably he does not intend it. The war is a war of conquest, not a war of philanthropy.

For England, it is even more material to observe that this message is so clearly and strongly warlike as to bring the speculations as to the prospective supply of cotton, with which we have favoured our readers this week and last, still more within the domain of pressing and practical questions. The chances of a complete and systematic interruption to the transmission of the American crop to Europe increase with every fresh demonstration of vigour and determination on the part of the North. And this is the interpretation put upon the tidings by merchants both here and at Liverpool. As to the latter place, it has led to large sales of cotton and a decided advance in price. If there is to be a war, no doubt the Northerners are right in straining every nerve to end the conflict at once. If they succeed, the affair is ended: if they fail, the very magnitude of the scale of their operations may serve to convince them that success is impossible, and thus equally contribute to a settlement. As far as this country and its commercial interests are concerned, anything which shortens the strife by enhancing its dimensions will be a gain. The more earnest the North is, and the more vigorous and extensive are its preparations, the more certain it becomes both that we shall not have any cotton at present and that we shall have plenty a year hence. The double certainty may throw some light upon the *probabilities*, which are all we have to guide us in our mercantile transactions.

We give elsewhere a full account of the financial proposals of the American Secretary of the Treasury in his own words. And we have only to guard our readers against the erroneous notion which has been spread by the first telegraphic announcement, that the large loan which the American Government will require will be asked for *at once*. What is asked is only an *authority* to borrow, to be exercised from time to time, and which will doubtless be exercised reasonably and moderately.

THE COMMERCIAL CONSEQUENCES OF THE AMERICAN BLOCKADE.

Last week we earnestly endeavoured to persuade our readers to consider, if only as an hypothesis neither fanciful nor remote, what would be the effect upon the cotton manufacture of Great Britain in case the blockade of the Ports of the Seceding States should be so strict and so long continued as to deprive us of our whole annual supply of cotton from that quarter; and what steps it was desirable to take in anticipation of such a very possible contingency. We were the more anxious to call attention to this uncomfortable question because we found, even among those most immediately concerned, a rooted unwillingness, approaching to inability, to contemplate any such result as within the range of rational calculation. The merchants of Liverpool and the spinners of Manchester seemed alike to have made up their minds that because cotton was grown and was *wanted*, it would be sure to come; and, having thus "spoken to themselves smooth "things and prophesied 'Peace, Peace,' where there was no "peace," to be little inclined to trouble themselves with any speculations as to the *modus operandi* by which their sanguine hopes were to be realised. We wish now to consider this part of the subject somewhat more fully, with a view to ascertain what prospect really exists of the American cotton coming forward as imagined.

Commercial men, with that sort of unreasoning instinct which is so natural to them and which is usually so sound, have jumped to the conclusion that where an article exists which one people are intensely eager to sell and another people are intensely eager to buy, no power on earth can thoroughly or for long prevent the transfer from being effected. They say that all experience bears them out in this anticipation. They point to the war of 1812, when we got the American cotton as usual at the very moment when we were *fighting tooth* and nail with the Americans. They point to the opium trade with China, to the Slave trade with Cuba, to smuggling trades generally all over the world, to show that the most powerful Governments and the most active efforts of fanatical philanthropists cannot prevent the supply to any nation of any article that is vehemently desired. They remind us that the eager desire of Napoleon at the height of his power to exclude English manufactures from the Continent was completely baffled by the force of circumstances; and that his own soldiers were clothed with the produce of our looms, even by the connivance of his own Marshals.—There is great weight, no doubt, in all these arguments and illustrations, though they do not fully bear out the conclusion in confirmation of which they are adduced. In 1812 *we* were ourselves the belligerents; we were by no means anxious so to blockade the enemy's ports as to deprive ourselves of cotton. We were willing enough often to allow vessels to sail, satisfied that if they escaped our cruisers their cargoes would find their way to us through neutral markets, and that if seized, they would reach us by a still cheaper and directer process. But notwithstanding this double operation of capture and connivance, the quantity we received both directly and through Brazil did fall off considerably. The total was as follows:—

	lbs.
1810	81,000,000
1811	67,000,000
1812	42,000,000
1813	Records destroyed by fire.
1814	35,000,000

The opium trade with China, though a contraband one, is scarcely a case in point; for the Chinese Government was one of the weakest and corruptest in the world. Our efforts to suppress the Slave trade have been baffled fully as much by the recalcitrance of nations which we could not coerce, as by the skill of the Spanish and Portuguese traders. But this case, and that of the defeat of Napoleon's Berlin and Milan decrees, are unquestionably signal instances of the power of Profit when matched against armed force; and we are prepared even here to hope much from its energising motives.

But, though we are and must be anxious purchasers, is it by any means so sure that the Americans are anxious sellers? At present, certainly, it would appear to be just the reverse. The Government at least—and in a democratic country like America the people and the Government are one—seem bent upon preventing the export of cotton. They are above all things anxious that the Northern States shall not get any, hoping by this means to distress and coerce the manufacturers they hate; and next to this they are anxious that France and England shall receive as little as possible, believing that by this means those countries will be induced to interfere in their behalf or with a high hand to put down the blockade. Accordingly they have prohibited the export of their staple article by land or river, except towards Mexico;—and besides this strong and singular enactment they appear to have some queer scheme of purchasing the crop from the planters and paying them in Treasury notes,—in order, no doubt, as they fancy, to keep this cherished means of "coercion by "starvation" more effectually in their own hands. It may possibly be true that the cotton-growers are not partic[illegible]rly zealous for this indefinite suspension of their trade and its rich returns, but they make no sign, and appear to coincide both with the projects and the expectations of the authorities. It is even probable that as time goes on and the privation of accustomed luxuries begins to be seriously felt, both the planters and the Government may be desirous to relax their "self-denying ordinance"; but at present the Seceding States present the anomalous spectacle of forbidding the export of that article by land which their enemies forbid the exportation of by sea—both parties in fact combining to prevent its reaching the foreigners who are so anxious to procure it.

It may not be denied that there is a certain amount of rationality in the anticipations of Mr Jefferson Davis and his colleagues as to the consequences both on their enemies and on neutrals of a dearth of cotton, though, as unquestionably, they much exaggerate its influence. The manufacturers of New England will no doubt suffer considerably by the loss of their usual supply of the raw material, though their stock must be unusually large and the markets for their produce must be much curtailed. But considering the exasperated passions of both parties and how little they are accustomed to submit to either coercion or constraint, we no more expect the North to be brought to terms because they cannot buy cotton than the South because they cannot sell it. It is a fact well worth considering, that within the last few days the Boston spinners have been making inquiries in Liverpool as to the terms on which they can be supplied with the raw material *from our markets*, and some small lots have already been sent out to New York. We do not for a moment suppose, that either the French or the English Government will be induced by the distress of their respective manufacturing populations to attempt to raise or to prohibit the blockade—any such step would be equivalent to a declaration of war against the North—but it is certain that the distress which neither country can wholly escape will make the two Governments most pressing in tendering their mediation to bring about a termination of the contest. As yet, however, nothing has transpired in the acts or the attitude of either of the belligerents to warrant the least hope that they would listen to any such proposals. We have just learned that the spinners of Rouen have been urging upon Louis Napoleon the desirability of some immediate steps to avert the threatened calamity, and have received for answer that he is as alive as they can be to the gravity and the pressing nature of the case. As soon as the Americans are in a frame of mind to listen to the notion of European mediation, they will not be far from a settlement of the quarrel without our interposition. But they seem months, if not years, distant yet from so desirable a temper.

It remains to be seen what other chances there may be of some *mitigation*, by miscellaneous means, of that hermetical sealing-up of the cotton crop with which, to all appearance, we are threatened. These means are neither numerous nor promising, but they are worth something.—In the *first* place, it is considered that, though the large Ports whence cotton is usually shipped are few and easily blockaded, there are other smaller ones where light craft might run in and out with great facility, each carrying a few bales, which could be transhipped out at sea into larger vessels fitted for the Atlantic voyage. There can be no doubt that this process will be carried on to a great extent, and that a certain, perhaps a considerable, proportion of these cargoes may escape the vigilance of the United States cruisers, which are not as yet numerous. But it must be borne in mind that cotton is a very bulky article, not easily concealed or stowed away,—a bale worth 12*l* or 15*l*, weighing 5 cwts and measuring

5 feet by 3 and 4; and it is probable therefore that the quantities that could thus escape observation must be reckoned rather by tens than by hundreds of thousands of bales. —In the *second* place, it would seem that the Southerners themselves imagine that a good deal will find its way into Mexico and be shipped from Tampico and other ports in that Republic. Of course some will come that way; but in a wild country like Texas and the adjacent provinces roads are few and bad, and water-carriage is not handy, and the expense of transporting merchandise like cotton bales through such a district must be enormous. We are, therefore, not sanguine of any great relief from that quarter, though some driblets may come to mitigate the dearth.—*Thirdly*, when cotton reaches such a price as to leave enormous profits on a single cargo, adventurous merchants in both hemispheres will no doubt make every possible exertion to evade the blockading squadrons, and will calculate, as the Slave-traders do, that if one vessel out of two or three evade capture, they will still be gainers by the enterprise. Some of our leading commercial houses connected with the American trade place, we are informed, considerable reliance on this source of supply. We dare say they are right: we have only to observe that the hypothesis supposes cotton to have reached a more than famine price.—*Lastly*—for we presume we must not venture to hint at the possibility of corrupt connivance on the part of officials so notoriously pure as the Americans —it is to be observed that every vessel that leaves a Southern port laden with cotton, *whether captured or not*, is equally available to Europe. If she gets off scot-free, the cargo is sold in the Liverpool market for the benefit of the owner:— if she is detained and forfeited, the cargo is sold for the benefit of the captor;—but in either case the cotton goes into consumption, and *pro tanto* supplies the manufacturer and lowers the price. If we could be sure that all or half the crop would *leave the shores* of the Confederate States in hopes of crossing the Atlantic, its subsequent fate (unless it should be shipwrecked) would be a matter of perfect indifference to us, as far as concerns its bearing on the present question.

All these things considered, the unreasoning confidence of the Manchester and Liverpool merchants, to which we made reference last week—"that the cotton would come forward "somehow"—is not wholly unwarranted. The practical question is "*How much* will filter through the cordon in "these several ways?" Our fear is that—considering the strange temper of both North and South, the cost and difficulties of land carriage to *new* ports, and the high price which must be reached before the heavy expenses and the enormous risks we have described will be encountered on any great scale—a much smaller proportion of the crop will reach us through these illegitimate channels than sanguine men anticipate.

We have now, we believe, laid before our readers a complete view of this serious question as it stands at present; and the summary of the whole appears to be this. A very high price of cotton will bring us a large increase in the supply from India, a moderate increase from Egypt, and *some* portion at least of the crop from America. This high price will curtail the demand for the manufactured article at the same time that it enhances the supply of the raw material; and will thus tend to equalise to two. But this *beneficially* high price will only be reached when, and as fast as, the parties more immediately concerned shall become convinced of the reality and the extent of the dearth with which they are threatened.

THE RICHES OF THE LONDON JOINT STOCK BANKS.

We have heard a great deal lately of the poverty of bankers, and this has been assigned as a concurring cause for the tightness of the money market and for the low value of public securities. The accounts, however, of the London Joint Stock Banks for the half-year do not show any indication of this poverty. The following are the deposits in the three following banks:—

	30th June, 1861.		31st Dec., 1860.
	£		£
London and Westminster	14,821,650	.....	12,484,454
London Joint Stock	11,425,037	.....	10,562,658
Union	10,415,020	.....	10,352,703
	36,661,707	.....	33,399,815

showing a large augmentation, not a diminution of means.

It has surprised many persons that these great establishments should not show any signs of the poverty which has been attributed, doubtless correctly, to banks in general. As these banks have large country connections, it might be especially thought that they would be affected by the poverty which the bad harvest of last year has caused through the agricultural districts and among country bankers. But the peculiar nature of the business of the London Joint Stock Banks must be remembered. They are the reservoirs of *hesitating* money. Whenever there is a period of uncertainty they thrive. When a man is in doubt as to what he shall do with his money, he puts it out at interest in a London Joint Stock Bank; whenever he hesitates to buy anything because he thinks the price will be lower, he puts it at interest in a London Joint Stock Bank; whenever he is dubious whether he can continue to do his usual business with a profit, he deposits the money in a London Joint Stock Bank. He can have his money in a moment, and he obtains a high interest; for these banks are in the very best market for making money, and can obtain the aid of the most practised intelligence. No other establishment can compete with them in these respects. They are a sort of asylum for unemployed money, because they can bid more highly for it than any one else can bid. During the last half-year there has been much unemployed money, and therefore they have not suffered as other banks have done during the same trying period.

It is less surprising that the profits of these banks should this year be very large, for they have now had the advantage of charging high rates without giving proportionate rates for the money left with them. We think they are quite right in so doing, for the old rule of always paying 1 per cent. less than the Bank rate of discount could not prudently be followed when that rate was 8 per cent. Still it is proper to observe that the London Joint Stock Banks are peculiarly profitable this half-year, because they had very much money left with them, and because they were not obliged to raise the rate of interest which they paid, as much as they raised the rate of interest which they charged.

THE CRIMES OF M. MIRES.

Very few of our readers can have ascertained,—for very few have had the means and fewer still would take the necessary pains,—what are the exact charges made against M. Mirès, and the precise offences of which he has been found guilty. No very full account of his remarkable trial has appeared in this country, and it requires some labour to extract the true accusations from the technicalities of French law and the puzzling interpretations with which French procedure abounds. We therefore think it not amiss to give in as few words as possible a plain summary of the real facts.

M. Mirès is a Jew of whose early life there are many singular legends. He himself tells us that he was the son of a watchmaker of small means at Marseilles; that he was born in 1809, and led a fluctuating life as a clerk or *employé* for several years. He does not explain to us that he made any money, but it would rather appear that he must have done so; for in 1848 he purchased a railway journal well known in France, called *Le Journal des Chemins de Fer*, which he states that he made successful. He then purchased other journals; became a general "promoter" of undertakings and companies, till he at last became *gérant* or manager of a considerable Company called the *Caisse des Chemins de Fer*, which was in part a bank and in part a sort of stock-broker. It received on running account any one's money who might choose to leave it; and lent it on the deposit of railway shares, or other shares known on the Bourse, on such terms and at such rates as might seem expedient; and, in addition, undertook to buy or sell railway shares or other shares in the market for a proper commission. Further, like its great *analogue*, the *Credit Mobilier*, the *Caisse des Chemins de Fer* bought and sold shares on its own account—sometimes as a monetary speculation, sometimes as a permanent investment. It thus became possessed of some money, some property of its own, and many shares deposited with it to secure the repayment of its loans. These were entirely in the hands of M. Mirès and his confederate M. Solar, and they were skilful enough to manipulate them in several ways.

First, they imitated the coarse and obvious fraud of Sir John Dean Paul, the English banker. They sold the securities deposited with the Company as a security for its loans, and pocketed the money themselves. They were, however, far too acute to fall into the obvious error of their English forerunner. He looked only to the present; they looked also to futurity. They perceived that, sooner or later, some one would ask for the shares sold, especially as they were very numerous and belonged to very many people: they knew that if they were detected, severe punishment was instant and certain. The *Code Napoleon* has some brief clauses easily applicable to this sort of offence. Accordingly, they took adroit advantage of a favourable conjuncture. The Italian war had caused a great depreciation in every kind of share property. The price which the abstracted shares would then have fetched was far less than they did fetch when M. Mirès purloined and sold them. He quietly, therefore, wrote to the debtors of the Bank to say that, looking to the circumstances of the time, he was obliged to call in his loans, and with a view of doing so in the easiest and most satisfactory way, had ordered a sale of the securities which the Bank held. He added a debtor and creditor account, a handsome charge for brokerage, and if, as often happened, the shares when sold at a very unfavourable moment had not realised as much as would pay the debt owed to the Bank, he requested a cheque for the balance in the course of post. He thus made sure of the great difference between the high price at which the shares were really sold, and the imaginary price at which they were supposed to be sold. He secured a large fraction of his gains at the cost of repaying the remainder—of repaying it, probably, with money he had *ingeniously* acquired elsewhere.

Some of the subsequent proceedings were somewhat French. One man rushed to M. Mirès telling him that his wife had been killed by the news of her loss: she could not bear to think that her property and her husband's, which she valued at a great price, had been sold away for almost nothing. Another pitifully bewailed the poverty to which he was reduced after five and twenty years of labour. M. Mirès acted his part well. To very turbulent people he was compassionate. He commiserated their sufferings and *managed* to get their shares back for them. The silent mass—they seem to have been a considerable number of uneducated persons—he cheated silently. In plain English, he bought back a few shares for those who were making a noise, and successfully consummated his financial stratagem on the timidity and the weakness of all the rest.

Such was the first of the frauds of which M. Mirès has been pronounced guilty. The second is simpler. He used to ply a similar trade with the shares belonging to the *Caisse* itself. When they were dear, he took them out and sold them; when they cheap, he bought them back and replaced them. The profits of the speculation he and M. Solar divided.

Thirdly, he issued (like Redpath in England) railway debentures which were not authorised by law and were not of any value. He had, in consequence of his connection with the Railway *Caisse*, of his general command of capital, and of the standing he had acquired in Paris, obtained the predominant command in the affairs of a Spanish Railway from Pampeluna to Saragossa. He quietly sold more bonds than the Company was authorised by law to issue, and the extra profit so obtained has not been satisfactorily accounted for to the Company. The holders of the bonds, too, appear to have been *clients*, as the phrase is, of the Railway *Caisse* in its capacity of broker. So that M. Mirès' stratagem was in two ways fraudulent. It was a fraud on the Railway Company to issue bonds purporting to bind them though not really binding them; it was a fraud on the persons investing through the agency of the bank, to give them bonds professing to bind a Company in good credit, but in fact binding only certain insolvent *gérants* who signed them.

Lastly, what will not surprise us after all, this M. Mirès "cooked" his accounts. The judgment states with legal brevity that "he concealed items which *should have been* "passed to the debit, and fraudulently exaggerated other "items which *were* passed to the credit." The adroit use of these two expedients enabled him to declare excellent dividends in the various Companies with which he was connected, and raised his financial reputation for a time to a great height, though it has now contributed to bring him within the penalties of the law.

THE FREE LOCOMOTION OF LABOUR.

The term irremoveable poor is quite a modern one in English legislation. Under the poor law of Elizabeth every pauper had a parish to which he inseparably belonged,—to which he might be returned after any interval, however long,—which he acquired as a general rule at his birth. The evils of this legislation were always grievously felt. Political economists called attention to them occasionally; even sensible men without any pretension to abstract reflection were in some degree aware of them. It was evident that the labouring classes suffered from them in two ways.

First, they were prevented from changing their residence when they might be tempted to do so by advantageous offers of better wages; for, if they moved, they might after the lapse of years be, in any sudden vicissitude of trade, at once returned to their original parish, where they were no longer known—where they had no friends, connections, or employers—where, perhaps, they could not practice the manufacturing art by which they had learnt to live elsewhere.

Secondly, the poor were not only injured by being perpetually returned to their first locality, but they were also made uncomfortable while they remained in that locality. The interest of the landowners was to diminish the number of poor that might be chargeable to the parish, and the readiest means of so doing was to diminish the number of persons who were born there. Accordingly, they built no more cottages than they were absolutely compelled to build. They confined the labouring population of each successive generation within the very dwellings which had barely sufficed for their fathers, or perhaps for their grandfathers.

In a comparatively stationary age these evils might have been endured, but in the perpetually moving age in which we live they would be unendurable. The last census shows that it is exclusively the great towns,—the great seats of manufacturing industry and trading wealth,—which employ our augmenting population. The migration from the solitary agricultural hamlet to the populous commercial district is not occasional but habitual. It is not as it once was, a rare exception; it has become a familiar fact. We, therefore, could not bear that *our* population should be restrained by the strict rules of the old law of settlement, although our fathers were able to bear it.

The better remedy would perhaps have been to repeal the law of settlement altogether, and to make every pauper chargeable wherever he might be, or wherever at least he may have resided for a moderate interval. Such, however, has not been the remedy in fact adopted. It has been provided that although every pauper shall continue by law to have a parish in which he is settled, a certain class of paupers should not be removeable to that parish. By an Act of Sir R. Peel, "no person should be removed from any parish in which he or she shall have resided for five years." And this is the origin of the new and anomalous class of paupers whom we call the "irremoveable poor." In this age of industrial migration, they have become a very important class. Their number is 225,000, and the cost of their relief amounts to 780,497*l*, being nearly one-fourth of the cost of the workhouse maintenance and the out-door relief of the whole number of paupers during the year.

This law has, however, not worked very well in practice; it has mitigated the evil which was previously felt, but it has not sufficiently mitigated it to meet the requirements of the present times. Since the year 1846, when Sir R. Peel passed this enactment, we have passed what is sometimes magniloquently called a new commercial era, and in plain and simple truth we have achieved a great industrial progress. A law which was suitable to us before free trade, may be wholly unsuitable to us after free trade. Our population now need that liberty of locomotion which is necessary to give complete effect to the other conditions of free industry.

The law requiring the long residence of five years within the narrow limits of a single parish, is a very insufficient relaxation of the local fetters of the old law of settlement. Many a poor artisan may have been for his whole life absent from his native place, without having been resident for five years in any one parish. Our population must migrate with

the course of trade, and in five years new centres of industry rapidly spring up and old centres as rapidly disappear. Our population, too, has caught the taste of locomotion. A spirit of adventure is beginning in some degree to qualify the rooted adherence to a single spot which used to characterise the English peasant. To *require* artisans to be stationary for five years, is to require what is daily becoming more and more opposed to their habits. A parish, too, is not a new commercial division, it is an old ecclesiastical division. Many of our great seats of modern industry are intersected by the mediæval divisions in a curious and complicated way. An artisan very likely does not know in what parish he is living: his migrating from one street to another may make a change. It is continually found that if he had continued to live in street A he would have become irremoveable; but he happens to remove to street B, a few yards off, yet in a different parish, and he loses the privilege without intending it—without even reflecting on it.

The Bill which is now before Parliament provides a remedy, or at any rate a partial mitigation, for both these evils. It enacts that three years' residence in a single union should confer irremoveability. It improves the condition of the poor in two ways: it lessens the length of time during which the law requires them to be stationary, and enlarges the area within which they need be stationary.

The Bill likewise provides a remedy for a small but irritating grievance. As soon as the irremoveable poor were admitted to be a legal class, the question at once arose how the cost of their relief should be defrayed. The Legislature provided that it should be paid out of a certain "common "fund" which exists in each union for common expenses, such as those of the workhouse and the salaries of the officers of the union. The Legislature formed these irremoveable poor into a new class of *union paupers*, not attached to any particular parish, but chargeable on an entire union. And, under other circumstances, this would have been a rational provision. But the nature of the "common fund" of the union, and the mode in which it is apportioned between the respective parishes, had been in practice overlooked. The duty of providing that fund is divided between those parishes in proportion to the average expense incurred by each parish in the union for the relief of the poor belonging to each of them for the previous three years. But it is evidently unjust to charge the expense of the irremoveable poor according to this rule. They were formed into a separate class of union paupers in order that they might not be charged in the particular parish where they are accidentally resident; and, nevertheless, from the mode in which the contributions to the common fund are divided they unduly augment the burden in that parish. The effect is the worse, because the very principle of the "common fund," which charges the common expenses, in each parish in proportion to the separate expenses is that of taxing most the places where there are most poor,—in other words, the principle of taxing most heavily the poorest locality; and it is obviously therefore very inexpedient to augment the inequality by imposing on these localities an additional tax proportioned to the number of irremoveable poor that happen accidentally to be within them.

The Act before Parliament amends this error, by imposing the charge for the irremoveable poor that is in the union on the different parishes in each union in proportion to their respective wealth.

THE SECRETARY OF THE TREASURY'S FINANCIAL PLANS FOR THE NORTHERN STATES.

THE Secretary ventures to recommend only such modifications of the existing tariff as will produce the principal part of the needed revenue, and such resort to direct taxes or internal duties as circumstances may require in order to make good whatever of duties may be found to exist. That the present tariff of duties will not produce the revenue required by sound principles of finance, under existing circumstances, is a proposition which will command general assent. It was formed, indeed, with reference to a very different condition of affairs. The receipts for the last quarter of the fiscal year just closed were only 5,527,246.33 dols, and, though a very considerable improvement in the revenue may be confidently anticipated for the current fiscal year, should no change be made in the rates of duties, it will be inadequate, beyond doubt, to the demands of the Treasury, which should be provided for without resort to loans. These demands, as has been already stated, will reach the sum of 79,887,849.34 dols—a sum not greater, perhaps, than may be reasonably expected in more prosperous years from a well-adjusted tariff of duties, though greater than can now be expected from any tariffs.

The disorders of business incident to a a disturbed condition of political affairs will be gradually redressed, as new channels open to receive the trade obstructed in former courses, and the new employments engage the industry displayed from former pursuits. With this revival of trade and industry the revenue will improve, even though the restoration of peace may be delayed beyond our present hope. It is hardly to be doubted moreover, that the great body of the citizens of the States now involved in the calamities of insurrection will ere long become satisfied that order and peace are security for all rights of property and for all personal and political rights in the Union, and under the constitution are preferable to the disorder and conflict, and insecurity necessarily incidental to the attempts to subvert the Government, break up the institutions, and destroy the nationality by force and violence. When, under the influence of this reasonable conviction, the people of the several States now constrained by the criminal folly of political partisans into civil war against the Union, shall in their turn constrain these partisans to loyalty, to law, and obedience to the constitution, it is not unreasonable to expect that, with a restored Union, will come not merely renewed prosperity, but prosperity renewed in a degree and measure without parallel in the past experience of our country.

While recommending the changes in the existing tariff and the other revenue measures which seem to him necessary, the Secretary indulges a confident expectation that they will ultimately prove wholly adequate to all reasonable demands for ordinary expenditures, for the payment of the interest, and for the reduction of the public debt, and that they will moreover be establishing a national credit on sure foundations; will contribute in no inconsiderable degree to the revival of trade and industry, which by its healthful reaction will in turn essentially promote the increase and security of revenue. The sources of revenue most promptly to be made available must be sought, doubtless, in the articles now exempt from duty, or but lightly taxed. Nearly all these articles have heretofore contributed in a full measure to the national income. It was only when the debts contracted in former wars for the establishment of our national independence, or the vindication of our national rights had been fully paie, and the revenue had increased largely beyond any legitimate uses of the Government, that it was thought proper to remove the duties on some of them, and largely reduce the duties on others. That intelligent patriotism which cheerfully sustain the former charges will even more cheerfully sustain those made necessary now for the preservation of our national Union, and the maintenance of the sovereignty of the people. Of the articles now lightly taxed, sugar, and of those wholly exempt from duty, tea and coffee are the most important.

The Secretary most respectfully proposes to Congress that a duty of 2½c per pound be laid on brown sugar, of 3c per pound on clayed sugar, of 4c per pound on loaf and other refined sugars, of 2½c per pound on the syrup of sugar cane, of 6c per pound on candy, of 6c per gallon on molasses, and of 4c per gallon on sour molasses; and it is also proposed that a duty of 5c per pound be imposed on coffee, 15c per pound on black tea, and 20c per pound on green tea.

It has been objected, and not without apparent reason, to a resort to direct taxes at this time, that in consequence of the disturbed condition of the country the apportionment required by the constitution cannot be made. The Secretary, however, adopts the opinion that the constitutional requirement will be satisfied if Congress, in the act of levying the tax, shall apportion it among the several States in the required manner. The tax cannot become unconstitutional because it may be difficult, or even temporarily impossible, to collect it as apportioned; if it were otherwise, the objection would be fatal to internal duties, as well as to direct taxes, for in the present condition of the country it is impossible, whatever uniformity may be observed in the law imposing such duties, to make them uniform in collection. Internal duties may be collected more cheaply than direct taxes, by fewer agents, and with less interference with the finances of the States. They may also be made to bear mainly upon articles of luxury, and thus diminish, to a certain extent the burdens imposed by duties on imports upon the classes of the people least able to bear them. It has been already shown that a light direct tax from which the Secretary ventures to suggest very small properties may be properly and advantageously exempted, will produce the sum needed for revenue.

In the judgment of the Secretary, the needed sum may also be obtained from moderate charges on stills and distilled liquors, on ale and beer, on tobacco, on bank notes, on spring carriages, on silverware and jewelry, and on legacies. If both sources of revenue be resorted to to the extent suggested, the amount required from loans will be proportionately diminished, and the basis of the public credit proportionately enlarged and strengthened, whether both these modes of taxation be resorted to under present emergencies, or only one of them, the Secretary will but ill perform his duty to Congress or the people, if he

omits to urge the great importance, the absolute necessity indeed, of such full provision of the annual revenue as will manifest to the world a fixed purpose to maintain inviolate the public faith by the strictest fidelity to all public engagements.

It will not, perhaps, be thought out of place if the Secretary suggest here that the property of those engaged in insurrection, or in giving aid and comfort to the insurgents, may properly be made to contribute to the expenditures made necessary by their criminal misconduct. As a part of the punishment due to the guilt of involving the nation in the calamities of civil war, and thereby bringing distress on so many innocent citizens, Congress may justly provide for the forfeiture of the whole or a part of the estates of offenders, and for the payment of the proceeds into the public treasury. Before discussing the subject of the proper provision for ordinary expenditures, including interest on the public debt, and a proper amount for a sinking fund, the Secretary respectfully asks the consideration of Congress for the question, whether the current disbursements of the Government may not be diminished. He ventnres to suggest that a considerable saving may be judiciously effected by a reduction, for the time at least, of forty per cent. upon salaries paid by the Federal Government, in cases where such reduction will not interfere with the existing contracts; and that a further saving, perhaps not less considerable, may be effected by the abolition of the franking privilege and reduction of postal expenses. A retrenchment in other directions will doubtless suggest itself to the reflection of Congrress, and it is most respectfully recommended that every retrenchment compatible with the rigour and efficiency of the public service be promptly and effectually made.

The present Secretary also invited proposals at par for 13,978,000 dols, being the balance of the loan authorised by the act of June, 1861. No bids were received except three for twelve thousand in the aggregate, which, having been made under misapprehension, were permitted to be withdrawn, or applied as offers for Treasury notes at par, or for bids under the act of February, at eighty-five per cent. The Secretary has since, under the authority of March, 1861, issued Treasury notes to offerers at par and in payment to public creditors to the amount of 2,584,550 dols. The only authority now existing for obtaining loans is, therefore, found in the act of second of March, 1861, which authorises the issuing of bonds bearing an interest of six per cent., or in default of offers at par. The issue or payment of Treasury notes bearing the same rate of interest at par to the amount of 10,000,000 dols in bonds at rates varying from 85 to 93 per cent., and 1,684,000 dols in Treasury notes at par, realising for the 8,994,000 dols offered, the sum of 7,922,553.45 dols; and in the act of June 22, 1860, is modified by the act of March 2, 1860, under which Treasury notes at 6 per cent. may be issued or paid to creditors at par to the amount of 11,393,450 dols, making in all the aggregate of loans authorised in some form, 21,393,450 dols.

The authority, under existing circumstances, is no further available than as creditors may desire to accept payment in Treasury notes at 6 per cont., which is not to be expected, except perhaps as an alternative for delays, of which a just or prudent Government will not, unless under extreme necessity, permit the occurrence. It needs no further argument to work the conviction that under the existing laws little or nothing of the required sum can be realised. The magnitude of the occasion requires other measures. As the contest in which the Government is now engaged is a contest for national existence and the sovereignty of the people, it is evidently proper that the appeal for the means of prosecuting it with energy to a speedy and successful issue should be made, in the first instance at least, to the people themselves; and it is highly desirable, in order that the circle of contribution may be widely extended, to make the burden press as lightly as possible upon each indivipual contributor, and if possible transmute the burden into a benefit. To attain these desirable objects the Secretary submits to Congress the expediency of opening subscriptions for a national loan of not less than 100,000,000 dollars, to be issued in the form of Treasury notes or Exchequer bills, bearing a yearly interest of 7-3 10 per centum, to be paid half-yearly, and redeemable at the pleasure of the United States after three years from date. The sum of 100,000,000 dollars is named as the amount for which it now seems expedient to rely on a subscription of this kind. But it is not intended to restrict loans in this form to any precise limit short of the entire sum which may be required in addition to the sums to be realised from other sources for all the purposes of the year. The interest of 7 3-10 is suggested because it is liberal to the subscriber, convenient for circulation, and, under existing circumstances, a fair rate for the Goveanment. It is beneficial to the whole people that a loan distributed among themselves should be made so advantageous to the takers as to inspire satisfaction and hopes, a profit rather than annoyance and fears of loss; and if the rate of interest proposed be somewhat higher than that allowed in ordinary hands, it will not be grudged to the subscribers, when it is remembered that interest on the loan will go into the channels of home circulation, and is to reward those who come forward in the hour of peril to place their means at the disposal of their country. The convenience of calculation incident to the rate proposed is quite obvious, for the interest being equal to one cent a day on fifty dollars, it is only necessary to know the number of days since the date of a note, or the last payment of interest, to determine at a glance the amount due upon it.

To increase still further this facility of calculation, it is proposed also to issue the Treasury notes of this loan in sums of 50 dols, 100 dols, 500 dols, 1,000 dols, and 5,000 dols, with the amount of interest for specified periods engraved on the back of each note. The facility thus secured to the holder of determining the exact amount of the note and interest, without any trouble of computation, will naturally enhance its value for all purposes of investment and payment. While the rate proposed is thus liberal and convenient, the Secretary regards it also as, under existing circumstances, fair and equitable to the Government. The bonds of the United States, bearing an interest of six per cent. and redeemable twenty years after date, cannot be disposed of at current market rates, so that the interest on the amount realised will not exceed 7 3-10 per cent. Nor is there any reason to believe that Treasury notes bearing an interest of 6 per cent. receivable for public dues and convertible into twenty-years 6 per cent. bonds can be disposed of in any large amount, so that the interest on the sum realised will not fall much, if at all, short of the rate proposed for the deficiency of interest, if any, between such notes and those of the proposed national loan. The Secretary thinks the absence of the feature of receivability for public dues in the latter is a sufficient compensation. To secure the widest possible circle of contribution, the Secretary proposes, in addition to the inducements just mentioned, that the books be opened at the office of the Treasurer of the United States in Washington, at the offices of the Assistant-Treasurer and depositories of public moneys, at the offices of such postmasters and other selected persons in such cities and towns of the Union as may be designated; that subscriptions be received for 50 dols, or any sum being the multiple of 50 dols; that the sum subscribed be paid in cash, or if the subscriber prefer in instalments of one-tenth at the time of subscription and one-tenth on the 1st and 15th days of each month thereafter, the first instalment to be forfeited in case of non-payment of subsequent instalments; that interest accrue and be paid as it becomes due on all sums paid in from the day of payment, and that Treasury notes be issued if required for all payments except the first instalments, and for these on final payment. The Secretary cannot doubt that for a loan so beneficial and so advantageous, secured both as to interest and principal by adequate provisions of revenue, an appeal to the people will be answered with promptitude and liberality. In addition to the sums to be raised by national loan, the Secretary proposes, in case it shall be found inexpedient to provide the whole amount needed in that mode, that bonds or certificates of debt of the United States be issued to lenders in the country, or in any foreign country, at rates not lower than par for sums of 500 dols, 1,000 dols and 5,000 dols.; or of 100*l*, 500*l*, and 1,000*l*, sterling, not exceeding in the aggregate 100,000,000 dols, or if issued in the currency of Great Britain, not exceeding 20,000,000*l* sterling. He proposes further that these bonds or certificates be made redeemable at the pleasure of the Government after a perfod not exceeding thirty years, after a common date not later than the 1st day of January, 1862, and bear an interest not exceeding seven per cent., payable in London or at the Treasury of the United States, with exchange at such rates as will make the payment equal to payment in London. If the simple provision already recommended for the punctual payment of the interest and final redemption of the principal be made by Congress, the Secretary entertains very confident expectation that it will be found practicable to negotiate a very considerable part of this loan, if not the whole, in our own country at favourable rates, and that whatever part, if any, may be maintained from capitalists in other countries, will be easily obtained. For whatever sums may be needed to supply the full amount required for the service of the fiscal year, and as an auxiliary measure already proposed, the Secretary recommends that provision be made for the issue of Treasury notes for 10 dols or 20 dols each, payable one year from date, to an amount not exceeding in the aggregate 50,000,000 dols. These notes should bear interest at the rate of 3 65-100 per cent., and be exchangeable, at the will of the holders, for Treasury notes or Exchequer bills, payable after three years, bearing seven per cent. interest; or should it be found more convenient, they may be made redeemable on demand in coin, and issued without interest. In either form the Treasury notes of these smaller denominations may prove very useful if prudently used. In anticipation of revenue, they are certain to be received. The greatest care will, however, be requisite to prevent the degradation of such issues into an irredeemable paper currency, than which no more certainly fatal expedient for impoverishing the masses and discrediting the Government of any country can well be devised. The increase of the public debt in consequence of the disturbed condition of the country and from other sources, will clearly appear from a brief review on the 1st of July, 1860, as shown by the last annual report, which was 64,769,703 dols 80c; it had been increased on the 1st of January, 1861, to the sum of 66,243,721 dols 63c. It had been further increased on the 7th of March, 1861, when the present Secretary took charge of the department,

to the sum of 76,455,269 dols 28c, and on the 1st of July, 1861, the close of the fiscal year, it had been still further increased to the sum of 90,867,828 dols 68c.

Agriculture.

THE ROYAL AGRICULTURAL SOCIETY AT LEEDS.

As might have been expected from the district in which this year's meeting of the Royal Agricultural Society has taken place, the meeting has proved one of the most successful, perhaps the most successful yet held. The Shorthorns were very numerous and good, and there was great equality in the animals, none standing out with great prominence before the general show. Lord Faversham's bull "5th Duke of Oxford," which obtained the first prize in the first class, had never before been exhibited at the Society's shows, but many other prize-takers, as Mr Langston's bull "Grand Turk," Captain Gunter's "Duchess 77th," and his twins "Duchesses 78th and 79th," Mr Booth's "Queen Mab" and "Soldier's Bride," and some others, have before been exhibited at the Royal Agricultural Society's shows, and taken prizes in younger classes. Colonel Towneley's animals were absent.

The horse show likewise proved eminently successful. "Nutbourne," the winner of the Society's 100*l* prize, was a Derby favourite, which broke down in that race last year, and for substance and form is well entitled to a prize as a stud horse for first-class hunters; and there were other horses in all classes which fully sustained the character of Yorkshire as a horse-breeding district. This is a very useful department of the Society's operations, as selecting and marking amongst the thorough-bred horses of repute such as are adapted for breeding hunters and saddle-horses, inasmuch as there are many racers utterly unfit for any other purpose than racing, from their low, short shoulders, long backs, and want of substance. All such horses should be carefully avoided by all farmers who would breed valuable colts for the field or the road. The Leicester sheep in all classes were very good, the prizes being all taken by well-known breeders. The prizes for long-woolled sheep (not Leicesters) were all awarded to Cotswolds. Indeed the Lincolns and Yorkshire long-wools, most valuable sheep, do not appear to have been brought out at any of the Society's meetings. This is the more remarkable, because there are numerous Lincoln ram-breeders whose stock are fit to compete with any long-woolled sheep in the world. The breeding and preparing sheep for exhibition would seem to be almost a distinct branch of sheep-breeding. At present the "lustrous long wool" of the Lincoln sheep is in great demand, and we expect soon to see the breeders of that race putting in their claims to the long-woolled prizes. The Southdowns were not so remarkable amongst the short-woolled sheep as they have been at former shows, the larger kinds, such as Shropshire, Hampshire, and West country Downs, finding more favour with the general body of farmers.

The number of visitors to the show-yard exceeded anything at former meetings. The mills of the district were all closed, and the railways from all parts of the manufacturing districts poured out train after train loads of visitors.

TETANUS IN THE HORSE.

THE severe injuries to which horses are frequently liable, and the by no means unfrequently fatal results of such injuries from tetanus or locked-jaw, render a communication recently made to the Council of the Royal Agricultural Society of a method of cure of much value and importance. Lord Powis read the following accounts of the successful treatment of traumatic tetanus in the horse by a veterinary surgeon. The writer stated that he had tried all the usual remedies, such as bleeding, physicing, and blistering, without any successful result, and he determined to alter his treatment. In the three cases which has come under his care since the adoption of his new mode of treatment, complete cures had been effected. The following are the details of each case:—

The first horse belonged to Mr John Inglis, who has extensive mills, called Brunston Mills, near Edinburgh; this animal when drawing a cart jumped up into a loaded cart before him, and as he came down again, the point of a bolt in the side of the cart tore open his leg, the wound being about one foot in length; he was placed under my charge, and the wound soon healed satisfactorily; but about two weeks later, tetanus came on, and I was again called in. I then decided to change my mode of treatment, and after giving one dose of physic and taking some blood, I had him wrapped from head to tail in large woollen rugs wrung out in nearly boiling water, and placed him in a quiet box, where no person was allowed to go but the attendant, who was ordered quietly to pour a pail of very hot water over his coverings every four hours; he had water to drink if he would, but no opium, no blister, no hyoscyamus, no aconite, no physic, beyond the one dose. In eight days he was as well as ever, and continued so.

In the second case the horse had belonged to Mr A. Douglas, an extensive corn merchant and farmer of Mayfield, near Dalkeith. A large tumour grew on the olecranon of this animal, which has probably occasioned by pressure when lying down. (N.B. The streets of Edinburgh are steep, and high heels are used on the horses' shoes.) The horse underwent medical treatment, but without effect, and was so unsightly that its owner disposed of it for little or nothing to a customer of his, Mr Campbell, an extensive brewer in Edinburgh, and it thus came under my charge.

Suspecting that the tumour was connected with the joint, I declined to use the knife, and attempted unsuccessfully to destroy it with caustic; at last the deformity became so great that the horse could not be sent out to work, and I got orders to operate at all risks. I then directed a pair of iron glams to be made about twelve inches long, with a screw in each end, for the purpose of closing by pressure the opening into the joint, if any such existed; these were applied and tightened daily; in five days the weight of the tumour was pressing the weight of the under screw into the muscles of the arm. I had then to remove the tumour, weighing nearly nine pounds; the glams were soon removed; and the healing of the wound was advancing favourably until about two weeks later, when I received word that the horse was not looking so well, and found that he had tetanus. I then put him under the treatment already described, when he soon got well, and has worked ever since, the part operated upon bearing scarcely any mark or scar.

Thirdly, Mr Sheils, of Miles, near Tranent, employed me to castrate a blood horse, four years old, nearly twelve months ago. The operation, at Mr S.'s particular desire, was performed with glams. The horse was irritable, but the wounds healed well. When he was supposed to be perfectly safe, I called one day in passing, and discovered, to my great mortification, that my patient had tetanus; the same treatment which I had before adopted was pursued for a week, when he recovered perfectly, and was taken in May last (1859) to a farm belonging to Mr Sheils, in the neighbourhood of Newcastle, where he was quite well the last time I heard of him.

This discovery cannot be too widely known amongst horsekeepers as well as veterinary practitioners.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

The success of the subscription to the thirty-years railway bonds surpasses expectation. All the great bankers and capitalists have subscribed largely—Messrs Rothschild, it is said, for the whole amount required; and, in addition, the lower classes have presented themselves in even greater numbers than they did for the war loans. In the provincial towns and the country districts, the subscriptions were also very large. On the whole, the sum offered is said to be the huge one of 2,300,000,000f, though that required is only 132,000,000f.

Reports of a painful character are current: namely, that the director of one great Government office, or as such things are called here, *administrations*, has disappeared, leaving a deficit of about 3,000,000f; that another who has given in his resignation is in debt from unfortunate Bourse speculations to the amount of 700,000f; that the *gérant* of a great company in shares is likely to fall into the hands of justice for acts similar to those of Mires; and that a banker has absconded, leaving his accounts in confusion.

From Marseilles the news is not good, several Greek houses being in danger of suspending their payments, owing to the Bank of France not having accepted certain arrangements proposed for the settlement of its claims on firms at Constantinople, with which the Marseilles houses are connected.

The monthly return of the Bank of France, published on Friday, presents, your readers will have observed, a very considerable increase in discounts. That augmentation cannot, however, unfortunately be ascribed to a resumption of commercial activity, but it is solely owing to large sums being required, as usual at this period of the year, to make purchases of silk and wool.

According to the reports of the agricultural journals, the harvest in the South, which is now nearly terminated, presents a deficit of from one-third to one-fourth in the quantity of sheaves, whilst the yield in grain is expected to be less than ordinary; but the quality of the grain is good. In the West an average crop is not hoped for, so much have the crops suffered from bad weather and blight. In Le Blaisois, Le Vendomois, Le Perche, and La Beauce, which are large corn-producing provinces, the crops have suffered severely from mildew.

The Government has just published a table of the receipts of the indirect taxes and revenues for the first six months of the present year, compared with the corresponding periods of 1860 and 1859. It is on the whole not unsatisfactory: in the first place, the total amount received for the just expired half of the present year is greater than was that of the first six months of 1860, whereas for some time previous there had been a diminution; in the second place, the Customs duties, though still presenting a decline, are manifestly beginning to recover from the effects of the great reductions made in them by Imperial decrees and the English treaty of commerce; in the third place, the duties on wines, beer, and spirits, the post office, and various other branches of revenue, present an increase. In the registration and mortgage duties, there is a diminution for the present year compared with 1860; but it is not large in itself, and may be regarded as a proof that people have less need to sell or mortgage real property. The reduction on the manufacture of native sugar is remarkable, especially as it is accompanied by a large one on that of foreign

sugar, and it is not compensated by a corresponding increase in the revenue from colonial sugar. It is true that a great reduction in the sugar duties has been made, but that does not account fully for the decline. These sugar items may be regarded as the black spots in the return. Perhaps we ought to range in the same category the revenue from the sale of tobacco (a Government monopoly), though it presents a prodigious increase; for surely we may regret to find the people spending money by millions, and more and more every year, in an idle, if not a pernicious luxury. The following is a detailed account of the indirect revenues:—

	First half-year of			Difference between first half-year of 1861 and 1860.		Difference between first half-year of 1861 and 1859.	
	1861.	1860.	1859.	Increase.	Decrease.	Increase.	Decrease.
	f	f	f	f	f	f	f
Registration and mortgage duties	147,675,000	151,052,000	134,263,000	...	3,377,000	13,412,000	...
Stamp duties	28,705,000	27,657,000	26,751,000	1,048,000	...	1,954,000	...
Customs duties on importation of grain	557,000	399,000	746,000	158,000	...	...	189,000
Various sorts of merchandise	30,605,000	41,434,000	53,970,000	...	10,829,000	...	23,365,000
French colonial sugar	15,001,000	14,232,000	22,859,000	769,000	...	...	7,858,000
Foreign sugar	9,307,000	13,116,000	17,632,000	...	3,809,000	...	8,325,000

In definitive, it will be observed the six months of 1861 are 3,595,000f more than the corresponding period of 1860, but 8,402,000f less than that of 1859.

A return of the direct taxes has also been issued. It shows that up to the 30th June as much as 248,798,000f was paid out of a total of 484,334,000f due for the year; and that the said sum was 46,992,000f more than could have legally been exacted, inasmuch as the direct taxes are only payable by monthly instalments. In the first half of last year the amount paid in advance was only 44,828,000f. Whilst, too, last year the expense of legal proceedings for enforcing payment of taxes was at the rate of 71c the 1,000f, this year it has only been 69c.

An Imperial décree, dated the 24th of last month, but only just inserted in the *Moniteur*, makes modifications in the general Customs tariff in order to put it in accord with the stipulations of the Belgian treaty. In consequence of these modifications, which are of interest to English merchants, the tariff stands as follows:—

Foreign Sugar not refined, and not classed with refined.—By French vessels: From countries out of Europe, 30f the 100 kilogrammes (about 1*l* 4s the 2 cwt); from elsewhere (that is from foreign Custom entrepots), 32f.

By foreign vessels: From India, 33f; from elsewhere, 32f.

Coffee.—By French vessels: From French colonies, and from French establishments on the Western coast of Africa, 36f; from other countries out of Europe, 50f 40c; from elsewhere, 55f 40c.

By foreign vessels from all places, 55f 40c.

Oleaginous Grains and Fruits of all kinds.—By French vessels: From countries out of Europe, exempt; from producing countries in Europe, exempt.

By foreign vessels: From countries out of Europe, 2f the 100 kilogs; from producing countries in Europe, 1f.

From elsewhere, whatever the mode of conveyance, 2f.

Pure Oils.—*Of Olive.*—By French vessels, 6f the 100 kilogs; by foreign, 7f.

Palm, Cocoa, &c.—By French vessels: From French colonies, from Senegal, and from the French establishments in India, exempt; from other countries out of Europe, 1f the 100 kilogs; from elsewhere, 3f.

By foreign vessels from all places, 3f.

Other Sorts.—By French vessels and by land: From producing countries, 6f; from elsewhere, 7f.

By foreign vessels from all places, 7f.

Swedish Iron in bars and in masses.—By French vessels, 7f the 100 kilogs; by foreign vessels, 7f 70c.

The same decree enacts that foreign sugar, not refined and not classified with refined, imported by foreign vessels from countries out of Europe, shall, after the expiration of a month from the 24th of June, be allowed drawback; also that from the same date the drawback on the export of soap shall be suppressed.

The Bourse during the past week has been devoid of animation, and the following are the quotations:—

The following is an account of the markets:—

Flour at *Paris* has risen in price, the quotation yesterday having been 71f to 76f the sack of 159 kilogs. For the four marks the current month, and also August and September were 75f.

Wheat.—Business at *Paris*, yesterday, was not active: the quotations were 39f to 41f 50c, and even 42f the sack of 120 kilogs, and for choice 42f 50c were demanded. For American, Baltic, and Black Sea, an advance of 50c on last week's quotations were asked. In the provincial markets, as many as 88 present a rise of from 10c to 1f 55c the hectolitre, 21 a fall of from 6c to 3f; 18 markets are reported firm, 41 without variation, 8 calm.

Cotton.—The sales at *Havre*, in the week ending Friday, were 8,920 bales, and the importations 3,045. The closing prices on that day were the same as in the preceding week: very low New Orleans was consequently 97f the 50 kilogrammes; low, 109f; and very ordinary, 115f. On Monday and Tuesday in the present week, sales were unimportant, but prices remained unchanged. Yesterday, on account of the news that the President of the United States had issued a warlike message, and that great activity prevailed in the cotton market at Liverpool, about 8,000 bales were sold, and prices advanced.

Coffee.—At *Havre*, in the week ending Friday, business was more active: 400 sacks Hayti Cape went at 77f 50c to 78f 50c the 50 kilogs in bond; 600 Gonaives, 79f; 2,000 Rio, not washed, disposable, 63f to 66f; 326 ditto new, for delivery, 72f to 73f; and 493 washed disposable, 75f to 83f. In addition, several lots of different sorts of damaged were sold. The arrivals were about 10,000 sacks. This week, Rio has been at 62f to 67f 50c; ditto washed, 81f; Hayti, 76f 50c to 77f. At *Bordeaux*, last week, business was somewhat active: 4,395 casks Macassar went at 103f; 1,657 sacks Java, 108f duty paid; 38 Santiago, 93f in bond; a small lot of Guadeloupe habitant, 137f 50c; 108 sacks Guayra non grage, 89f 50c; 163 sacks Rio, not washed, 77f 50c; and 110 ditto, washed, 87f This week, Java has been at 106f 50c duty paid; Santiago, indifferent quality, 87f 50c; Rio, not washed, 72f 50c. At *Nantes*, last week, various lots of damaged, of different sorts, were sold. This week, there have been no sales. At *Marseilles*, last week, about 3,000 sacks went at prices varying from 55f to 72f, according to quality.

Sugar.—The demand at *Havre*, in the week ending Friday, was somewhat more animated, especially for foreign, and prices were firm. 492 casks Cuba for delivery went at 46f 50c the 50 kilogs duty paid; 3,600 casks Havana for delivery 34f to 34f 50c in bond; 1,500 casks Havana, old, disposable, 33f; 3,000 sacks Mauritius, 50f 50c duty paid; 410 bales Reunion, 50f; 34 casks French West India, 47f 25c duty paid. In addition, some lots of damaged were disposed of. The arrivals were nearly 3,000 casks French West India, 5,850 sacks Pernambuco, and some small lots of other sorts. This week, Havana old has been at 33f 25c and 33f 50c in bond; French West India, 47f 50c duty paid; ditto usine, 61f 50c. At *Nantes*, last week, business was not active: 299 sacks Reunion, inferior quality, went at 40f, and a small lot of French

West India was also disposed of. This week, some very large sales of Reunion have been made at 50f 25c to 54f 25c; a small lot of French West India "usine," at 59f; ditto ordinary, 48f. At *Bordeaux*, last week, the only sales were 250 bales Reunion, 44f 50c; 136 casks Guadeloupe, usine, part at 56f 50c, and part at prices not stated; 130 casks French West India ordinary, 46f 75c. This week, French West India has been at 46f 75c to 48f; Reunion, indifferent quality, 44f. At *Marseilles*, last week, from 500 to 600 casks French West India went at slightly improved prices; 115 San Yago at quotations previously established.

HIDES.—Business at *Havre*, in the week ending Friday, was not active: 1,451 New York salted went at 45f the 50 kilogs in bond, and 1,500 horse, salted La Plata, 85f the 100 kilogs. At a public auction, out of a considerable quantity of different sorts offered, 261 New Orleans saltep (sound) were sold at 43f to 43f 50c, and various lots of different sorts damaged were also disposed of. The arrivals were about 14,000. This week, New York salted have been at 43f 50c; Bombay cow, 60f; Tampico dry, 85f; Buenos Ayres dry, 110f. Sales have been rather active.

WOOL.—At *Havre*, in the week ending Friday, about 40 bales Buenos Ayres and Monte Video unwashed went at 1f 17½c the kilogramme to 2f 62½c. The arrivals did not amount to 1,000 bales. This week, Buenos Ayres unwashed has been at 2f 33c.

INDIGO.—The sales at *Havre*, in the week ending Friday, consisted only of 48 chests Bengal and 1 Caracca; prices not stated. There were no arrivals. This week, there have been no sales. At *Bordeaux*, last week, the sales were 15 chests Madras, 18 Kurpah, 35 Bengal; prices not stated. This week, 8 chests Kurpah, 11 Bengal have been sold quotations not given.

TALLOW.—At *Havre*, in the week ending Friday, business was rather animated, owing to holders having made concessions. 150 casks New York disposable went at 63f the 50 kilogs, and 75 New Orleans at prices kept secret. The arrivals were unimportant. This week, New York has been at 62f 50c and 63c. At *Paris*, yesterday, the 100 kilogrammes were 122f, a fall on last week's quotations.

SPIRITS.—At *Paris*, yesterday, 3-6, first quality, disposable, was 89f the hectolitre; Montpelier of 86 deg., 120f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 110f; beetroot, first quality, 88f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following has reached us by the last Australian mail:—Melbourne, May 25.—Since our last issue there has been very little wool coming to hand, with the exception of fellmongers' slipe and scoured, the cost of production of which being far in excess of what buyers are inclined to give, this kind of wool has been for some time shipped on owners' account. Sheepskins are not so much in request, except at lower rates. Hides—There is no improvement to note; the market still continues extremely dull. The news by the English mail of a fall in price at the London wool sales has caused a decline here of fully 1d per lb. Present quotations are:—Superior clips, 1s 10d to 1s 11d; fair to good, 1s 7d to 1s 9d; low to middling, 1s 2d to 1s 6d; locks, pieces, &c., 8d to 1s 2d; handwashed, 1s 6d to 1s 9d; scoured, 2s to 2s 2d: grease, 11d to 1s 1d. Sheepskins are not so firm, and have participated in the decline that has taken place in wool. The prices obtained lately have ranged from 5d to 8d per lb. Hides—Heavy hides are not so much in request, and prices have given way about 1s each.

We have received the following commercial news from Calcutta, dated June 8:—Produce Market.—The improvement alluded to in our last has continued. Shippers evince more disposition to operate, and this, combined with the limited stocks available, has enabled holders to maintain firmly previous rates. Shipments have been principally confined to the European market, the American firms here having almost suspended further shipments pending more reliable advices from their constituents in America. Import Market.—For some time after our last report no improvement was observable in our markets, but within the last few days there has been more disposition to buy shown by dealers, and the sales that have been made have been in most instances at rather better prices than were obtainable a fortnight ago. It will be some time yet before trade can go on briskly again, but there is nothing in the present position of piece goods, either here or in the interior, to lead us to look otherwise than hopefully regarding the future of our market.

The following is dated Rangoon, June 1:—Imports.—A better feeling has been manifest lately in transactions in British goods, owing to the firm state of the Northern markets, and the presence of the King's steamer inducing some speculation. Some large parcels have left first hands, for shipment to Mandalay, but in values we are unable to quote any material change. Staple articles, such as grey shirtings, T'cloths, and dyed shirtings, have in some cases obtained an advance of 1a to 2a per piece. Grey yarns are in better demand. Exports.—Rice— The condition of the market has changed during the past fortnight, which must be mainly attributable to the variableness of the weather. Up to the 22nd supplies were very short. Larger arrivals of grain, however, had a depressing influence on the market, and prices were with difficulty supported.

A commercial letter from Quebec, dated the 5th inst., says:—White pine is arriving freely, and considerable sales have been made during the fortnight. A prime raft of Ottawa wood, about 80 feet average, fetched 8¼d, and several from 65 to 75 feet average, 7¼d to 7¾d. Board wood is dull of sale, and lower prices than last season would be accepted. Red Pine—41 feet fetched 9½d measured off. Elm has arrived in considerable quantity, and is now dull of sale. No transactions are reported. Oak—The new wood arrives slowly. The demand is slack, and in the absence of sales some of the cutters seem disposed to ship again on their own account. Staves—No change in value. Deals—Bright, of fair specification, maintain their value of 15*l*. Floated, 13*l* to 14*l*, according to specification. Birch—Dull, no sales.

Statement of coinage at the United States Mint in Philadelphia, for the month of June, 1861:—

The latest advices state that commercial matters at Jamaica continued without any improvement. Coffee was very scarce, and no sales of consequence had transpired, the nominal value being quoted at 44s to 46s. Sugar ranged at from 15s to 18s. No pimento at market. Commerce was reported to be at a standstill in Trinidad, importers feeling very diffident in extending their credit transactions, especially in the face of large balances due to them not likely to be paid for the present season. The weather had altered for the better. The shipments of produce from the 1st of January to the 20th of June comprised 19,709 hhds, 3,700 tierces, 1,459 barrels sugar; 3,100 puncheons, 116 tierces molasses; 987 puncheons rum; 4,364,792 lbs cocoa; 2,700 lbs coffee. From Demerara advices are to the 22nd of June. The exports of the fortnight had been—sugar, 2,395 hhds, 28 tierces, 737 barrels, 594 bags; rum, 1,097 puncheons, 114 hhds, 50 barrels; molasses, 5 casks; timber, 4,650 cubic feet; charcoal, 1,533 barrels; cocoa-nuts, 16,800; shingles, 205,000.

It appears that the number of immigrants introduced into the Mauritius from India during the last 18 years has been as follows:—1843, 31,258; 1844, 14,152; 1845, 10 285; 1846, 6,789; 1847, 5 729; 1848, 5,303; 1849, 7,282; 1850, 9,823; 1851, 9,771; 1852, 16,796; 1853, 12,144; 1854, 18,516; 1855, 12,915; 1856, 12,653; 1857, 12,725; 1858, 29,946; 1859, 44,397; and 1860, 13,286; making a total of 273,770, besides 1,158 introduced by private individuals and 843 Chinese and others introduced in 1843 and 1845. Of the 200,000 immigrants introduced between 1849 and 1860 inclusive, about 150,000 appear to have remained, either dead or alive, in the colony, the departures for India in that period having amounted to 49,916. As far as can be ascertained, the immigrants received between 1843 and 1860 consisted of 195,000 men, 48,000 women, and 31,000 children.

The market continues very buoyant and with a fair demand, prices have further advanced ¼c per lb, while the offerings are so very light, that to obtain any considerable amount, purchasers would have to pay a still further advance. The sales foot up 5,000 bales, part in transit, closing firm.

NEW YORK, July 5.—The market remains very firm, and holders are enabled to realise full prices. The sales for the two days comprise 8,000 bales. *We quote:*—

The cotton market has been much excited during most of the week. A large business has been done by the trade as well as by speculators and exporters. In the anticipation of a steady reduction in stock, holders have successfully demanded higher rates, and our quotations have been raised ⅛d per lb in most classes of American. Egyptian have been saleable, but command no further advance. Brazil are also unaltered. East India are ⅛d per lb dearer, especially in the lower qualities. The sales to-day are 15,000 bales. The market is firm, and prices still tend upwards. The reported export amounts to 23,160 bales, consisting of 9,010 American, 30 Brazil, and 14,120 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

Advices from most of the manufacturing districts are to the effect that an increased business has been transacted in goods, both for home use and export, and that prices have had an upward tendency. The stocks are by no means heavy for the time of year. The iron market has ruled steady, at full quotations; and there has been more passing in the coal trade.

MANCHESTER, July 18.—The movement in the cotton market has impelled spinners to higher prices. At ⅛d per lb over last week a fair business has been done in cop yarns for the home trade; in mule yarns for India, little above the full rates of last week has been paid; but in all descriptions, home and export, ¼d per lb is the average advance which sellers may be said to hold for. In cloths, no great extent of business has occurred. At the

rates of last week large clearances could be effected, but manufacturers, where they can, keep aloof from selling. In Preston, Blackburn, Burnley, and other districts, several large establishments are on short time.

Bradford.—There is less doing in wool than last week, and no sales of consequence have been made. Prices, however, rule about stationary. Yarns continue dull. A few foreign orders are being given out, but spinners cannot afford to abate their prices, consequent on the high price of wool. The general tone of the piece market is unchanged. Prices are unaltered, and still relatively lower than those of wool. Both home and foreign houses are doing no more business han last week.

Rochdale.—Wool—Operations have been few, and generally trade has been without any degree of certainty. Prices are tending upwards, and staplers are asking, but seldom getting, an advance. Flannel.—Trade generally is still inactive. Lancashire flannels are particularly inactive, and but few buyers operate except for small lots to make up sorts. Prices, as a rule, hold firm to rates current some weeks ago.

Halifax.—Wool continues stiff in price, but not much doing. The short wools of all kinds are in brisk demand, and rates quite firm. Yarns and pieces remain much the same. Of the latter, fancies are in request.

Nottingham.—There has been no improvement whatever in the lace trade this week. There are a few orders for muslins, plaits, and Saxonies in the market. The plain net trade continues exceedingly dull. Very little is doing for the home markets, and the foreign trade is likewise flat. The hosiery trade remains without material change. Stocks are being kept down as much as possible, and numbers of hands continue unemployed. Manufacturers do not complain so much of the demand for the home market as from the foreign shipping orders being scarce. Yarns are firm and high in price.

Leicester.—Some departments of the hosiery trade are rather active, and a tolerable amount of business is doing. Future prospects are also improving; still many hands are only partially employed. At Loughborough and the hosiery districts around business is rather dull. Very little change in yarns or wool.

Belfast.—There has been less depression in the sale of finished goods, and a few orders have been filled for New York. A more active inquiry has also been going on for goods suited to the continental markets. Holland and the Hanse Towns are doing more business—the one in yarns, and the other in linens. South America continues a steady customer for the lighter descriptions of cloth; and to the East there have been pretty large parcels sent off. A quiet feeling prevails in the home trade.

Wolverhampton.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 0s, at the works; best bars, 8*l* 0s; sheets, 8*l* 10s; doubles, 10*l* 0s; nail sheets, 8*l* 0s; latten, 11*l* 10s; boiler plates, 8*l* 10s; best and best best in proportion; common rods, 7*l* 0s; hoops, 8*l* 0s; gas strip, 7*l* 10s; Canada plates, 11*l* 10s; and all other sorts in proportion. Second and third-class makers are selling below these rates. Current prices of pig iron:—Staffordshire cold blast, 4*l* 5s; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, 4*l*; Old Windmill End, second quality, Nos. 1 and 2, melting pig iron, 3*l*; Old Windmill End Mine forge pig iron, 3*l* 5s to 3*l* 7s 6d; best native hydrate pigs, 3*l* 7s 6d to 4*l*, according to the brand; first-class All Mine grey forge pigs, 3*l* 5s to 3*l* 7s 6d; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2s 6d; Seend Mine melting pigs, 3*l* 10s to 3*l* 15s; good mine pigs, with a modicum of fine cinder, 2*l* 10s to 2*l* 15s; mine pigs, deteriorated by cinder, 2*l* 7s 6d to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; Barrow hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; Workington hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; grey forge cinder pig iron, 2*l* 5s to 2*l* 10s; white forge cinder pigs, 2*l* 2s to 2*l* 7s 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of mine melting iron, 3*l* 2s 6d to 3*l* 15s, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Gadlys (Aberdare, South Wales), No. 1 foundry pig, cold blast, 4*l* 10s f.o.b. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12s 6d to 3*l* 15s delivered; Northern hæmatites from 3*l* 2s 6d to 3*l* 7s 6d, according to brand or quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

New York, July 3.—The flour market was heavy and dull. Owing to the character of the foreign news, compared with the advance in freights, the market closed at lower rates, reaching in some cases from 5c to 10c per bbl. The sales footed up about 14,000 bbls, closing within the following range of prices:—Superfine State, 3.90 dols to 4.05 dols; extra State, good to choice, 4.45 dols to 4.90; superfine Western, 3.70 dols to 4 dols; common to choice Western extra, 4.25 dols to 6.40 dols; mixed to straight Southern, 5.50 dols to 6.20 dols; straight to good extra ditto, 6.25 dols to 9 dols, choice extra family and bakers' brands, 9 dols to 9.50 dols; rye flour, 2.70 dols to 3.60 dols; corn meal, Jersey and Brandywine, 2.75 dols to 3.10 dols. Canadian flour was dull and common grades were cheaper, with sales of 400 bbls at 4.40 dols to 7.50 dols—the latter figure for choice extra brands. Southern flour, from Georgetown, Baltimore, and Delaware, and Southern Pennsylvania and Ohio, classed as such, were in good supply, while Virginia, and especially Richmond brands, were nearly exhausted and in few hands, and generally held above the views of purchasers. The sales of Southern, of all brands, embraced 1,200 to 1,500 bbls, closing within the range of the above quotations. Rye flour dull at our figures, with sales of 250 bbls. Corn meal was steady at quotations, with sales of 800 bbls Jersey and Brandywine. Wheat was tolerably active at the present decline, but closed dull for white and inferior qualities, while sound shipping qualities were sustained. The sales footed up about 250,000 bushels at 1.20 dol to 1.30 dol for white Michigan, 1.35 dol to 1.40 dol for Kentucky white, 1.15 dol to 1.22 dol for white Canadian, 1.09 dol to 1.12½ dol for red Western, 1.15 dol to 1.20 dol for white Western, 92c to 96c for Racine spring, 1 dol for amber Iowa and Michigan, and 92c to 95c for Chicago Club, and 73c to 90c for Chicago spring. Corn was firm, especially for good sound shipping lots. The sales embraced 55,000 bushels at 35c for distilling lots, in store; 44c to 46c for heated, 48c for extra mixed, and 56c for prime shipping cargoes. Rye was quiet at 55c to 56c for Western, and 67c to 69c for State. Barley malt was in some better request, while prices were steady. Sales of 8,400 bushels were reported at 72½c to 80c. Oats were in fair demand, with sales at 25c to 29c for Canadian, 29½c to 30½c for Western, and 30c to 31c for State.

New York, July 6.—The flour market was again heavy and lower, and closed at a decline of 10c to 15c, especially on the lower grades of Western and State. The sales embraced about 13,000 bbls. Canadian flour was heavy and lower. Southern was unsettled, and the market was again lower, especially for common and medium brands. Wheat was in somewhat better request, and prime spring was in demand for shipment. Corn was lower and the demand moderate.

STATE OF THE CORN TRADE FOR THE WEEK.

Mark Lane, Friday Evening.

Only limited supplies of home grown wheat have been on offer this week. Good and fine samples have commanded a steady demand, at full quotations; but inferior qualities have moved off slowly. There has been a fair inquiry for most descriptions of foreign wheat, at full currencies. Both English and foreign barley have changed hands heavily, at late rates. In malt a fair average business has been passing, at late quotations. There has been an increased sale for oats, at 6d to 1s per quarter more money. Both beans and peas have maintained their former value, and the flour trade has shown some firmness.

The Continental markets are flat, and both wheat and flour have experienced rather a heavy decline in America.

The general appearance of the wheat crop in this country is very satisfactory, and most accounts agree in stating that the yield in America and Canada will be a large one. Messrs Sturge and Co., of Birmingham, have published reports received by them from cor-

respondents in America. They observe :—"Texas will produce more than an average supply of wheat, maize, oats, and rye. Louisiana an abundant harvest of the same, many of the cotton and sugar plantations having been converted to this purpose. Arkansas reports the largest breadth of land under cultivation ever known before. Alabama, Florida, and Mississippi, have much more land than usual under wheat and maize, with favourable prospects. Georgia reports flatteringly of an abundant yield of all crops; while Missouri, Kentucky, Virginia, Delaware, and Maryland, will at least produce an average. The spring crops in the Central and Western States will not, perhaps, in the aggregate, come up to the yield of last year. Illinois, Iowa, and Wisconsin have, probably, planted one-third less than last year, owing to unfavourable weather, and the withdrawal o valuable field hands by the war excitement. The winter wheat crop, however, will be the heaviest known for years, which will be a counterbalance to the supposed deficit. From Michigan, Minnesota, Indiana, Ohio, Pennsylvania, New Jersey, New York, and the New England States, we have the most favourable reports of all crops, including grass, which will be very heavy. Upon the whole, no accident or disaster occurring between now and harvest, we shall have in the North and West, according to present appearances, as large a yield as last year of wheat, maize, and oats."

The Scotch markets have been firm for wheat and oats, at very full prices. All other produce, however, has moved off slowly on former terms.

Very little change has taken place in the value of any article in Ireland. Generally speaking, the demand has ruled inactive.

At Mark lane, to-day, the supply of English wheat was small, nevertheless the trade ruled slow for both red and white qualities, at Monday's currency. The show of foreign wheat was large. Generally speaking, purchases were made to meet actual wants at late rates; but where sales were pressed, ex ship, 1s to 2s per quarter less money was accepted. Barley was in slow request, on former terms. Oats moved off steadily, and good sweet corn realised extreme rates. Beans and peas were dull, but without alteration in value. Flour changed hands to a limited extent, yet no change took place in the quotations.

The arrivals off coast since this day week to last night are 54. Some of these had previously changed owners. There has been a fair business this week in cargoes afloat.

The London averages announced this day are:—

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 17th day of July, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	25,361,795	Government Debt	11,015.100
		Other Securities	3,634,900
		Gold Coin and Bullion	10,711,795
		Silver Bullion	..
	25,361,795		25,361,795

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,535,202
Rest	3,383,112	Other Securities	19,534.290
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	2 946,205	Notes	4,913,935
Other Deposits	13,317,958	Gold and Silver Coin	866,348
Seven Day and other Bills	649,500		
	34,849,775		34,849,775

Dated the 18th July, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,097,360	Securities	29,166,492
Public Deposits	2,946,205	Coin and Bullion	11,578,143
Private Deposits	13,317,958		
	37,361,523		40,744,635

The balance of Assets above Liabilities being 3,383,112*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£323,669
A DECREASE of Public Deposits of	309,408
A DECREASE of Other Deposits of	596,640
A DECREASE of Government Securities of	81,000
A DECREASE of Other Securities of	366,301
A DECREASE of Bullion of	96,156
An INCREASE of Rest of	38,918
A DECREASE of Reserve of	386,521

The above return is unfavourable. A considerable decrease has taken place in the reserve, owing to the diminution in the Government and other deposits. From the moderate demand for money, however, a portion of the other securities have run off. Notwithstanding that at this period of the year the coin taken out at the end of the quarter is flowing back into the Bank, there is a falling off in the bullion, attributable partly to the withdrawals for America, and partly to the requirements for the approaching harvest.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 21,816,938	£ 21,404 110	£ 22 922,859	£ 22 936,766	£ 21,097,360
Public deposits	3,957,006	2,808 845	4,982 572	3,485,307	2,946.205
Other deposits	9,583,816	15.711,905	14,932,995	15,265,312	13,317,958
Government securities	13,464,021	10,587,476	11,270,180	9,721,445	9,535,202
Other securities	11,803 076	15,499,255	17,254,439	19.419,147	19,534,290
Reserve of notes & coin	7,229,002	11,082,307	10,109,687	8,306,678	5,780,283
Coin and bullion	18,863,047	17.212,937	17,699,527	16,009,843	11,578,143
Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	4 p. c.	6 p. c.
Price of Consols	96⅞	95¾	95¼	93⅝	90
Average price of wheat	42s 7d	45s 3d	46s 6d	57s 7d	50s 6d
Exchange on Paris (short)	24 97½ 25 2½	25 5 12½	25 5 12½	25 10 17½	25 35 42½
— Amsterdam ditto	11 16 16½	11 15	11 12 12½	11 14½ 15	11 18½ 19
— Hamburg (3 months)	13 7¾	13 6½ 7	13 3½ 4	13 5¼ 5½	13 10 10½

In the corresponding week of 1851, the House of Lords had just thrown out a Bill to admit Jews into Parliament. In France, M. de Tocqueville had prepared an able report in favour of a revision of the Constitution. The Sardinian Chamber of Deputies had just approved a treaty of commerce and navigation with Holland. The accounts from California reported the extraction of large quantities of gold from quartz by machinery. The London money market continued easy.

In 1858, the best bills were discounted at 2½ per cent. The Queen was about to visit the Emperor of the French at Cherbourg. The adjudication of the New Zealand 4 per cent. guaranteed loan of 300,000*l* had taken place at the reserved price of 107.

In 1859, the English funds had fallen nearly 1 per cent. The market was principally affected by the decline in French Rentes, and the impending pecuniary demands of the Indian Government.

In 1860, the Chancellor of the Exchequer had just presented his financial statement in the House of Commons, and the Attorney-General had withdrawn his Bankruptcy Bill. The East India Railway Company had announced the issue of a million and a half in debentures. The creditors of the great leather house of Streatfeild, Laurence, and Mortimore had held a meeting, when the parties principally interested announced their intention of sending the affair into the Court of Bankruptcy. The Syrian massacres were exciting much interest and indignation. Disturbances continued to prevail in Naples. The recall of Sir Charles Trevelyan from the Governorship of Madras had exercised a good effect in Calcutta.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 2,219,260*l*; in 1858, an excess of 212,650*l*; in 1859, a deficiency of 2,321,444*l*; and in 1860, a deficiency of 4,153,835*l*. In 1861, the deficiency is 6,216,332*l*.

DISCOUNT AND MONEY MARKET.—In the discount market, this week, the demand has been very moderate, and the rate for the best paper is only 5½ per cent. The supply of capital, however, does not appear abundant, but from the contraction of trade there are remarkably few first-class bills offering. On the Stock Exchange, money is very easy, and short loans on Government securities were readily negotiated this morning at 4 to 4½ per cent., and in the afternoon at 3 per cent. only. For longer periods the charge is from 4 to 5 per cent.

The following are the rates of discount in the principal cities of the Continent. The St Petersburg quotation is 1 per cent. higher than last week:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5½
Berlin	4	2½
Frankfort	3	2
Amsterdam	3	3
Turin	6	5½
Brussels	3	3
Hamburg	...	2¾
St Petersburg	7	...

The applications for the new issue of 10,000,000*l* of French railway obligations have been so enormous that the applicants will receive only about 3 per cent. on the amounts asked for. The 500f obligation was yesterday quoted on the Bourse 14f to 15f premium.

The Italian loan of 20,000,000*l* is to be adjudicated on Tuesday next at Turin. It is believed, from the latest accounts received from that city, that the whole will be readily subscribed.

The Committee of the six associated banks have given notice that on Thursday next tenders will be received for a further issue of 1,000,000*l* 6 per cent. debentures by the colony of Victoria for railway purposes. A deposit of 5 per cent. must be made upon application, and the remainder on the delivery of the bonds on the 16th of August. The interest will run from the 1st of April last. The price of the existing issue of bonds is 105¼ to ⅜.

A list of the successful tenders for the new Indian loan of 4,000,000*l* was published on Monday. The applications at 98*l* 18s were for a total of 1,357,200*l*, and the amount allotted in this instance will, therefore, be about 37 per cent. The success of the present operation has been more marked than the last. Notwithstanding the difference in the price of Consols, now about 2 per cent. lower, Messrs Rothschild, who sent in a bid on Friday for a million-and-a-half, received nothing, whereas on the former occasion they obtained the whole of their application, the price being in each case the same, 98¾. The following is the official list of tenders:—

No. of Tenders.	Amount. £	Price. £ s d
2	100,000	99 8 0
3	24,500	99 7 6
1	50,000	99 7 0
1	2,000	99 6 6
1	3,000	99 6 0
6	123,000	99 5 6
7	53,500	99 5 0
1	4,000	99 4 6
1	2,000	99 4 0
7	191,000	99 3 6
15	371,000	99 3 0
22	286,500	99 2 6
7	226,000	99 2 0
21	207,000	99 1 6
52	519,100	99 1 0
43	427,700	99 0 6
35	462,500	99 0 0
2	35,000	98 19 6
14	316,000	98 19 0
17	99,000	98 18 6
77	503,200	98 18 0
Total 349	4,000,000	

About 700,000*l* was paid up in full on the stock this afternoon in addition to the first instalment due to-day of about 700,000*l*.

English Funds.—Consols remained steady at the improved prices of last Friday during the earlier part of the week, but some further sales have been effected for exchange into the new Indian loan, and a decline has since taken place. Yesterday, as much as 140,000*l* stock was stated to have been disposed of for this purpose by one broker. The market has also been prejudiced by the news from America, and by unfavourable political reports from abroad, and espepially by a telegram said to have been received here by a foreign house that the Emperor of the French is seriously ill at Vichy. Little credit, however, was attached to this rumour by persons likely to be well informed. Consols on Monday were quoted 90¼ to ⅜ for the 7th of August, and receded yesterday to 89⅞ to 90. To-day, a further reduction occurred of an eighth, but before the close the price recovered to the same point as yesterday.

Immediately the result of the negotiation for the new Indian loan of 4,000,000*l* was announced, a rise took place in the scrip, and at one time it was quoted as high as 100½, or 2 per cent. premium. A slight reaction then took place, but the price is still firm at 100⅝ to ¼. The public continue to purchase for investment, while the dealers being oversold in anticipation of receiving an allotment, the stock is scarce and in demand for delivery. The old Five per Cents. were last quoted this evening 99⅜ to ⅝.

Exchequer bills have receded with Consols, the June descriptions being quoted 3s discount to par, and the March 9s to 4s discount. India bonds are firmer at 13s to 8s discount.

Foreign Stocks.—The principal fluctuations in this market have again been in Turkish Six per Cents. of 1858, which, from speculative purchases, went as high as 68. Some realisations on the advance were then effected, which caused a reaction, the movement being hastened by the announcement of an adverse alteration in the Constantinople exchange from 175 to 182½. After touching 65¼, the price rallied this afternoon to 66½. The 1854 loan has also fluctuated considerably, but to a less extent than the 1858 stock. Other foreign bonds have been generally unchanged, Russian descriptions, however, continuing with a tendency to decline.

The closing price of French Three per Cents. on the Paris Bourse, this evening, was 67f 75c, showing a reduction on the week of an eighth. The movement is chiefly attributable to the attempted assassination of the King of Prussia.

The annexed communication is from the Committee of Spanish-American bondholders.

The Committee, having made an urgent representation to the Government of Venezuela on the subject of the existing arrears on the foreign debt of that republic, and having requested that the Government would at once appropriate 25 per cent. of the custom house duties to meet the interest of the deb', have received a reply from the Minister of Finance, dated Caracas, the 21st ult., stating that, in the actual unsettled condition of the Republic it is impossible for the present to comply with that requisition. The Government are, however, occupying themselves with efforts to obtain such financial resources as may enable them to meet their engagements to their foreign creditors.

11 Austinfriars, 19th July, 1861.

A Venezuelan journal confirms the account of the defeat of the revolutionary forces by the Government party of New Granada. General Obando is said to have been killed, and Mosquera taken prisoner.

The following relates to the debt of Equador:—

Ecuatorian Commission of Agency,
11 Austinfriars, July 15.

Advices have been received to-day from Messrs Gutierrez and Co., dated Guayaquil, June 13th, stating that they are prevented remitting the funds they have in hand from the Custom house duties, by an entire want of bills of exchange in that place.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

	Consols. Money. Lowest.	Highest.	Account. Lowest.	Highest	Exchequer Bills March.	June.

Railways and other Shares.—There has been scarcely any business doing in the railway market, but the public during the past fortnight having made a few investments in some stocks, especially in Great Northern, prices are generally firmer. Until, however, the announcement of the proposed dividends for the past half-year, business continues almost suspended.

In the colonial market Indian guaranteed stocks are improving, owing to the success of the new loan. Canadian are rather dull.

Foreign descriptions have been generally neglected, and closed with a heavy appearance. American shares have fallen on the President's message.

In the miscellaneous share market joint-stock banks have been in some demand, owing to the good dividends declared for the past half-year. Ottoman have been especially in request, from the increased confidence felt with regard to Turkish finance. Universal Marine Insurance have receded to ⅞ to ¾ dis., on the intended raising of new capital.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

	Closing prices last Friday.	Closing prices to-day.
Railways.		
Bristol and Exeter	95 7	94 6
Caledonian	99 100	99½ 100

Foreign Exchanges.—There has been no alteration of importance in the rates this week, but the tendency has been rather less firm.

Bullion.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley on the movements in bullion during the week, and the transactions in Indian rupee paper:—

Gold.—The shipments, since our circular of 11th inst., comprise 65,815*l*, per North American, to Quebec; 117,263*l*, per Arabia, to Boston; 64,800*l*, per Borussia, to New York; 42,113*l*, per City of Baltimore, to New York; 4,563*l*, per Shannon, to West Indies. The arrivals are—The Siene, from the West Indies, with 30,000*l*; and the Norfolk, from Melbourne, with 235,000*l*. Some considerable amounts of foreign gold coin, from the Continent, have come to hand. The Bank of England have reduced their price for French gold coin, from 76s 3d to 76s 2d per ounce. About 272,000*l* has been paid into the Bank of recent arrivals. The following ships from Melbourne are now on their way, or advised as about to sail:—The Marco Polo sailed 18th February with 26,000*l* (this vessel put into Valparaiso on 2nd April with damages); the Boreas, 4th March, with 41,872*l*; the Agincourt, 28th March, with 79,528*l*; the Donald McKay, 20th April, with 200,000*l*; the Dover Castle (to sail the end of April), with 116,600*l*; and the Sussex (to sail end of April), 127,700*l*. Advices also have been received that shipments of 80,000 ounces per Great Britain, and 30,000 ounces per Suffolk, had been made. These vessels would leave about the end of May, and would probably have still larger amounts on board.

Silver.—A slight improvement has taken place in the silver market; we now quote the price 5s 0¼d per oz standard; at this rate the amount brought by the Seine from the West Indies has been sold; this vessel had 59,000*l* on board.

Mexican Dollars.—We have to report a rise in the market for Mexican dollars, owing to their scarcity, and to an improved demand for China. Sales have been effected at 59d per ounce, and but few, if any, are to be obtained even at this rate.

Exchange on India for banks' drafts, on Bombay and Calcutta, 60 days' sight, continues as on the 11th inst., viz., 1s 11⅝d to 1s 11¾d. Bills with documents, 1s 11⅝d to 1s 11¼d. Madras banks' 60 days' sight drafts, 1s 11⅝d.

India Government Loan Notes remain unchanged, but are firm at last week's quotations of 100¾ to 101¼ for 5½ per Cents., and 94¼ to 94⅜ for 5 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 10d per oz std; bar gold refinable, 77s 11d per oz std; South American doubloons, 73s 6d to 73s 9d per oz, last price; United States gold coin, scarce. Silver—Bar silver, 5s 0⅜d per oz std, last price; bar silver, containing 5 grs gold, 5s 0⅜d per oz std, last price; fine cake silver, 5s 5d per oz, last price; Mexican dollars, 4s 11d per oz, last price; Spanish dollars (Carolus) in demand, scarce.

About 56,000*l* in gold was bought by the Bank yesterday, and 90,000*l* to-day.

The out-going steamer with the India mail to-morrow will take 625*l* in gold for Malta, 1,000*l* for Alexandria, 2,050*l* for Ceylon, and 70,801*l* in silver and 3,401*l* in gold for Calcutta and Madras, making a total shipment of 77,877*l*. The whole is on private account.

Failures and Mercantile Embarrassments.—At a meeting of creditors of Messrs Stephen Roberts and Co., drapers and clothiers, of Bow churchyard and Shoreditch, who suspended on the 1st instant, it was resolved to accept a composition of 10s in the pound. The balance-sheet, prepared by Messrs Harding, Ball, and Bush, accountants, showed liabilities 10,778*l*, and assets valued at cost 6,900*l*.

The stoppage has been announced of the Monkland Iron and Steel Company at Glasgow, with, it is said, liabilities of about a quarter of a million. Among the creditors are several of the Scotch banks, who are understood to have made large advances to the concern, but are believed to be fully secured. The establishment consists of only a few partners, and until very recently was reputed to be wealthy. A committee has been appointed to investigate the accounts.

The suspension has also taken place of Mr James Grieves, of Gracechurch street, Australian merchant, with liabilities of about 60,000*l*. The assets consist chiefly of assignments to the colonies of recent date, and favourable expectations are consequently entertained as to their realisation. The books have been placed in the hands of Messrs Coleman, Turquand, Youngs, and Co., the accountants.

Numerous small suspensions in the iron and tin plate trades are taking place throughout the country, owing to the stagnation in those branches of business.

Public Companies.—The new scale of charges adopted by the Fire Insurance Companies in consequence of the disaster near London Bridge has just been published. In many cases they are three times as high as those hitherto in use, the rate for each of the docks having been raised from 3s 6d to 10s; for specific insurances at waterside warehouses, from 3s to 10s; and for general floating policies, from 10s 6d to 35s per cent. It is intended, however, to reduce these rates by 30 to 50 per cent. in the event of certain precautionary measures being adopted, modelled chiefly on those made compulsory at Liverpool in 1844 by Act of Parliament. The latter, from being the most dangerous port in the Kingdom, and constantly experiencing serious conflagrations like the one that lately occurred here, has now become more than ordinarily safe. London is understood to be one of the worst, and a calculation made by a leading office of the results of the past eleven years shows an average loss of 12s 8d per cent. The new tariff includes a scale of charges for floating policies, and a new and increased scale for ships in the port of London. The new rates are to apply to all insurances commencing from the 24th June last, and to all existing policies for which the renewed notices had not been issued on that day.

In consequence of the above determination of the Insurance Companies, a movement is being organised to oppose any large increase in the rates for mercantile risks. At a meeting of the Southwark Wharfingers' Association, on Tuesday, the following resolution was adopted:—

That after a careful consideration of the new tariff of rates for fire insurance just issued by various of the leading insurance offices, and which tariff, in the opinion of this meeting, is unreasonable and unsound in principle, the members of this Association are of opinion that an effort should be made to establish additional fire insurance companies; being fully satisfied that mercantile insurance upon a more equitable scale of rates than that just published, and insurance upon private house property at reduced rates, will afford highly remunerative employment for a large amount of capital.

The principal merchants and brokers in the colonial produce and corn markets are also taking measures to have a meeting convened under the presidency of the Lord Mayor, to protest against the proposed increase in the fire rates.

The half-yearly meeting of the London and Westminster Bank took place on Wednesday, when the report stated that the net profit for the past six months was 131,591*l*, which, added to the amount brought forward from the previous account, made an available balance of 142,533*l*. Out of this sum it was resolved to appropriate 25,253*l* to the reserve, which now amounts to 215,378*l*, to declare a dividend and bonus at the rate together of 20 per cent. per annum, and to carry forward the remaining 17,280*l*. The business of the bank continues to progress steadily, the amount due to customers having advanced to the large sum of 14,821,650*l*, being an increase of about 3,000,000*l* over this time last year, and about 2,500,000*l* over January. A part of this augmentation, however, is due to the transfer of the business of the Commercial Bank. The losses have been inconsiderable, and much below the average. The profits realised have not arisen from any extraordinary effort, and so little have the Directors looked to swell the receipts, that they have not hesitated to add largely to their Government investments as a measure

of security against the augmentation in their deposits, notwithstanding the rate of interest continues very remunerative. The Directors claim to have acted with promptitude and liberality in their late negotiations with the Commercial Bank, and to have saved a great deal of mercantile difficulty. The best and most desirable part of the business of the Commercial Bank has come to the London and Westminster. The Directors of the latter have taken on their staff eighteen clerks of the Commercial Bank, besides distributing 9,000*l* as compensation among those officers whose services were finally dispensed with.

At the London Joint Stock Bank meeting, there was no discussion beyond the usual votes of thanks, and the report immediately on being put from the the chair was adopted. It appeared that the profits in the past six months have been 84,006*l*, and a dividend and bonus were declared at the rate of 25 per cent. per annum, leaving 9,006*l* to be added to the guarantee fund, which, allowing for depreciation of securities, now stands at 198,458*l*. The sum already reserved to meet the losses by the great leather failures has proved more than sufficient, and some portion of it will probably be recovered on the final liquidation of those estates. Mr Ambrose Moore, an original director and founder of the bank, has resigned from ill health.

The City Bank held their half-yearly meeting on Tuesday, when a dividend and bonus were declared at the rate together of 4½ per cent., free of income tax, making a total distribution of 7½ per cent. for the financial year ending in June. During the past twelve months the business of the bank has been generally satisfactory, the only unfavourable feature being the loss by the failures in the leather trade. A further sum of 5,000*l* has been written off in the present half-year on this account, making a total of 22,000*l* in all, the bank having been compelled by an adverse legal decision to give up to the assignees of Messrs Streatfeild, Laurence, and Mortimore a collateral security they held, estimated to realise the former sum. In consequence of this loss, no addition has been made to the reserve for twelve months; but, on the other hand, it is satisfactory that the dividend has been maintained. Owing to the increase in the business of the bank, it is intended to raise the paid-up capital from 300,000*l* to 400,000*l* by the issue of 2,000 new shares. Some influential parties have recommended the establishment of a branch at the West End, but the Directors are satisfied with their present prosperity, and will remain as they are. The net available balance on this occasion was 22,822*l*, of which 13,500*l* was applied to the dividend, 7,000*l* to the reserve, which now stands at 40,000*l*, and 2,322*l* was carried forward.

A meeting of the Bank of London took place on Wednesday, when the report announcing a dividend at the rate of 5 per cent. per annum, free of income tax, was agreed to unanimously. It was stated that the connections of the bank have continuously increased, and that the character of the business affords a gratifying proof of the high estimation in which it is held by the public. The current accounts, which form the most profitable part of banking business, show a considerable augmentation. The profits have been in some degree increased by the high rates of interest in the half-year. It is satisfactory that the proprietors have hitherto abstained from the declaration of a higher dividend than 5 per cent. until a reserve shall have been accumulated of 50,000*l*, as such a course has given great confidence to the public. Looking, however, to the past, it is believed that the present is the last occasion when the dividend will be 5 per cent. only. The bank has now gained experience, and will avoid many risks it has previously gone through. Notwithstanding the loss by the failures in the leather trade, the addition to the reserve this year has been 14,000*l*. There was a short conversation, in the course of which it was mentioned that the bad debts are very strictly scrutinised, and that the actual earnings of the year are estimated at 12 per cent. The Directors have shown their confidence in the prosperity of the bank by increasing their holdings more than threefold since the commencement.

At a meeting of the Union Bank of Australia, on Monday, a satisfactory report was presented, and a dividend declared at the rate of 12 per cent. per annum, free of income tax. It was stated that the Directors have instituted a close examination into the affairs of the establishment, and have provided for every bad and doubtful contingency. It is considered encouraging that the bank has got through the last three years of depression in trade in Australia so well, and confidence is felt for the future, as the crisis is now nearly over. With regard to the threatened war in New Zealand, it is believed that should it arise it will be productive of good rather than evil, as the island will be thoroughly pacified once for all. The restoration of peace will also probably be followed by the formation of new settlements and increased activity in trade. Not much relief has yet been obtained by the reduction in the allowance of interest on deposits, but it is hoped that the evil of the course pursued will ultimately lead to its modification. In reply to a suggestion that the accounts should contain the expenditure, the Directors agreed in future to supply the information required. For the year ending the 31st December, 1860, in Australia, and the 30th of June, 1861, in London, the total expenses were 101,497*l*, of which 79,766*l* was colonial, and 21,731*l* home, including 6,540*l* for income tax. In answer to an inquiry, it was mentioned that about 1,700*l* has been recovered on account of the defalcation last year of about 10,000*l*, and a further sum may also ultimately be obtained.

At a meeting of the Bank of New South Wales, held at Sydney on the 24th of April, it was announced that the profits for the half-year ending in March were 60,274*l*, and that the available balance was 62,836*l*. It was resolved to pay a dividend of 56,250*l*, being at the rate of 15 per cent. per annum, to appropriate 2,017*l* to the reserve, and to carry forward the remaining 4,569*l*.

At a board meeting of the Universal Marine Insurance Company yesterday, it was resolved to increase the paid-up capital of the Company from 100,000*l* to 200,000*l*.

The half-yearly meeting of the St. Katharine's Dock Company took place to-day, when a dividend was declared at the rate of 1¾ per cent. for the past six months out of the available balance of 35,025*l*, leaving 1,079*l* to be carried forward. The report stated that the Directors have considered the question of adopting a more remunerative charge, instead of the low tariff forced upon them at the end of 1859, but in order to raise their rates it will be necessary to act with other establishments. With reference to the late fire, it was mentioned that the greatest precautions are used against any such misfortune, and that a regular fire brigade is kept, with powerful land and floating engines. Water mains are also laid round the premises, and the hydraulic machinery is being adapted to throw a very large body of water on any spot required. The number of ships entering the docks in the past six months contrasts unfavourably with the same period of 1860, but shows an increase over 1859, the numbers being in 1859, 403 ships of 97,962 tons; in 1860, 420 ships of 105,935 tons; and in 1861, 404 ships of 101,669 tons. The stock of goods in warehouse on the 30th June was 67,928 tons, or very nearly the same as last year.

The report of the National Discount Company, issued preparatory to their meeting next Thursday, states that the available balance is 17,459*l*, out of which a dividend is proposed at the rate of 5 per cent. per annum. This distribution will leave 7,825*l* to be added to the reserve fund, which will then amount to 16,115*l*. The sum written off in the last account, 26,336*l*, has proved amply sufficient to meet the losses by the late failures in the leather trade.

The Directors of the Scottish Australian Investment Company propose in their report to declare a dividend at the approaching meeting at the usual rate of 10 per cent. per annum, leaving 10,246*l* at the credit of the reserve fund. The operations in the colony during the six months ending in December last have been satisfactory, the profits showing an augmentation compared with the same period of 1859 of 2,187*l*.

A financial statement of the Port Philip and Colonial Gold Company announces that in the six months from the 1st October to the 31st March, the net returns have been 10,058*l*. The available balance is 10,645*l*, out of which a distribution of 1s per share is recommended, free of income tax.

The United Mexican Mining Company have given notice that on the 13th of September next, 40 per cent. of the special loan raised in 1854 will be repaid.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 4 per mille premium, and the short exchange on London is 25.37½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is 4-10ths per cent. dearer in London than in in Paris.

By advices from Hamburg the price of gold is 427½ per mark, and the short exchange on London is 13.8½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 1 per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 106½ to 107 per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT

The show of English wheat at Mark lane, to-day, was limited; nevertheless, all kinds moved off slowly, at about Monday's currency. Foreign wheat was very dull, and rather lower to purchase. The dealings in barley, malt, beans and peas were limited; but flour commanded previous rates. The imports of foreign produce, this week, are 15,970 quarters of wheat, 720 barley, 14,580 oats, 20 sacks and 7,920 barrels of flour. At Liverpool, this morning wheat moved off heavily, and inferior qualities gave way 1d to 2d per cental.

The demand for wheat at Alexandria has ruled inactive. The arrivals from the interior have been small, and have comprised but little of really good quality. Beans and other articles have sold slowly. Saide wheat, private trade produce, has changed hands at 28s 6d to 29s 3d; Beheireh ditto, 27s to 28s; ditto, Pasha's produce, white, 29s 7d; beans, private trade produce, 26s 3d to 26s 8d; ditto, Beheireh, 23s 6d to 24s 4d; barley, private trade, 17s 6d to 18s 6d; ditto, Pasha's produce, 19s 6d to 19s 10d per quarter free on board. The Liverpool steamers are accepting 2s per quarter for beans, wheat, or other grain. For sailing vessels, the rate is 5s 3d to 5s 9d for beans to the United Kingdom for orders; to a direct port, 4s 9d to 5s for beans and wheat.

After the arrival of the American mail on Monday, the Liverpool cotton market became very excited, and has continued so. The sales are again very large, say 113,000 bales, of which spinners took 67,000 bales, speculators 23,000 bales, and exporters 23,000 bales. Prices are raised ⅛d to ⅜d per lb. With the prosecution of the war in America, and a diminishing stock in Europe, undoubtedly prices will rise gradually, unless accounts should arrive indicating a chance appearing that some arrangement between the belligerent parties in America might take place, but even then the effect on prices might be very temporary, as the million bales short on the last crop, and the less land under cotton cultivation this season appears sufficient to warrant present quotations.

Messrs Briggs and Co., writing from Alexandria to the 4th inst., report as follows on the cotton trade:—"Cotton is in good demand and prices are high, but the supply is necessarily at this light, and qualities much mixed with a generally inferior staple. The operations of the week past have been—288 bales sweepings to low ordinary, at 5.57d to 7.27d; 428 ordinary to good middling, 7.34d to 7.98d; 736 good middling to fair, 8.05d to 8.40d; 551 good fair to good, 8.54d to 8.76d; and 138 good to fine, 10.87d per lb."

There has been a fair average business doing in most kinds of tea, at about last week's currency.

The following remarks, under date Hong Kong, May 28, are in reference to the tea and silk trades:—

Tea—Settlements of country congou amount to 2 chops, at previous rates. The new Tayshan tea continues to arrive, but the extreme rates demanded (23 taels to 24 taels), together with the unsatisfactory character of the crop, have prevented settlements to any extent. Some small transactions in new scented teas have taken place. Canton-made green teas have been taken to a fair extent for England and the United States at slightly higher prices. In country greens, settlements amount to about 6,500 packages, for America. Sales are as follow:—Congou, 2 chops; stock, 8 chops; Ohnams, 22½ taels to 25½ taels; Oopacks, 26 taels to 29 taels. Souchong—No sales. The 1½ chop has been taken off the market. Canton packed Congou—1 chop of chests, 3,000 half-chests, at 18 taels to 20½ taels. Tayshan Congou—300 half-chests, new, at 21 taels to 23 taels. Scented Orange Pekoe—4,500 boxes, medium to fine, at 27 taels to 32 taels. Scented Caper—2,000 boxes, fine to finest, at 29 taels to 31 taels. Canton Green Teas—Gunpowder, new, 5,000 boxes, at 19 taels to 24 taels; young hyson, new, 1,000 boxes and 2,500 half-chests, at 19 taels to 30½ taels. Country Green Teas—Sales, 6,500 packages; stock, 9,300 packages. Hyson skin, common to good, at 20 taels to 25 taels; young hyson, common cargo, at 24 taels to 25 taels; ditto, medium, at 26 taels to 28 taels; ditto, superior, at 29 taels to 30 taels; ditto, fine to finest, at 34 taels to 42 taels; hyson, cargo, at 28 taels to 34 taels; ditto, medium to finest, at 40 taels to 65 taels; gunpowder and imperial, common to finest, at 28 taels to 53 taels. Freights to London, 3*l*; to New York, 10 dols. Amoy advices are to the 20th inst., and contain nothing of importance. Foochow advices are to the 18th inst. Tea—During the fortnight a trifling business only had been done. A small parcel of the new crop had already come down, and further arrivals might be expected shortly. Late accounts from the country describe the crop to be equal to an average one, but not likely to prove extra fine. The cost is said to be from 22 taels to 28 taels laid down in Foochow. Sales from the 2nd to 17th of May:—Congou, 1,150 chests, from 11 8 taels to 18 5 taels, short. Stocks—Congou, 6,300 chests; Oolong, 1,100 half-chests; and Pekoe, 630 chests. Quotations, nominally as follows:—Congou, low dusty to fair common, 8 taels to 13 taels, short; good common, 14 taels to 15 taels, short; common to fair Ningchow, 16½ taels to 19½ taels, short. Shanghai advices are to the 18th inst. Silk—Settlements for the fortnight amount to 1,500 bales at very irregular rates. Quotations, however, remain as before. Stock estimated at about 4,000 bales. The weather was most favourable for the new crop. The peasantry were fully at work, and not interfered with by the rebels. Total export of silk from China to Europe is 81,604 bales, against last year to same time 65,011 bales, showing an increase for this season of 16,593 bales. Tea—Settlements of black amount to 706 chests; Hohow and Ningchow at 24 taels to 24½ taels; and 900 half-chests common congou at 20 taels. Green—The market was unaltered. About 7,000 packages had been settled. At Ningpo about 5,000 packages had found buyers, at a reduction of fully 2 taels on previous sales; 700 half-chests Japan tea had also been settled. Stocks—Black—3,000 chests Hohow, 1,300 chests Shanghai packed low tea, and 1,300 chests flowery Pekoe. Green—1,600 half-chests China, and 2,300 half-chests Japan. Freights to London, 3*l* for tea, and 5*l* for silk. The total export of tea from China to Great Britain is 80,838,200 lbs, against to same time last year 77,971,500 lbs, or an increase for this season of 2,866,700 lbs. To the United States the export is 24,515,100 lbs, against 30,037,800 lbs, showing a decrease for this season of 5,522,700 lbs.

Good and fine raw sugars have commanded a steady inquiry, at, in some instances, 6d per cwt more money. Low and damp parcels have realised previous rates.

The coffee market may be considered firm, at full prices.

The annexed information respecting coffee, dated Colombo, June 17, is forwarded by Messrs Fryer, Schultze, and Co.:—"Considerable progress has been made in shipments of coffee since our last, and the weather, though occasionally broken, is favourable for shippers. To date, the exports of the present season's crop are as follows:—

PLANTATION COFFEE.

To Great Britain	cwts 347,190	against last year,	cwts	323,182
Foreign Ports	21,940	—	—	30,391
Australia and India	9,193	—	—	6,499
	378,323			360,072

NATIVE COFFEE.

To Great Britain	cwts 60,801	against last year,	cwts	70,792
Foreign Ports	42,828	—	—	67,269
Australia and India	4,303	—	—	2,035
	107,932			140,096

Plantation coffee is selling at 68s 11d; and native ditto at 55s per cwt, cost, freight, and exchange included."

There is only a limited business doing in rice. Prices, however, are supported.

The transactions in most kinds of saltpetre have been much restricted, on former terms.

The third series of colonial wool sales for the present year commenced on Thursday. The attendance of buyers, both home and foreign, was less than usual. The competition was not spirited. Prices for Sydney, Port Philip, Van Diemen's Land, and New Zealand, ruled on the average 1½d per lb lower than at the close of the last sales. Of other descriptions the quantity offered was scarcely sufficient to form an opinion on; lower qualities have suffered more than the better. The greatest fall is on Sydney wool, which is 1½d to 2d lower. The quantity arrived to date is as follows:—From Sydney, 18,535; Port Philip, 24,859; Van Diemen's Land, 10,169; South Australian, 7,198; New Zealand, 13,241; Swan River, 903; Cape of Good Hope, 8,909. Total, 83,814 bales.

Messrs Ronald and Son report the close of the public sales of wool at Liverpool as follows:—"The total quantity of 24,465 bales brought forward consisted of 15,156 bales East India, 554 Egyptian, 2,039 Peru and Lima, 1,350 Buenos Ayres and Entre Rios, 265 Cordova and San Juan, 817 Oporto, 793 Spanish and Lisbon, 873 Russia, 681 Mogadore, 1,150 sundries, 787 sheets English skin and fleece, in all, 24,465 bales, &c. The recent sudden decline of about 20 per cent. in English wools could not fail but exercise a correspondingly depressing influence upon the prices of East India, as well as the other descriptions brought forward on this occasion; and although we have had a fair attendance of both home and foreign buyers, and the biddings have been spirited throughout, East India wools have undergone a reduction in value to the full extent of the advance established at our May series. The higher-priced kinds have suffered most, and, some of the importers being not disposed to submit to so great a decline, about 800 bales were withdrawn. Egyptian sold freely. Peru and Lima—The former were all withdrawn for want of competition; of Lima only a small portion was disposed of at a considerable reduction in price. The quantity of Buenos Ayres offered was rather considerable, but there was no competition; the few lots washed wool were sold "to close accounts," and brought rather low prices; the unwashed were all withdrawn. Cordova met with fair competition, at from 9¼d to 10d per lb; a few lots of San Juan wool of prime quality realised 11⅛d. Oporto—Only a few lots of fleece offered, and sold at from 13d to 13½d per lb; the lower grades maintained about former rates. For Spanish and Lisbon there was no demand. Russia—Nothing very good was offered; inferior sold at from 8d to 8½d; grey 6d to 6¾d. Mogadore—Washed sold from 8d to 13d; for unwashed there was no demand, and they had consequently to be withdrawn. The other descriptions of foreign call for no comment. English Skin and Fleece—There was a good attendance of buyers, and fair competition; short skins went from 1½d to 2d per lb lower, whilst long for carding and combing purposes must be quoted a full 1d per lb lower than at the May sales."

The public sales of indigo have been in progress this week. The biddings have continued inactive, at prices about equal to the opening.

We extract the following remarks from Messrs Moran and Co.'s circular, dated Calcutta, June 8. They refer to the state of the indigo crop and trade to that period:—"The transactions in indigo in this market have been small and confined to two public sales, at which about 400 chests were disposed of, and the season may now be considered as closed. Prospects for the coming crop are somewhat more favourable. The long drought broke up about the middle of the month, and has been followed by copious showers, with every appearance of the periodical rains having set in. Sowings in Lower Bengal have now closed, but with a cultivation less than was expected."

No quotable change has taken place in the value of spirits. Scotch pig iron has sold at 51s 3d; and linseed oil at 31s.

The tallow trade is flat, at 48s 6d per cwt for P. Y. C., on the spot; 48s 6d for July to September; and 48s 6d for October to December.

A report from New York, dated the 3rd instant, runs thus:—Since the date of the last mail, very little has been doing in commercial circles; nevertheless, as the stock of goods is now considerably reduced, and as the stock of gold held by the banks is the largest on record, prices have for the most part been supported. The demand for money, however, has not increased, and we quote prices as follows:—

	Per cent. per annum.
Loans on call, stock securities	4½ to 5
Do. bond and mortgage	6 7
Prime endorsed bills, 60 to 90 days	6 7
Do. 4 to 6 months	10 ...
First-class single signatures	... ...
Other good bills	... ...

The following is a comparative statement of the condition of the banks of New York City, June 22 and June 29:—

	June 22. dols		June 29. dols		dols
Loans	113,667,640	...	112,404,012	... Dec.	1,263,628
Specie	39,480,189	...	42,028,011	... Inc.	2,597,829
Circulation	8,444,830	...	8,338,559	... Dec.	106,271
Deposits	87,602,803	...	88,721,752	... Inc.	1,119,409

The result is about what was anticipated. The loans show a further contraction, while the specie shows an increase of nearly 2,600,000 dollars, the actual amount in the Bank vaults being upwards of 42,000,000 dollars. The fiscal year which closed on the 30th June, shows the following result in imports and exports at New York City:—

	dols
The imports of foreign merchandise from 1st July, 1860, to 30th June, 1861	191,328,000
1860	231,341,000
Decrease	40,013,000

IMPORTS.

	1861. dols		1860. dols
Dry goods	87,001,000	...	101,783,000
General merchandise	104,327,000	...	129,558,000
	191,328,000	...	221,341,000

SPECIE.

	dols
Foreign specie at New York direct	33,197,000
Foreign specie, via Boston	8,186,000
Total import	41,383,000
The import of foreign specie the previous year at New York amounted to	2,376,000

EXPORTS.

	dols
Domestic produce, 1861	117,933,000
Domestic produce, 1860	70,250,000
Increase	47,683,000
Foreign articles re-exported	7,035,000
Same last year	9,789,000
Decrease	2,754,000
Specie exported from New York	23,845,000
Same last year	53,999,000
Decrease	32,254,000

RECEIPTS OF CALIFORNIA GOLD.

1861. dols	1860. dols	Decrease. dols
34,073,000	39,784,000	5,711,000

The decrease in the value of imports, as compared with last year, is shown to be 40,013,000 dollars, against an increase of 47,683,000 in the value of exports of domestic produce. The receipts of California gold for the year was 34,073,000 dollars, against 39,784,000 last year, showing a decrease of 5,711,000 dollars.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There has not been so much excitement in the market as last week, but the advance then established was generally supported to yesterday (excepting for Porto Rico, which went cheap.) Some strong dry grainy Mauritius sold at extreme rates to 6d advance. The transactions in West India during the three days reached 2,874 casks, including 500 casks Barbadoes by auction which realised 33s to 41s 6d per cwt. Floating cargoes of foreign are still in demand for the United Kingdom. There were 7,020 tons landed last week, and 4,920 tons delivered; consequently the stock has increased to 69,030 tons, against 70,330 tons at the same date in 1860. Since the commencement of the year the home deliveries have fallen off to the extent of 3,210 tons.

Mauritius.—The public sales, comprising 9,911 bags, went off at full rates to 6d advance for grainy sorts, the latter ranging from 37s 6d to 44s 6d for low grey to very fine pale yellow, with brown at 35s to 36s; soft brown, 30s to 34s; grey, 34s 6d to 37s per cwt.

Bengal.—138 bags sold steadily: soft brown to middling yellow Gurpatta date kind, 33s 6d to 37s 6d per cwt.

Madras.—4,000 bags grocery of middling quality, sold at 41s to 41s 6d. Native brown is worth 31s to 31s 6d per cwt.

Foreign.—652 casks Cuba, by auction, found buyers, and went at former rates: brown, 33s 6d to 34s; low grey to fair yellow, 34s 6d to 39s. Of 1,300 casks, 380 barrels Porto Rico, about 900 casks sold on rather easier terms: brown and low, 34s 6d to 36s 6d; middling greyish to fine yellow, 37s to 44s 6d. A floating cargo of Cuba muscovado brought 23s for the United Kingdom; four of Havana, Nos. 9½ to 13, 24s

to 26s 9d; 11½ to 12, with part No. 16, 26s 9d; 4,500 bags brown Pernambuco, 33s landed. 300 casks Cuba at the above quotations.

Refined.—The market is firm, and with a reduced supply of goods the refiners obtain rather higher rates. This morning, nothing suitable for grocery purposes offers under 50s per cwt.

MOLASSES.—546 casks 30 barrels Cuba muscovado, offered by auction, were withdrawn at 17s. per cwt.

MELADO.—A large business has been done by private contract at 25s 6d to 26s 6d. 247 casks at auction went from 23s to 26s per cwt.

RUM.—Very few contracts have been made this week. Some common to good Demerara, at 1s 9d to 1s 10d, was rather lower. Fine Leewards have sold at 1s 10d. Penang quoted 1s 7d to 1s 8d proof. Jamaica has sold from 3s 2d to 3s 6d per gallon, according to quality.

COCOA.—93 bags middling dull to fine red Grenada sold at 51s to 57s. 185 bags Dominica, at 49s. 500 bags Trinidad were only partly disposed of: grey to superior bright red, 54s to 75s. Privately, Grenada has sold at 49s to 50s per cwt.

TEA.—The small public sales held this week went off without alteration in price, 6,800 packages being rather more than half sold. Transactions by private contract have generally been limited, and further public sales will be held next Wednesday.

COFFEE.—This article still maintains its firm position, although supplies keep large. 2,388 casks 1,389 barrels and bags plantation Ceylon all sold at 67s 6d to 78s for fine ordinary and small berry to good. 50 casks 2,406 bags native rather more than half sold: small to good, 60s to 62s 6d. A few lots of Jamaica found buyers at former rates. 101 bags African, 71s 6d to 74s. 3,760 bags Costa Rica went off steadily: fine ordinary pale to middling, 64s to 74s. 60 bales and half-bales Alexandria Mocha were taken in at 88s. 101 bags African brought 71s 6d to 74s. Two floating cargoes of St Domingo have sold at 62s 6d per cwt for the Mediterranean.

RICE.—Several orders have been executed at full rates, and at a slight advance for cargo kinds. The market is now very firm. Privately, Ballam is reported at 9s 7½d to 9s 10½d; pinky Madras, 9s 10½d to 10s; good Coringa grain, 10s 6d. 2,901 bags Bengal, by auction, were disposed of: Ballam, 9s 3d to 9s 10½d; good middling white, 12s 6d. A floating cargo of Rangoon was sold last week at 10s, and one of Necrancie Arracan, at 9s 6d per cwt.

IMPORTS and DELIVERIES of RICE to July 13, with STOCKS on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons
Imports	38950	15600	11650	61000

Exported	*	1280	12630	10900
Stock	34200	45980	70750	94600

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

SAGO.—318 boxes were mostly bought in, a few lots selling at 19s to 20s for good to fine large grain. 391 bags sago flour sold at 16s per cwt.

SPICES.—36 casks 224 barrels Jamaica ginger sold at 2*l* to 6*l* 10s for low to fine bold. 250 cases Calicut: common small to middling, 45s to 55s per cwt. 738 bags dusty greyish Penang pepper were bought in at 3½d, and the sound portion of 1,710 bags black Singapore partly sold at 4d. 320 bags white Penang were taken in at 5¾d. 620 bags Singapore sold at easier rates, from 5⅝d to 5½d for common to good. 143 bags old Zanzibar cloves partly realised 3⅝d to 3¾d per lb.

SALTPETRE.—Very limited sales have been made in Bengal, at 34s 6d to 37s per cwt, refraction 7⅞ to 3 per cent.

IMPORTS and DELIVERIES of SALTPETRE to July 13, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	7125	7900	10750	6160
Delivered	6450	6800	10025	8070
Stock	4000	4970	3670	4750

SHELLAC remains firm at the late advance.

DRYSALTERY GOODS.—Cutch is less pressed for sale, and good quoted 23s to 23s 6d. Gambier and turmeric are quiet. 95 bales Bengal safflower sold from 2*l* 5s to 6*l* 10s per cwt for low to good.

IMPORTS and DELIVERIES of COCHINEAL to July 13, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imports	10175	9000	10050	4600
Deliveries	9120	8640	9550	6070
Stock	7600	6420	6200	4555

HEMP.—Petersburg clean steady at 29*l* 10s to 30*l* per ton.

LAC DYE.—Good marks remain firm. A few lots, by auction, realised 3½d for ordinary native, and 1s 4d per lb for SLD.

DRUGS.—At the public sales yesterday, the previous advance upon castor oil was maintained: raw to fine pale, 5¼ to 6¼d per lb.

RUBBER.—East India sold at 1s 3d to 1s 3½d per lb for good quality.

HIDES.—107,000 East India went off steadily at full rates.

METALS.—Great quietude continues to pervade this market. Iron, however, is in steady demand; Scotch pig advanced to 51s 3d for mixed Nos., and since receded to 50s 6d per ton. Sales of spelter are reported as low as 15*l* 10s per ton, and of Straits tin at 111s per cwt. Both the latter descriptions are dull.

JUTE.—Some business has been done privately, but the small quantity offered by auction on Wednesday (1,900 bales) only partly sold at the previous value.

LINSEED.—The sales effected the last few days have been extensive, chiefly for parcels floating or future shipments, and a further advance of 1s per quarter has taken place; Bombay is now worth 56s 6d on the spot or to arrive; Calcutta 53s 6d to 54s 6d as to quality, delivered, or 52s 6d cost, freight and insurance, including bags. Several cargoes Black Sea and Azoff have again been sold, 53s 6d delivered U. K. the last price paid, either floating or for shipment up to September. Some fine Archangel on sample brought 50s cost, freight and insurance to the East Coast. Imports into London since 1st January, 284,212 quarters, against 248,214 quarters the corresponding period last year.

OILS.—Olive remains dull, and prices nominal: Gallipoli, 57*l* to 57*l* 10s; other kinds in proportion. Colonial sperm has sold at 94*l*. Pale seal quoted 36*l* to 36*l* 10s per tun, in the absence of fresh arrivals. The demand for linseed oil active, and 31s the price here, 3d less at Hull. Large transactions have taken place in cocoa-nut for export and partly on speculation: Cochin, 45s to 45s 6d; Ceylon, 44s to 44s 6d. Fine palm has declined to 44s per cwt. There is more demand for rape, partly attributable to the rise in the price of seeds: foreign refined, 42s to 42s 6d; brown, 39s 6d per cwt.

TURPENTINE.—There has been a reaction in the market: American spirits offer at 51s per cwt without finding buyers.

TALLOW.—The market is exceedingly dull in the absence of any speculative business. This morning 1st sort Y. C. on the spot closed at 48s 6d to 49s per cwt in all positions.

PARTICULARS OF TALLOW.—Monday, July 15.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—Some of the Barbadoes offered to-day went rather cheaper, but the grainy Berbice and other West India without change in value. The total quantity disposed of, including the various parcels by auction, is 4,238 casks for the week. 2,983 bags Mauritius partly sold at about former terms; also a portion of 603 casks 121 barrels Porto Rico.

COFFEE.—700 *cases* 151 bags East India realised 67s 6d to 81s. 3,570 bags Rio were chiefly taken in at 52s 6d to 58s, a few lots good selling at 59s 6d to 61s, 201 bags native Ceylon, 60s to 61s. 237 casks 105 barrels plantation realised former quotations.

SAGO.—80 boxes 60 bags were taken in above the value.

SPICES.—706 bags pimento sold steadily at 2¾d to 2⅞d. 706 bags Zanzibar cloves of old import, 3⅝d per lb.

SALTPETRE.—247 bags Bombay partly sold, refraction 29 per cent., at 30s 6d. 800 bags low sold privately at 30s per cwt.

RICE.—A floating cargo of Rangoon has sold at 10s 3d *open charter*; one of Necrancie Arracan at 9s 7½d for *Liverpool*. On the spot, 700 bags Ballam realised previous rates.

COCHINEAL.—191 bags Teneriffe sold: silver, 2s 7d to 2s 8d; black, 2s 8d to 3s 1d. 32 bags Honduras: silver, 2s 2d to 2s 11d; black, 2s 6d to 3s 9d per lb.

GAMBIER.—174 bales sold, at 15s per cwt.

OIL.—850 casks palm were mostly bought in at 40s 6d to 44s per cwt. Cocoa-nut part sold: Ceylon, 43s 6d to 44s; Cochin, 44s 9d to 45s per cwt.

TALLOW.—Y. C., 48s 6d. Town unaltered. The public sales went off at 6d to 1s 6d per cwt decline.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been well supported this week; in some instances an advance of 6d has been paid. Treacle continues firm. Nothing doing for export. The following sales are reported to have been made in Dutch crushed for delivery this and next month viz.:—250 tuns S & T superfine, 33s 6d; 200 tons V O, 32s 7½d; N S R No. 3, 50 tons, 32s 6d; 50 tons, 32s 7d; and 50 tons, 32s 9d; B & H No. 1, 100 tons, 32s 9d; 50 tons, 32s 10d; and 50 tons, 33s, all in barrels; and 100 tons W & Z, 31s 3d hhds, f. o. b. in Holland.

GREEN FRUIT.—The sale of pine apples has continued brisk. 20,000 ex Kate, sold by Keeling and Hunt, realised higher prices in consequence of further shipments being stopped by bad weather at the Bahamas. Lemons improved in value, and are scarce. A cargo of Para nuts has been sold ex ship at a reduction in price, and may be quoted 3s per barrel lower.

DRY FRUIT.—The reports of the approaching crops of fruit all continue highly satisfactory, and the yield will doubtless be equal to that of last year. With the exception of a public sale of 100 tons of currants (Trieste shipment), at 26s the market has continued perfectly quiet.

COLONIAL AND FOREIGN WOOL.—The public sales have commenced heavily, and prices, compared with the previous series, have fallen 1d to 1½d to, in some instances, 2d per lb.

FLAX unaltered.

HEMP market quiet, and very little business doing.

COTTON.—Sales of cotton from Friday, 12th July, to Thursday, 18th July, inclusive:—1,300 bales Surat at 6¾d for good fair sawginned, 6d for good fair new Oomrawatty, 5½d to 5⅝d for middling old ditto, 5⅝d to 5 13-16d for middling to good fair Dhollera; 1,600 bales Tinnevelly at 6d to 6¼d and ⅝d for fair to good. A good demand has prevailed throughout the week, and very full prices were obtained up to yesterday on all kinds, when, owing to the activity in Liverpool, by the recent warlike accounts from America, holders evinced less disposition to offer their cotton, and higher prices were obtained for Surat, and in partial instances ⅛d per lb advance. Good Tinnevelly also brought ⅛d advance, the market closing with great firmness. The quotations for some descriptions are ⅛d per lb higher than last week. Sold for arrival, 300 Western Madras, guaranteed fair at 5⅝d.

SILK.—Silk market still quiet, the American business destroying all confidence both here and abroad. Prices unchanged here.

TOBACCO.—The market remains very firm for all sorts, and increased difficulty has been experienced in purchasing at present quotations. Sales have been almost confined to limited lots for immediate use. For export demand languid.

LEATHER AND HIDES.—The leather market continues to show no change; the demand, although still limited, is fully equal to the fresh supplies, so that the stocks generally do not accumulate, while good

English butts (24 lbs and upwards), prime heavy harness hides, and best calf-skins (40 lbs to 60 lbs) are scarce, and in request. No alteration can be quoted in prices.

METALS.—A shade more of firmness has shown itself in the metal market this week, but the actual values are really little altered, and transactions continue most limited. Copper has not become worse, and, indeed, a very little more business may be said to have been done. Iron keeps depressed, although the Welsh makers have found a few orders. Tin is rather lower for Straits, but in other respects unaltered. Lead is a shade further depressed, and the same may be said of tin plates.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	56	6
Fat by ditto	2	7
Yellow Russian	50	0
Melted stuff	34	6
Rough ditto	19	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Our bacon market still maintains its price 78s; f. o. b. for anything prime in Waterford; and 75s for Hamburg landed. Friesland butter, quality very bad, 104s: Jersey, good, 98s.

METROPOLITAN CATTLE MARKET.

MONDAY, July 15.—The total imports of foreign stock into London, last week, amounted to 10,082 head. In the corresponding period in 1860, we received 12,739; in 1859, 9,059; in 1858, 7,883; in 1857, 9,434; in 1856, 9,959; and in 1855, 6,169 head.

A full average supply of foreign stock was on offer in to-day's market, in but middling condition. Sales progressed slowly at about stationary prices. From our own grazing districts, the receipts of beasts fresh up this morning were moderately good as to number, but deficient in quality. Some Scots, crosses, and Shorthorns sold freely, on rather higher terms—a few of the former having realised 5s 2d per 8 lbs; but inferior breeds were a dull inquiry, at last week's currency. The arrivals from Lincolnshire, Leicestershire, and Northamptonshire comprised 1,600 Shorthorns, &c.; from other parts of England, 800 various breeds; from Scotland, 260 Scots and crosses; and from Ireland, 150 oxen and heifers. About an average supply of sheep was in the pens. Downs and half-breds were scarce, and in request, at extreme rates. All other breeds, however, moved of slowly, at late quotations. The best old Downs were worth fully 5s 4d per 8 lbs. We were fairly supplied with lambs. The best breeds were taken off readily, and, in some few instances, 6s 4d per 8 lbs was realised for Down qualities. Inferior lambs were heavy, at from 5s to 5s 4d per 8 lbs. The supply of calves was good, and the veal trade was in a sluggish state at barely stationary prices. There was only a limited inquiry for pigs, and the quotations had a drooping tendency.

SUPPLIES.

	July 16, 1860.	July 15, 1861.
Beasts	4140	4140
Sheep and lambs	29200	25490
Calves	309	323
Pigs	390	390

THURSDAY, July 18.—Our market to-day was but moderately supplied with beasts, which moved off steadily, at fully Monday's currency. A few very superior Scots and crosses have realised 5s 2d per 8 lbs. The show of sheep was tolerably good. Prime Downs and half-breds commanded a ready sale at, in some few instances, a slight advance in the quotations. Other breeds were a slow inquiry, at late rates. A few very superior lambs realised 6s 4d per 8 lbs, but inferior breeds were a dull inquiry. We have to report a heavy sale for calves, at the late decline in value. Pigs and milch cows were very dull, on former terms.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	6	3	8	Prime Southdown sheep	5	0	5	4
Second quality ditto	3	10	4	2	Large coarse calves	3	6	4	0
Prime large oxen	4	4	4	8	Prime small ditto	4	2	4	8
Prime Scots, &c.	4	10	5	0	Large hogs	3	10	4	4
Coarse and inferior sheep	3	4	3	6	Small porkers	4	6	4	8
Second quality ditto	3	8	4	0	Suckling calves, each	21	0	30	0
Prime coarse-woolled do.	4	4	4	10	Quarter old store pigs	21	0	29	0

Lambs, 5s 0d to 6s 4d.

Total supply—Beasts, 950; sheep and lambs, 12,220; calves, 320; pigs, 300.
Foreign supply—Beasts, 280; sheep 1,200; calves, 250.

NEWGATE AND LEADENHALL.

FRIDAY, July 19.—The supply of meat on sale here is moderately good. Good and prime qualities sell steadily at very full prices, but inferior kinds moved off somewhat slowly on former terms.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	3	0	3	4	Middling mutton	3	10	4	4
Middling ditto	3	6	3	10	Prime ditto	4	6	4	8
Prime large ditto	4	0	4	4	Veal	3	8	4	4
Prime small ditto	4	4	4	6	Small pork	4	4	4	8
Large Pork	3	10	4	2	Lamb	5	0	5	8
Inferior mutton	3	6	3	8					

HOP MARKET.

BOROUGH, Monday, July 15.—The reports from the Weald of Kent and Sussex are quite as unfavourable as of late, and a large proportion of the ground has gone past recovery. The improvement in Mid and some parts of East Kent and Worcester is steadily progressing, and the duty has in consequence advanced to 100,000*l*. We have nothing doing in our market, and prices remain nominal. Mid and East Kents, 90s, 150s, 210s; Weald of Kents, 80s, 130s, 180s; Sussex, 75s, 90s, 140s; Yearlings, 120s, 160s, 210s.

FRIDAY, July 19.—The plantation accounts continue to report improvement, particularly in the Mid and East Kent, Worcester, a small portion of the Weald of Kent and Farnham districts. The duty is estimated at 100,000*l*. For all kinds of hops the demand is in a sluggish state, yet we have no change to notice in their value.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, July 15.—The supply of new home-grown potatoes continues to increase, and may now be considered seasonably extensive. Of the receipts of foreign, however, since our last there is a decided falling off. Generally speaking the trade is in an inactive state, and prices range from 100s to 140s per ton.

THURSDAY, July 18.—The arrivals of potatoes are seasonably extensive, and the trade rules heavy for all qualities. Shaws are quoted at 60s to 90s; and Regents at from 90s to 140s per ton.

COAL MARKET.

FRIDAY, July 19.—Walls End Tees, 19s—Trimdon Hartlepool, 18s 9d—Hartlepool, 19s—South Kelloe, 18s 6d—Heugh Hall, 17s 6d—Kelloe, 18s 6d—Thorpe, 16s 3d—Bells, 16s 6d—Wylam, 15s 6d—Tanfield Moor Butes, 13s—Buddles Hartley, 16s 6d—West Riding Hartley, 15s. Ships at market, 26.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Old meadow hay, 2*l* 0s to 5*l* 0s; new do., 2*l* 10s to 4*l* 0s; old clover ditto, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 0s to 4*l* 15s; straw, 1*l* 14s to 2*l* 0s per load. A fair demand.

CUMBERLAND.—Old meadow hay, 2*l* 0s to 5*l* 0s; new ditto, 2*l* 10s to 4*l* 0s; old clover, 3*l* 10s to 5*l* 18s; new ditto, 3*l* 0s to 4*l* 12s; and straw, 1*l* 15s to 2*l* 0s per load. Trade dull.

WHITECHAPEL.—Old meadow hay, 2*l* 0s to 5*l* 0s; new ditto, 2*l* 10s to 4*l* 0s; old clover, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 0s to 4*l* 15s; and straw, 1*l* 14s to 2*l* 0s per load. Trade steady.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 19.—Since the close of our public sales here on the 12th inst. our market has been very quiet, the trade having supplied their immediate wants on the above occasion. English wools show a tendency upwards during the last week or ten days, and if the weather continues favourable for the harvest, they will no doubt recover to a great extent from the late extraordinary depression.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 19.—Moderate attendance. Fine qualities of wheat maintain Tuesday's prices; inferior sorts are 1d to 2d cheaper, with fair amount of business doing. Flour a shade easier and limited demand. Rather more inquiry for Indian corn; prices slightly in favour of buyers. Beans, Saide. 31s 6d to 32s; Beheira, 30s 6d to 31s; moderate sale. Oats and oatmeal dull.

METALS.

[FROM OUR OWN CORRESPONDENT.]

FRIDAY, July 19.—The market for manufactured iron continues depressed, with only a limited business doing at previous quotations. Scotch pig iron has maintained its price during the past week. The inquiry for copper is still very limited. No change in lead or any other metals.

The Gazette.

TUESDAY, July 16.

BANKRUPTCIES ANNULLED.

J. Crossley, jun., Manchester, and Hebden bridge, cotton spinner.
J. Parkes, Birmingham, coal merchant.

BANKRUPTS.

S. Carter, Fen Stanton, near St Ives, Huntingdonshire, corn merchant.
J. Balls, Salcot, Essex, grocer.
N. Ballard, Farringdon, Berkshire, woolstapler.
J. Yates, Berry street, Clerkenwell, mustard manufacturer.
W. Cash, High street, Portland town, and Peterborough, grocer.
G. Scott, Cubitt town, Isle of Dogs, engineer.
G. Glazebrook, Birmingham, plumber.
J. S. Walker, West Bromwich, licensed victualler.
W. J. Windram and E. S. Tebbutt, Leicester, elastic web manufacturers.
W. Martin, A. P. Youle, and W. R. Roebuck, Doncaster, iron manufacturers.
W. Newsham, Blackburn, innkeeper.
W. Ronald, Manchester, warehouseman.

SCOTCH SEQUESTRATIONS.

J. P. Macdonald, Dumfermline, merchant.
M. Watson, Edinburgh, draper.
J. Liveston, sen., Forfar, spirit dealer.
T. Muir and T. Hepburn, Larkhall, builders.
W. A. Sutherland, Edinburgh, bookseller.
D. Cross, Hamilton, general merchant.

GAZETTE OF LAST NIGHT.

BANKRUPTS.

E. J. Heard and J. J. Walter, packing case manufacturers, Norway wharf, Wapping wall.
W. T. Ashwin, Burslem, Staffordshire.
T. F. Perry and J. E. Wilson, timber merchants, Bridgnorth, Salop.
W. Ballard, Faringdon, woolstapler.
J. Smith, builder, Guildford.
S. Bannister, wool dealer, Leominster.
W. Malkin, wine merchant, Macclesfield.
J. G. Mason, ironmonger, Stamford.
E. Maw, engineer, Birmingham.
J. Smith, carman, Macclesfield street, City.
W. W. Whelpley, timber merchant, City.

SCOTCH BANKRUPTS.

J. M'Farlane, butter and egg merchant, Glasgow.
J. M'Vicar, wine and spirit dealer, Glasgow.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 6th of July amounted to 553,776*l*, and for the corresponding week of last year to 555,900*l*, showing a decrease of 2,124*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 256,916*l*, and for the corresponding week of 1860 to 264,249*l*, showing a decrease of 7,333*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, July 15.—In the railway market to-day business was mainly confined to the fortnightly settlement, and the general transactions were limited. In the colonial market, Indian guaranteed descriptions were firmer, East Indian closing at 98½ to 99. Grand Trunk of Canada also improved to 19¼ to ¾. In foreign shares Lombardo-Venetian relapsed to ⅛ dis to par. American railway securities showed no alteration; but United States Five per Cents. and Virginia Sixes were quoted higher. Mines were little dealt in, and the only change was a fractional rise in Bon Accord Copper. In joint stock banks, Ottoman shares improved to 17½ to 18. Miscellaneous descriptions closed about the same as on Saturday.

TUESDAY, July 16.—The railway market showed increased buoyancy to-day, although the closing prices were not fully as good as at one period. The principal improvement was in Midland, London and North-Western, York and North Midland, and Caledonian, all of which left off ½ to ⅝ per cent. higher. Lancashire and Yorkshire, Great Northern, and Sheffield were also firm. In colonial descriptions, Indian guaranteed continued firm. No alteration of importance occurred in foreign railways. Lombardo-Venetian remained dull, at ⅛ discount to par. In American securities a rise took place in Erie and Illinois Central shares. There were few transactions in mines, and almost the only changes were an advance in East Wheal Russell and a relapse in Bon Accord Copper. Joint stock banks and miscellaneous descriptions left off about the same as yesterday.

WEDNESDAY, July 17.—The railway market to-day was flat on the news from America, but there was scarcely any business doing pending the announcement of the dividends. Compared with yesterday, the leading speculative stocks generally showed a slight decline. The principal movement in the colonial market was a reduction in Grand Trunk stock to 19 to ½, and in Great Western of Canada to 10 to ¼. Atlantic and St Lawrence shares, however, were quoted higher, and Indian guaranteed descriptions were steady. In the foreign market, Bahia improved. New South Wales debentures also advanced. American railway securities were flat, Erie receding to 22 to 23, and Illinois Central to 38½ to 38 dis. Mines were more dealt in, but occasionally closed lower; East Wheal Russell especially relapsed. The transactions in joint stock bank shares were rather numerous, and in some cases increased firmness was shown, particularly Egypt, National, Provincial, and Oriental. In miscellaneous descriptions a rise took place in Canada Land.

THURSDAY, July 18.—The railway market remained without business, and showed no feature of importance. In some of the leading stocks a fractional decline occurred, while South-Western and Berwick slightly improved. In colonial descriptions Atlantic and St Lawrence shares were quoted higher. East India left off at 98¾ to 99; Grand Trunk, 19 to ½; and Great Western of Canada, 10 to ¼. Foreign descriptions were quiet at former prices. Lombardo-Venetian were heavy in the morning at ¼ to ⅜ dis., but after official hours recovered to ⅛ dis. to par. In American securities, Illinois Central shares were dull at 39 to 38½ dis., while Erie improved to 22½ to 23. Mines were in fair demand and firm. Bon Accord Copper, however, again declined.

FRIDAY, July 19.—The transactions in the railway share market were very limited, and prices showed increased depression. Great Westerns receded to 70⅛; North Westerns to 94⅜ 95; Manchester, Sheffield, and Lincoln to 47½; Midlands to 121¾; North Eastern, Berwick, to 107; North Eastern, York, to 94 and 94⅛; and South Easterns, to 81⅝; East Anglian improved to 17¾. The foreign and colonial lines remained very dull. South American and Lombardo-Venetian realised 15¾ to 15⅞; Great Luxemburg, 7⅞; Grand Trunk of Canada declined to 19⅛ to 19½.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

IMPORTANT NOTICE

GLENFIELD PATENT STARCH

is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

CHUBB'S PATENT SAFES

—the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

WARM WEATHER.—

RIMMEL'S TOILET VINEGAR will be found a perfect luxury this weather, either used for the toilet or bath, or as a reviving scent for the handkerchief. A special uninflammable sort is prepared to be used in Rimmel's Patent Vaporiser, for purifying the air and fumigating sick rooms. (See Dr Letheby's report.)—Rimmel, Perfumer to the Queen, 96 Strand, and 24 Cornhill, London.

DINNEFORD'S PURE FLUID

MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

ALLSOPP'S PALE OR BITTER

ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS

LONDON	61 King William st., City
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross.
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

HOLLOWAY'S PILLS.

ERUPTIVE and OTHER FEVERS.

Throughout the summer febrile diseases prevail more or less: and the unusual number of storms has caused a proportionate increase in fever cases. On the first feeling of lassitude, before the thirst and heat of skin set in, the patient should resort to Holloway's Pills, which will throw out all fever-poison both from the blood and every organ. For many years no other medicine has proved so efficient in removing the seeds of these perilous complaints, whether affecting young, middle aged, or old. These Pills purify the whole system, greatly improve the digestion, regulate the circulation to the minutest vessels of the skin, and cool that pungent heat which always attend cases of fever.

TRADE B/P MARK.

BROWN AND POLSON'S

PATENT CORN FLOUR,

In packets 2d, 4d, 8d, and tins 1s, 5s, and 9s 6d.

Considerable extra advantage is allowed upon the sale of articles similar in appearance, to encourage their being recommended in place of Patent Corn Flour, to support which practice unscrupulous announcements are made use of. It is therefore respectfully suggested that Families should observe that no other kinds are substituted for Brown and Polson's, of which the LANCET states (July 24, 1858), "This is superior to anything of the kind known,"—an opinion indisputably confirmed by scientific tests and public appreciation.

BROWN and POLSON, Manufacturers and Purveyors to Her Majesty the Queen: Paisley, Manchester, Dublin, and London.

DR MARSTON'S LECTURES.—

FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

DR KAHN ON MARRIAGE.—

A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either, from the publisher, J. Allen, 20 Warwick lane: or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

EDUCATION.—

International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

MR LEWIS AND SON,

113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons. Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

Under the Patronage of the Governments of Great Britain, Spain, Denmark, Brazil, Russia, &c., &c.

EASTON'S PATENT BOILER

FLUID effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M. steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Xurrachee, and by engineers and manufacturers thro ghout the country.

Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

KEATING'S PERSIAN INSECT

DESTROYING POWDER.

This powder is quite harmless to animal life, but is unrivalled in destroying fleas, bugs, emmets, flies, cockroaches, beetles, gnats, mosquitoes, moths in furs, and every other species of insects in all stages of metamorphosis.

Sportsmen will find this an invaluable remedy for destroying fleas in their dogs, as also ladies for their pet dogs, and sprinkled about the nests of poultry, it will be found extremely efficacious in exterminating those insects with which they are usually infested. It is perfectly harmless in its nature, and may be applied without any apprehension, as it has no qualities deleterious to animal life.

Sold in packets, 1s, 2s 6d, and 4s 6d each, or post free for 14, or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79 St Paul's churchyard, London, E.C.

Take notice, each genuine packet bears the above name and address.

EXTRAORDINARY DISCOVERY—NEW THEORY.
(Medicines Superseded.)

NERVOUS DEBILITY AND ITS

train of evils, such as self-distrust, timidity, pimples on the skin, loss of memory, thoughts of suicide, trembling of the limbs, depression and prostration of the system &c., immediately checked and speedily cured by the Newly-Discovered Patent Appliance. DR CURTIS'S MEDICAL WORK. "MANHOOD. An Essay on Nervous and Generative Diseases. The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

ROWAN'S NEW PATENT FLAX SCUTCHING MACHINE.

Messrs JOHN ROWAN and SONS, York street Foundry, Belfast, have just finished and patented a new FLAX SCUTCHING MACHINE, which, in point of cheapness and efficiency, surpasses any machine yet made. It is simple in construction, occupies a small space, is easily driven and attended, and can be attached to any motive power. It is worked by two persons and will clean from 35 lbs to 40 lbs of flax per hour, in a superior manner, and with a great economy of fibre. Descriptive particulars will be forwarded on application. The extremely low price of this machine brings it within the reach of every flax grower. Price £24, f.o.b., or at any of the Belfast railway termini. The machine can be seen at work on Tuesdays and Fridays, between eleven a.m. and four p.m., at the Foundry.

DEBENTURES.—SCINDE RAILWAY COMPANY.

The Directors are prepared to receive applications for Debentures at par, in sums of not less than £100, for the unappropriated portion of the £83,000 Debentures about to be issued for the purposes of the Indus Steam Flotilla, bearing interest at the rate of 5 per cent. per annum, for five years, payable by Coupon at the banking house of Messrs Smith, Payne, and Smiths, No. 1 Lombard street.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council, as will appear on the face of the Bonds.

The Debentures are convertible into Indus Steam Flotilla Stock, or may be renewed for a second period of five years, at the option of the holder.

Forms of application may be obtained at the offices of the Company.—By order of the Board,

THOMAS BURNELL, Secretary.

Scinde Railway Offices, Gresham House, Old Broad street. July 9, 1861.

MADRAS RAILWAY COMPANY.

—The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary of State for India in Council. The interest is payable by coupon half-yearly at the Union Bank of London. Debentures as above are being issued by the Company of the two following descriptions:—

1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.

2nd. For a term of 4 or 5 years, and convertible at the option of the holder into capital stock of the Company, bearing 5 per cent. interest, guaranteed by the contract entered into with the East India Company.

Forms of application may be obtained at this office.—By order of the Board,

JAMES WALKER, Managing Director.

Company's offices, No. 33 New Broad street, London, E.C., April 30, 1861.

GREAT INDIAN PENINSULA RAILWAY COMPANY.

Notice is hereby given that, in pursuance of a resolution of the Board of Directors, the Shareholders of this Company holding shares upon which £10 per share have been already called up, are requested to pay a further call of £2 per share upon each share (making £12 per share) on or before the 14th day of August prox., at the London and County Bank, South Sea House, Threadneedle street, London; and if such call be not paid on or before the said 14th day of August, the holders of the shares will not be entitled to receive interest upon any portion of their shares so long as such call shall remain unpaid, but will, nevertheless, be chargeable with interest upon the arrears at the rate of 5 per cent. per annum, and the shares will become liable to forfeiture under The Companies Clauses Consolidation Act, 1845.

A letter for the payment of the call will be forwarded to each shareholder.

N.B.—The option of paying in full (the remaining £8 per share) upon any portion of their shares is continued to the shareholders. A letter authorising the Bankers to receive the payment may be obtained on application at this office. THOMAS R. WATT, Secretary.

3 New Broad street, E.C., London, 12th July, 1861.

THE GRAND TRUNK RAILWAY COMPANY of CANADA.

At a Meeting of the Share and Bondholders of the Company, held to day at the London Tavern, Bishopsgate street, for the purpose of receiving and considering the Second Report and the Proposals contained therein of the Select Committee appointed at the meeting held on the 2nd of January last,

Thomas Baring, Esq., M.P., in the Chair,

It was moved by Mr Weguelin, seconded by Mr N. Clarke, and resolved:—

"That the report of the Committee of Share and Bondholders appointed at themeeting held in London on the 2nd January, 1861, be received and adopted."

It was moved by Mr Hartridge, and seconded by Mr Wheeler, and resolved:—

"That having regard to the urgency and importance of the case, the Directors be requested to appeal to the Canadian authorities, and to take such steps as they consider necessary with a view to the earliest possible legislation in respect of the several matters referred to in the report of the Directors and the Committee"

It was moved by Mr Baring the Chairman, seconded by Mr Glyn, and resolved:—

"That the report and statement of accounts now produced be received."

Moved by Mr Otter, seconded by Mr Wright, and resolved:—

"That the best thanks of the meeting be given to the Select Committee for their able and practical report."

Moved by Mr Crauford, and seconded by Mr Hartridge, and resolved:—

"That the cordial thanks of the meeting be given to the Chairman for his courteous and impartial conduct in the chair." JOHN M. GRANT, Secretary.

Offices of the Company. 21 Old Broad street, London, E.C., July 19, 1861.

John Johnson, Esq. (John Johnson and Son, Savage gardens.)
Charles Joyce, Esq. (Charles Joyce and Co., Moorgate street.)
Thomas Luce, Esq., King street, St James's, and Malmesbury, Wilts.
Henry Morris, Esq., late of the Madras Civil Service, 25 Mark lane, City.
Sir Henry Muggeridge, Kt., Alderman of London, St Andrew's hill, City.
Robert Porter, Esq., 12 Billiter street.
Alfred Wilson, Esq., Firgrove, Weybridge, Surrey.

MANAGER—Mathew Marshall, Jun., Esq.

SECRETARY—C. J. H. Allen, Esq.

At the Eleventh General Meeting of the Shareholders, held at the London Tavern, Bishopsgate street, on Wednesday, the 17th of July, 1861, the following Report was read by the Secretary:—

The accounts which the Directors have now the satisfaction of submitting to the Shareholders show that the result of the operations of the Bank for the past half-year has been unusually favourable. It will be seen that the balance of Profit and Loss Account amounts to £37,580 2s 6d.

After payment of all expenses, making ample provision for bad and doubtful debts, and allowing for rebate of interest on bills discounted not yet due, there remains available the sum of £17,543 13s 9d.

The Directors are therefore enabled to declare a dividend at the rate of £5 per cent. per annum, free of income tax, and to carry to the Reserve Fund the sum of £10,000, by which addition that fund is increased to £41,000. The balance, viz., £43 13s 9d, is transferred to the credit of Profit and Loss Account of the current half-year.

The Directors who retire on this occasion are John Griffith Frith, Esq., Alderman Sir Henry Muggeridge, and Robert Porter, Esq., who, being duly qualified, offer themselves for re-election.

GEO. THOMSON,
HENRY ASTE,
ALFRED LAMB, } Auditors.

It was resolved unanimously—

That the report now read be received and adopted.

The Chairman announced that the dividend would be payable on and after Wednesday, the 24th July, at the Head Office, Threadneedle street.

It was resolved unanimously—

That John Griffith Frith, Esq., Alderman Sir Henry Muggeridge, and Robert Porter, Esq., be re-elected Directors of the Bank.

That George Thomson, Esq., Henry Aste, Esq., and Alfred Lamb, Esq., be the Auditors for the year ensuing.

That the cordial thanks of the meeting be given to the Directors, for their zeal and energy in conducting the business of the Bank.

That the thanks of the shareholders be given to Mr Marshall, the Manager; Mr Allen, the Secretary; and the Officers of the Bank, for the excellent manner in which their duties are discharged.

Extracted from the minutes.

C. J. H. ALLEN, Secretary.

Threadneedle street, July 17th, 1861.

BANK OF LONDON,

CHAIRMAN—Sir John Villiers Shelley, Bart., M.P.

VICE-CHAIRMAN—John Griffith Frith, Esq. (Frith, Sands, and Co.)

MANAGER—Matthew Marshall, Jun., Esq.

Current Accounts opened with parties properly introduced, and interest allowed on Credit Balances, provided such balances are not drawn below £200.

Money Received upon Deposit, repayable on seven days' notice, interest on which is regulated by the market value of money, as announced from time to time by public advertisement; the present rate being 4½ per cent.

Circular Notes and Letters of Credit issued free of charge, and all descriptions of Banking Business transacted.

C. J. H. ALLEN, Secretary.

FORTY EIGHTH REPORT OF

THE LONDON JOINT STOCK BANK.

At a General Meeting of the shareholders, held at the banking house of the Company, in Princes street, Mansion house, on Thursday, the 18th of July, 1861.

Philip William Flower, Esq., Chairman.
Henry Lee, Esq., Deputy-Chairman.

DIRECTORS.

William Bird, Esq.	Charles James Heath, Esq.
William Blount, Esq.	William J. Lancaster, Esq.
George Thomas Brooking, Esq.	Donald Larnach, Esq.
Henry Christy, Esq.	Henry Lee, Esq.
Francis Joseph Delafosse, Esq.	John George Maclean, Esq.
Alderman Sir James Duke, Bart., M.P.	Sir John M'Taggart, Bart.
Philip William Flower, Esq.	John Timothy Oxley, Esq.
Francis Bennett Goldney, Esq.	George Pollard, Esq.
	John Joseph Silva, Esq.
	George Tayler, Esq.

THE MANAGER—Mr Fleming Hewett.

SOLICITORS—Messrs Clarke and Morice.

The following Report was presented:—

The annexed accounts, which the Directors have the pleasure of submitting to the shareholders, show that the Bank has realised during the past half-year a net profit of £84,006 16s 10d, which is appropriated as follows, viz:—

£37,500 to the usual dividend at the rate of £12½ per cent. per annum.

£37,500 to a bonus of 12s 6d per share; and

£9,006 15s 10d to the augmentation of the Guarantee Fund.

The decline in the market value of Government and Indian Securities since the 31st December having reduced the value of those held by the Bank on the 29th of June to the extent of £17,875, that sum is carried to the debit of the Guarantee Fund, which Fund, being credited with six months' interest, and the undivided profit stated above, now amounts to £198,458 5s 9d.

It will be satisfactory to the shareholders to learn that the sum reserved from the profits of last year has proved ample to cover the loss sustained by the failures in the leather trade, and that some portion of it will, probably, be recovered on the final liquidation of the bankrupt estates.

The Directors have to announce that the Bank has been deprived of the valuable services of one of its few remaining original Directors and Founders, by the resignation of their friend Ambrose Moore, Esq.; and they desire, at the same time, to record their high appreciation of their late colleague's talents, and of his unremitting attention, during so many years, to the affairs of the Bank.

The retirement of this gentleman, induced by considerations of health, will make it necessary to call an early General Meeting to fill the vacant seat at the Board.

The Dividend and Bonus, free from Income-tax, will be payable on and after Friday, the 26th instant.

The preceding Report having been read to the Meeting by the Secretary, a Dividend for the Half-year ending the 29th June last, after the rate of 12½ per centum per annum, and a further Division of 12s 6d per share out of the net profits of the half-year ending as above, were declared by the Chairman.

Resolved unanimously—

"That the Report now read be received, and that it be printed for the use of the Shareholders."

Resolved unanimously—

"That the best thanks of this Meeting be presented to the Chairman and Directors for their continued and successful administration of the affairs of the Bank."

Resolved unanimously—

"That the thanks of this meeting be presented to Mr Hewett, for his able management."

(Signed) P. W. FLOWER, Chairman.

Extracted from the Minutes,

A. G. KENNEDY, Secretary.

Accounts of parties are kept agreeably to the custom of London Bankers.

Parties keeping banking accounts with the Bank can at all times transfer to a deposit account such portion of their balance as they may not immediately require, upon which interest at the current rate of the day will be allowed.

Deposits are also received from parties not customers, either at call or for fixed periods, on interest at the market rates.

The agency of Joint Stock, and other country and foreign banks, undertaken on such terms as may be agreed upon.

Investments in, and sales of, all descriptions of British and Foreign Securities, bullion, specie, &c., effected.

Dividends on the English and Foreign Funds, or railway and other shares, debentures, and coupons, received without charge to customers. Every other description of banking business and money agency transacted, and letters of credit granted on the Continent, and on the chief commercial towns of the world.

IRON BRIDGE SUPERSTRUCTURE

—The Board of Directors of the East Indian Railway Company are prepared to receive Tenders for TWELVE SPANS of GIRDERS for JUMNA BRIDGE. Specifications, drawings, and form of tender, upon which only tenders will be received, may be seen at the Company's offices. Tenders endorsed "Tenders for Iron Bridge Superstructure," must be delivered to the Secretary on or before Twelve o'clock at noon, on Thursday, the 15th August next. The Company is not bound to accept the lowest or any tender.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, 18th July, 1861.

THE FRENCH AND GERMAN

PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

BANK OF NEW SOUTH WALES.

The Half-yearly General Meeting of the shareholders of this bank was held at the banking house in Sydney on the 24th of April last; Mr A Stuart in the chair. The Secretary read the following report and balance-sheet:—

In conformity with the provisions of the deed of settlement, the Directors now place before the shareholders the annexed statement of the accounts of the bank for the half-year ended on the 31st ultimo.

	£	s	d
The undivided balance of 30th Sept. was	2,561	16	1
To which is to be added the profits, after deducting rebate on current bills, allowing interest on deposits, paying expenses of management, providing for bad and doubtful debts, and making an allowance in reduction of bank premises and office furniture	60,274	12	11
Leaving for distribution	£62,836	9	0
which the directors recomend to be appropriated as follows:—			
To payment of dividend, at the rate of 15 per cent. per annum £56,250 0 0			
To increase of reserved fund 2,017 10 6			
To balance carried to present half-year 4,568 18 6			
	£62,836	9	0

With the above addition to reserve fund, and the sum of £5,109 17s 9d, which they are happy to say has been recovered from debts previously written off as bad or doubtful, that fund will amount to £212,500.

The Directors have had for some time past under their consideration the propriety of extending the operations of the bank to the important colony of New Zealand, and believing that the time has now arrived for doing so, they have to request the sanction of the shareholders to certain alterations in clauses 4, 5, and 60 of the deed of settlement, requisite to enab e them to accomplish this object, and they do not hesitate to express their opinion that the opening of branches there will add to the position which the bank has already attained, and prove remunerative.

Since last half-yearly meeting the Directors have lost the valuable assistance of two of their number, Sir Daniel Cooper and Mr Frederick Tooth, who both resigned on their departure for Europe. Their places have been temporarily filled, under the 44th clause of the deed of settlement, by the appointment of Mr Thomas Buckland and of Mr Robert Tooth, who on the present occasion are the only candidates for these vacancies.

Owing to the falling off in the escort returns of gold dust from Timbarra and the Rocky River, the agencies of the bank in those places have been withdrawn, and a fresh agency has been opened at Lambing Flat.

The dividend will be payable at the head office to-morrow, and at the branches on receipt of advice.

For and on behalf of the Board of Directors,
ALEXANDER STUART, President.

Audited April 23, 1861.
EDWARD LOTZE, JAMES HENDERSON, } Auditors.

The Chairman moved the adoption of the report.

Mr Piddington moved as an amendment that the report be referred back to the Directors, for the purpose of considering whether a dividend at the rate of 16 per cent. per annum should not be declared.

Mr J. H Bettington seconded the amendment, which was put, and negatived by a very large majority.

The report, with the amendments as proposed by the Directors, were agreed to.

Mr Thomas Buckland and Mr Robert Tooth were elected Directors, in the room of Sir Daniel Cooper and Mr Frederick Tooth, resigned.

A vote of thanks was awarded to the Chairman and Directors, and the meeting separated.

ELEVENTH REPORT OF THE CITY BANK, LONDON.—

At a General Meeting of the shareholders, held at the London Tavern, on Tuesday 16th July, 1861,
Alderman Sir Robert Walter Carden Chairman.
Peter Bell, Esq., Deputy Chairman.

DIRECTORS.

Peter Bell, Esq.	Andrew Laurie, Esq.
Ald. Sir Robert W. Carden.	Robert Lloyd, Esq.
Henry Vigurs East, Esq.	Wm. Macnaughtan, Esq.
William Gardner, Esq.	Jonathan Thorp, Esq.
John Hackblock, Esq.	John Vanner, Esq.
John Jones, Esq.	

The Manager, A. J. White, Esq.

SOLICITORS.

Messrs Pearce, Phillips, Wineworth, and Pearce.

The following report was presented:—

The report now presented to the shareholders exhibits statements of account which show the result of the operations of the Bank for the six months ending the 30th June last.

On reference to the abstract of the Profit and Loss Account, it will be found that the gross profit for the half-year, including a small balance of £625 5s 4d brought forward from the last account, amounts to £45,034 14s 2d, and that after deducting from this amount the current expenses, bad and doubtful debts, and rebate of interest on bills discounted not yet due, there remains at the disposal of the Directors the sum of £22,322 0s 5d, which they have dealt with as follows, viz.:—

	£	s	d
To the payment of a dividend at the rate of £6 per cent. per annum free of income tax	9,000	0	0
To ditto a bonus of 15s per share, also free of income tax	4,500	0	0
To transfer to the "Reserved Fund" (thereby increasing that fund to £40,000)	7,000	0	0
And the balance amounting to	2,322	0	5

has been carried to the new Profit and Loss Account.

The Directors who on this occasion retire by rotation are
Mr H. V. East,
Mr John Hackblock,
Mr Andrew Lawrie,
all of whom offer themselves for re-election.

The Directors take leave to express their deep regret at the death of their much-esteemed colleague Mr John Lidgett. This lamented event having so recently occurred, they have not deemed it expedient to fill up at present the vacancy thus occasioned in the direction.

The Dividend and Bonus will be payable on and after Tuesday, the 23rd instant.

After the "Register of Shareholders" and "Register of Transfers" had been authenticated by impressing thereupon the corporate seal of the Bank, the Secretary read the Report and Accounts, and

It was resolved unanimously—

"That the report now read be received and adopted."

Whereupon a dividend was declared for the period ending the 30th June last at and after the rate of £6 per cent. per annum, and a bonus of 15s per share, both free of income tax.

The following Directors having retired (by rotation) were unanimously re-elected, viz.:—
Mr H. V. East,
Mr John Hackblock,
Mr Andrew Lawrie.

Resolved unanimously—

"That the thanks of the meeting are hereby given to the Directors for the sound judgment and the close attention which they have evinced in the past management of the Bank."

"That the sincere and best thanks of this meeting be awarded to our excellent manager, Mr White, for his able services."

"That the best thanks of the shareholders be given to our courteous secretary, Mr Worth, for his past services to the Bank."

"That the retiring auditors, Mr Anning and Mr Lewis, be re-elected for the ensuing year, and that the best thanks of the proprietors be presented to them for the careful manner in which they have discharged their duties." (Signed)

ROBERT WALTER CARDEN, Chairman.

Extracted from the minutes.
C. J. WORTH, Secretary.

THE CITY BANK, LONDON.

Liabilities and Assets, Saturday, June 29, 1861.

Dr.	£	s	d
To capital paid up, viz., £50 per share on 6,000 shares	300,000	0	0

We have examined and do approve the above accounts.
WM. ANNING, OWEN LEWIS, } Auditors.

THE CITY BANK,

corner of Finch lane, Threadneedle street, London,
Incorporated by Royal Charter, 1855.

	£
Subscribed capital	600,000
Paid-up capital	300 000
Reserved fund	40,000

Current Accounts are made up to the 30th June and 31st of December in each year; and if the credit balance shall not, at any time during the half-year, have been below £500, interest at the rate of 2 per cent. per annum is allowed on the minimum monthly balances. If not below £200, interest at the rate of 1 per cent. per annum is allowed on the minimum monthly balances; but if under £200, no interest is allowed. Parties keeping current accounts have the privilege of drawing cheques upon the Bank against funds previously placed to their credit; of depositing bills, coupons, &c., for collection; and of lodging with the Bank deeds and other valuable property in the fireproof strong rooms for safe custody.

Deposit Accounts.—Money in amounts of £20 and upwards is received from the public generally—subject to 7 days' notice of withdrawal—and interest is allowed thereon at the current rate of the day; the Bank notifying any change in the rate of interest by advertisement in one or more of the leading London newspapers. If the money be withdrawn within a fortnight, no interest is allowed. Persons having current accounts can transfer any portion of their credit balance to deposit account.

The Agency of Country and Foreign Banks, whether joint stock or private, is undertaken by the Bank.

Letters of Credit, payable at any of the chief commercial towns and cities of the world, are granted.

Circular Notes are issued by the Bank addressed to all, and payable at any, of the places on the Continent where the Bank has an agent.

Dividends, &c., on Government and other stocks, annuities, pensions, &c., are received for customers of the Bank without charge; and every description of banking business is transacted.

London, July 17, 1861.

PIANOFORTES.—

CRAMER, BEALE, and CO. Every description on sale or hire, New and Second-hand. Lists gratis, post free.—201 Regentt street.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,

Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr GRANVILLE, F.R.S.—"Dr Granville has found Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LANKESTER, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

VICTORIA (AUSTRALIA) RAILWAY LOAN.

Issued under the authority of the Railway Loan Act of the Legislature of Victoria, No. XXXVI., dated Melbourne, November 24, 1857, entitled "An Act to authorise the raising Money for the Construction of Railways," to be effected by the issue of debentures, bearing interest at the rate of Six per Centum per Annum, in amounts of £500 and £100 each, secured upon the consolidated revenues of Victoria, and redeemable on the 1st October, 1885.

The Committee appointed by the six associated Australian Banks, as Agents in this country of the Government of Victoria for the negociation of the above loan, hereby give notice, that they will be ready to Treat for a Further Portion of the above-named Debentures, not exceeding £1,000,000 sterling, by public tender, at the London and Westminster Bank, at two o'clock precisely, on the afternoon of Thursday, the 25th instant, up to which time sealed tenders will be received there from all parties who may forward the same, addressed to the chairman of the Committee, and endorsed "Tenders for Victoria Six per Cent. Loan," or attend in person therewith. In cases of equality of tenders beyond the amount to be issued they will be subject to a pro rata diminution.

A deposit of 5 per cent. on the amount of each tender must be previously paid to the London and Westminster Bank. The tenders will then be opened in the presence of all so attending and read publicly, and the purchasers forthwith declared to be those who have offered the highest price not under the minimum previously fixed, and which shall be contained in a sealed paper, placed on the table before the tenders are opened.

Tenders by the same person at various prices must be made out and delivered separately, and parties must be careful not to enclose the deposit in the sealed tender.

Tenders at a price including fractions of a shilling other than sixpence will not be accepted.

The debentures so contracted for will be deliverable to the subscribers at the London and Westminster Bank on Friday, the 16th August next, upon payment of the balance due thereon.

Purchasers of the debentures will be entitled to the interest accrued from the 1st April last.

Principal and interest payable in London, at the London and Westminster Bank and London Joint-stock Bank. Interest payable on the 1st April and 1st October in each year by coupons.

London, July 17, 1861.

MEDITERRANEAN EXTENSION TELEGRAPH COMPANY LIMITED.
Gresham House, July 13, 1861.

Notice is hereby given, that the Ordinary Half-yearly General Meeting of this Company will be held at the London Tavern, Bishopsgate street within, in the City of London, on Wednesday, the 7th day of August next, at One o'clock, for transacting the ordinary business of the Company and electing two Directors.—By order,
HENRY C. ORTON, Secretary.

CONTRACT FOR ROLLING STOCK IRONWORK.—The Board of Directors of the East Indian Railway Company are prepared to receive Tenders for 831 Sets of ROLLING STOCK IRONWORK. Specifications, drawings, and forms of tender, upon which only tenders will be received, may be seen at the Company's offices. Tenders endorsed "Tender for Wheels and Axles, Springs," or as the case may be, must be delivered to the Secretary, on or before Twelve o'clock at noon on Thursday, the 15th August next. The Company is not bound to accept the lowest or any tender.—By order of the Board,
D. I. NOAD, Secretary
East Indian Railway House, Aldermanbury walk, New Broad street, London, 13th July, 1861.

ST MARGARET'S COLLEGE, CRIEFF.

N.B.—For the Education of Young Ladies.
Principal—The Rev. A. LENDRUM, M.A.
For prospectuses, examination papers, and all particulars, apply to the Rev. the Principal.
N.B.—The next Term will commence on Tuesday, the 20th of August, when there will be vacancies for three Clergymen's Daughters at the reduced rate of £40 a year.

ST MARGARET'S COLLEGE, NORTH-END, FULHAM, London, S.W., for the Education of Young Ladies.

Principal—The Rev. A. LENDRUM, M.A.
Vice-Principal—The Rev. FREDERICK TAUNTON, M.A.

For prospectuses and all particulars apply to the Rev. the Vice-Principal.
N.B.—All the Pupils are resident in the College.
The next Term will commence on Thursday, the 19th of September.

EDUCATION.—COLLEGIATE SCHOOL.—Newark House, Hempstead, Glocester.—The above mansion is deservedly celebrated for its peculiar salubrity; its elevated position commands an extensive prospect, the picturesque scenery is rarely equalled, while its spacious apartments and pleasure grounds render it pre-eminently calculated for an educational establishment. Head Master, Edw. Green, F.L.S., late Tutor in Grosvenor College, formerly Master at the Proprietary Grammar School, Yarmouth, Author of "Popular Education," &c. Pupils are instructed in Greek and Latin, the mathematics, and the French and German languages, while a superior English and mercantile education is ensured. They are also prepared for civil, competitive, and the middle class examinations of Oxford and Cambridge. Much useful information on natural philosophy and mechanical science is communicated by familiar lectures. Terms:—Under 10 years of age, 25 guineas; above, 30 guineas per annum; entrance fee, one guinea. The number of pupils is limited to 30. No notice demanded previous to removal. The ensuing term will commence July 22nd. Particulars may be obtained on application to Mr Thompson, 322 Regent street, London; Mr J. Lusher, No. 19 High Holborn; or Mr Bean, James's terrace, Hoxton.

SAFE AND PROFITABLE MINING INVESTMENT.

MR T. E. W. THOMAS, 16 Hackins Hey, Liverpool, transacts business in every description of Mining property, and can recommend at the present time as secure and good stock a few Shares in the best DIVIDEND MINES, as also in Mines promising very early Dividends, which, at the present low prices now ruling in the market, cannot fail to be very profitable to an investor.
Mines inspected and reports furnished.

JOZEAU'S COPAHINE, of SACCHARATED CAPSULES.—Copaiba and Cubebs are, doubtless, the best remedies, but these drugs are of a repulsive taste and odour, and occasion colicky pains, nausea, and gastric disturbance. M. Jozeau has succeeded in rendering these valuable therapeutic agents perfectly innocuous by incressing, in in his Copahine, all the curative properties. This preparation has been adopted by the Paris Academy of Medicine, after more than a thousand trials in Paris and the different London hospitals, viz., St Thomas's, Guy's, and St Bartholomew's, under the care of Messrs Lloyd, Poland, and Legros Clark, LANCET, Nov. 6, and Dec. 10, 1857. The Copahine, which is in form of a pretty pink sugar plum, effects a cure in about six days, either in recent or chronic diseases. 100 capsules, 4s 6d; post free, 5s 2d. Post-office order required; at G. Jozeau's, French Chemist, 49 Haymarket, London; 22 Rue St Quentin, Paris; and all the most important Chemists.

Terms of Subscription.

LONDON WOOL SALES.

AT THE WOOL SALE ROOMS, 54A Moorgate street, on SATURDAY, August 10,

WOOL.....About 1,100 Bales Adelaide.

Particulars in due course, of
HELMUTH SCHWARTZE, Broker,
54c Moorgate street buildings.

TO BE DISPOSED OF, THE Goodwill of a Continental House in India, of more than twenty years' standing.—Apply to Messrs Littledale, Ridley, and Bardswell, Solicitors, Liverpool.

MADRAS AND PONDICHERRY.—A Gentleman with a thorough knowledge of the Madras Indent Consignment Business, wishes a re-engagement as Correspondent—as which he has been for some years occupied in a first-class house.—Address "ANR." Messrs W. Dawson and Sons, Cannon street.

PARTNERSHIP.—WANTED, by a London firm having an establishment abroad and importing first-class colonial produce, a Partner with a capital of £8 to £10,000, which can be partly secured.—Particulars will be given to principals only, or to their solicitors, on application to Messrs Ashurst, Son, and Morris, 6 Old Jewry, City.

TO BANKERS, BANK MANAGERS, and OTHERS, requiring a confidential and industrious Young Man.—A Banker's Clerk, who has had nearly sixteen years' experience of banking business in London and the country, is desirous of obtaining an appointment in any department of a Banking Establishment or Merchant's Office, where zeal, ability, and integrity would be appreciated. The advertiser is 29 years of age, and can furnish the highest references and testimonials of character, &c.—Address G. C., London road, Peterborough.

TO BANKERS.—A GENTLEMAN engaged in Country Banking in England for the last 23 years, and previously in a Scotch Bank, offers his services to any Bank requiring an experienced official. He is well acquainted with Bookkeeping, and has filled efficiently the offices of Inspector and Manager in different Banks. He has had opportunities of acquiring a thorough knowledge of Banking, and of fully understanding the business requirements of every class of a Banker's customers. Testimonials and references of a high character.—Apply by letter to A. B., care of Messrs Skipper and East, 1 St Dunstan's hill, E.C.

LOANS ON DEBENTURES.—The London, Chatham, and Dover Railway Company are prepared to receive Tenders for Loans of £100 and upwards, on Mortgage of the Metropolitan Extension Lines, authorised by Act of Parliament, to last for three or five years, at 6 per cent. per annum.—By order,

G. F. HOLROYD, Secretary.

Offices, 3 Victoria street, Westminster, S.W.

CIRCULAR NOTES IN THE MONEY of the Country.—Tourists and travellers to the Continent may obtain Circular Notes for 100 and 200 francs each, payable for the full amount, at nearly every town and village throughout France; also in Belgium, Italy, and Switzerland, from

SAMUEL and MONTAGU,
Bullion Merchants and Foreign Bankers, 21 Cornhill.

FRENCH WINE BOTTLES. Soda Water Bottles, Confectioners' Bottles, Drug, Dispensing, and Castor Oil Bottles, Wine, Ale, and Porter Bottles, from Stock in London or direct from the Works.—AIRE and CALDER GLASS BOTTLE COMPANY, Castleford; Free Trade Wharf, Ratcliff; and 61 King William street, E.C. The Patent Stoppered Bottles of all kinds.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons. Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8 WATERLOO PLACE, PALL MALL, S. W.

THE HON. FRANCIS SCOTT, CHAIRMAN.
CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.

FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December, 1861, should make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these bonuses amount to, the three following cases are given as examples:—

Sum Insured.	Bonuses added.	Amount payable up to Dec., 1854.
£	£ s	£ s
5,000	1,987 10	6,987 10
1,000	397 10	1,397 10
100	39 15	139 15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the policy.

The Assets of the Company at the 31st December, 1860, amounted to £730,665 7s 10d, all of which had been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

For prospectuses, &c., apply to the Resident Director, No. 8 Waterloo place, Pall Mall.

By order, E. L. BOYD, Resident Director.

WESTERN LIFE ASSURANCE

and ANNUITY SOCIETY,
3 Parliament street, London, S.W.
Established A.D. 1842.

DIRECTORS.

Henry Edgeworth Bicknell, Esq., Upper Bedford place, Russell square.
Thomas Somers Cocks, Esq., J.P., Charing cross; Hereford street, Park lane; and Thames Bank, Marlow, Bucks.
George Henry Drew, Esq., Hibernia chambers, London bridge, and Caterham, Surrey.
William Freeman, Esq., Millbank street, Westminster.
Joseph Henry Goodhart, Esq., J.P., 3, 4 and 5 Ratcliffe highway, and Manor House, Upper Tooting, Surrey.
Edmund Lucas, Esq., Millbank street, Westminster, and Wandsworth, Surrey,
Frederick Boyd Marson, Esq., Brunswick place, Regent's park.
James Lys Seager, Esq., Millbank row, Westminster, and Carroun House Surrey.
John Bazley White, Esq., Blackheath, Kent.

ACTUARY.

Arthur Scratchley, Esq., M.A.

Annual payments to insure £100 at the undermentioned ages:—

	£ s d		£ s d
20	1 14 2	40	2 14 5
25	1 18 6	45	3 2 5
30	2 2 9	50	3 17 0
35	2 8 0	55	4 10 4

Partners in Firms are recommended to give attention to the moderate terms upon which joint life assurances may be effected.

The medical attendants of the lives proposed are always consulted, and paid for their reports.

BONUSES.—The rates of this society, when compared with those of other offices, will be found to give an immediate bonus to assurers, and, in addition, large bonuses are periodically declared out of the surplus profit. The next division will take place in 1865.

Agents wanted in the towns and villages of the United Kingdom where the society is not already represented.

THE SCOTTISH WIDOWS' FUND

and LIFE ASSURANCE SOCIETY is a purely mutual office, in which the whole funds belong to the members, and the profits are divided among them alone. Since it was founded in 1815, its history has been one of constant and increasing prosperity; and it is now, in point of funds, annual revenue, and number of members, one of the largest Life offices in the world. The security presented by the Society to its members and their representatives is of the most unquestionable character, while the returns made in the form of bonuses are, it is believed, not exceeded by those of any other similiar institution. The following is a

MEMORANDUM OF BUSINESS, BONUSES, FUNDS, AND REVENUE,

Extracted from the Society's detailed Prospectus.

	£
1. Total assurances issued	14,621,724
2. Total bonuses declared	3,033,049
3. Sums assured and bonuses existing	10,886,591
4. Total claims paid exceed	3,600,000
5. Invested funds	3,601,764
6. Annual revenue	425,738

Forms of proposal, detailed prospectuses and reports, and every information may be had at the Head Office, or any of the Society's agents.

SAMUEL RALEIGH, Manager.
J. J. P. ANDERSON, Secretary.

SPECIAL NOTICE.

Proposals dated and lodged at the Head Office, or with any of the Society's agents, during the current year, will secure One Bonus more than those of later date.

LONDON HONORARY BOARD.

George Young, Esq., Mark lane.
Charles Edward Pollock, Esq., Barrister, Temple.
David Hill, Esq., Sussex square.
John Murray, Esq., Publisher, Albemarle street.
Samuel Laing, Esq., Indian Finance.
Sir John Thomas Briggs, Admiralty.
Leonard Horner, Esq., F.R.S.
Jas. Anderson, Esq., Q.C., Lincoln's inn.

AGENTS for LONDON and the SUBURBS.

Central Agent { Hugh M'Kean, 4 Royal Exchange buildings, Cornhill.
District Agents { Major R. S. Ridge, 49 Pall Mall, Agent for the West-end District.
District Agents { Benton Seeley, Islington green, Agent for Islington District.

ROBERTSON and WHITE, Accountants,
4 Princes street, Bank E. C.

QUEEN INSURANCE COMPANY

(FIRE, LIFE).

Capital—Half-a-Million, with power to increase to One Million.

LONDON BOARD.

CHAIRMAN—Henry Bruce, Esq., merchant, Bell court, Mincing lane.
Edward P. Alderson, Esq., (firm, Kelson, Tritton, and Co.), Old Broad street.
Henry Fowler, Esq., (firm, H. and R. Fowler); St. Saviour's Dock, Southwark.
Thomas Wm. Kough, Esq., (firm, Jones Brothers), Upper Thames street.
Samuel Lloyd Stacey, Esq., (firm, Corbyn, Stacey, Messer, and Co.), Holborn.
BANKERS—Messrs Barclay, Bevan, Tritton, and Co.

Mercantile and other descriptions of Fire Insurances effected.

Losses promptly and liberally settled.

Life assurance in every branch.

Days of Grace.—Full protection granted under both fire and life policies during the period allowed for their renewal.

W. P. CLIREHUGH, Manager and Actuary.
H. B. TAPLIN, London Secretary.

LIFE ASSURANCE.—

Special Notice.—The next investigation into the profits of the Life Department of the SCOTTISH UNION INSURANCE COMPANY will be made as at 1st August, 1861, and parties taking out policies before that date will participate in the division.

625 new policies, for £304,705, yielding £9,828 6s 2d of new premiums, were issued during the year ending 1st August, 1860.

Thirty days' grace allowed to renew life insurances and 15 days to renew fire insurances, during which time, on payment of the premium, the Company hold themselves liable.

No extra premium charged for members of volunteer or rifle corps within the United Kingdom.

LONDON BOARD.

President—The Right Hon. the Earl of Mansfield.

DIRECTORS.

P. Anstruther, Esq.	H. M. Kemshead, Esq.
Charles Balfour, Esq.	John Kingston, Esq.
Robert Collum, Esq., M.D.	J. R. Robertson, Esq.
J. E. Goodhart, Esq.	Hugh F. Sandeman, Esq.

George Ramsay, Esq., Manager.
Secretary—F. G. Smith, Esq.
Surgeon—E. W. Duffin, M.D.
Solicitors—Messrs Oliverson, Lavie, and Peachey.

A copy of the last report, forms of proposals, and prospectuses, may be had at the offices, 37 Cornhill, London; and of the agents throught the kingdom.

FREDK. G. SMITH, Secretary to the London Board.
No. 37 Cornhill, London.

IMPERIAL LIFE INSURANCE

COMPANY, No. 1 Old Broad street, London, E.C.
Instituted 1820.

DIRECTORS—1861.

Thomas Newman Hunt, Esq., Chairman.
James Gordon Murdoch, Esq., Deputy-Chairman

Thos. G. Barclay, Esq.	George Field, Esq.
James C. C. Bell, Esq.	George Hibbert, Esq.
Charles Cave, Esq.	Samuel Hibbert, Esq.
Ed. H. Chapman, Esq.	Frederick Pattison, Esq.
Geo. W. Cottam, Esq.	W. R. Robinson, Esq.
Geo. Henry Cutler, Esq.	M. T. Smith, Esq., M.P.
Henry Davidson, Esq.	Newman Smith, Esq.

Profits.—Four-fifths, or 80 per cent. of the profits are assigned to policies every fifth year. The assured are entitled to participate after payment of one premium.

Bonus.—The decennial additions made to policies issued before the 4th of January, 1842, vary from £78 to £16 15s per cent. on the sums insured, according to their respective dates.

The quinquennial additions made to policies issued after the 4th of January, 1842, vary in like manner from £28 17s to £1 5s per cent. on the sums insured.

Purchase of Policies.—A liberal allowance is made on the surrender of a policy, either by a cash payment or the issue of a policy free of premium.

Loans.—The Directors will lend sums of £50 and upwards on the security of policies effected with this Company for the whole term of life, when they have acquired an adequate value.

Insurances without participation in profits may be effected at reduced rates.

Prospectuses and further information may be had at the chief office as above; at the branch office, 16 Pall Mall; or of the agents in town and country.

SAMUEL INGALL, Actuary.

ROYAL INSURANCE COMPANY,

29 Lombard street, London, and Royal Insurance Buildings, Liverpool.

Subscribed Capital £2,000,000. Paid up and accumulated Funds £700,000.

Mercantile Insurances of every description in the Port of London and elsewhere freely entertained.

This Company has ever distinguished itself by promptitude and liberality in the settlement of Claims.

FREE ASSURANCE.

The Policies of the STANDARD LIFE ASSURANCE COMPANY are relieved from all restrictions as to residence Abroad (except in special cases), and they are otherwise so framed as to afford the most complete security in connection with Family Provisions, Marriage Settlements, Loan Transactions, and the various other purposes in connection with which the protection of Life Assurance is sought.

The STANDARD LIFE ASSURANCE COMPANY was established in 1825, and during the last fourteen years the annual average of New Assurances has exceeded Half a Million sterling, being the largest business transacted in that period by any Life Assurance Office. The new Assurances effected in 1860 alone were upwards of £700,000. The business is a purely home business, the Company having no agencies out of the United Kingdom.

Accumulated fund	£1,856,802 19 4
Annual revenue	£304,161 13 7

THE SIXTH DIVISION OF PROFITS.

was made on 9th May last, when it was reported that the Bonus Additions were at the rate of 150 per cent. on the sum assured on Policies effected in 1825; 100 per cent. on Policies effected in 1831; and 50 per cent. on Policies effected in 1840. Next Division of Profits in 1865.

THE INVESTIGATION REPORT,

showing these important advantages, is now ready, and may be had at the Office, or Agencies of the Company.

WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, Res. Secretary.

LONDON ..... 82 King William street.
EDINBURGH..... 3 George street (Head office.)
DUBLIN..... 66 Upper Sackville street.
GLASGOW..... 35 St Vincent place.

FIRE INSURANCE.—

Proposed New Tariff.—At a large and influential Meeting, held at the Egyptian hall, Mansion house, London, on Thursday, the 25th July, 1861, convened by the Right Hon. the Lord Mayor, pursuant to a requisition signed by upwards of 300 leading merchants and others, ROBERT WIGRAM CRAWFORD, Esq., M.P., in the chair, the following resolutions were unanimously adopted:—

Moved by George Moffatt, Esq., M.P., seconded by Joseph Anderson, Esq.:

1. That, in the opinion of this Meeting, the proposed rates on merchandise and the depots thereof, as issued by the combined fire offices, who virtually form a monopoly, are manifestly unjust and excessive, and would, if submitted to, be the means of converting an unparalleled calamity into the basis of a permanent source of exorbitant profit.

Moved by James Layton, Esq., seconded by John Humphery, jun., Esq.:

2. That this meeting is also of opinion that if the proposed rates of insurance be established, an inducement would be offered to incur the hazard of non-assurance rather than submit to an exorbitant impost, and that such a temptation to imprudence would diminish the protection which the caution of the mercantile community has hitherto enabled them to secure for their property.

Moved by Henry Trower, Esq., seconded by R. Woolloton Esq.;

3. That the market value of the shares of the leading fire offices, which has suffered no material depreciation since the fire in Southwark, proves that on the average the previous rates were amply sufficient; and, therefore, this Meeting pledges itself to use all lawful means by the formation of a new Company, or other otherwise, to oppose the establishment of the proposed new rates of insurances, and that a Committee be appointed to consider the best course to be pursued towards that end, and that the Committee consist of the following gentlemen, viz.:—

Geo. Moffatt, Esq., M.P.	W. J. Hall, Esq.
Hy. Wm. Peek, Esq.	F. Besley, Esq.
James Layton, Esq.	Joseph Anderson, Esq.
Horatio Love, Esq.	John Corderoy, Esq.
Mr Alderman Wilson.	J. T Noakes, Esq.
Henry Trower, Esq.	G. Hewett, Esq.
Arthur Capel, Esq.	Charles Curling, Esq.
Smith Harrison, Esq.	J. P. Judd, Esq.
Arthur Stevins, Esq.	Charles Browning, Esq.
J. C. Quick, Esq.	Joseph Underwood, Esq.
Fredk. Palmer, Esq.	David Hart, Esq.
Geo. Scovell, Esq.	John Sim, Esq.
John Humphery, jun., Esq.	

Moved by H. W. Peek, Esq., seconded by Arthur Capel, Esq.:

4. That the thanks of this Meeting be respectfully tendered to the Right Hon. the Lord Mayor, for his courtesy and kindness in convening this Meeting and granting the use of the Egyptian hall for the purpose.

Moved by Charles Curling, Esq., seconded by Horatio Love, Esq.:

5. That the thanks of this Meeting be cordially given to R. W. Crawford, Esq., M.P., for his able and impartial conduct in the chair.

AIR CIRCULATING AND ANTI-GREASE HATS—

Patented and Manufactured by MAYHEW and CO., 89 New Bond street, W.—These Hats are waterproof, grease proof, and ventilating; they are peculiarly soft and easy in wear, ensuring a comfortable and complete fit to any formation of head, being light, yet durable. THE INDIAN BUDGET AND LOAN.

On Thursday night Sir C. Wood gave his last statement for this Session of the condition of our Indian finance, and asked leave to borrow 5,000,000*l* for Indian railways, should the Indian Railway Companies need that amount in addition to what they can themselves raise. We propose in our next issue to examine this financial statement carefully, and to go thoroughly into these complicated accounts, which we could not do, satisfactorily to our readers, this week. It is a subject requiring patient attention to a very confused mass of figures.

WHY HAVE WE SO FEW STATESMEN IN THE HOUSE OF COMMONS?

The retirement of Lord John Russell from the scene of action in which he has so long been so distinguished, from the scene which he so much loves,—the retirement of Lord Herbert from an assembly which always listened to him with pleasure, though he never rose to address it without reluctance,—cannot but raise a very serious question in the minds of thinking men:—Why have we so few statesmen of eminence in the House of Commons? Great man after great man passes into the still calm of the superior assembly or into the tomb, but no adequate successor to them springs up. Their constituencies elect in their places fair men, but they do not elect their equals or their similars. The paucity of accomplished statesmen is so great that we are just now compelled to transfer one of our best statesmen from a post for which he has been trained during many years, for which he is adapted by nature, which he has filled almost perfectly, to another post which demands different previous studies and very different mental qualifications. We are obliged to take a thoroughly trained man from the post for which he was thus prepared, and we are compelled to place him in a post for which—habits of business and collectedness of understanding apart—he is entirely unprepared. Our excuse is that "statesmen are so scarce, we have no other man equally good. Lord Palmerston had *really* no choice." If this be so, what is the cause of it? We do not apologise for stating the problem in this plain and emphatic form; it is for the interest of the public that it should be seen as it really is, and be discussed without disguise.

It is useless to attempt to evade the existing difficulty by alleging that there are still great men in the House of Lords, —that when they migrate from one assembly to the other, they remain the same men that they were before,—that the country can as much have their services in the place where they are, as it could in the place which they have left. The truth is not so. These men are the same men, perhaps, but we have not the same use of them. One of the principal duties of a Parliamentary administrator in the present day is to answer Parliamentary questions. We boast that for better or for worse our administration lives in the face of day; that it has no indefensible secrets—no hidden defalcations; that it is searched into during half the year by the incessant inquiry of 658 inquisitors, and especially by certain of them who are stimulated by public spirit, by personal vanity, by the wish to be thought active by their constituents, by the wish to become great men with the public. As this is so, it is advisable that such questions should be answered well, and experience shows that a subordinate official, as a rule, does not answer questions well. Except under circumstances exceptionally advantageous, he cannot feel sufficiently at home to state the past actions of his chief as if they were *his* own actions—the past motives of his chief as if they were his own motives—the future policy of his chief as if it were his own policy. The inherent principles of human nature, the fundamental conditions of official action ensure that, as a rule, this will be the case. And in consequence the public service will suffer. If false impressions are given by incomplete, hesitating, or inaccurate replies in Parliament, an erroneous opinion is formed in the country and perhaps in other countries; and the characteristic usefulness of "question-and-answer" administration is wholly sacrificed, even if such mistaken impressions should chance by good fortune to cause no absolute evil.

Why, then, is there this remarkable vacuum in the Lower House of Parliament? On many grounds we should expect that available talent would accumulate there. There is doubtless a great augmentation of ability in the country, for our population is augmenting and our education is spreading and improving every year. The number of educated men competent to begin to learn to be statesmen must be largely on the increase. Early in the century one of the shrewdest of the Conservatives, old Lord Stowell, was fearful of the rapid diffusion of education upon this precise account. He said:—"If you create more educated talent than there is a "demand for, the surplus will be apt to turn sour." If we look at the House of Commons the result is the opposite of the prediction: the surplus has not turned sour, and could not turn sour, for it does not exist.

The real reason, which is concealed from the public at large, but which arrests the attention of close observers, is the expense of English political life. If *we* may be pardoned for an economical expression, the cost of producing a statesman in this country is far beyond the profit which he can derive from the service of the State. The cost may be divided under two heads.

First, the cost of getting into Parliament. We all know vaguely, not certainly, how great this is, and how increasingly great it seems likely to become. A very large number of rich men are very anxious to have seats in Parliament. It is the only way in which newly-made wealth can in England attain a respectable proximity to hereditary wealth. A man of large income—if he have not a position by birth, or peculiar talents, or some other exceptional advantage—is,

notwithstanding his wealth, of little account in English society. If he enters Parliament he becomes at once somebody, and if he plays his cards skilfully and carefully, he may become a very distinguished member of society. Rich people, and the wives and daughters of rich men even more, are keenly alive to all this. They bid, and will continue to bid, very high for all the purchasable seats in Parliament.

And it must be observed that the influence of money is not to be measured by the sum, considerable though it be, which is expended in bribery at elections. It runs far wider and far deeper. Almost every constituency likes to have a rich member far better than a poor one. The "subscriptions" which a rich man can give to the charities of the borough are a considerable object to the philanthropic part of its inhabitants; his dinners are something of an object to such of them as come to London; his "business" may be made to add a little to the fee book of the local solicitor. In countless ways which it would be tedious to enumerate, though it will be easy to imagine, the influence of wealth, which is so powerful in every other part of English life, will be especially powerful in obtaining the coveted position of a seat in Parliament. We may imagine constituencies in another and a better world which do not feel such terrestrial agencies; but such are not the constituencies among which we live. The evident fact is, that the cost of attaining a seat in Parliament has risen during the last thirty years, not because of the Reform Act, not because of any legislative change, but from a social change, because there are more rich bidders for seats in Parliament than there were once.

It may indeed be said that we have still some small boroughs in which aristocratic influence is more potent than pecuniary corruption, and that the noble patron may think it his duty to appoint an eminent representative. One or two such cases there certainly are, but how few! We have only to look down the list of the members for the closer boroughs to satisfy ourselves of the conclusion which we should be inclined to anticipate beforehand, viz., that the support of the borough proprietor is given in the main to the relations and friends of the borough proprietor, and to the friends of his friends; and that, therefore, we cannot count on such dependent seats for any great accession of Parliamentary ability, because they are for the most part given away with but a secondary reference to its attainment.

The present system might indeed be loosely, but not very inaccurately, described as a system for securing the indirect representation of wealth and property at the expense, or at least at the risk, of sacrificing the representation of intelligence. We have confined the area of electioneering competition to the comparatively small number of rich men, and we must, therefore, not complain if the great majority of the persons elected are rich rather than clever.

And, *secondly*, when a distinguished member of Parliament is elected, his expenses are not at an end. His daily political life is an expensive life. The tone has been given to it by men of great fortunes, by men of large estates and large incomes: the rate of expenditure was fixed by them, is suitable to them, and is scarcely suitable to any one else. It is scarcely possible for a high English statesman to live out of the high social world; and if he lives in it he must conform to its fixed usages—he must live as others live there, he must spend as others spend there.

Nor is there at present any pecuniary profit to be obtained from English statesmanship which is even approximately commensurate with this large pecuniary outlay. The salaries of office are not very high, and its tenure is very uncertain. No one could start in political life in reliance upon a political income: any one would be reckoned mad who even thought of doing so. The popular impression of the pecuniary unprofitableness of Parliamentary life is very strong and very correct. In former times there were sinecures to be had, and large pensions were a not impossible contingency; but the sinecures have been wisely abolished, and pensions have been reduced within very narrow limits. Patronage may once, too, have been a great practical augmentation to the daily convenience of a statesman's life. He may have been able to provide easily and suitably for his friends, and relatives, and *protégés*—for those whom he wished to provide for. But such is not the case now. The borough attorney, the local supporters who determine the close-run election, have the best of the few good things which now remain; and how few these are is best known to those who have most closely investigated the present arrangements of our public offices. A statesman who entered public life in the hope of gaining a satisfactory livelihood either for his friends or for himself, perhaps ought to be disappointed, and certainly would be so.

We must not then be surprised that we have so few accomplished statesmen;—let us rather be thankful that we have so many. We have confined our selection to the small number of opulent men, and as long as we do so we must take the consequences. Few rich men will go to a laborious profession—will, as Lord Macaulay puts it, "pass nights "without sleep and summers without one glimpse of the beauties "of nature, in the perhaps mistaken hope that they may attain "that laborious, that insidious, that closely watched slavery, "which is mocked with the name of power." Public spirit may give us some few statesmen, vanity will be sure to yield us many counterfeits of statesmen; but so long as we confine our selection as we now confine it—so long as we pay men as only rich men can afford to be paid, and expect them to labour as only poor men will submit to labour,—we must expect our House of Commons to exhibit its present barrenness of rising merit; we must not hope to see rich grapes growing on a soil which was only suited for poor thistles. In what manner this singular malady of English political life may be best mitigated or remedied, we may soon take an opportunity to consider. But the present striking exemplification of our Parliamentary poverty should at least make us admit our difficulties and acknowledge our defects.

THE FINANCES OF THE NORTHERN STATES OF AMERICA.

We published last week the most important portions of the message of the Secretary of the Treasury at Washington, but it is very possible that some of our readers may not have had sufficient time or sufficient preliminary information to understand without a commentary the whole bearing of its contents. A more remarkable document, it may safely be said, has rarely been laid before a great nation. The cost of civil war is traceable in every syllable—is discernible in every figure of it. It contains a proposal to increase Customs duties; to augment internal taxation; to reduce, and that largely, the salaries of the *employés* of the Government; to make the property of the rebel States as soon as they are conquered, liable, as it were, in damages for the cost of the rebellion; to raise, partly by national subscription and partly otherwise, an enormous loan. It is, perhaps, scarcely within the powers of finance to discover propositions of more startling magnitude or more extreme interest.

The expense of the American civil war is very easily calculable. According to the balance-sheet of the United States for the year ending 30th June, 1860 (which, as it may interest our readers, we publish below), the whole expenditure of the Federal Government was 17,396,452*l*. Now, the Secretary of the Treasury asks for 71,666,905*l*. In other words, the rebellion, or the secession, or whatever it is to be called, is to cost the Northern States fifty-four millions sterling, or more than three times the ordinary Federal revenue. The Northern States are to spend this year four times as much as the whole Union used to spend. More than fifty-one millions are required for the army alone, which was formerly maintained for three millions and a half.

As we may conceive, the Finance Minister is rather perplexed to derive so augmented a revenue from so contracted an area. He proposes to raise the money he requires partly by loans and partly by taxes, and divides the respective amounts thus:—

	£
Taxation	18,000,000
Loans	54,000,000
Total	72,000,000

The taxes he relies on may be divided into two classes—taxes which *he proposes* and *taxes which he only indicates*. In this country we expect a Chancellor of the Exchequer to state exactly the manner in which he thinks the necessary expenditure of the year could best be met. Mr Chase, the American Secretary of the Treasury, follows this customary precedent up to a certain point, but only to a certain point. After that he only suggests an alternative.

He proposes an import duty on tea, and an additional im-

port duty on coffee and on sugar. He proposes, likewise, a modification of the tariff, of which the details are contained in a Bill which has only just reached us, but of which we give elsewhere the most important clauses. The Secretary of the Treasury describes the contents as "proposed duties "on articles now exempt," and "changed duties on articles "now either lightly burdened or so heavily taxed that the "tax amounts to a prohibition"; and though we have not yet had time to examine the details with any accuracy, we are inclined to hope that the effect of the new tariff on British manufactures may be better than that of the Morrill tariff, for it could not easily be worse. Mr Chase, therefore, calculates that he shall receive as follows:—

	£
From augmented duties on sugar and coffee and from tea only...	4,500,000
Other new duties added in tariff of this year	1,575,000
Other duties under old tariff	6,750,000
Land sales	675,000
	13,500,000

A sum of 4,500,000*l* remains to make up the 18,000,000*l* which Mr Chase hopes to derive from taxation. As to this, he suggests that it may either be levied by direct taxation or by some form of Excise duties. Until the present time, as will be seen by the account below, the Federal Government has derived its revenue wholly from Customs duties and from land sales, but now it must resort to more extreme measures:—

Mr Chase observes that the property, both real and personal, in United States is	£ 3,623,157,926
Deduct property of rebellious States	1,170,487,376
	2,452,670,550

which are very large figures, on which any Chancellor of the Exchequer would be very glad to lay his hand. Accordingly, Mr Chase observes that a very trifling tax per cent. on this, the value of the *principal* of the country, would raise something like the requisite amount.

Not, however, apparently satisfied with this suggestion, he says that the required sum might also, he believes, be raised from an Excise duty on stills, distilled liquors, on ale and beer, on tobacco, and from taxes on bank-notes, spring carriages, silver ware and jewellery, and on legacies.

But he leaves it to the judgment of Congress whether it will adopt either of these suggestions, or whether it will combine the two, and impose a smaller rate on real and personal property, and impose likewise certain Excise duties.

Such are Mr Chase's suggestions as to taxation;—and what are we to say to them? It is certain that they indicate much financial distress; and when they come to be paid, in addition to the heavy taxes of the several States and the heavy municipal taxes of the several towns, it is very probable that we shall hear from our brethren across the Atlantic complaints something analogous to our own,—complaints that they are the most overtaxed country upon the earth. It is evident, too, that the reckoning of the Customs revenue is extremely sanguine. It is probable that the diminished consumption consequent on a great war may diminish the importations far more largely than Mr Chase calculates, so as to deprive him of much of the revenue which he would derive from the ordinary taxes at an ordinary time, and much also of that which he hopes to gain from the extraordinary taxes which he imposes. A direct tax, too, which looks large on the sum total of the principal of a country, is more serious when it is measured by its income. On this, however, and on the Excise duties it will be easier to comment when we have them in the shape of a definite suggestion, and not of an alternative proposal.

It is to loans that Mr Chase principally looks for his ways and means. As we have said, he means to borrow 54,000,000*l*. The debt of the Federal Government is not large, though it has of late been increasing. It was:—

	£
On the 1st of July, 1860	14,573,182
On the 7th of March, 1861	17,202,435
On the 1st of July, 1861	20,445,262

figures in which we see again the financial consequences of civil war. Mr Chase, however, is not disheartened at such small items as these. He proposes

	£
A national loan of	22,500,000
A loan adapted for foreign countries, but not exclusively so adapted, of	20,000,000
An issue of Treasury notes of	11,250,000
	53,750,000

The precise terms of these respective demands were given in the ECONOMIST of last week in the Secretary's own words, and it is not worth while to repeat them. The national loan is in sums of small amount, is intended for the mass of the community, and is to bear an interest of 7 3-10ths per cent. The second loan, which is intended, if possible, for Europe, is in larger amounts, and is therefore more suitable to ordinary capitalists. The interest given is 7 per cent. in London.

Whether these loans will be taken or not we cannot say. In the easy money market of New York a large sum could be obtained, but this is a very large sum for a market which is not large. It will task the national zeal to raise in any way by loans or taxes all this money; and for what? To re-unite a community of Free States to a set of Slave States, from which Providence offered them the happy chance of an immediate disjunction. We append the balance sheet of the Federal Government for the last year of peace, to which we have referred:—

BALANCE SHEET of UNITED STATES for the YEAR ending JUNE 30, 1860.

RECEIPTS	£
Customs	11,967,189
Land rates	400,179
Miscellaneous	227,421
Treasury bonds	4,363,920
Loans	310,510
	17,269,210
Balance in hand 1st July, 1859	976,336
	18,245,546

EXPENDITURE.	£
Civil list	1,383,447
Foreign affairs	261,721
Miscellaneous	4,648,051
Expenses connected with the Indians	890,029
Army	3,692,197
Navy	2,590,458
Interest on public debt	3,930,549
	17,396,452
Balance in hand 1st July	849,094
	18,245,546

THE TERRITORIAL EXTENSION OF FRANCE.

CAVOUR'S THEORY OF THE EMPEROR.

LORD JOHN RUSSELL'S speech on Friday week concerning the consequences of the rumoured cession of the island of Sardinia to France, has created a vivid sensation among French journalists, who vie with each other in proving, what they shower scorn on us for believing, that the opinion of the French nation has a force and vigour of its own quite powerful enough to change and direct the Emperor's policy in foreign affairs. "If Lord John Russell were serious," says our contemporary *Le Temps*, "he labours (as the *Journal* "*des Debats* very truly remarks) under a strange de- "lusion respecting the Legislative Body, its ambition, and "its power, and, still stranger, about public opinion and the "press, its organ. We assure him we have no means of "constraining the French Government to conquer Sardinia." But Lord John Russell certainly did not ascribe any such power as is here intimated to the *Corps Legislatif*. He spoke of the Legislative Body only as a national organ of the opinion of the nation at large,—and though in ordinary matters it certainly does not represent France, no one knows better than the Emperor how, under exceptional circumstances, any such formally constituted body may assume for the time a perfectly valid title to represent the Empire. Lord John Russell spoke of the power naturally exercised over the Emperor by the real opinion of France, which he professes, not without good evidence, to interpret, and to defer to. And the very journals which deny that they can exercise any such influence, even when they speak with the authority of a united people, furnish at least plenty of proof of the sincerity and enthusiasm of their own desire to drive the Emperor into some further territorial extension of the French dominion. The *Patrie* rails openly at England for grudging Sardinia to France, and rails quite as openly at Baron Ricasoli and the Italian Ministry for having pledged themselves to refuse it. The *Presse* is still bolder: it openly avows that while Sardinia would be of little importance to France, there is much new territory that would be, and expresses in no obscure terms its wish that the Emperor would aim at once at the Rhine.

We ask [says *La Presse*] why the cession of Sardinia, as Lord John Russell pretends, should not be a simple transaction between the King of Sardinia and the Emperor of the French? And in what respect would the balance of Europe thereby suffer? What we think most grave in the speech of Lord John Russell is the avowal of this blind obstinacy in preparing unlimited armaments, and the declaration "that England is ready to renounce peace with all its blessings, as well as the security of its commerce and industry, in the interest of a great cause." Now, nothing can be more vague and elastic these than last words, which leave the field open to every sort of interpretation. One may always transform into "a great cause" the most paltry event, the most secondary interest. For our part we have no taste for violent conquests, or forced annexations. Sardinia has but very slight importance in our eyes. We have for our country more elevated views, and a wider ambition. We have the certain conviction that France has a right to a territorial augmentation far more important.

No paper would write thus without a very strong confidence in popular support; and thus clearly, therefore, does the French Press justify Lord John Russell's very judicious observation, that, though the Emperor of the French is personally very well disposed towards both England and Italy, there is a power in France to which even he bows, and which might constrain him to run the risk of forfeiting the good will both of England and of Italy rather than the greater risk of forfeiting the popularity of his dynasty. We do not believe that Mr Kinglake adduced on Friday week any evidence half as important to show the danger of a new push for territorial extension on the part of France, as has come out since in the shape of proofs that even more dangerous designs than the absorption of the island of Sardinia would be received by France with extravagant joy and enthusiasm. All the signs seem to show that nothing is so popular in France as the idea of territorial extension. Certain it is that the Emperor's worst enemies,—the Orleanists, the Legitimists, and the Republicans,—have all agreed to defend his policy in the annexation of Nice and Savoy. A story is told on good authority that M. de Montalembert, the ablest and most eloquent enemy of the Imperial dynasty in France, once said,—that if Louis Napoleon should ever gain for France the boundary of the Rhine, though he should never cease to think as ill of him as he now thinks, his mouth would be closed for ever; he could not say another word against the ruler who should have done so much to raise the power and dignity of France. And if this low territorial vanity, as we cannot but call it, animates thus vividly the noblest and most chivalric minds in France,—it certainly is not less strong in the army and the peasantry. Probably the *bourgeoisie* alone dislike the thought of such extension, and this not for its own sake, but only for the disturbance to trade which it implies. From the highest to the lowest, the French imagination is filled with a real passion for the grandeur of France,—and the French imagination seems quite unable to conceive any form of true national grandeur except the physical grandeur of territorial magnitude.

But, it will be said, what is the Emperor's own individual bias on this annexation policy? We have often maintained that the Emperor's policy is not remarkable for its unity of conception. He is a shrewd man either of really wavering purpose,—or, if it be otherwise, with a policy so exceedingly deep as to be in fact quite beyond human discernment. We have often maintained this view as the only one really consistent with the marvellously tortuous course with which he has puzzled Europe,—but we hold it now with renewed confidence because it seems to have been the view of the Emperor which was adopted by the late Count Cavour. No shrewder observer of human conduct has ever been near the Emperor: certainly no observer half so shrewd who had anything like the same motive for fathoming his real nature and purposes. To Count Cavour's designs the Emperor's good faith was absolutely essential. Cavour himself thought at the peace of Villafranca that he had been treated with something very like bad faith. Yet he did not accuse the Emperor of intentional bad faith. He believed him to have been governed by exactly the same changing impressions which had actuated him previously in terminating the Crimean war,—which actuated him afterwards in putting his own construction upon the Villafranca peace. In the new number of the "Quarterly Review" there is the report of a remarkable conversation between Count Cavour and an English friend concerning the unfathomable ruler of France. "He has a number of political convictions floating in his mind, none of them matured," said Cavour. "They would seem to be convictions founded upon instinct. He will not steadily pursue any single idea if a serious obstacle presents itself, but will give way and take up another. This is the *mot d'énigme* to his policy. It is by steadily keeping this in view that I have succeeded in thwarting his designs or in inducing him to adopt a measure. The only principle,—if principle it can be called,—which connects together these various ideas is the establishment of his dynasty, and the conviction that the best way to secure it is by feeding the national vanity of the French people." "He is a man of generous impulses," he continued, "and has strong feelings of gratitude towards those who have served and befriended him. At the bottom of his heart he is greatly attached to Italy. His earliest recollections are bound up with her. He is to this day a "carbonaro" in his desire for Italian freedom and hatred of Austria. He has not forgotten the kindness and hospitality shown to him when an exile in England. He admires your institutions and the character of the English people. But all this is as nothing when compared with the maintenance of his dynasty, the establishment of which he looks on almost in the light of a religious obligation. If the moment came when he thought a sacrifice necessary to sustain it, however great the sacrifice might be, however painful or repugnant to his feelings, he would make it.....He has invariably assured me that his first object was to maintain peace and a good understanding with England, I believe that from policy as as well as from affection such are his views, and that only in a moment of the utmost emergency, when he was convinced that his influence in France depended upon it, would he depart from them. But that moment may come, and you would be madmen if you were not prepared for it."

This seems to us a view of the Emperor's character and purposes which is marked by all the broad and shrewd insight for which Cavour was remarkable,—and, therefore, we attach a far greater importance to any indications of a steady current in French opinion, than to the untrustworthy gossip which Mr Kinglake occupies himself only too frequently in compiling about the rumoured operations of the French Government itself. The Emperor personally is flexible enough:—the opposition to any extension of French territory at the expense of Italy which Baron Ricasoli and Lord John Russell have already offered, constitutes an obstacle quite sufficient to induce him to take up some other of his "floating ideas," unless he perceives that the national vanity of France is set upon this territorial extension. And if it is,—and only if it is,—he may be firm, as he was in the case of Savoy and Nice, and hazard even a war with England rather than give way. We do not really fear such a contingency, but we think we ought to be prepared for it. The danger lies not with the Emperor, but with the French people and the Press. If they do so far set their hearts on a periodical extension of territory that it is a matter of grave risk to the dynasty to thwart their hopes, the attempt will be made. We wish we could think with Mr Cobden and Mr Bright that the whole danger is a chimera. It may not be very imminent. But we should at least be, as Cavour says, "madmen" if we were not ready to meet and resist it.

THE IRISH CENSUS.

It has always been an established maxim among statists that the increase of a country in population afforded a pretty sure indication and a pretty fair measure of its progress in prosperity and resources. It is so usually, and nearly universally. But Ireland, which has long been an exception to every other rule, is an exception to this also. Ireland presents the singular spectacle of a land which is steadily and rapidly diminishing *in* population, which at the same time is steadily and rapidly improving in prosperity, and which, moreover, dates the commencement of its improvement from the commencement of its depopulation, and can almost point to the one as the cause of the other.

The publication (which took place last week) of the Irish Census of 1861 brings to light some very remarkable facts, and suggests an inquiry into others equally curious and in-

structive. We will proceed to lay these before our readers in as succinct and clear a form as possible. The following table shows the movement of the population during the last twenty years:—

Provinces.	Population in 1841.	1851.	1861.
Leinster	1,973,731	1,672,738	1,439,596
Munster	2,396,161	1,857,736	1,503,200
Ulster	2,386,373	2,011,880	1,910,408
Connaught	1,418,859	1,010,031	911,339
Total	8,175,124	6,552,385	5,764,543

The frightful decrease of numbers—upwards of a million and a half—between 1841 and 1851 astonished no one. The terrible famine of 1846-7, was known to have swept off hundreds of thousands, and the subsequent emigration, or rather exodus, was known to have removed hundreds of thousands more. Still the figures are appalling. But the reality was more appalling still. The 1,622,739 by no means represented the entire amount of the depopulation. For up to 1846—when the potato-rot first appeared—the population of Ireland had continued to increase at its usual rate, and in March, 1846, would therefore have reached 8,379,500. In March, 1851, it had fallen to 6,552,385;—shewing, not a decrease of 1,622,739 in *ten* years (as appeared by the official returns), but a decrease of 1,827,115 in *five* years. Even this, however, inadequately pictured the real rate and extent of the depopulation; for the *decrease* was greatest in those provinces in which, up to 1846, the *increase* had been the fastest. The rate of increase since 1831 had been 5 per cent. in Connaught, and 8 per cent. in Munster, so that the true comparison for those two provinces would stand thus:—

	Connaught.	Munster.
Population in 1846	1,454,331	2,492,000
Population in 1851	1,010,051	1,857,736
Decrease	444,300	634,264

The real decrease was thus in Connaught 30 per cent., and in Munster 26 per cent., in *five* years—a drain wholly unprecedented in modern history or among civilised nations.

Few persons, we believe, were prepared to expect that this process of depopulation would have continued during the last decennial period, or at least that it would have continued at anything like its actual rate—viz., 12 per cent. Famine was over long before 1851; the Encumbered Estates Act had come into operation, improvement had evidently begun, and employment was becoming general. The whole decrease during the last ten years must be owing to emigration and to the diminished number or fertility of marriages. Unfortunately we have no general system of registration in Ireland, so that the natural movement of the population is unknown to us. All we can state is, that between 1851 and 1861, 1,174,179 *emigrants* left the shores of Ireland, and that the net decrease of numbers was 787,842. Whether the process of depopulation will continue, it is of course impossible to conjecture. We should hope not. The drain by emigration is to a certain extent a permanent thing; but in a thriving country and under a healthy state of affairs, this drain should never equal or even approach the amount of natural augmentation by excess of births over deaths.

We have now to show how greatly this process of depopulation, severe as it has been, was needed, in order to place Ireland in a natural and normal position. Ireland was, and is still, in an overwhelming degree an *agricultural* country. Manufactures there are, and thriving ones; but as a whole they scarcely occupy a larger portion of the people there than they do in the more agricultural counties of England. Let us, therefore, compare the numbers on a given acreage in such counties with the corresponding numbers in Ireland formerly and now:—

Counties.	Statute Acres.	Population (1851.)	Acres per head.
Hereford	552,320	99,112	5.57
Lincoln	1,671,040	400,266	4.16
Dorset	643,840	177,597	3.63
Northampton	650,240	213,784	3.13
Rutland	95,360	24,272	3.99
York, N.R.	1,315,200	194,624	6.72
Wilts	874,880	241,003	3.62
Devon	1,654,400	572,207	2.88
Buckingham	472,320	143,670	3.28
Sussex	938,240	339,428	2.80
Average			3.97

The comparison of acreage with population in Ireland stood as follows in the three last decennial periods. We throw out the number of acres returned as "absolutely unimproyable":—

Provinces.	Net Statute Acres.	Acres to each Individual. 1841.	1851.	1861.
Leinster	4,625,000	2.34	2.77	3.21
Munster	5,040,000	2.10	2.78	3.13
Ulster	4,550,000	1.90	2.27	2.38
Connaught	3,430,000	2.42	3.39	3.76
Total	17,645,000	2.14	2.70	3.06

Thus it will be seen that whereas in the rural parts of England there were as nearly as possible four acres to each individual, the number in Ireland little exceeded *two* before the famine, and is now barely more than *three*.

Still this rectification of the proportion between acreage and population, partial though it is and yet incomplete, has had—in conjunction, no doubt, with other causes—a most beneficial operation on the condition of the Irish people. The supply of labour has been reduced at the same time that the demand for it has been increased. The introduction of a Poor Law system analogous to that of England has given to proprietors of land a strong interest both in discouraging redundant numbers and in furnishing full employment for the peasantry. Some new branches of industry—especially the manufacture of lace—have been introduced and have fairly taken root. The "Encumbered Estates Act" has transferred a large portion of the soil from embarrassed absentees to liberated and improving residents, under whose superintendence numbers of cottiers have risen into the position of thriving labourers for hire. Capital has flowed in and labour has flowed out; and under the combined operation of these several influences, wages have risen from 50 to 100 per cent.; beggary has nearly disappeared, and the whole aspect of the country is one of rapid improvement and hopeful activity.

One result brought to light by the recent Census we confess rather surprises us. Although by far the greatest portion of the emigration which has been so marked a feature during the last twenty years has taken place from the South and West where the Catholics predominated, yet the relative proportion between the two great religious denominations has not been very materially altered since the first investigation in 1834. In that year, according to the published returns, the total population of Ireland was 7,954,000; of whom 6,436,000 (or 81 per cent.) were Catholics, and 1,518,000, (or 19 per cent.) were Protestants. In 1861, out of a total population of 5,764,543, we find that 4,490,000 (or 78 per cent.) were Catholics, and 1,273,960 (or 22 per cent.) were Protestants.

LORD STRATHEDEN'S MOZAMBIQUE DEBATE.

Lord Stratheden was, perhaps, under the circumstances, wise in withdrawing last week the motion which his very able and convincing speech had supported, for the reappointment of the British Consul at Mozambique. It could have answered no purpose to press the motion to a division, and Lord Wodehouse's intimation that the question was still under consideration rendered it a matter not only of courtesy, but of prudence, to content himself with merely administering a spur, instead of insisting on a division. As the important point at issue in this debate is still, therefore, undecided, we need not apologise for earnestly urging on the public and the Government the duty of accepting the substance of Lord Stratheden's recommendation. Eventually, we think, the Government must comply with his suggestion; and—what is of far more importance than merely complying with a single suggestion of any kind—must shape their policy in the spirit of that suggestion. We have some reason to be gravely dissatisfied with the conduct both of Lord Malmesbury and of his successor at the Foreign Office (Lord John Russell), in the policy they have pursued towards Portugal with regard to this East African Slave Trade. And it is of the first importance that if a new era is to be inaugurated by the treaty recently concluded with the Emperor, it should be marked also by a complete change in the relations between England, Portugal, and France on this head. If the Coolie immigration treaty is to be a *bonâ fide* substitute for the purchase of African slaves on the Mozambique coast, it can only become so in one way,—by the hearty co-operation of the three Powers, France, Portugal, and England, to put a final stop to this traffic.

The reason of this is obvious. It is not, it has never been, any preference for slavery upon the part of any of the

three *Governments* which has caused the constant demand for slaves in Eastern Africa. If a mere hearty dislike to the thing on the part of every one of the Executives would have terminated it finally, it would have been terminated finally long ago. But the force which is always acting to keep up this demand for slaves is private self-interest. The laws of the French colony of Réunion admit the apprenticeship of "free African immigrants" for a term of years. And the question whether or not they were free when they were *engaged*, is not likely to be investigated with miles of ocean between them and their homes. Consequently, as Réunion, like our own West Indian colonies, is in constant want of fresh labour, there is a constant force tending to the engagement of such labour on the nearest coast; and since the only way of engaging "free" labourers is to *buy* them from the African chiefs, there is always a prosperous trade in these unfortunate immigrants. The only way in which it can be put down, is by constant vigilance and co-operation among all the forces of the different Naval Powers on that station,—but the chance of such co-operation has been anything but strong since the discreditable dispute between France and Portugal, in which, after we had been hectored into abandoning the latter, we withdrew in shame from Mozambique, and left the field clear for the slavers.

The Government appear to hope that when in July, 1862, the stream of Coolie immigration from British India to these French colonies sets in, the selfish private motive for continuing the purchase of African labour will cease. Of this, however, as Lord Stratheden very properly pointed out, there is no evidence whatever. In the first place, it will long be quite inadequate to the demand of the colony. In the second, it will provide labour engaged at a dearer rate than the African, and better able to stand up for its own rights. Even to protect these Coolie immigrants against violations of their rights, Lord John Russell sees that it is necessary to appoint a Consul at Réunion, to whom, as the representative of England, they may appeal. If, then, it is absolutely needful to watch on behalf of England the dealings of France with the Hindoos engaged in our provinces, in order to protect them against possible mis-treatment,—how obvious it is that it is far more necessary to watch at the sources of the African supply, where the danger is far greater, and spread over a far wider surface. If it is needful, as Lord John Russell admits, to check the French Government in their own colonial ports and where their own Executive is paramount, it is absurd to deny that such checks are far more needful along a line of 1,500 miles of coast, where French cruisers may seldom be stationed, and where there can be little hindrance to this traffic. Whatever arguments apply to the appointment of a Consul at Réunion, apply with still greater force to the appointment of one at Mozambique. If we could trust the French Government at all, we might well hope that its officers at Réunion would keep good faith with the British Coolies for carrying out the treaty; but, however good the faith of France, she cannot put down her own Slave-traders without first catching them; and to withdraw all our aid to this end at the time when she is promising in good earnest to second our efforts, is either very lukewarm in us, or betrays a deep distrust of her sincerity. The truth is that France, England and, Portugal, if they will really act heartily together, have full power to terminate this abominable traffic; but the *first* impulse must necessarily come from England,—for the Portuguese officers will lose largely by its suppression,—the French officers will have the unpleasant duty of setting spies over and detecting their own countrymen,—and, consequently, the only country without a strong motive for languor is England. If, then, we withhold all impulse, and take no pains to bring the true state of things before the attention of France and Portugal, we are really accomplices with them. We know very well the strong motives at work amongst the French and Portuguese. We know that Colonial Governments are always reluctant to act severely against wealthy and influential people, unless they fear to be reported at home,—and yet we desist from lending the little modicum of money and vigour which is requisite to get the French and Portuguese prohibitive machinery fairly to work.

Lord Stratheden showed most satisfactorily how important is this kind of influence, by citing its operation in Loanda on the West Coast of Africa. In 1843, when the British Consul first went there, and the court of adjudication was first established there, the Portuguese traffic in slaves was as shameless as it is now on the Mozambique coast. Thirty slavers were seen at one time in the harbour. There were a line of barracoons filled with slaves along the coast. The Portuguese judges shamelessly gave certificates to vessels well known to be active in the Slave Trade. By the year 1853 the Slave Trade on the Angola coast had been almost abolished, and greatly in consequence of the activity of our Consul, who used all the channels of information open to him,—informed the captains of our cruisers, and the captains of the Portuguese cruisers, and the Colonial Government itself of all that he learned,—and so at last contrived to render it impossible for the Portuguese Government to blink the offence, or for Slave-ships to escape convictions.

It will be said that such a method, to be effective, requires the hearty co-operation both of the French and Portuguese in Mozambique. No doubt it does. But the Portuguese co-operation can scarcely be withheld if once the French are really working cordially with us; and if we cannot promise ourselves hearty French co-operation, what is the meaning of this Coolie treaty at all? It is worse than a sham if the French Government cannot be relied upon to adhere strictly to its part of the contract; and if it can, we certainly should lose no time in securing the most effective means of bringing to light and to the knowledge of the French Government all that really goes on. If, after all, such disgraceful controversies as that of the *Charles et Georges* should recur, the fault will not be our's. We shall at least have done our duty in securing full evidence for Europe that France does not seriously wish to put an end to the French Slave Trade. But at present we have every reason to hope that she does; and that if we second her efforts as we ought, we may enable her to do so effectually.

THE WAR TARIFF OF THE UNITED STATES.

THE following are the most important clauses in a Bill which has been prepared by the Treasury Department to be submitted to Congress:—

A Bill to Provide Revenue from Imports and for other Purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

Sec. 1. That from and after in lieu of the duties heretofore imposed by law on the articles hereinafter mentioned, and on such as may now be exempt from duty, there shall be levied, collected, and paid on the goods, wares, and merchandise herein enumerated and provided for, imported from foreign countries, the following duties and rates of duty, that is to say:—

First: On raw sugar, commonly called muscovado or brown sugar, not advanced above No. 12 Dutch standard by claying, boiling, clarifying or other process, and on syrup of sugar or of sugar cane and concentrated molasses or concentrated melado, 2½c; and on white and clayed sugars, when advanced beyond the raw state by claying, boiling, clarifying or other process and not yet refined, 3c per lb; on refined sugars, whether loaf, lump, crushed or pulverised, 4c per lb; on sugars, after being refined when they are tinctured, coloured or in any way adulterated, and on sugar candy, 6c per lb.

Provided, That all syrups of sugar, or of sugar cane, concentrated molasses or melado entered under the name of molasses or any other name than syrup of sugar or of sugar cane, concentrated molasses, or concentrated melado, shall be liable to forfeiture to the United States; on molasses, 6c per gallon; on molasses when tart or sour, 4c per gallon; on confectionery of all kinds, not otherwise provided for, 30 per cent. ad valorem.

Sec. 2. And be it further enacted, That from and after the day and year aforesaid, there shall be levied, collected, and paid on the importation of the articles hereinafter mentioned the following duties, that is to say:—

First: On brandy, for first proof or less, 1 dol 50c per gallon; on spirits, manufactured or distilled from grain, for first proof or less, 60c per gallon; on spirits from other materials, for first proof or less, 60c per gallon; on cordials and liqueurs of all kinds, 75c per gallon; on arrack, absynth, kirschenwasser, ratafia and other similar spirituous beverages not otherwise provided for, 75c per gallon. Provided, that the duty upon brandy, spirits, and all other spirituous beverages herein enumerated, shall be collected upon the basis of first proof and so in proportion for any greater strength than the strength of first proof; on all white wines in casks, costing 25c or less per gallon, 10c per gallon, costing over 25c and not over 50c per gallon, 25c per gallon; costing over 50c and not over 80c per gallon, 50c per gallon; costing over 80c per gallon, 75c per gallon; on all white wines in bottles, costing 25c

or less per gallon, 30c per gallon; costing over 25c and not over 50c per gallon, 35c per gallon; costing over 50c and not over 80c per gallon, 45c per gallon; costing over 80c per gallon, 1 dol per gallon. On all red wines, in casks, costing 25c or less per gallon, 7c per gallon; costing over 25c and not over 50c per gallon, 15c per gallon; costing over 50c and not over 80c per gallon, 30c per gallon; costing over 80c per gallon, 70c per gallon. On all red wines in bottles, costing 25c or less per gallon, 10c per gallon; costing over 25c and not over 50c per gallon, 20c per gallon; costing over 50c and not over 80c per gallon, 45c per gallon; costing over 80c per gallon, 1 dol per gallon. Provided, That all imitation of brandy or spirits, or any of the said wines, and all wines imported by any name whatever, shall be subject to the duty provided for the genuine article which it is intended to represent. Provided further, That brandies, spirits, wines, and all other spirituous liquors, shall be subject to duty only on the quantity imported, and without any allowance for leakage; and provided further, That brandies, cordials, wines, or other spirituous liquors, may be imported in bottles when the package shall contain not less than one dozen, and all bottles containing brandies, cordials, wines, or other spirituous liquors, shall pay a separate duty of 30 per cent. ad valorem; on ale, porter, cider, and beer, in bottles 30c per gallon, otherwise than in bottles 15c per gallon; on all spirituous liquors not enumerated, 100 per cent. ad valorem. Second: On cigars of all kinds, valued at 5 dols or under per thousand 15c per lb; over 5 dols and not over 10 dols, 50c per lb; and over 10 dols, 70c per lb. Provided that it shall be lawful for the collector and naval officer (when there is one) if they see fit, with the consent of the importer or importers, consignee or consignees, to estimate or ascertain the real tare of the casks, boxes, or other packages containing cigars, and allow the same in lieu of the tare now fixed and allowed by law; on snuff 10c per lb, on unmanufactured tobacco and all other manufactures of tobacco, not otherwise provided for, 30 per cent. ad valorem.

Sec. 3. And be it further enacted, That from and after the day and year aforesaid, there shall be levied, collected, and paid on the importation of the articles hereinafter mentioned, the following duties, that is to say:—

First: On bar iron rolled or hammered, comprising flats not less than one inch nor more than seven inches wide, nor less than one quarter-inch nor more than two inches thick; rounds not less than one half-inch nor more than four inches in diameter, and squares not less than one-half inch nor more than four inches square, 14 dols per ton. Provided, that all iron in slabs, blooms, loops, or other forms, less finished than iron in bars and more advanced than pig iron, except castings, shall be rated as iron in bars, and pay a duty accordingly. And provided further, that none of the above iron shall pay a less rate of duty than 20 per centum ad valorem; on all iron imported in bars for railroads or inclined planes made to patterns and fitted to be laid down upon such roads or planes without further manufacture, and not exceeding six inches high, 10 dols per ton; on boiler plate iron, 20 dols per ton; on iron wire-drawn and finished, not more than one quarter-inch in diameter nor less than number 16 wire-gauge, 75c per 100 lbs and 15 per cent. ad valorem; over or finer than number 25 wire-gauge, 2 dols per 100 lbs, and in addition 15 per cent. ad valorem; on all other descriptions of rolled or hammered iron, not otherwise provided for, 20 dols per ton.

Second: On iron in pigs, 5 dols per ton; on vessels of cast iron not otherwise provided for, and on sadirons, tailors' and hatters' irons, stoves and stove plates, 1c per lb; on cast iron, steam, gas, and water pipe, 50c per 100 lbs; on cast iron butts and hinges, 2c per lb; on hollow ware, glazed or tinned, 2½c per lb; on all other castings of iron not otherwise provided for, 25c per cent. ad valorem.

Third: On old scrap iron 3 dols per ton, provided that nothing shall be deemed old iron that has not been in actual use, and fit only to be remanufactured.

Fourth: On band and hoop iron, slit rods not otherwise provided for, 20 dols per ton; on cut nails and spikes, 1c per lb; on iron cables or chains, or parts thereof, and anvils, 1 dol 25c per 100 lbs; on anchors or parts thereof, 1 dol 50c per 100 lbs; on wrought board-nails, spike, rivets and bolts, 2c per lb; on bed-screws and wrought hinges, 1½c per lb; on chains, trace-chains, halter chains and fence chains made of wire or rods one half-inch in diameter or over, 1½c per lb; under one half-inch in diameter, and not under one quarter-inch in diameter, and not under No. 9 wire-gauge, 2c per lb; under No. 9 wire-gauge, 25 per cent. ad valorem; on blacksmiths' hammers and sledges, axles, or parts thereof, and malleable iron in castings not otherwise provided for, 2c per lb; on horse-shoe nails, 3½c per lb; on steam, gas, and water tubes and flues of wrought iron, 2c per lb; on wrought iron railroad chairs, and on wrought iron nuts and washers ready punched, 25 dols per ton; on cut tacks, brads, and spikes, not exceeding 16 ounces to the 1,000, 2c per 1,000; exceeding 16 ounces to the 1,000, 2c per lb.

Fifth: On smooth or polished sheet iron, by whatever name designated, 2c per lb; on other sheet iron, common or black, not thinner than No. 20 wire-gauge, 20 dols per ton; thinner than No. 20 and not thinner than No. 25 wire-gauge, 25 dols per ton; thinner than No. 25 wire-gauge, 30 dols per ton; on tinplates galvanised, galvanised iron, or iron coated with zinc, 2c per lb; on mill-irons, and mill-cranks of wrought iron, and wrought iron for ships and locomotives, locomotive tire, or parts thereof, and steam engines, or parts thereof, weighing each 25 lbs or more, 1½c per lb; on screws, commonly called wood-screws, two inches or over in length, 5c per lb; provided that no screw shall pay a higher rate of duty than 40 per cent. ad valorem. On screws of iron or any other metal, 30 per cent. ad valorem; on all manufactures of iron not otherwise provided for, 30 per cent. ad valorem.

Sixth: On steel in ingots, bar, sheets and wire not less than one-fourth of an inch in diameter, or steel in any other shape or form except wires, valued at 4c per lb or less, 1c per lb; valued at above 4c, and not above 7c per lb, 1½c per lb; valued at above 7c, and not above 11c per lb, 2c per lb. Steel, in any form not otherwise provided for, shall pay a duty of 20 per centum ad valorem; on steel wire less than one-fourth of an inch in diameter, and not less than No. 16 wire-gauge, 2 dols per 100 lbs, and in addition thereto 15 per cent. ad valorem; less or finer than No. 16 wire-gauge 2 dol 50c per 100 lbs, and in addition thereto 15 per cent. ad valorem; on cross-cut saws, 8c per lineal foot; on mill, pit and drag saws, not over 9 inches wide, 12½c per lineal foot; over 9 inches wide, 20c per lineal foot; on skates costing 20c or less per pair, 6c per pair; on those costing over 20c per pair, 30 per cent. ad valorem; on all manufactures of steel, or of which steel shall be a component part, not otherwise provided for, 30 per cent. ad valorem; provided, that all articles partially manufactured, not otherwise provided for, shall pay the same rate of duty as if wholly manufactured.

Seventh: On bituminous coal, 1 dol per ton of 28 bushels, 80 lbs to the bushel; on all other coal, 50c per ton of 28 bushels, 80 lbs to the bushel; on coke and culm of coal, 25 per cent. ad valorem.

Sec. 4. And be it further enacted, That from and after the day and year aforesaid, there shall be levied, collected, and paid on the importation of the articles heretofore mentioned, the following duties, that is to say:—

First: On lead in pigs and bars, 1 dol 50c per 100 lbs; on old scrap lead, fit only to be remanufactured, 1 dol per 100 lbs; on lead in sheets, pipes, or shot, 2 dols 25c per 100 lbs; on pewter, when old and fit only to be remanufactured, 1 dol 50c per 100 lbs; on composite metals, when old and only fit to be remanufactured, 1 dol 50c per 100 lbs.

Second: On copper in pigs, bars, or ingots, 2c per lb; on copper when old, and fit only to be remanufactured, 1½c per lb; on sheathing copper in sheets 48 inches long and 14 inches wide, and weighing from 14 to 34 ounces to the square foot, 2c per lb; on sheathing metal or yellow metal not wholly of copper nor wholly or in part of iron ungalvanised, in sheets 48 inches long and 14 inches wide, and weighing from 14 to 34 ounces to the square foot, 2c per lb; on copper rods, bolts, nails, spikes, copper bottoms, copper in sheets or plates, called braziers' copper, and other sheets of copper not otherwise provided for, 25 per cent. ad valorem.

On spelter or tutenag manufactured in blocks or pigs, 1 dol per 100 lbs; on zinc in blocks or pigs, 1 dol 50c per 100 lbs; on zinc in sheets, 2 dols per 100 lbs; on spelter or tutenag in sheets, 1 dol 50c per 100 lbs.

Sec. 5. And be it further enacted, That from and after the day and year aforesaid, there shall be levied, collected, and paid on the importation of the articles hereinafter mentioned the following duties, that is to say:—First, on white lead and oxide of zinc, dry or ground in oil, red lead, or litharge, 2 dols 25c per 100 lbs; on sugar of lead or aceate of lead and nitrate of lead, chromate and bichromate of potash, 3c per lb; on hydryodate and prussiate of potash and chromic acid and salts of iodine, and resublimed iodine, 15 per centum ad valorem; on whiting, 25c per 100 lb; on Paris white clay and ochres or ochrey earths not otherwise provided for, when dry 35c per 100 lbs, when ground in oil 1 dol 35c per 100 lb; on umber, 50c per 100 lbs; on putty, 1c per lb; on linseed, flaxseed, hempseed and rapeseed oil, 20c per gallon; on kerosine oil and all other coal oils 10c per gallon; on alum, alum substitute, sulphate of alumina and aluminous cake, 50c per 100 lbs; on copperas, green vitriol or sulphate of iron, 25c per 100 lbs; on antimony (crude and regulus of), 2c per lb; on brimstone, crude in bulk 5 dols per ton of 2,000 lbs, on roll brimstone 7 dols 60c per ton of 2,000 lbs; on bleaching powders 15c per 100 lb, on crude camphor 6c per lb, on refined camphor 12c per lb, on crude borax 3c per lb, on refined borax 6c per lb, on tallow 1c per lb, on tallow candles 10c per lb; on spermaceti or wax candles and tapers, and on candles and tapers of spermaceti and wax combined, 8c per lb; on stearine candles and all other candles and tapers 4c per lb, on spirits of turpentine 10c per gallon, on opium 1 dol per lb, on morphine and its salts 1 dol per oz, on licorice paste or juice 5c per lb.

Sec. 6. And be it further enacted, That from and after the day and year aforesaid, there shall be levied, collected, and paid on the importation of the articles hereinafter mentioned the following duties, that is to say:

First: On black teas, 10c per lb; on green teas, 15c per lbs; on coffee of all kinds, 5c per lb; on cocoa, 5c per lb; on cocoa leaves and cocoa shells, 3c per lb; on cocoa prepared or manufactured, 8c per lb; on chocolate, 6c per lb; on salt, 15c per 100 lbs; provided that salt imported in bags or not in bulk shall pay a

duty of 20c per 100 lbs; on bristles, 4c per lb; on honey, 10c per gallon; on vinegar, 6c per gallon; on mackerel, 2 dols per barrel; on herrings, pickled or salted, 1 dol per barrel; on pickled salmon, 3 dols per barrel; on all other fish pickled in barrels, 1 dol 50c per barrel: on all other foreign-caught fish, imported otherwise than in barrels or half-barrels, or whether fresh, smoked, or dried, salted or pickled, not otherwise provided for, 50c per 100 lbs.

Second: On beef and pork 1c per lb, on hams and bacon 2c per lb, on cheese 4c per lb, on wheat 20c per bushel of 60 lbs, on butter 4c per lb, on lard 2c per lb, on rye and barley 15c per bushel, on Indian corn or maize 10c per bushel of 56 lbs, on oats 10c per bushel of 40 lbs, on potatoes 10c per bushel, on rice wholly or partially cleaned 1½c per lb, on uncleaned rice or paddy 75c per 100 lbs, on sago and sago flour 1 dol per 100 lbs, on flaxseed or linseed 16c per bushel of 52 lbs, on hempseed or rapeseed 10c per bushel of 50 lbs.

Sec. 7. And be it further enacted, That from and after the day and year aforesaid there shall be levied, collected, and paid on the importation of the articles hereinafter mentioned the following ing duties, that is to say:—

First: On cassia 6c per lb, on cassia buds 15c per lb, on cloves 6c per lb, on pepper 4c per lb, on cayenne pepper 8c per lb, on pimento 4c per lb, on cinnamon 20c per lb, on mace and nutmegs 20c per lb, on ginger-root 3c per lb, on ginger ground 5c per lb, on prunes 2c per lb, on dates ½c per lb, on currants 3c per lb, on figs 3c per lb; on sultana, muscatel, bloom, and all other raisins, either in boxes or jars, 3c per lb; on almonds 4c per lb, on shelled almonds 6c per lb; on all nuts not otherwise provided for, except those used for dyeing, 2c per lb.

Sec. 8. And be it further enacted, that from and after the day and year aforesaid, there shall be levied, collected, and paid on the importation of the articles hereinafter mentioned the following duties that is to say:—First; On all wool unmanufactured, and all hair of the alpaca, goat, and other like animals unmanufactured, the value whereof at the last port or place whence exported to the United States shall be 18c or less per lb, 5 per cent ad valorem; exceeding 18c per lb, and not exceeding 24c per lb, there shall be levied, collected, and paid a duty of 3c per lb; exceeding 24c per lb there shall be levied, collected, and paid a duty of 9c per lb. Provided that any wool of the sheep, or hair of the alpaca, the goat, and other like animals, which shall be imported in any other than the ordinary condition, as now and heretofore practised, or which shall be changed in its character or condition for the purpose of evading the duty, or which shall be reduced in value by the admixture of dirt or any foreign substance to 18c or less, shall be subject to pay a duty of 9c per lb, anything in this Act to the contrary notwithstanding. Provided also, that when wool of different qualities is imported in the same bale, bag, or package, and the aggregate value of the contents of the bale, bag, or package shall be appraised by the appraisers at a rate exceeding 24c per lb, it shall be charged with a duty of 9c per lb. Provided further, that if bales of different qualities are embraced in the same invoice at the same price, whereby the average price shall be lessened more than 10 per cent., the value of the whole shall be appraised according to the value of the bale of the best quality, and no bale or bales shall be liable to a less rate of duty in consequence of being invoiced with wool of lower value. Provided also, that sheepskins, raw or unmanufactured, imported with the wool on, washed or unwashed, shall be subject to a duty of 15 per cent. ad valorem.

Sec. 9. And be it further enacted, That from and after the day and year aforesaid, that there shall be levied, collected, and paid on the importation of the articles hereinafter mentioned the following duties, that is to say:—First: On Wilton, Saxony, and Aubusson, Axminster, patent velvet, Tournay velvet, and tapestry velvet carpets and carpeting, Brussels carpets, wrought by the Jacquard machine, and all medallion or whole carpets, valued at 1 dol 25c or under per square yard, 40c per square yard; valued at over 1 dol 25c per square yard, 50c per square yard. Provided, that no carpets or rugs of the above description shall pay a duty of less than 25 per centum ad valorem. On Brussels and tapestry, Brussels carpets and carpeting, printed on the warp or otherwise, 30c per square yard; on all treble, ingrain, and worsted chain Venetian carpets and carpeting, 25c per square yard; on hemp or jute carpeting, 4c per square yard; on druggets, bookings and felt carpets and carpeting, printed, coloured, or otherwise, 15c per square yard; on all other kinds of carpets and carpeting of wool, flax, or cotton, or parts of either, or other material not otherwise specified, a duty of 30 per centum ad valorem. Provided, that mats, rugs, screens, covers, hassocks, bedside, and other portions of carpets or carpeting, shall pay the rate of duty herein imposed on carpets or carpeting of similar character; on all other mats, screens, hassocks, and rugs, a duty of 30 per centum ad valorem.

Second: On woollen cloths, woollen shawls, and all manufactures of wool, of every description, made wholly or in part of wool, not otherwise provided for, a duty of 12c per lb, and in addition thereto 25 per cent. ad valorem; on endless belts for paper, and blanketings for printing machines, 25 per cent. ad valorem; on all flannels valued at 30c or less per square yard, 25 per centum ad valorem; valued above 30c per square yard, and on all flannels coloured, printed or plaided, and flannels composed in part of cotton or silk, 30 per centum ad valorem; on hats of wool, 20 per centum ad valorem; on woollen and worsted yarns valued at 50c and not over 1 dol per lb, 12c per lb, and in addition thereto 15 per cent. ad valorem; on woollen and worsted yarn valued at over 1 dol per lb, 12c per lb, and in addition thereto 25 per cent. ad valorem; on woollen and worsted yarns, or yarns for carpets, valued under 50c per lb and not exceeding in fineness No. 14, 25c per cent. ad valorem; exceeding No. 14, 30 per cent. ad valorem; on clothing ready made and wearing apparel of every description, composed wholly or in part of wool, made up or manufactured wholly or in part by the tailor, sempstress, or manufacturer, except hosiery, 12c per lb, and in addition thereto 25 per cent. ad valorem; on blankets of all kinds, made wholly or in part of wool, valued at not exceeding 28c per lb, there shall be charged a duty of 6c per lb, and in addition thereto 10 per cent. ad valorem; on all valued above 28c per lb but not exceeding 40c per lb, there shall be charged a duty of 6c per lb, and in addition thereto 25 per cent. ad valorem; on all valued above 40c per lb there shall be charged a duty of 12c per lb, and in addition thereto 20 per cent. ad valorem.

Third: On all delaines, cashmere delaines, muslin delaines, barege delaines, composed wholly or in part of wool or worsted, uncoloured, and on all other grey or uncoloured goods of similar description, 25 per cent. ad valorem; on all delaines, cashmere delaines, muslin delaines, barege delaines, composed wholly or in part or wool or worsted, stained, coloured, or printed, 30 per cent. ad valorem; on bunting, and on all stained, coloured, or printed, and on all other manufactures of wool or worsted, or of which wool or worsted shall be a component material, not otherwise provided for, 30 per cent. ad valorem; on lappings, composed of worsted and linen, or any other materials, 30 per cent. ad valorem; on cloths composed of worsted, linen and cotton, or any other materials, not otherwise provided for, 30 per cent. ad valorem.

Fourth: On oilcloth for floors, stained, painted, or printed, valued at 50c or less per square yard, 20 per cent. ad valorem; valued at over 50c per square yard, and on all other oilcloth, 30 per cent. ad valorem.

Sec. 10. And be it further enacted, That from and after the day and year aforesaid, there shall be levied, collected, and paid on the importation of the articles hereinafter mentioned, the following duties, that is to say:—First: On all manufactures of cotton not bleached, coloured, stained, painted or printed, and exceeding 100 threads to the square inch, counting the warp and filling, 1c per square yard; on finer goods of like description, not exceeding 140 threads to the square inch, counting the warp and filling, 2c per square yard; on goods of like description, exceeding 140 threads and not exceeding 200 threads to the square inch, counting the warp and filling, 3c per square yard; on like goods exceeding 200 threads to the square inch, counting the warp and filling, 4c per square yard; on all goods embraced in the foregoing schedule, if bleached, there shall be levied, collected, and paid an additional duty of ½c per square yard; and if printed, painted, coloured or stained, there shall be levied, collected, and paid a duty of 10 per cent ad valorem, in addition to the rates of duty provided for bleached goods.

Provided, That no cotton goods in the above schedule or other cotton piece-goods shall pay a less duty than 25 per cent ad valorem. And provided further that no cotton goods having more than 200 threads to the square inch, counting the warp and filling, shall be admitted at a less rate of duty than is provided for goods which are of that number of threads.

Second: On spool and other thread of cotton, 30 per cent ad valorem.

Third: On shirts and drawers, wove or mode on frames, composed wholly of cotton and cotton velvet, 25 per cent ad valorem; and on all manufactures composed wholly of cotton, bleached, unbleached, printed, painted, or dyed, not otherwise provided for, 30 per cent ad valorem.

Fourth: On all brown or bleached linens, ducks, canvas paddings, cot-bottoms, burlaps, drills, coatings, brown hollands, blay linens, damasks, diapers, crash, huckabacks, handkerchiefs, lawns, or other manufactures of flax, jute, or hemp, or of which flax, jute, or hemp shall be the component material of chief value, being of the value of 30c and under per square yard, 25 per cent ad valorem; valued above 30c per square yard, 30 per cent. ad valorem; on flax or linen threads, twine and packthread, and all other manufactures of flax, or of which flax shall be the component material of chief value, and not otherwise provided for, 30 per cent. ad valorem.

Sec. 11. And be it further enacted, That from and after the day and year aforesaid, there shall be levied, collected, and paid on the importation of the articles hereinafter mentioned, the following duties, that is to say:—First: On unmanufactured hemp, 40 dols per ton; on Manilla and other hemps of India, 15 dols per ton; on jute, Sisal grass, Sunn hemp, coir and other vegetable substances not enumerated used for cordage, 10 dols per ton; on tarred cables or cordage, 2½c per lb; on untarred Manilla cordage, 2c per lb; on all other untarred cordage, 3c per lb; on yarns made of hemp or tow of hemp, 4c per lb; on seines, 6c per lb; on cotton bagging or gunny cloth or any other

manufacture not otherwise provided for, suitable for the uses to which cotton bagging or gunny cloth is applied, whether composed in whole or in part of hemp, jute or flax, or any other material, valued at less than 10c per square yard, 1c per lb, over 10c per square yard 1½c per lb; on sail duck, 25 per cent. ad valorem; on Russia and other sheetings, brown and white, of flax or hemp, 25 per cent. ad valorem; and on all other manufactures of hemp, or of which hemp shall be a component part, not otherwise provided for, 20 per cent. ad valorem; on unmanufactured flax, 15 dols per ton; on tow of flax, 5 dols per ton; on grass cloth, 25 per cent. ad valorem; on jute yarns, 15 per cent. ad valorem; on all other manufactures of jute or Sisal grass not otherwise provided for, 20 per cent. ad valorem.

Sec. 12. And be it further enacted, That from and after the day and year aforesaid there shall be levied, collected, and paid on the importation of the articles hereinafter mentioned, the following duties, that is to say:—First: On silk in the gum not more advanced in the manufacture than singles, tram, and thereon or organzine, 15 per cent. ad valorem; on all silk valued at not over 1 dol per square yard, 20 per cent. ad valorem; on all silk valued at over 1 dol per square yard, 30 per cent. ad valorem; on all silk velvets, or velvets of which silk is the component material of chief value, valued at 3 dols per square yard or under, 25 per cent. ad valorem; valued at over 3 dols per square yard, 30 per cent. ad valorem; on floss silks, 20 per cent. ad valorem; on silk ribbons, galloons, braid, fringes, laces, tassels, buttons, button cloths, trimmings, and on silk twist, twist composed of mohair and silk, sewing silk in the gum or purified, and all other manufactures of silk, or of which silk shall be the component material of chief value, not otherwise provided for, 30 per cent. ad valorem.

Sec. 13. And be it further enacted, That from and after the day and year aforesaid there shall be levied, collected, and paid on the importation of the articles hereinafter mentioned the following duties, that is to say:—First: On rough plate, cylinder, or broad window glass, not exceeding 10 by 15 inches, 80c per 100 square feet; above that and not exceeding 16 by 24 inches, 1 dol 20c per 100 square feet; above that and not exceeding 24 by 30 inches, 1 dol 60c per 100 square feet; on all above that and not exceeding in weight 1 lb per square foot, 2 dols per 100 square feet.

Provided, That all glass imported in sheets or tables, without reference to size or form, shall pay 2c per square foot, and in addition thereto a duty of 2c per lb. And provided further, that all rough plate, cylinder or broad glass, weighing over 100 lb per 100 square feet, shall pay an additional pro rata duty on the excess; on crown, plate, or polished, and on all other window glass not exceeding 10 by 15 inches, 1 dol 20c per 100 square feet; above that and not exceeding 16 by 24 inches, 2 dols per 100 square feet; above that and not exceeding 24 by 30 inches, 3 dols per 100 square feet; on all above that, 4 dols per 100 square feet.

Provided, That all crown, plate or polished, and all other window glass weighing over 150 lbs per 100 square feet shall pay an additional duty on such excess of 4c per lb; on all plain and mould, and press glass ware, not cut, engraved, nor painted, 25 per cent. ad valorem; on all articles of glass, cut, engraved, painted, coloured, printed, stained, silvered, or gilded, 30 per cent. ad valorem; on porcelain and Bohemian glass, glass crystals for watches, paintings on glass or glasses, pebbles for spectacles, and all manufactures of glass or of which glass shall be a component material, not otherwise provided for, and all glass bottles or jars filled with sweetmeats, preserves, spices, or other similar articles, 30 per cent. ad valorem.

Second: On china and porcelain ware of all descriptions, 30 per cent ad valorem; on all brown earthenware and common stoneware, 20 per cent. ad valorem; on all earthen, stone, or crockery ware, printed, white, glazed, edged, painted, dipped or cream coloured, composed of earthy or mineral substances, 25 per cent. ad valorem.

Agriculture.

THE COMMON SENSE OF GAME PRESERVATION.

The common sense view of game preservation is extremely simple. It is this; that the game, like the stock and produce of the land, must be under the absolute control of the occupier, *i.e.*, the person who expends his labour and capital in cultivation, be it for pleasure or for profit. There can be no separation of game and sporting rights from the right of possession. All pleas for or in defence of any such separation will on examination be found to be either mystification or foolishness. The man who farms the land is the only person to determine whether he will maintain upon it any or many wild animals as well as his farming live stock, and whether, if he determines to maintain some game on his farm, he will keep five, or five hundred, or five thousand rabbits, hares, or pheasants. We all know that game may be preserved so largely that scarcely any live-stock can be kept, and very little saleable produce grown on the preserved farm; or the quantity of game may be sufficient only to cause partial damage and annoyance only. But that any other man, except the man who cultivates the farm,—who finds the capital for and runs all the hazard of husbandry,—should have the power of determining whether game shall or shall not be kept on that farm, or whether a greater or lesser head of game shall be there preserved, is a proposition so monstrous that it shocks the conscience of any one whose sense of right and wrong has not become hopelessly confused.

Yet we find Mr Mechi, who so pretentiously calls on farmers to follow his example in husbandry, and incur unlimited outlays in the improvement of their land, has come out as an apologist, if not an advocate, for game preservation. He certainly won't add to his popularity amongst farmers, which, by-the-bye, may be said now to be a negative quantity. His object is, probably, to stand well with game-preserving landlords, who will doubtless be glad of such a quasi-authority to add to their stock of standing fallacies in favour of game.

But imagine a person professing to have a practical knowledge of farming and claiming to be a light to the agricultural world putting forth such propositions as these! Thus, Mr Mechi, in a letter to the *Mark Lane Express*, says:—"Nobody can suppose that game is no longer to form an element in our food; and on the narrow ground of profit, I am prepared to prove that game pays as much for its food, probably much more, than the animals or poultry with which our markets are supplied." And he then goes into some statistical looking remarks about the weights and prices of hares, rabbits, pheasants, and partridges, as compared with poultry and meat, and concludes that game pays best for its food, mainly because game birds "consume an immense number of the insect tribe, very much to the farmer's advantage." He puts ducks into his own garden without complaint from his gardener, and he has 300 head of poultry which may and do run into his corn crops, from wheat sowing to harvest, and that at first "they are capital cultivators," and though "just at and before harvest they will pull down a few straws, and clear out the kernels, but the damage looks more than it really is, and they *will consume less corn in the yards*."

Now for a grave alderman this is somewhat puerile, and really is not worth any serious comment. But in passing we may note, that assuming it all to be literally true—a strong hypothesis—it takes as a fact the farmer, the grower of the crops, is to determine whether hares and rabbits or sheep, pheasants or poultry, will be the most profitable to maintain on his land. Now where that is the case, farmers cannot and do not complain, for the quantity kept on each farm depends entirely on the will and object of each farmer. The complaint, the just complaint, is that farmers are compelled to feed the game reserved from their control for the pleasure or profit of their landlords, or the persons who hire from them the right of devastation. That is altogether ignored by Mr Mechi. Thus, he says, "Game, like poultry, sheep, and cattle, must be fed somewhere by somebody. If people will do what is consistent with right and common sense in this matter, there need be none of that heartburning which now exists. I know that there always will be a percentage of greedy landlords and cross-grained tenants, but the bulk of humanity is actuated by the better principles of equity and justice. To those I appeal to combine pleasure with profit." And further on he says, "that if game is well fed in cover, it will seldom show itself in the open." Here again, the cool assumption is that the matter is to be dealt with as if every farmer was the occupier of his own land, and could calmly consider in what degree he would combine the profit of cultivation with the pleasure of game preserving. The gravamen of the game nuisance is wilfully overlooked.

Now, at the late Hertford assizes, a cause was tried which illustrates pretty clearly the difference between Mr Mechi's fancy pictures of game preserving and the stern realities of that noxious system. An action was brought by Mr George Hilton, who had occupied a farm in Hertfordshire, near Ware, of 245 acres, at the rent of 240*l*, under a written agreement from year to year, by which there was a reservation of the game to the landlord. The reservation was in this form:—"Reserving to the lessor, his heirs, assigns, friends, and servants, all game, &c., with liberty to sport over the said lands, *doing no wilful or unnecessary damage to crops, &c.*"

In some respects that form was more favourable to the occupier than the ordinary and simple reservation of the game and the right of sporting to the landlord, because of the implied stipulation that no wilful or unnecessary damage should be done. On this the action was founded. The landlord let his game rights to some persons of the name of Green, and against them the action was brought to recover some 1,600*l*, being the amount of damage wilfully caused to Mr Hilton's crops by the rabbits and hares preserved on his farm between 1856 and Michaelmas 1859, when he left under a notice from his landlord given on account of his complaints about the game. The facts appeared, from the concurrent testimony of the farmer, his son, and many of his servants, as well as from that of the son of the man who had been gamekeeper for the hirers of the game, who had assisted his father, since dead, to be as follows:—When Mr Hilton entered upon the farm in 1851 there were no

rabbits on the farm. The farm was then in "a wretched state of cultivation," and required large outlays for cleaning the land as well as for draining. These outlays were made by Mr Hilton. There were 30 acres of wood-land on the farm, called Buckney wood, the control over which was reserved from the tenant. In the earlier part of his tenancy, that is before 1856, Francis was the gamekeeper, and the damage done by the game was not very considerable. In the year 1855, however, in order to have the game under his own control, Mr Hilton hired it himself and relet it to the Greens, upon the special terms of receiving a certain sum per head for each game animal killed on the farm. During the existence of that arrangement, the tenant and his son acted as the gamekeepers. The next year the Greens again hired the game directly from the landlord, and in February or March, 1856, Vigis came as their gamekeeper. He seems to have been a man skilled in game preservation, and he soon proved how large a head of game might be raised. Of course, as Mr Mechi says, the game so raised must "be fed somewhere and by somebody," and, of course, Mr Hilton's farm being the locality whereon the game animals were reared, his crops furnished the means of feeding them. At the harvest of 1856, Mr Hilton "observed great damage to the crops." He told the jury "I observed bristling among the growing corn long and heavy bushes, which damaged the corn. There were covers made for the rabbits in the corners of the different fields; dried cut underwood was placed among the trees for this purpose, and I saw several rabbit burrows. I made complaint to Vigis and then to all the gentlemen who had the shooting. They said they would kill the rabbits, but they increased in number to a great extent, and in 1857 they had increased from scores to thousands. In July, 1857, I counted sixty in one field in the middle of the day." That was a barley field, the crop of which was found to have been injured to the extent of 30*l*. And, as might be expected, the injury grew in a rapidly increasing ratio. At the harvest of 1856, the damage on the farm amounted to 120*l*. The following year, 1857, the damage was nearly 300*l*. The rabbits having been somewhat killed down, the damage in 1858 was about 200*l*, and in 1859 the damage done was 130*l*. These sums applied only to one of several farms which made up the whole occupation.

This vast increase of rabbits was caused by Vigis turning down by hundreds rabbits which the Greens had bought elsewhere. Vigis had made a deposition on his death-bed, in which he stated that the first year he was keeper, he had by Mr Green's orders turned down "with his own hands" 200 live rabbits on Mr Hilton's and in the Buckney wood. Green had paid in that year 29*l* for rabbits purchased to turn down. Young Vigis, the son, when examined as a witness at the trial, said:—"I have heard Mr E. Green say we must have plenty of rabbits or we shall not have any sport at all, and I have heard Mr H. Green and Mr Collyer say the same thing." There were but few rabbits when he (Vigis) first went to the farm, but the next year they were very numerous. He said "the rabbits were put on the farm in the second year; I saw the rabbits put on the farm. I put some down, and my father put some down in my presence. I put some in Buckney wood, and some in Grove-hedge in the centre of the farm. I myself put down about 400 rabbits. I used to take them from my father's house, and he used to tell me where to put them. I think I saw my father put down about 150." Another person employed by the game-hirers spoke to having "put down" a further number, so that it was proved that some 700 or 800 rabbits were turned down on this farm of 245 acres and the adjoining wood of 30 acres. The reader who has seen a game-preserved farm will understand the devastation committed. The reader who has not had such ocular demonstration, may recollect that one couple of rabbits, if well fed and sheltered, will in a dry year multiply forty-fold. In this case not more than 100 rabbits were killed in each year, 1856 and 1857. Vigis fed the rabbits with turnips in Buckney wood, which, according to Mr Mechi, should have prevented them from getting out upon the crops; yet hear what says Joseph Hart, a man employed by Vigis to make warrens for the rabbits. "There were no rabbits to speak of till Vigis was keeper. I was employed to make three warrens. Vigis paid me for doing it. Hilton (the farmer) asked me what I was doing. I said, 'No good for him.' I have seen as many as 40 rabbits taken up at one time to Mr Green's house. I never saw so many rabbits anywhere on a little place like that. I have noticed a wonderful many runs in the wheat and all about the ground. In Great Bury field I have seen 150 rabbits on the clover. The winter barley was very much damaged in Newlands field in 1856; a wonderful sight of it was spoilt, being nibbled off by the rabbits. In 1859, Newlands was sown with wheat, and the wheat was very much damaged. I never worked for Mr Hilton, but worked for Vigis, who had six acres of Newlands let to him. I have gone over some thousands of acres of land, and I never saw so many rabbits together as on Castlebury farm." These are unquestionable facts in opposition to the last new fancies of Mr Mechi, and hundreds on hundreds of English farmers could tell of game damages of a similar kind. We shall perhaps have occasion to recur to this trial and its result, the jury, a special one, being unable to agree on any verdict; but for the present we are content to put the simple language of the Hertfordshire labourers, who saw the mischief, against the fallacies of the fussy Alderman.

SOCIETY FOR PROMOTING THE AMENDMENT OF THE LAW. Eighteenth Report. London: McCorquodale and Co.

THE Society for the Amendment of the Law have just issued their eighteenth annual report for the session 1860-61. It details the various proceedings that have taken place before the Society, including the presentation of papers by individual members on various points of law. With reference to the new Bankruptcy and Insolvency Bill, the Council report that the measure was discussed before going up to the House of Lords, and that considerable difference of opinion then existed as to its merits.

MANUEL A L'USAGE DES CONSULS DES PAYS-BAS. Par JACS. WERTHEIM, Docteur en Droit. Amsterdam: Binger Frères. London: Trübner and Co.

THE above is a useful manual designed for the use of the consular profession of the Netherlands. Some ten years ago, the author states in his preface, he published a similar work in Dutch, and the present book is a more complete treatise on the same subject and in the more familiar French language. The first volume gives a general history of the consular institution, and details the rights, privileges, and duties of the Netherlands Consuls, according to international agreement. The second volume contains a description of the functions of consuls according to national law, and the third a chronological list of the ordinances now in force in the Low Countries bearing upon the consular profession.

GENERAL LITERATURE.

REMINISCENCES OF SCOTTISH LIFE AND CHARACTER. By E. B. RAMSAY, M.A., LL.D., F.R.S.E., Dean of Edinburgh. The Second Series. Edinburgh: Edmonston and Douglas. 1861.

THE popularity of the first series of these curious Reminiscences has induced Dean Ramsay to publish a second volume, great part of which has been selected from communications sent to him from all parts of Scotland. It is a good collection, and well edited, the compiler's personal observations being as unconsciously illustrative of "Scottish Life and Character" as any of his materials. One curious fact meets us throughout the volume,—the very large proportion of anecdotes *relating to theological subjects*, and the hardness of feeling which frequently characterises them, and which shows the habitual self-assertion of the Scottish mind in its most unpleasing aspect. We do not think that Dean Ramsay at all appreciates the true character of this class of anecdotes. Speaking of "the quaint, and frequently irreverent, manner in which sacred subjects were referred to by the older Scottish race," he says truly that "they did not *mean* to be irreverent or profane," and adds, "it seems to me that this plainness of speech arose in part from the *sincerity* of their belief in all the circumstances of another condition of being." In illustration of this he gives an anecdote of a family who had struggled hard to pay off a debt on their house; the father died before the object was achieved, and when the mother was dying, the elder son said to her, "Mother, you'll soon be with my father; no doubt you'll have much to tell him; but dinna forget this, mother; mind ye, tell him *the house is freed*. He'll be glad to hear that." In this we can see no irreverence whatever; it is simply an expression of human affection. But the Dean continues, "A similar feeling is manifest in the following conversation," in which a dying woman was thus addressed by some friends. "Weel, Jenny, ye are gaun to Heeven, an 'gin you should see our folk, ye can tell them that we're a' weel." To which Jenny replied, "Weel, 'gin I shud see them I'se tell them, but you manna expect that I am to gang clank clanking through Heeven looking for your folk." Now, so far from a *similar* feeling being manifest in this story, it is precisely the reverse. The point lies in the unsympathising reply, not in the affectionate suggestion so harshly met. "But of all stories of this class," continues the author, "I think the following death-bed conversation between a Scottish husband and wife, is about the richest specimen of a dry Scottish matter-of-fact view of a very serious question. An old shoemaker in Glasgow was sitting by the bedside of his wife, who was dying. She took him by the hand, 'Weel, John, we're gawin to part. I hae been a gude wife to you, John.' 'Oh, just middling, just middling, Jenny,' said John, not disposed to commit himself. 'John,' says she, 'ye maun promise to bury me in the auld kirk-yard at Stra'von, beside my mither. I couldna rest in peace among unco folk, in the dirt and smoke o' Glasgow.' 'Weel, weel, Jenny, my woman,' said John soothingly, 'we'll just pit you in the Gorbals *first*, and 'gin ye dinna lie quiet, we'll try you sine in Stra'von.'"

Here again the point of the story turns still more decisively on the hardness of the unsympathising husband, whose "plainness of speech" does not arise from any remarkable "sincerity of belief," but simply from a toughness of mind, to which all tender feeling, either human or religious, is unknown. The same remark will apply to one of the Dean's stories of Miss Johnstone. He tells us that "she was remarkable for the freedom of her expressions on religious subjects, and for her plain-spoken honesty, which scorned

to express any sentiments she did not feel. Of this she gave a striking proof in her answer to her niece, Mrs Wauchope of Niddrie. Poor Mrs Wauchope, when very ill, sent for 'Aunt Soph,' and said to her, 'Soph, I believe I am dying, will you always be kind to my children when I am gone.' 'Na, na; tak y'r spoilt deevils wi' ye', was the reply, 'for I'll hae naething ado wi' them.'" A more brutal answer could scarcely have been given; yet this is the sort of repartee which only strikes Dean Ramsay as evincing "plain-spoken honesty." And *half* of the theological anecdotes he gives us are of a similar character. Their point lies in the *absence* of religious feeling in combination with the *presence* of theological belief, and the collision between the two forms the entertainment which is offered to the reader. We cannot think it of a wholesome sort. Doubtless these anecdotes are very instructive, as illustrating the peculiar nature of Scottish religion, and they should be read by all who wish to form a clear and full picture of it in their minds. But we do not envy the reader who finds any very pleasurable relish in these tokens of a secularism so ingrained that it perpetually makes game not only of others' faith, but of its own also. It may be urged that most of these stories relate to old times, but it is very evident that the compiler writes to a living Scottish public that will thoroughly enjoy his collection, and experience no shock to their feelings of reverence in so doing. In curious connection with this fact, stands his praise of his country, as possessing "a far nearer approach to doctrinal uniformity than exists in England." "With all our divisions and differences of opinion, we have nothing corresponding to the 'Essays and Reviews,' and had such a volume appeared among us, written by clergymen of similar position in the country, I feel confident that public measures would have quickly been taken for a judicial condemnation of men who were violating the standards and authorities of the church to which they professed to belong."

We should not, however, convey a fair impression of the spirit of Dean Ramsay's book, if we omitted to say that there is a genuine kindliness in his tone, which frequently escapes the bounds of his theological and national biases. There is a contribution from Dr Clason (pp. 137-46) on the old parochial Communion Sabbaths, which is not only very interesting historically, but which displays a spirit at once religious and genial, and does the good service of reminding us of the deeper elements in the Scottish faith and character. We will conclude by quoting the following amusing anecdote told by Dean Ramsay of Lady Clerk:—

She showed me once a highly characteristic letter from Lord Eldon. At the time of passing what was usually called the Catholic Relief Bill, Lady Clerk wrote to Lord Eldon congratulating him on the energetic stand he had made to prevent the Bill becoming law. His answer was laconic, and nearly thus:—"Dear Molly Dacre,—I am happy to find you approve of my endeavours to oppose the Catholic Relief Bill. I have done what I thought my duty. May God forgive me if I have done wrong, and may God forgive my opponents (*if he can*).—Yours, affectionately, ELDON." The parenthesis is exquisite. What paragraph would have expressed half so much?

THE QUARTERLY REVIEW. July, 1861. John Murray.

THE chief literary article in the present Number of the "Quarterly" is a very interesting paper on Montalembert's "Monks of the West." The reviewer commences by epitomising Montalembert's narrative (which he frequently criticises as a representation of historical fact), and then examines the theory of monasticism which the book has been written to exemplify. There is nothing very new in the reviewer's estimate of the subject, but it is interesting from the ability and geniality which it displays throughout. There is also an attractive article on Maine's "Ancient Law,"—an average one on "Scottish Character," containing notices of Dr Carlyle, Dr Somerville, Dean Ramsay, &c., —a paper on "Virgil and his Translators," assigning the palm to Dryden,—and an absurdly eulogistic sketch of De Quincey, whom the writer seems to have taken at his own valuation. But the most striking articles are the two concluding ones, on Cavour and on America. The article on Cavour is evidently written by one who knew him well, and it contains many facts concerning his early life, his public career, and his last hours, which are new to the public, and will be read and re-read with the deepest interest. We hope that the writer who has told us so much will eventually communicate more of what all Europe is desirous to know. One of the most interesting parts of the memoir is the account of the pressure by which Louis Napoleon wrung from Cavour the sacrifice of Savoy and Nice, and rendered it impossible for Cavour to clear his own reputation by stating the whole truth. The writer adds that "he never spoke of these unhappy events without a pang, so apparent that his friends refrained from touching upon a topic so painful to him. He had a settled conviction that Italy would one day regain her lost provinces." The final article, "Democracy on its Trial," is an elaborate funereal discourse on the supposed downfall of the American Republic. That many of the writer's charges against democracy are just, may readily be granted; but he writes in the spirit of a mere partisan, whose eagerness to expose "the other side" is not disturbed by any anxiety to recast in a juster form the amount of truth which may have been exaggerated or misused by his opponents. He even catches at the Secessionists as reputable allies against democracy, and talks about the genuine alarm with which they regarded its workings. "They had watched it ripening year by year to the full development of mob supremacy," and could judge of "the temper and moderation with which it was likely to improve a triumph, or wield unfettered power over a conquered rival." It is almost too absurd to represent the South as judging of "the temper and moderation" which the North would or would not display, when every one knows but too well that temper and moderation are scarcely reckoned as virtues at all by "the chivalry"; and as for "mob supremacy," is it in the North or in the South that its sway has been most fearfully manifested?—The only other political article is one on the encroachments of "Russia on the Amoor," of average merit, and containing some interesting descriptions of Tartar life and scenery.

THE HAND-BOOK OF LETTER-WRITING: containing a Series of Letters illustrating every variety of Correspondence; with Hints on Composition and Style. Cassell, Petter, and Galpin, London and New York. 1861.

THE instructions here given to inexperienced letter-writers are sensible and practical, and are illustrated by a great variety of letters of all kinds. Among these are interspersed a few from celebrated persons, Horace Walpole, Lady M. W. Montague, Sir John Malcolm, Cowper, Franklin, &c., including an interesting letter from Charles Dickens to Lady Blessington, written from Milan. There are also two good letters from a brother and sister of ten and fourteen years of age to their father in the country. The Editor says that "the speciality of this compendium consists in the fact that only genuine letters are inserted, with such alterations as were necessary to correct grammatical inaccuracies." We hope it is only by an accidental oversight that he has allowed "Emily Mary Norton" to write from Grenoble that the snow "*lays* on the roofs opposite"; the sole blemish that we have found in this useful and amusing little hand-book.

GLIMPSES OF OCEAN LIFE; or, Rock-Pools and the Lessons they Teach. By JOHN HARPER, F.R.S.S.A., Author of "The Sea-side and Aquarium," &c. With numerous Illustrations by the Author. London: T. Nelson and Sons, Paternoster row; Edinburgh; and New York. 1860.

THIS pretty little volume will probably be acceptable to those students of natural history, young and old, who believe with the author that "no ornament for the drawing-room or parlour can possibly be more beautiful than a well-stocked and tastefully-arranged aquarium," and that "when pursued even in the most humble way, this recreation yields a degree of interest greater than any other 'hobby' can produce, at least in an equal space of time." (P. 355.) The substance of the book consists of anecdotes of Mr Harper's experiments in his own aquarium, with a background of general information concerning marine creatures and their habits. As a record of many curious facts, some of which are apparently new to the public, it will probably be found interesting by the amateur readers for whom it has been compiled. Yet we cannot say it is a pleasantly-written book. The cold-blooded way in which Mr Harper tried all kinds of disagreeable and painful experiments on his "pets," and the constant strain of hacknied and heavy joking which is kept up throughout the volume, render it far from attractive. Unlike Mr Kingsley, whose poetic insight and artistic descriptions bring out the real charm of marine zoology so as to enlist the sympathies even of those who do not care to follow it as a pursuit, Mr Harper treats the subject in a vulgarising way, which rather increases than minimises its repulsive aspects. Still, as we said before, to enthusiastic aquarians the book will probably be an acquisition, and the more so as it contains 13 exquisite plates of marine animals, besides several woodcuts.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

A report from the Minister of Finance to the Emperor gives details of the subscription for the railway bonds. The number of bonds to be issued was (as has been already stated in the ECONOMIST) 300,000, and the amount of them was 132,000,000f; the number subscribed was 4,693,000, the amount of them exceeding 2,000,000,000f. The total number of persons subscribing was 189,627, of whom 145,397 asked only for a single bond. Thus nearly half the required subscription is offered by people who, from the smallness of their demands, may be supposed to belong to the poorest class of society. The Minister of Finance of course represents to the Emperor that the "result of the subscription is an imposing manifestation of the financial power of the country," and the Government journals expatiate on the same theme at great

length. But in sober reality the affair is a deplorable one for the Government. The terms on which the money is raised are, as has been shown in previous letters, very onerous; and the calculation is made that if instead of bonds redeemable in twenty-eight years, the Government had issued 3 per cent. stock, a saving of some 11,000,000f or 12,000,000f might have been effected. It is, moreover, represented that a public subscription for such a small sum as 132,000,000f ought to have been avoided; because that system of raising money should be reserved for grave national extremities. It is said, too, and very justly, that when the public are offered investments by the Government at from 4½ to 5 per cent., they will naturally be indisposed to carry their money to private enterprises, so that commerce and manufactures will suffer.

Strange to say, the recent resumption of payments in silver by the Bank of France has not obtained from the press that attention which such an extraordinary event was calculated to excite. Only one newspaper article, in fact, in which the matter is seriously treated has fallen under my notice: it is by M. A. Cochut, an economist of eminence, and is in the *Temps*. According to this writer, the sudden reappearance of silver coin is entirely accidental, and will not last. It is owing, he says, to the demand for silver in the East having diminished on account of the indemnity which the Chinese have to pay the Western Powers being destined to remain in the country; to the Moors having paid in silver a portion of the war indemnity to Spain; to Belgium having given legal currency to French gold pieces, and having thereby set at liberty a mass of silver, &c. And he observes:—"Is silver about to become the ordinary element of French currency? Our conviction is that it will not. If its reappearance had been caused by an increase in production, new pieces would have been issued; but, instead of that, old coins are to be seen. In order to cause silver to remain permanently in circulation there must be a durable change in metallurgic production, or in the monetary legislation of France.....We must then," he concludes, "expect shortly to see the Bank resume its payments in gold, and that metal once again become the principal instrument in commercial transactions."

The return of indirect taxes, noticed in my last, showed a large decline in the duties on the manufacture of native (beetroot) sugar. Another return, brought out to-day, shows that the quantity made from the beginning of the present campaign (the designation used) up to the end of June was 26,485 tons less than in the corresponding period of last season; and that the stock at the end of June was 16,391 tons, whereas on the corresponding date of last year it was 23,405.

The Portuguese Railway Company advertises the issue of 10,000 bonds at 240f, bearing 15f interest, and to be paid off in annual drawings in the space of 98 years.

M. Pegot-Ogier, banker, of the Place de la Bourse, in this city, has been declared bankrupt; he was not in a large way of business. At Bolbec, a town near Rouen, there has also been the failure of a bank.

The Imperial decree translated in the last ECONOMIST, by which the import duties on sugar and other articles are modified in order to place them in accord with the stipulations of the Belgian treaty, enacts that "foreign sugar not refined, and not classified with refined, imported by *foreign* vessels out of Europe, shall be allowed drawback." This enactment is causing some uneasiness among the shipowners of Havre, Nantes, and other places, for the reason that it will be easy to make French colonial sugar foreign by sending it to some English entrepôt out of Europe, and that consequently it can be introduced into France in foreign vessels with the privilege of drawback—a thing which will greatly injure French shipping. But this new grievance of the shipowners does not appear likely in practice to be of much importance, and at all events they must bear it in patience, as it is not to be expected that the Government will consent to modify the decree.

The Bourse continues to display but little activity. The following are the quotations:—

	Thursday, July 18.		Thursday, July 25.

In addition to the grave condemnation pronounced on them, Mirès and Solar are being sued before the Tribunal of Commerce, the former for 3,232,727f, the latter for 200,000f, due to the Caisse Generale des Chemins de Fer on their private accounts; the two jointly for 2,926,000f, the value of 5,852 shares appropriated by them; also for a sum undetermined for the loss occasioned by the "executions" (selling of securities belonging to customers) effected by them for loans made without guarantees, and for sums paid as commission or indemnity without just cause. These claims are made on them by the assignees of their estate.

Annexed is an account of the markets:—

FLOUR.—At *Paris*, a new advance has taken place. Yesterday the quotations were 72fto 76f the sack of 159 kilogrammes. The four marks were 75f for the current month, and in the early part of the day 74f 50c and 74f 75c for August, in the latter part 75f. The demand was active at the latter price, not only for August but for late periods.

WHEAT.—Owing to the accounts of the harvest so far as it has gone not being favourable, prices have advanced. Yesterday, the sack of 120 kilogs was 40f to 43f, and even 43f 50c; one superior lot of new wheat from the Centre went at 44f 50c. Foreign wheat was 42f to 43f. Of the country markets, as many as 108 presented a rise of 13c to 1f 92c the hectolitre; only 18 a fall, which varies from 10c to 1f; 30 are reported firm, and 20 without variation.

COTTON.—The sales at *Havre*, in the week ending Friday, were 14,504 bales, and the arrivals 4,892. The closing prices were 2f to 3f higher for the very low qualities, and 2f for all other sorts. Very low New Orleans was consequently 99f the 50 kilogs; low ditto, 111f; and very ordinary ditto, 117f. On Monday and Tuesday of the present week sales were active; the quotation for low New Orleans being 111f to 112f. Yesterday, sales were active, and prices firm.

SUGAR.—At *Havre*, in the week ending Friday, business was active at advanced prices: 650 casks French West India disposable went at 47f 50c to 48f the 50 kilogs, duty paid; 123 ditto "usine," 58f; a small lot of ditto, 61f 50c; about 500 hogsheads Porto Rico, 47f to 49f 50c; 1,210 casks Havana old, 33f 25c to 38f 50c in bond. The arrivals were about 4,500 casks. This week, Havana has been at 34f 25c in bond; ditto old, 33f 25c; French West India, 47 50c; ditto "usine," 61f 50c duty paid. At *Nantes*, last week, business was important; 20,816 bales Reunion, 1,885 Mayotte, 110 casks of Guadeloupe being sold, and brokers fixed the closing quotations at: Reunion, 50f to 50f 50c; French West India, 48f. This week, Reunion *gros grains* has been at 55f; Reunion, very ordinary, 40f 25c; Guadeloupe "usine," 58f 25c. At *Bordeaux*, last week, 220 bales Reunion, inferior quality, went at 44f, and about 600 casks French West India at 46f 50c to 48f. This week, a small lot of Reunion has been sold; prices not given. At *Marseilles*, last week, about 3,800 casks Havana were sold at 35f to 36f, and 3,000 sacks Brazil at 34f.

COFFEE.—Business at *Havre*, in the week ending Friday, was rather active: 2,300 sacks Hayti Port-au-Prince, disposable, went at 76f 50c to 77f the 50 kilogs in bond; 400 ditto for delivery, 77f; 342 Gonaives and St Marc, 80f; 1,450 Rio, not washed, disposable, 62f to 67f; 163 ditto, washed, 81f. Some damaged Rio was also disposed of. The arrivals were about 4,000 sacks and some casks. This week, Rio has been 60f to 71f; ditto washed for delivery, 83f 50c; Java, 110f; Hayti, 76f 50c to 80f; Gonaives, 78f 75c. At *Nantes*, last week, 50 sacks Hayti went at 78f in bond; 50 Java at 110f duty paid. This week, there have been no sales. At *Bordeaux*, last week, 1,150 sacks Java went at 106f 50c, and 1,540 at 109f 25c; 111 casks Santiago, 87f 50c; 176 Rio, washed, at different prices; 100 ditto, not washed, 72f 50c; 125 Mysore, 107f duty paid; 150 Guayra, at prices not stated; a small lot of Martinique and Guadeloupe, 84f 50c to 85f; 1,200 sacks Guayaquil, 73f 50c in bond. This week, Rio, washed, has been at 80f; ditto, not washed, 69f 50c to 78f; Java, 112f; Santiago, different prices, and part at 91f 50c; India, 106f. At *Marseilles*, last week, a small lot of Mocha of Alexandria went at 105f in bond; 600 sacks St Domingo, at 80f; 1,000 sacks Rio, 62f to 72f. A quantity of damaged Rio was also disposed of. This week, Rio ordinary has been at 55f.

HIDES.—At *Havre*, in the week ending Friday, prices declined. 800 Buenos Ayres dry went at 87f 50c to 110f the 50 kilogrammes; 4,500 Tampico, 85f; 1,250 New York salted, 42f 50c; and 200 ditto Odessa, 50f; 3,600 Bombay cow, 60f. Various lots of damaged Monte Video were also sold by auction. The arrivals were only about 1,000. This week, New York salted has been at 42f 50c; Monte Video dry, 100f; Buenos Ayres, 96f to 105f; Chili, 85f.

WOOL.—At *Havre*, in the week ending Friday, business was not very animated. 78 bales La Plata, unwashed, went at 2f 33c to 2f 50c the kilog; and 15 bales Peru at prices kept secret. Some lots of damaged La Plata and Chili were also sold. The arrivals exceeded 200 bales. This week, Buenos Ayres, unwashed, has been at 2f to 2f 19c.

INDIGO.—At *Havre*, in the week ending Friday, there were neither sales nor arrivals. This week, there have been no sales. At *Bordeaux*, last week, business was not important. This week, some small lots of Madras and Bengal have been disposed of; prices not given.

TALLOW.—At *Havre*, last week, prices declined. 75 casks New Orleans went at 62f 50c the 50 kilogs; 25 New York, for delivery, 63f; and 15 tons ditto, 61f. No arrivals. This week, there have been no sales or arrivals. At *Paris*, yesterday, the 100 kilogrammes were 118f, a rather important decline compared with last week's quotations.

VIENNA, July 21.

Some foreign capitalists propose to establish in this city a new bank in the French form *en commandite*, with a capital of about 300,000*l* in English. The Government is understood to be desirous of raising a new loan abroad.

BERLIN, July 20.

The negotiations between France and the Zollverein for the conclusion of a commercial treaty have of late made such progress that the convention will soon and very shortly be signed.

TURIN, July 22.

The Minister of Finances has received from eminent bankers, native and foreign, an extraordinary number of offers for the new loan of 20,000,000*l* sterling (500,000,000f). The success of it is quite certain. The issue will probably be made at about 70.

COMMERCIAL AND MISCELLANEOUS NEWS.

A report from Calcutta to the 15th ult. says:—Produce Market.—No change to notice since last report. Import Market.—This still continues much depressed. Government Securities.—The transactions in this market have been of the most limited character, and for local account sales are difficult to make, at present, at even lower rates than those now quoted. Money Market.—There is still a good inquiry for money in the bazaar, and rates are maintained. With the banks the demand is limited at previous rates.

Commercial advices from Bombay to the 27th of June state:—Money is again easier, and the Bank of Bombay reduced its rates of discount 1 per cent. all round at the last meeting of the directors, making 4 per cent. on Government securities and 6 per cent. on short-dated private paper. Government securities are firm, though almost no improvement has taken place. Cotton has further advanced, dealers keeping stedfast in their demands, and some purchases, to a moderate extent, on English account, have had effect.

Advices from Buenos Ayres come down to the 10th ult. A commercial report says:—Salted ox and cow hides are quoted at 53½; dry ditto for Germany, 56 nominal. Wool, unwashed, sup. merino, 105 to 111; fine Mestiza ditto, 95 to 100; middling, 85 to 92; mixed, 65 to 80. Freights to Liverpool, London, and Channel.—Hides, salted, 30s to 40s; ditto, dry, 50s; tallow, 35s to 45s; all with 5 per cent. primage. We have letters from Pernambuco to the 29th ult. "The little sugar coming forward," says one report, "has been difficult of sale, and the almost constant rain prevents the produce, already prepared for market, being sent to the city. Prices of white descriptions are nominal, and the values of yellow and brown are from 2,300 reis to 1,900 reis per arroba. There have been no shipments to France, and the total shipments since the departure of the Oneida are 2,155 tons. We expect that this crop will be larger than the last one, as the wet weather is delaying the arrival of the produce lying at the sugar estates in the interior. About 6,000 bags of Paraiba and Maceio sugars have been disposed of, the former at 2,050 reis per arroba, and the latter, of superior quality, at 2,400 reis, both free on board. Cotton.—The prices have advanced 200 reis per arroba—viz., to 8,900 and 9,000 reis per arroba for fine quality, since the Oneida sailed. The crop to this day amounts to 13,893 bags less than last year. Paraiba and Macao cotton have been sold at 9,350 reis per arroba for the former, and the latter at 8,700 reis per arroba cash, and 8,850 reis credit per arroba, all free on board. Hides.—Dry salted have ruled at 195 reis to 200 reis per lb. The only shipments are 2,500 to Liverpool."

An account of the importations and exportations of bullion and specie registered in the week ended 24th July, 1861:—

AMERICAN GRAIN AND FLOUR MARKETS.

New York, July 13.—The demand for State and Western flour has been moderate, both for the local trade and for shipment, but the market has nevertheless been quite firm. The demand for export has been restricted by the high rates of freight prevailing. Canada flour has met with fair inquiry. The market for Southern flour is without essential change, though prices in some cases are higher.

Export from 1st to 9th July.

	1861. barrels	1860. barrels
Wheat Flour	62,674	63,296

The market for wheat remains steady, with a fair demand at about previous prices. The high rate of freight demanded has checked the export demand very materially. Corn continues in good demand, and prices rule firm.

Export from 1st to 9th July.

	1861. bushels	1860. bushels
Wheat	815,572	437,052
Corn	74,069	91,507

STATE OF THE CORN TRADE FOR THE WEEK.

Mark Lane, Friday Evening.

Only moderate supplies of home-grown wheat have been on offer this week, in but middling condition. Good and fine samples have commanded a steady sale, at full prices; but inferior qualities have moved off slowly, at late rates. The transactions in foreign wheat have been somewhat restricted, at previous currencies. There has been a slow inquiry for both English and foreign barley, at last week's quotations. Fine malt has moved off steadily, other kinds slowly, on former terms. The oat trade has ruled firm, at extreme rates; but the demand for beans and peas has been restricted. The inquiry for flour has fallen off; nevertheless, prices have been supported. Much the same state of trade has prevailed in the leading provincial markets.

On the Continent, wheat and nearly all kinds of spring corn have changed hands slowly, at late quotations. In the United States, wheat has further given way in price, owing to the large supplies on offer.

The accounts from most parts of the United Kingdom, in reference to the general appearance of the crops, are very favourable. In some parts of the forward counties wheat cutting has been partly commenced.

In Scotland, wheat has commanded previous rates; but the demand for it has been by no means active. Barley and oats have realised former terms; but other articles have commanded very little attention.

The Irish markets have been wholly free from activity; nevertheless, prices have ruled about stationary.

At Mark lane, to-day, the supply of English wheat was small, and the trade ruled firm at the extreme rates of Monday. In foreign wheat, only a moderate business was transacted; nevertheless, the quotations were quite supported. Fine oats were, in some instances, 6d per quarter dearer; but in the value of other kinds no change took place. Barley, beans, and peas supported previous currencies. For flour, there was a somewhat improved demand, and prices had an upward tendency.

Mr E. Rainford reports as follows on the floating trade:—Since the 19th inst. to last night 39 arrivals off coast for orders are reported, comprising 14 cargoes of wheat, 13 maize, and 12 miscellaneous, viz.:—Wheat, 1 cargo from Marianople, 2 Alexandria, 6 New York, 1 San Francisco, 1 Constantinople, 1 Philadelphia, 1 Ibraila, 1 Darel Baida; maize, 3 Galatz, 1 Salonica, 1 Giurgevo, 4 Ibraila, 2 Sulina, 1 Enos, 1 Reni; barley, 1 Odessa, 1 Starma, 1 Nicolaieff, 1 Galatz; wheat and flour, 1 Montreal, 1 Philadelphia; flour, 1 Valparaiso; peas, flour, and wheat, 1 Montreal; beans, 3 Mazagan, 1 Casabianca. Several of these were disposed of previously. Since this day week there has been a fair business in cargoes afloat, and prices continue looking upward. The following transactions are reported:—Wheat, arrived, per 492 lbs, Odessa Ghirka 47s 3d, and Marianople about 50s 3d, for the United Kingdom; red spring American, supposed about 52s per 496 lbs, for the Continent; per 480 lbs, Milwaukee, imperfect, equal to about 44s 1d; Milwaukee, perfect, 2 cargoes at 47s, both for the United Kingdom; for the Continent, Milwaukee, 48s 6d; Iowa, 47s 3d; Chicago, 47s; Banat, 47s 7d; for the United Kingdom, Saide, 34s; on passage by steam to Hull, Sandomirka, 55s. Maize, arrived, per 492 lbs, Galatz, 2 cargoes at 31s 3d and 2 at 31s 6d; Moldavian, 31s 4½d and equal to 31s 4d; per 480 lbs, Giurgevo, per steamer at Waterford, 29s 7½d; Bulgarian, 2 at 30s and 1 at 29s 10½d; Fatza, 29s 6d; Ibraila, 2 at 30s; Enos, 29s 4½d; on passage, per 492 lbs, Galatz (July shipment), 31s.

The London averages announced this day are:—

THE OLD FORM.

The above Bank accounts would, if made out in the old form present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,769,291	Securities	28,558,062
Public Deposits	4,123,460	Coin and Bullion	11,720,090
Private Deposits	11,984,227		
	36,876,978		40,278,152

The balance of Assets above Liabilities being 3,401,174*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£328,065
An INCREASE of Public Deposits of	1,177,255
A DECREASE of Other Deposits of	1,333,731
An INCREASE of Government Securities of	71,077
A DECREASE of Other Securities of	679,507
An INCREASE of Bullion of	141,947
An INCREASE of Rest of	18,062
An INCREASE of Reserve of	447,042

The above account is favourable, but less so than had been anticipated. The increase in the bullion arises from the diminished shipments to America and the large sums received here from the Continent; but the augmentation will probably be much more marked next week. The increase in the public deposits and decrease in the other deposits are chiefly attributable to the new Indian loan. The other securities have again fallen off, owing to the moderate demand in the money market.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 21,711,707	£ 21,214 129	£ 22,659,235	£ 22,830,331	£ 20,769,291
Public deposits	4,295,495	3,640,443	5,018,456	3,960,021	4,123,460
Other deposits	9,097,562	15,053,461	14,937,777	14,828,614	11,984,227
Government securities	13,464,021	10,587,476	11,170,680	9,771,445	9,606,279
Other securities	11,600,605	15,440,082	17,350,396	19,405,303	18,854,783
Reserve of notes & coin	7,300,696	11,328,551	10,096,585	8,271,659	6,227,326
Coin and bullion	13,816,736	17,262,806	17,462,600	15,914,834	11,720,090
Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	4 p. c.	6 p. c.
Price of Consols	96⅞	96	95	93⅝	90
Average price of wheat	42s 5d	46s 4d	44s 11d	56s 6d	59s 7d
Exchange on Paris (shrt)	25 25 5	25 5 12½	25 5 10	25 10 17½	25 37½ 45
— Amsterdam ditto	11 16¼ 16⅜	11 15 16	11 12 12½	11 14½ 15	11 19½ 19⅝
— Hamburg (3months)	13 8	13 7	13 4½ 4⅝	13 5½ 6	13 10 10½

In the corresponding week of 1851, the French Chamber had failed to carry by the required majority the proposed revision of the Constitution, thus paving the way to the *coup d'etat* in the following December. At home the Ecclesiastical Titles Bill was passing through the House of Lords. The Peace Congress had met at Exeter Hall, and the most hopeful views were indulged in with regard to the cessation of war in future. The attendance at the Great Exhibition continued unabated.

In 1858, considerable animation was observable in the stock markets in anticipation of a pacific speech from the Emperor of the French at Cherbourg. A favourable influence was also exercised by the news of a great defeat of the Sepoy mutineers near Lucknow, and a favourable statement by Lord Stanley in respect to the prospects of Indian finance.

In 1859, the Bank rate of discount was 2½ per cent., yet the funds were 1 per cent. lower than in 1858 when the rate was 3 per cent. It should, however, be observed that a drain of gold existed at the Bank, and that adverse political rumours were beginning to create uneasiness.

In 1860, no domestic event had occurred of any importance, and the debates in Parliament were generally without interest. From abroad news had arrived of the evacuation of Sicily by the Royalist troops, and of the commencement of the campaign of Garibaldi on the mainland. France was preparing for an early embarcation of troops for Syria. The Emperor of Austria and Prince Regent of Prussia had met at Toplitz.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 2,503,043*l*; in 1858, a deficiency of 386,621*l*; in 1859, a deficiency of 2,442,619*l*; and in 1860, a deficiency of 4,576,689*l*. In 1861, the deficiency is 6,870,556*l*.

DISCOUNT AND MONEY MARKET.—The demand for money this week has again been moderate, although to-day from some exceptional cause there was rather more inquiry. The rate in the open market has fallen to 5¼ per cent. for the best bills, and some very choice short-dated paper has occasionally been taken at a fraction less. An early reduction in the Bank rate to 5 per cent. appears to be now generally anticipated. On the Stock Exchange there is a fair supply of money, and loans on Government securities are obtainable at 4½ per cent.

The following are the rates of discount in the principal cities of the Continent, showing no alteration:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5½
Berlin	4	2½
Frankfort	3	2
Amsterdam	3	3
Turin	6	5½
Brussels	3	3
Hamburg	...	2¾
St Petersburg	7	...

On Thursday, the Committee of the Six Associated Banks proceeded to open the tenders for the new Victoria loan of 1,000,000*l* for railway purposes. They were very numerous, and occupied nearly an hour and a half in reading through. The majority of the bids were a fraction over 105*l*, the public having apparently anticipated that would be the fixed minimum. Some large applications were also sent in between 104*l* and 105*l*. The lowest tender was at 103, and the highest at 105¾. The Chairman of the Committee having announced that the minimum was 105¼, it appeared that the tenders at and above that amount were for 231,500*l* only. It was then intimated that the subscription list would be kept open until two o'clock to-day, when further applications were received of about 978,500*l*, making a total of 1,210,000*l*. Of the tenders this afternoon, those at 105*l* 6s will receive allotments in full, while those at 105*l* 5s 6d will get only 20 per cent. of the amounts applied for. The price of the old debentures this evening on the Stock Exchange was 105½ to 106.

It appears that the applications for the 6,000,000*l* French railway debentures have amounted to 94,000,000*l*. The total allotted to the general public is about 3,700,000*l*, giving a *pro ratâ* distribution of about 4 per cent. The remaining 2,300,000*l* is taken by claimants with exclusive rights.

ENGLISH FUNDS.—The funds have been quiet this week, but slightly firmer, although any tendency to improvement is checked by the unsettled state of the weather. Political considerations have exercised little effect, notwithstanding that the debate on Sardinia has in some quarters produced a feeling of discouragement. The report that the health of the Emperor was much worse than had been generally believed is not confirmed, but there is still an impression that the rumour, though exaggerated, is partially true. Consols, which closed last week at 89⅞ to 90 for the 7th of August, left off this evening at 90 exactly. For money, the latest transactions were at 89⅞.

Exchequer bills continue without animation, the June issue being quoted 3s discount to par, and the March 10s to 5s discount. Indian bonds have again improved, and were last quoted 11s to 7s discount.

The scrip of the new Indian Five per Cent. loan has not maintained the late advance, a reaction having taken place

to 99⅞ to 100. The decline has been chiefly caused by the Secretary for India obtaining from the House of Commons power to raise an additional five millions for railway purposes during the ensuing prorogation. The old stock stands at 99⅛ to ⅜.

FOREIGN STOCKS.—Business in the foreign market has been generally limited, but to-day the transactions have been larger than for some time past. Another rise took place in Turkish Six per Cents of 1858 in the commencement of the week, but was followed by a temporary relapse on the exchange from Constantinople having risen to 184, the movement being adverse to the Turkish currency. To-day the announcement of further financial reforms has caused renewed buoyancy, and the tendency is again firm. The 1854 loan, on the other hand, has been rather heavy. Mexican remains without change, the communication appearing below having had no effect on the market. Sardinian is steady, and Russian descriptions have been slightly firmer. Buenos Ayres bonds have again been pressed for sale, and show a further decline. Peruvian Uribarren bonds are in request, in anticipation of the purchases for the sinking fund.

The closing price from Paris this evening was 67f 75c, or the same as last Friday.

The following important communication has been received from the Committee of Mexican bondholders:—

The Committee have received a letter from Mr Whitehead, via the United States, dated Mexico, the 14th ult. The Vera Cruz agents had advised receipts of 47,777 dols duty bills for the dividend fund, a day or two before the 29th May, on which day the Congress decreed the suspension of all payments for one year, with the exception of what was owing on account of the Conducta robbery, and what was payable under foreign conventions. At the Treasury they at first seemed to agree with Mr Whitehead in thinking that the arrangement made with Captain Dunlop and Captain Aldham would place the payments on account of the British debt on the same footing as though arranged by diplomatic convention; but on the 11th ult., Mr Whitehead, to his great surprise, received advices from the Vera Cruz agents of the collector having informed them that, under the decree of the 29th May, he should give them no more bills. This the Minister of Finance, on being applied to, avowed to have been done by his order. Mr Whitehead told him that these things were not "suspensions of payment," but violent appropriations of funds which do not belong to them, having been made over to the bondholders, and immediately referred the matter to Sir Charles Wyke, who has taken it up in a way which has not been witnessed of late years, and which promises to restore Her Majesty's Legation in Mexico to the high position it occupied in the days of Sir R. Pakenham, if Sir Charles's health be spared. The result at the date of Mr Whitehead's letter was not known. The Mexican Government had answered Sir Charles Wyke's application for the payment of the 660,000 dols in a very equivocal manner. The amount of the Conducta robbery at Laguna Leea was due on the 11th June, but up to the 14th nothing had been paid.

The Congress had at last declared Juarez Constitutional President by the small majority of 6 (61 to 55). Morquez and Zuloaga are still marching about with 1,000 or 2,000 cavalry, distracting the attention of their opponents. They had lately kidnapped and carried off Ocampo, Juarez's former chief minister, living at his farm with his family, and after exposing him to all sorts of brutality from the soldiery, shot him at Tepiji, 15 leagues from the capital. Other outrages are also recounted. The bonds of the domestic debt had fallen to 6 per cent.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

	Consols, Money		Consols, Account		Exchequer Bills

RAILWAYS AND OTHER SHARES.—The railway market during the week has been very inactive, business being generally suspended until the announeement of the dividends. It seems to be anticipated that these will prove comparatively unfavourable, as notwithstanding traffic has kept up well during the past half-year, the working expenses have been at least commensurately large. Much disappointment was experienced to-day in the official statement that the dividend of the Berwick will be only at the same rate as last year, although the traffic returns show a considerable augmentation. On other lines it is feared the dividends will show a diminution. The market has, therefore, been unsettled, and in several stocks a decline has taken place. Caledonian remains exceptionally firm.

Indian Guaranteed and Canadian descriptions were generally steady, the former in particular.

In the foreign market there have been some fluctuations in Lombardo-Venetian, and an advance has taken place to ⅛ dis.

A general rise has occurred in American railway securities, owing to the corresponding movement in New York. Illinois Central and Erie shares are especially higher.

No general change is shown in miscellaneous descriptions. Labuan coal shares left off at 2¼ to ⅜ prem., and London and Provincial Marine Insurance par. Ocean Marine have improved to 5 premium.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

	Railways. Closing prices last Friday.	Closing prices to-day.

FOREIGN EXCHANGES.—There has been a slight advance this week in the rates on Holland.

BULLION.—Annexed is the weekly circular of Messr Pixley, Abell, and Langley on the transactions in bullion during the week, and the business in Indian rupee paper:—

Gold.—The following arrivals have taken place since the date of our last circular (18th inst.):—The Agincourt, from Melbourne, with 79,500*l*; the Dover Castle, from Melbourne, with 116,600*l*; the Donald McKay, from Melbourne, with 200,000*l*; the Boreas, from Melbourne, with 42,000*l*; making in all a total of 438,100*l*. Several amounts of gold coin have also been received from the Levant. As there is scarcely any demand for export, the greater part of the above has been sent into the Bank, that establishment having purchased about 410,000*l* during the past few days, and further amounts are likely to be sent in. The Africa has taken 16,552*l*, and the Kangaroo 56,000*l*, to New York.

Silver.—The market during the past week has been very dull, and we have not a single operation of any amount to report. The price remains about 5s 0¼d per oz standard, with scarcely any demand.

Mexican Dollars.—We still quote the price at 59d per oz, with but little doing.

Exchange on India for Banks' drafts on Bombay and Calcutta, at 60 days' sight, is 1s 11⅛d to 1s 11⅜d, being rather weaker than last week; Madras the same. Bills with documents, Bombay and Calcutta, 1s 11d to 1s 11¼d; Madras rather better than that to the buyers.

India Government Loan Notes, with the exception of 4 per Cents., remain unchanged. The 4 per Cents. are held very firmly, in consequence of the steadiness of the quotations at Bombay, at

82½. The 5 per Cents. and 5½ per Cents. remain without change, viz., 94¼ to 94¾, and 100¾ to 101¼ respectively.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9½d per oz std; bar gold refinable, 77s 11d per oz std; Spanish doubloons, 77s 6d to 78s per oz; South American doubloons, 73s 6d to 73s 9d per oz, last price; United States gold coin, scarce. Silver—Bar silver, 5s 0¼d per oz std, last price; bar silver, containing 5 grs gold, 5s 0⅛d per oz std, last price; fine cake silver, 5s 4⅛d per oz, last price; Mexican dollars, 4s 11d per oz, last price; Spanish dollars (Carolus) in demand, scarce.

In addition to the shipments mentioned above 28,484*l* was sent yesterday by the Anglo-Saxon from Liverpool to Quebec. The steamer with the Bombay mail to-morrow, will take 11,010*l* in silver, and 5,150*l* in gold.

The amount of gold purchased by the Bank yesterday was 155,000*l*, and to-day 140,000*l*, making a total of nearly 300,000*l* since making up the last account. The bulk of the specie was Australian.

Public Companies.—A meeting of the National Discount Company was held on Wednesday, when the report recommending a dividend for the past half-year at the rate of 5 per cent per annum, free of income tax, was carried unanimously. The profit in the six months would have admitted of a larger distribution, the net returns having been 17,459*l*, or equal to 9½ per cent. on the paid-up capital; but the Directors preferred making instead a large addition to the reserve, which has now been raised to 16,115*l*. The past half-year has been a very eventful period, owing to the large efflux of gold for breadstuffs, the suspensions in the Levant trade, and the civil war in America. It has been necessary on account of the two latter contingencies to act with great circumspection, and it is satisfactory that no losses have been thereby incurred. The provision made on the last occasion for the bad debts by the great leather failures last year has turned out amply sufficient. There was a short discussion, chiefly upon the desirableness of increasing the dividend 1 per cent., and making a smaller appropriation to the reserve, but the general feeling appeared to be in favour of the more prudent course proposed by the Directors. One shareholder considered that the Company had proved experimentally a failure, the profits being incommensurate with the risk, and intimated that at the next meeting he would move a resolution to wind up. In answer to questions, it was mentioned that the reserve fund is applicable to the equalisation of dividends and for the general purposes of the undertaking. The rental from the part of the premises let off remains about the same, but applications to take other portions are being considered.

At a meeting of the Scottish Australian Investment Company to-day, the report was adopted and a dividend declared at the rate of 10 per cent. per annum. It was stated that many failures of greater or less importance have occurred during the half-year in the colony, but in consequence of the caution and vigilance exercised in the management, no loss has been sustained. Great dulness has prevailed as regards the sale of land, and rents have remained depressed, but the rate of interest has continued favourable for making investments. Following out the policy stated in the last report, the Directors have succeeded in placing 9,066*l* preference stock and 45,930*l* in debentures at 5 per cent., a rate which will leave a considerable margin of profit on the employment of the capital so raised in Australia. The accounts from the Pyrmont Bridge Company, an undertaking in which this Company has an interest, are favourable. The latest advices from Australia report satisfactorily respecting the position and future prospects of the present concern.

The first meeting of the United Kingdom Telegraph Company took place yesterday, when it was announced that the first three lines of the Company, to Manchester, Liverpool, and Oxford, will be open in about three weeks for the conveyance of messages at 1s each, exclusive of a slight additional charge for porterage. Considerable opposition is stated to have been experienced from the Companies interested in the present monopoly. The system adopted by the Company is the pole-telegraph, which will be worked by an economical and efficient apparatus already in extensive use. A renewed application will be made in Parliament next year for an Act similar to the one thrown out in the present session on technical grounds only.

At a meeting of the Unity Bank, this morning, it was stated that the available balance is 4,066*l*, out of which a dividend was declared of 12s 6d per share, free of income-tax. The business of the bank during the past six months has steadily progressed and continues to improve in character.

The report of the English, Scottish, and Australian Chartered Bank, issued preparatory to their meeting on the 31st, shows an available balance of 16,600*l*, out of which it is proposed to declare a dividend at the rate of 6 per cent. per annum, to write off 1,500*l* for preliminary expenses and bank premises, and to add the remaining 100*l* to the reserve, which will then amount to 22,587*l*.

The proposed dividend of the Electric and International Telegraph Company for the past half-year is 3½ per cent.

The Directors of the National Bank have just declared a half-yearly dividend and bonus at the rate together of 14 per cent. per annum.

The report of the Bank of Egypt, to be presented at their meeting on Monday week, states that the balance standing to the credit of profit and loss, is 12,479*l*, out of which a dividend at the rate of 7 per cent. per annum, free of income tax, is proposed, leaving 3,729*l* to be carried forward. The debt due from the late Prince El Hami Pasha has been reduced to 30,000*l* inclusive of interest, and this amount is amply secured. Of the other dependencies mentioned in the last report, a considerable sum has been realised, although with the sacrifice anticipated, which, however, has been met without infringing on the reserve fund.

The Directors of the Australian Agricultural Company announce that the sum available for distribution at the ensuing meeting is 14,720*l*, or rather less than sufficient for the usual dividend of 15s per share. It is proposed, however, to make a distribution at that rate by appropriating the deficiency, 279*l*, from the profit of the current year.

The prospectus has been issued of the Equitable Grocery Consumers' Company Limited upon the co-operative principle, with a capital of 100,000*l* in 20,000 shares of 5*l* each, the holding and liability of each person being limited to 5*l*, of which 1*l* is to be paid up.

Fire Insurance.—The agitation against the proposed increase in the rates for commercial risks by the leading fire insurance companies is being actively carried on, and there appears little doubt that some modification in the proposed scale will be adopted. Meanwhile, three or four new companies, it is said, are about to be brought before the public. Yesterday an influential meeting was held at the Mansion House of merchants and others, when resolutions were passed condemning the new tariff as excessive; asserting that it would tempt persons to abstain from insuring to the manifest hurt of the mercantile community; and that the market value of the shares of the leading offices shows that the previous rates were amply sufficient; and, finally, appointing a committee to consider the best course to be pursued to prevent the adoption of the new charges.

Failures and Mercantile Embarrassments.—The suspension has been announced of the well-known and respectable Italian firm of Rocca Brothers, with houses at London, Naples, Marseilles, Odessa, and Genoa. The house has been for some months in liquidation, but up to Wednesday all its engagements had been regularly met. The outstanding liabilities are believed to be still large. The principal establishment is at Genoa, and the stoppage took place in consequence of a telegram from that city. The cause of the suspension is said to be disappointment in the collection of assets there, but it is hoped that the partners will be able to make a satisfactory proposition for the completion of the winding up of the estate.

A preliminary meeting of the principal creditors of Mr James Grieves, Australian merchant, who stopped payment a week ago, was held on Wednesday, when an approximate statement of affairs was presented by Messrs Coleman and Co., the accountants, showing liabilities about 58,000*l*, with assets, taking the consignments at cost price, and assuming that the debtors for goods shipped to order are good, worth about 43,000*l*. A committee of supervision was appointed, with directions to take such measures as may be necessary to protect the property of the house in Australia.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.37½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 5-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 426½ per mark, and the short exchange on London is 13.8½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 1¼ per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 106½ to 107 per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

The Commercial Times.

Additional Mails for Bermuda via New York.—With the view of affording to the public more frequent opportunities than at present exist of forwarding letters to Bermuda, it is intended, in future, to despatch a mail for Bermuda by each of the Cunard packets proceeding to New York. These extra mails will be conveyed from New York to Bermuda by means of private ships, as opportunities offer. The postage upon letters forwarded by this route will be 9d for a letter not exceeding half an ounce in weight, 1s 6d for a letter above half an ounce and not exceeding one ounce, 3s for a letter above one ounce and not exceeding two ounces, and so on for heavier letters. This postage must be paid in advance, or the letters will be liable to an extra charge on delivery. Upon newspapers a postage of one penny each must be prepaid. A like sum of one penny will be collected on their delivery, to cover the United States transit rate of postage.

Imports of the week ..... 315,870 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was only a limited supply of English wheat on sale in to-day's market. On the whole, the demand ruled steady, at full prices. Foreign wheat, the show of which was good, moved off slowly, on former terms. Barley and malt commanded very little attention, but oats were very firm in price. Other kinds of produce were a dull inquiry, at previous currencies. The imports from abroad, this week, amount to 11,260 quarters of wheat; 3,730 barley; 6,840 oats; and 6,350 barrels of flour.

At Liverpool, this morning, wheat and flour were in good request, at full prices.

The following is the statement of the transactions in produce at Alexandria during the week ending July 10, with the prices paid, quoted free on board:—Wheat comes down slowly, and is firm in price, as it is required for local consumption. But shortly we expect very considerable quantities will appear, as the crop is considered to have given a large yield. Saide, private growth, 940 quarters, 29s 3d to 28s; Beheireh, private growth, 1,148 quarters, 27s 8d to 26s 6d; Beheireh, Prince's(white), 1,500 quarters, 29s 6d to 28s 6d per quarter. Beans arrive very freely, and it is evident the crop is very abundant. We expect to see much lower prices very shortly, as they are only sustained for the moment by a demand for Malta, which must soon cease. Saide, private growth, 8,928 quarters, 25s 8d to 24s; Beheireh, private growth, 6,565 quarters, 24s to 22s 3d; Beheireh, Prince's, 1,850 quarters, 25s to 24s per quarter. Barley—None of very good quality has yet appeared; but of this grain also we shall expect to see both abundant supplies and good quality from the upper country. Private growth, 4,147 quarters, 17s 9d to 16s 6d; Prince's growth, 1,625 quarters, 18s to 17s 4d; Ceci (chick pease), 62 quarters, 28s 3d to 33s 3d; linseed, Prince's growth, 131 quarters, 3s 4d per quarter. Freights have improved. Beans, &c., in proportion for orders, 5s 9d to 6s 3d; direct port, 5s to 5s 6d.

Under the influence of the alarming news from America the market during the whole of the present week has shown unusual excitement. The sales amount to the enormous number of 144,000 bales, 87,000 of which are to spinners and 57,000 for speculation and for export. An advance of 3-16d to ¼d is currently paid for all descriptions. To-day, 18,000 bales are sold, with a strong market and prices tending upwards.

Messrs Briggs and Co., of Alexandria, report the state of the cotton trade to the 11th inst. as follows:—"Whatever small lots of cotton come down are freely bought, but little or nothing is seen in the open market, and for this reason it is difficult to establish the qualities and to quote an actual rise in price, although we may mention, generally, that the staple is dearer. The sales for the week have been:—257 bales sweepings to low ordinary, 5d to 7¼d; 167 bales ordinary to middling, 7¼d to 8d; 104 bales good middling to fair, 8¼d to 8 4-10d; 102 bales good fair, 8 43-100d to 8 68-100d; 180 bales good, 9¼d per lb, f.o.b. Freights, by steamers, have remained at ½d and 5 per cent., but 3-16ths are now asked. Exchanges are steady at 96 to 96½ piastres per £."

The public sales of tea, held this week, have gone off slowly, at, in some instances, a slight reduction in the quotations.

There has been less activity in the demand for sugar, and medium qualities have given way 6d per cwt.

Coffee has changed hands slowly; yet the market may be considered firm for good qualities. In cocoa and rice, the transactions have continued on a very moderate scale.

The fruit market is quiet, and there have been very few inquiries for either rum or saltpetre, the rates of which have been with difficulty supported. Scotch pig iron has realised 51s 3d cash mixed numbers.

The wool sales are progressing slowly, and prices rule somewhat lower than at the opening. The decline in the value of Sydney wool is now 1d to 1½d; Port Philip, 1½d to 2d; Van Diemen's Land, 2d to 3d; Adelaide and Cape, 1½d to 3d per lb.

Linseed oil is in moderate request, at 31s per cwt. Most other oils are a dull inquiry on former terms.

The tallow market is flat to-day. P.Y.C. on the spot is quoted at 47s, and for separate months 47s 6d per cwt. The latest commercial news from New York is unfavourable.

Good middling	16¼	16¼	17	17¼
Middling fair	16¼	16¼	17	17¼

There have been no receipts since our last. Total import since 1st inst., 97 bales; total import since 1st September, 431,063 bales. Export from 1st to 9th July, 1,061 bales, against 2,210 in 1860.

MARKETS IN THE MANUFACTURING DISTRICTS.

Both for home use and export, the demand for goods in the manufacturing markets held this week has steadily increased, and, in some instances, prices have had an upward tendency. There has been rather a large business doing in iron, at full quotations; and the transactions in coal have been on an extensive scale.

MANCHESTER, July 25.—In consequence of the excited business in Liverpool, this market has become dearer all round, though buyers have secured a good many lots at the full rates of last week. The majority of sellers now give quotations which are tantamount to a withdrawal from further selling, but a minority of sellers accept offers which clear their stocks and relieve their means. Purchases are certainly few which are based on anticipations of future demand, and though a rise is always a relief of some sort for the time, the prospects which are entertained are gloomy rather than otherwise. At all events, the trade seems resolved to work up the cotton.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—The general aspect of the wool market is what it has been for the last several weeks. A reduction of from 5s to 10s per pack from the extreme prices of last week could be pretty generally obtained, especially in the bright-haired sorts.

NOTTINGHAM.—There has not been much doing during the past few days in the lace trade. Buyers continue to purchase in small quantities, and manufacturers merely finish what goods are wanted. The silk lace trade is also dull, and much machinery is working short time. There is no favourable symptom in the foreign department of the hosiery trade, shipping orders being few; many framework-knitters and lace makers are unemployed. Yarns keep up in price, and are firm.

LEICESTER.—The hosiery trade in many departments continues in a healthy condition, and a fair amount of business is being done. There is, however, very little alteration in the trade at Loughborough, Hinckley, and the adjacent districts. In the price of yarns there is no material change, spinners only producing what is actually wanted. Wools keep up former prices.

BELFAST.—Flax was in active demand, and, in several instances, higher figures were realised. The accounts of the new crop are very favourable, and many parties have now some in steep. The yarn market has assumed a decidedly improved tone. The demand on the part of manufacturers has become more active. White Linens with Bleachers—Demand is tolerably steady, taking the season of the year into account. Stocks do not appear further to accumulate. The home demand is not active.

WOLVERHAMPTON.—Our iron market is firm, and prices are well supported.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There has been little animation in the demand, and the trade seem determined not to hold large stocks. Quotations, occasionally, rule 6d cheaper since the 19th ultimo. 8,100 tons were landed last week, and 5,225 tons delivered, consequently the stock at the close had increased to 71,900 tons, or 1,730 tons above that of 1860 at the corresponding period. The transactions in West India during the three days reached 1,030 casks. 450 casks Barbadoes, by auction, partly sold: brown, 31s to 34s; low heavy to good yellow, 34s 6d to 40s. Several floating cargoes of Havana have sold upon former terms.

Foreign.—938 casks 64 barrels Cuba muscovado partly found buyers as follow: brown, 32s to 34s; low soft greyish to good yellow, 34s 6d to 39s. 868 boxes clayed: brown to low grey, 33s 6d to 36s 6d; middling to fine dry grey, 37s to 44s; a few lots white, 47s to 50s. Of 997 casks 286 barrels Porto Rico, a few lots sold: brown, 31s 6d to 34s 6d; low grey to fine yellow, 35s to 44s. A floating cargo of Cuba has sold for the United Kingdom at 22s 9d; one of low brown at 22s 3d; one of Havana, No. 13, including some white, at 26s 6d; one of Havana, No. 11 to 11½, 27s, for the Mediterranean; one of No. 16, 28s 9d, for a near port.

Refined.—The market is less active, at 6d per cwt under last week's quotations.

MELADO.—756 casks, by auction, went at 24s to 26s 6d; two lots sugar, 30s 6d to 33s per cwt.

MOLASSES.—38 casks clayed, by auction, were bought in at 15s. A floating cargo of clayed Cuba recently sold for the United Kingdom at 14s; also one of muscovado at 15s per cwt.

COCOA.—1,165 bags Trinidad were mostly bought in or withdrawn, a few lots selling: grey to good bright red, 53s to 68s. 256 bags Grenada partly sold at 49s to 52s per cwt.

TEA.—The market is quiet, and there has been very little business done by private contract, owing to the numerous public sales declared. These commenced on Wednesday, when the catalogues contained 32,700 packages, 9,000 packages finding buyers without material change in prices.

COFFEE.—The reduced supply brought forward this week, has found buyers at full rates in all cases. 331 casks 308 barrels and bags plantation Ceylon realised 68s to 75s for fine ordinary to good middling. 7 casks 849 bags native, small berry to good, 60s to 63s. 335 bags fine ordinary Java from the Cape, 67s to 67s 6d. 89 casks East India: Wynard plantation, middling, 70s 6d to 71s; Malabar, 64s 6d to 66s. 84 casks 50 barrels and bags Jamaica partly sold: good ordinary to middling, 62s to 72s; fine as high as 97s per cwt. 428 bags Singapore withdrawn.

RUM.—There is little inquiry, and the few sales made in West India have been at rather easier rates. Some East India in second hands has sold as low as 1s 6d per proof gallon.

RICE.—A large business was done at the close of last and at the commencement of the present week at rather higher rates, but the market is now very firm. Soft grain descriptions sold at 8s 9d to 10s 3d; good pinky Madras, 10s; white Bengal, 10s to 12s 6d. 2,500 bags common Necrancie, by auction, brought 9s to 9s 6d per cwt. Two floating cargoes Rangoon have sold at 10s 3d; and four of Necrancie Arracan at 10s 1½d. One with open charter: Necrancie, 10s 4½d; Larong, 9s 10½d per cwt.

SAGO.—1,500 boxes partly met with buyers, and occasionally at rather easier rates: good small, 18s 6d to 19s; good medium, 19s; the remainder bought in. Sago flour has been in demand, by private contract, at 16s to 17s per cwt.

SPICES.—The market presents few changes this week. 600 bags pimento nearly all sold at 2½d to 2⅝d for ordinary shelly to good quality. 815 bags Singapore black pepper realised 3⅞d; a few lots 4d. 73 cases brown nutmegs: mixed small and uneven sold at 1s 1d to 1s 2d per lb. 67 barrels Jamaica ginger went at 39s to 55s per cwt for low to middling quality.

SALTPETRE.—Very few contracts have been made this week. Bengal last sold at 35s to 37s per cwt, refraction 3½ to 7 per cent.

COCHINEAL.—The market is steady.

DYEWOODS.—61 tons red Sanders part sold at 6*l* to 6*l* 2s 6d. 36 tons Jamaica logwood, 4*l* 17s 6d to 5*l*. 264 tons Nicaragua were mostly bought in at 7*l* 10s to 8*l* per ton.

OTHER DRYSALTERY GOODS.—A small parcel of Cutch, by auction, sold at 22s 6d for fair quality. Gambier is quiet. China turmeric brought 16s; Bengal, 14s to 14s 6d. 60 bales Bengal safflower partly sold at 3*l* to 5*l* 7s 6d per cwt.

HEMP.—Baltic is in moderate demand. 172 bales Manilla, by auction, sold at 20*l* 2s 6d to 20*l* 7s 6d for fair roping, and 33*l* per ton for white.

JUTE.—There has not been any improvement in the demand. On Wednesday the sales passed off flatly, 6,400 bales about one-third finding buyers; low to good, 12*l* to 19*l* 2s 6d per ton.

METALS.—The sales have again been upon a limited scale, and the market is inactive. Straits tin has sold at 110s to 111s per cwt. Tin plates are dull. At the commencement of the week spelter sold at 15*l* 10s, but the market is now firmer at 15*l* 15s per ton. Scotch pig iron last sold at 51s 6d per ton for mixed numbers. Manufactured has been steady at the quotations. Copper in moderate demand. English pig lead sells slowly, and may be quoted 19*l* to 19*l* 10s per ton.

OILS.—Quotations of sperm and common fish oils remain unaltered. The market for olive is dull, and no sales have been made. With a good export and home demand, linseed remains firm, at 31s. Rape firm: foreign refined, 42s to 43s; brown, 39s 6d; for delivery in the last four months, 44s and 42s respectively. Tallow oil is very dull, 43s being accepted for fine. The market for cocoa-nut shows less activity; Cochin, 44s 6d to 45s; Ceylon, 43s 6d to 44s per cwt.

SPIRITS TURPENTINE.—500 barrels American sold during the week at 50s per cwt, and the market is now quiet.

LINSEED is firmer in the absence of arrivals: Bombay, 56s 6d to 57s; Calcutta, 53s 6d to 54s 6d. Large sales have been made afloat: Black Sea and Azoff, 54s 6d to 55s per quarter.

TALLOW.—Prices of foreign have further receded 1s 6d, and the market is still unsettled. At the decline established since last Friday, the consumers bought more freely during the week. This morning Y.C. is quoted 47s per cwt in all positions.

PARTICULARS OF TALLOW.—Monday, July 22.

POSTSCRIPT.

FRIDAY EVENING.

SUGAR.—The market was quiet to-day, but grainy Bengal realised very extreme rates. 1,098 bags sold at 45s to 47s for fine Bally. 600 bags native Madras were taken in at 32s 6d. 107 bags soft greyish yellow, 37s 6d to 38s. 284 bags dark brown Manilla, 30s 6d. 598 casks 254 barrels various kinds of West India, by auction, partly met with purchasers at the previous value. The week's transactions reach 1,400 casks.

COFFEE.—The small public sales held to-day went off without any material change in prices for 49 casks Jamaica, and 26 casks 250 bags plantation Ceylon. 430 bags Bahia were bought in.

RICE.—2,729 bags Bengal sold at 13s 6d to 13s 9d for good white. Two floating cargoes of soft grain are reported at 10s per cwt.

SALTPETRE.—926 bags Bombay chiefly sold: refraction 52½ to 30¾, 30s to 30s 6d per cwt.

COCOA.—142 bags Trinidad were sold at 53s to 65s. 670 bags Guayaquil were withdrawn at 56s. 252 bags Bahia withdrawn at 50s per cwt.

TEA.—The sales concluded to-day, and 5,720 packages sold, including 3,670 packages printed "without reserve," occasionally at easier rates.

LAC DYE.—114 chests DT were bought in at 1s 9d per lb.

RUBBER.—124 bags Penang were bought in at 1s 4d, and some parcels Para at 1s 2d to 2s per lb.

OIL.—731 casks palm part sold at 38s to 43s 3d. 207 casks Sydney chiefly sold at 37s 6d to 42s 6d per cwt. 1,080 tuns sperm part sold at 94*l*. 30 tuns Southern whale at 34*l* 15s to 36*l* per tun.

TALLOW.—Town declined to 49s. Y.C., 47s and 47s 6d per cwt for the last three months. 2,150 casks various kinds, by auction, sold at 1s to 1s 6d per cwt decline.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been quiet this week, and prices rather in favour of the buyer. From Holland the accounts state that Dutch crushed is firmly held. Here there is less demand.

GREEN FRUIT.—No arrivals of pine apples, shipments being stopped by bad weather. The remaining portion of the cargo, per Kate, sold by Keeling and Hunt at public sale, went at an advance in price. Lemons lower, in consequence of the wet weather interfering with consumption.

DRY FRUIT.—No alteration to report in this market.

ENGLISH WOOL very quiet, prices fully ½d per lb lower.

COLONIAL AND FOREIGN WOOL.—Sales progressing without change. The fall in inferior ill-conditioned lots is 2d to 3d per lb.

FLAX.—Market unaltered.

HEMP steady at our quotations.

COTTON.—Sales of cotton from Friday, 19th July, to Thursday, 25th July, inclusive:—2,600 bales Surat, at 6¾d good new Broach, 6d fair old ditto, 5½d to 6d middling to fully fair old Dhollera, 5⅞d to 6¼d middling old to good fair new Oomrawatty, 5¼d and ⅝d middling fair Compta; 1,600 bales Tinnevelly, at 6⅝d to 6¾d good; 100 bales Western Madras, 5⅝d fair; total, 4,300 bales. A very active demand has been experienced this week, and considering the smallness of the stock, a comparatively large business has been transacted at ⅛d to ¼d per lb advance on Surat. Sawginned Dharwar is becoming scarce, and holders are asking an advance of fully ¼d per lb. A good export demand has prevailed for the

better kinds of Tinneveliy, which have again advanced fully ½d per lb. Western Madras may also be quoted ½d per lb dearer, the market closing with great firmness, and with an upward tendency. A good business has been done for arrival, viz.:—250 Sawginned Dharwar, at 7¼d guaranteed fair; 1,500 new Broach, 6⅝d to 6¾d, guaranteed fair to good fair; 700 new Dhollera, 6½d, guaranteed fair; 400 new Compta, 5⅞d, guaranteed fair; 700 Western Madras, 5½d guaranteed fair. P.S.—Market very firm: sales, 200 Surat at full prices.

SILK.—Market continues dull, prices much the same.

TOBACCO.—There is no change to report in this market. Little business is doing, but prices remain very firm.

LEATHER AND HIDES.—The leather market continues to present no new feature. The demand during the past week again shows some improvement in extent, while the supplies of fresh goods are short, and consequently the stocks are somewhat diminished. The articles that are in the smallest supply and the most wanted are good English butts, 24 lbs and upwards, extra strong foreign butts, and prime calf-skins, 40 lbs to 60 lbs per dozen. No change can be quoted in prices.

METALS.—Our market has not been worse in any branch during the week, and a slightly improved tone has shown itself in some things. Copper is rather firmer, and in somewhat better inquiry. Iron keeps steady, although depressed, the heaviness being greatest in the Staffordshire districts. Tin maintains a fairly steady position, although English is slow of sale, and Banca has become rather easier to buy. Spelter, lead, and tin plates are all more or less depressed.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	49	0
Fat by ditto	2	6
Yellow Russian	48	6
Melted stuff	34	6
Rough ditto	19	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

The bacon market has a downward tendency; prime sizeable Waterford, 79s and less. Hamburg, same as last week; very little doing. Friesland butter, quality indifferent, 106s. Jersey, no sales.

METROPOLITAN CATTLE MARKET.

MONDAY, July 22.—The total imports of foreign stock into London, last week, amounted to 10,609 head. In the corresponding period in 1860, we received 15,120; in 1859, 8,101; in 1858, 7,958; in 1857, 5,948; in 1856, 6,825; and in 1855, 6,259 head.

There was a full average supply of each kind of foreign stock on offer in to-day's market, and the demand ruled inactive, at barely stationary prices to slightly reduced rates. From our own grazing districts the receipts of beasts fresh up this morning were seasonably good as to number, but somewhat deficient in quality. Prime Scots, crosses, and Shorthorns were in fair request, at about stationary prices; but inferior breeds moved off heavily, at, in some instances, 2d per 8 lbs less money. The best Scots sold at 5s per 8 lbs. From Lincolnshire, Leicestershire, and Northamptonshire we received 1,550 Shorthorns, &c.; from other parts of England, 1,200 various breeds; from Scotland, 200 Scots and crosses; and from Ireland, 150 oxen and heifers. There was a fair average show of sheep in the market. Downs and half-breds commanded a steady sale at extreme currencies. Other breeds moved off slowly, but at full prices. The best Downs changed hands at 5s 4d per 8 lbs. Good and prime lambs moved off freely, at full currencies. Inferior breeds ruled dull, at about previous rates. Calves, the supply of which was good, were a dull inquiry, at late quotations.

Supplies.	July 23, 1860.	July 22, 1861.
Beasts	4650	4360
Sheep and lambs	28040	25290
Calves	380	357
Pigs	240	350

THURSDAY, July 25.—There was only a limited supply of beasts on offer in our market to-day. Prime Scots, &c., commanded a steady sale, at full prices; but all other breeds moved off slowly, at late rates. Sheep—the show of which was moderately good—realised Monday's currency; but the demand for them was by no means active. We have to report a slow inquiry for lambs, but at full quotations—viz., from 5s to 6s per 8 lbs. The veal trade was in a sluggish state, on former terms. The supply of calves was good. Pigs and milch cows met a dull inquiry, at late quotations.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	4	3	8	Prime Southdown sheep	5	0	5	4
Second quality ditto	3	10	4	2	Large coarse calves	3	6	4	0
Prime large oxen	4	4	4	8	Prime small ditto	4	2	4	8
Prime Scots, &c.	4	10	5	0	Large hogs	3	10	4	4
Coarse and inferior sheep	3	4	3	6	Small porkers	4	6	4	8
Second quality ditto	3	8	4	0	Suckling calves, each	21	0	29	0
Prime coarse-woolled do.	4	4	4	10	Quarter old store pigs	22	0	29	0

Lambs, 5s 0d to 6s 0d.

Total supply—Beasts, 86[illegible]; sheep and lambs, 11,850; calves, 380; pigs, 340.
Foreign supply—Beasts, 190; sheep 1,200; calves, 300.

NEWGATE AND LEADENHALL.

FRIDAY, July 26.—Moderate supplies of meat continue on sale at these markets. Good and prime qualities move off steadily at full prices, otherwise the trade is in a sluggish state at our quotations.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	3	2	3	8	Middling mutton	3	10	4	4

Inferior mutton	3	4	3	8					

HOP MARKET.

BOROUGH, Monday, July 22.—The accounts from Mid and East Kent report a further improvement in the plantations of those districts, but from the Weald of Kent and Sussex we have no better reports. The duty is estimated at 110,000*l* to 120,000*l*. Mid and East Kents, 90s, 150s, 210s; Weald of Kents, 80s, 130s, 180s; Sussex, 75s, 90s, 140s; Yearlings, 120s, 160s, 210s.

FRIDAY, July 26.—Scarcely any business is passing in our market, and prices rule next to nominal. The duty is estimated at 110,000*l*.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, July 22.—The arrivals of home-grown potatoes continue on a moderately extensive scale; but the receipts of foreign are very limited. Compared with last week, the demand has decidedly improved, and prices are well supported. Shaws are selling at from 60s to 80s, and Regents 100s to 130s.

FRIDAY, July 26.—The supply of home-grown potatoes is seasonably extensive; of foreign, limited. Generally speaking, the trade is dull, at lower prices, Shaws being quoted at 60s to 80s; and Regents, 80s to 100s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Old meadow hay, 2*l* 0s to 5*l* 0s; new do., 2*l* 10s to 4*l* 0s; old clover ditto, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 10s to 5*l* 0s; straw, 1*l* 10s to 2*l* 0s per load. A slow trade.

CUMBERLAND.—Old meadow hay, 2*l* 0s to 5*l* 0s; new ditto, 2*l* 10s to 4*l* 0s; old clover, 3*l* 10s to 5*l* 18s; new ditto, 3*l* 10s to 5*l* 0s; and straw, 1*l* 10s to 2*l* 0s per load. Trade dull.

WHITECHAPEL.—Old meadow hay, 2*l* 0s to 5*l* 0s; new ditto, 2*l* 10s to 4*l* 0s; old clover, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 10s to 5*l* 0s; and straw, 1*l* 10s to 2*l* 0s per load. Trade dull.

COAL MARKET.

FRIDAY, July 26.—Walls End:—Trimdon Hartlepool, 19s 9d—Russell Hettons, 19s 6d—South Kelloe, 19s 6d—Heugh Hall, 19s—Eden Main, 18s 6d—Thorpe, 17s 9d—Whitworth, 15s 6d—Wylam, 15s 6d—Tanfield Moor Butes, 13s 3d. Ships at market, 22.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 26.—We have had rather more inquiry this week, and if holders were less reluctant to submit to a reduction in price in proportion to that of English wool, there would be more business doing.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 26.—In consequence of the unfavourable state of the weather there is a general opinion prevalent that the harvest in this district can scarcely be ready before the 15th of next month; the trade, however, continues without excitement. The transactions in all articles being on a moderate scale, no material alteration is reported in prices.

METALS.

[FROM OUR OWN CORRESPONDENT.]

FRIDAY, July 26.—There is no change to report during the week in the market for manufactured iron; for Staffordshire there is only a limited demand, but for Welsh bar iron a fair inquiry exists. There has been a moderate business doing in Scotch pig iron, and prices have been supported. In copper there is a slightly improved feeling, and transactions have taken place at some advance. Most other metals remain with little or no alteration.

The Gazette.

TUESDAY, July 23.

BANKRUPTS.

W. Gibb, Southampton, fishmonger.
J. Wise, Stourbridge, victualler.
G. Turner, New Radford, Nottinghamshire, brewer.
G. Hill, South Milford, Yorkshire, grocer.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 13th of July amounted to 557,622*l*, and for the corresponding week of last year to 551,647*l*, showing an increase of 5,975*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 261,446*l*, and for the corresponding week of 1860 to 264,763*l*, showing a decrease of 3,317*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, July 22.—The railway market to-day was rather firmer. Compared with Saturday, London and North-Western, Midland, Lancashire and Yorkshire, Great Western, and South-Western showed an advance of ⅛ to ¼ per cent., while the other leading stocks closed without change. Foreign shares were flat, especially Great Luxembourg. South Austrian and Lombardo-Venetian remained dull at ⅜ to ½ dis. Ottoman were quoted higher. There was a general rise in American securities, owing to the corresponding movement in New York announced by the present mail. Illinois Central and Erie exhibited the chief advance. Mines were inactive at an occasional reduction. No material variation occurred in joint stock banks or miscellaneous descriptions.

TUESDAY, July 23.—The railway market was fairly supported during the morning, but afterwards declined on fresh rumours that, owing to increased working expenditure, the forthcoming dividends will be generally reduced, and closed at the lowest point of the day. London and North-Western was especially affected. The opening of the London, Chatham, and Dover to Dover throughout caused a fall in South-Eastern, while both the ordinary and preference stocks of the former company have been latterly advancing. Compared with yesterday, Sheffield receded 1 per cent., London and North-Western and South-Eastern about ½, and Midland, Lancashire and Yorkshire, and Great Western ¼ per cent. No change of importance has taken place in the colonial and East Indian markets. In foreign descriptions there was a reaction in Ottoman. American securities steadily maintained the late advance. There was little doing in mines, but occasionally an improvement was shown. Joint stock banks and miscellaneous descriptions closed about the same as yesterday.

WEDNESDAY, July 24.—The railway market remained without the slightest animation, and the final prices were generally the same as yesterday. In the morning, however, the tendency was rather unfavourable, but towards the close a recovery took place. There were few transactions in Indian guaranteed or Canadian stocks, and the quotations were generally without change. In the foreign market, Lombardo-Venetian improved after official hours to ¼ to ⅜ dis. In American securities, United States Five per Cents. and Illinois Central shares were quoted higher. There was scarcely any business done in mines, but prices were generally firm. In joint stock banks, Union of Australia were left steady. Miscellaneous descriptions exhibited no material variation.

THURSDAY, July 25.—The railway market was dull, and in the more speculative stocks a decline of ⅛ to ⅜ per cent. took place. South-Western, however, was rather firmer. Colonial descriptions were mostly quoted the same as yesterday. In the former market, Lombardo-Venetian did not fully support the advance of yesterday. American securities showed increased firmness, United States Five per Cents., Virginia Sixes, and Erie shares being especially quoted higher. Mines were inactive, but generally steady.

FRIDAY, July 26.—The railway share market was very quiet, and the variation in prices in scarcely any instance exceeded ⅛ per cent. Great Western stock was quoted 70½ to ¾; Midland, 121½ to ¾; Lancashire and Yorkshire, 111½ to ¾; Caledonian, 99⅝ to ⅞; South-Eastern, 80⅝ to ⅞, being rather firmer; Eastern Counties, 49½ to 50; and Great Northern, 108 to 109. Lombardo-Venetian Railway shares were firmer, at ¼ to ½ dis. The Indian lines were well supported. Great Luxembourg Railway shares remained rather dull. In mining shares, a very moderate business was doing.

The Economist's Railway and Mining Share List.

DR CURTIS'S MEDICAL WORK, "MANHOOD.
An Essay on Nervous and Generative Diseases.
The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps,
MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London, Consultations, Ten till Three and Six till Eight.
REVIEWS OF THE WORK.
"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.
"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.
N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.
Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

HOLLOWAY'S PILLS AND OINTMENT.—The Friends of the Afflicted.—For more than a quarter of a century have these medicaments been before the public; by which their merits have been universally recognised and commended. In all ailments they prove useful. In debilitated constitutions they act as preventives to disease, and where maladies have manifested themselves, the afflicted can resort to no remedies at once so efficient and harmless as Holloway's. They keep the blood pure, and preserve the stomach in a sound state. They cool and cleanse the whole system. These medicaments should be possessed by all; they will confirm good health, and prove serviceable under any infirmity which can afflict mankind. Plain directions accompany each box of Pills and pot of Ointment.

CURE OF INDIGESTION by Dr HUGO'S MEDICAL ATOMS.—"Dear Dr,—I dont know how sufficiently to express my gratitude to you for the cure of my long sufferings by your Medical Atoms. No one who has not suffered the pangs of indigestion and its attendant miseries can appreciate my feelings now. For more than twenty-one years I suffered with more or less intensity—nothing really benefited me but your Atoms; and now, after what may be called a short use of them, I am quite another man. I may truly say I found relief after the first dose, &c.—(Signed) EDWARD THORNEY, Lower road, Deptford, March 21, 1861." Dr Hugo's Medical Atoms are small, and have a most agreeable taste, and may be taken whole or eaten like confectionary. Sold in packets, at 1s 1½d, 2s 9d, and 4s 6d, by all respectable medicine vendors.

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.
The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German, Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.
AND
Just published, second edition, price 1s 6d,
CASES and OBSERVATIONS illustrative of the oneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.
"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.
"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.
"Mr Hare is, we think, a sound and successful practitioner."—MEDICAL CIRCULAR.
London: John Churchill; and may be had of all booksellers

KEATING'S PERSIAN INSECT DESTROYING POWDER.
This powder is quite harmless to animal life, but is unrivalled in destroying fleas, bugs, emmets, flies, cockroaches, beetles, gnats, mosquitoes, moths in furs, and every other species of insects in all stages of metamorphosis.
Sportsmen will find this an invaluable remedy for destroying fleas in their dogs, as also ladies for their pet dogs, and sprinkled about the nests of poultry, it will be found extremely efficacious in exterminating those insects with which they are usually infested. It is perfectly harmless in its nature, and may be applied without any apprehension, as it has no qualities deleterious to animal life.
Sold in packets, 1s, 2s 6d, and 4s 6d each, or post free for 14, or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79 St Paul's churchyard, London, E.C.
Take notice, each genuine packet bears the above name and address.

FRAMPTON'S PILL OF HEALTH, Price 1s 1½d and 2s 9d per box
This excellent Family Pill is a medicine of long-tried efficacy for purifying the blood, and correcting all disorders of the stomach and bowels. Two or three doses will convince the afflicted of its salutary effects. The stomach will speedily regain its strength; a healthy action of the liver, bowels, and kidneys will rapidly take place; and renewed health will be the quick result of taking this medicine, according to the directions accompanying each box.
Persons of a Full Habit, who are subject to headache, giddiness, drowsiness, and singing in the ears, arising from too great a flow of blood to the head, should never be without them, as many dangerous symptoms will be entirely carried off by their timely use, and for elderly people, where an occasional aperient is required, nothing can be better adapted.
These Pills require no restraint of diet or confinement during their use; and in consequence of the great and increasing demand, the Proprietor has obtained permission from Her Majesty's Commissioners to have the name and address of "Thomas Prout, 229 Strand, London," impressed upon the Government stamp affixed to each box. Sold by all venders of medicine.

EXTRAORDINARY DISCOVERY—NEW THEORY.
(Medicines Superseded.)
NERVOUS DEBILITY AND ITS train of evils, such as self-distrust, timidity, pimples on the skin, loss of memory, thoughts of suicide, trembling of the limbs, depression and prostration of the system &c., immediately checked and speedily cured by the Newly-Discovered Patent Appliance. Advice and instructions post free on receipt of two stamps, by Dr Watson, U.S., F.R.A.S., President of the Medical Reform Society of Great Britain. No. 27 Alfred place, Bedford square, London. Consultations daily from 11 till 2 and 6 till 8 on all these ailments and infirmities peculiar to youth, manhood, and old age, which tend to embitter and shorten life. For distinguished qualifications vide diplomas.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 3 Burton crescent, Tavistock square, London, W.C.

ST MARGARET'S COLLEGE, NORTH-END, FULHAM, London, S.W., for the Education of Young Ladies.
Principal—The Rev. A. LENDRUM, M.A.
Vice-Principal—The Rev. FREDERICK TAUNTON, M.A.
For prospectuses and all particulars apply to the Rev. the Vice-Principal.
N.B.—All the Pupils are resident in the College.
The next Term will commence on Thursday, the 19th of September.

SAFE AND PROFITABLE MINING INVESTMENT.
MR T. E. W. THOMAS, 16 Hackins Hey, Liverpool, transacts business in every description of Mining property, and can recommend at the present time as secure and good stock a few Shares in the best DIVIDEND MINES, as also in Mines promising very early Dividends, which, at the present low prices now ruling in the market, cannot fail to be very profitable to an investor.
Mines inspected and reports furnished.

GLENFIELD PATENT STARCH, USED in the ROYAL LAUNDRY.
The Ladies are respectfully informed that this Starch is EXCLUSIVELY USED in the ROYAL LAUNDRY, and Her Majesty's Laundress says, that although she has tried Wheaten, Rice, and other Powder Starches, she has found none of them equal to the GLENFIELD, which is the FINEST STARCH SHE EVER USED.
WHEN YOU ASK FOR
GLENFIELD PATENT STARCH,
see that you get it, as inferior kinds are often substituted.
WOTHERSPOON and CO., Glasgow and London.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped
"G. and J. Deane, London bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

JOZEAU'S COPAHINE, or SACCHARATED CAPSULES.—Copaiba and Cubebs are, doubtless, the best remedies, but these drugs are of a repulsive taste and odour, and occasion colicky pains, nausea, and gastric disturbance. M. Jozeau has succeeded in rendering these valuable therapeutic agents perfectly innocuous by increasing, in his Copahine, all the curative properties. This preparation has been adopted by the Paris Academy of Medicine, after more than a thousand trials in Paris and the different London hospitals, viz., St Thomas's, Guy's, and St Bartholomew's, under the care of Messrs Lloyd, Poland, and Legros Clark, LANCET, Nov. 6, and Dec. 10, 1857. The Copahine, which is in form of a pretty pink sugar plum, effects a cure in about six days, either in recent or chronic diseases. 100 capsules, 4s 6d; post free, 5s 2d. Post-office order required; at G. Jozeau's, French Chemist, 49 Haymarket, London; 22 Rue St Quentin, Paris; and all the most important Chemists.
Under the Patronage of the Governments of Great Britain, Spain, Denmark, Brazil, Russia, &c., &c.

EASTON'S PATENT BOILER FLUID effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M. steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Xurrachee, and by engineers and manufacturers thro ghout the country.
Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

BRITISH AND NORTH AMERICAN ROYAL MAIL STEAM SHIPS, between LIVERPOOL and NEW YORK direct, and between LIVERPOOL and BOSTON, the Boston ships only calling at HALIFAX. The following, or other vessels, are appointed to sail from Liverpool, calling at CORK to receive the mails :—

Foord, 52 Old Broad street, London; D. Currie, Havre, and 12 Place de la Bourse, Paris; G. and J. Burns, Buchanan street, Glasgow; D. and C. M'Iver, Queenstown; or D. and C. M'Iver, 8 Water street, Liverpool.

BLACK BALL MONTHLY AUSTRALIAN CLIPPERS.

LONDON to MELBOURNE.

MARY SCOTT, A 1, 10 years, special survey, 1,100 tons, receiving goods at jetty, London Docks, until 29th July, unless previously full. This superb English-built clipper, constructed specially for the Australian trade, has just returned from her second voyage, and for speed, sound delivery of cargoes, and safe conveyance for fine and season goods, is unsurpassed by any vessel now loading; has full and spacious poop for passengers.

LONDON to SYDNEY.

ANNIE ARCHBELL, A 1, 10 years, special survey, 1,400 tons, to sail 10th August. This magnificent new English-built clipper, constructed under the special surveillance of Lloyd's surveyors, just returned from her first voyage, has established a character for speed and sound delivery of cargo unsurpassed by any vessel afloat.

LONDON to ADELAIDE.

CITY of MANCHESTER, A 1, 1,000 tons, will have quick despatch. This magnificent ship is now loading at the jetty, London Docks. Shippers and passengers are desired to inspect this beautiful vessel before making any engagements.

LONDON to QUEENSLAND.

Under arrangement with the Queensland Government. Free grants of land. Passage money, £18 and upwards. Packet for 25th August.

CLIFTON, A 1, 1,500 tons. This noble frigate-built English clipper has fine poop with spacious saloon, unusually lofty and well-ventilated between decks, and the accommodation for all classes of passengers is unsurpassed, well known in the passenger trade; and being the largest and finest on the berth, offers the best opportunity to passengers and shippers. Free land grants, under the Government regulations, to the amount of £30, given to all persons paying their own passage by this ship. All further information given by applying to H. JORDAN, Esq., representative of the Queensland Government; to JAMES BAINES and CO., Liverpool; all Agents for the Black Ball Line; and to T. M. MACKAY and CO., 1 Leadenhall street, E.C.

CREMORNE.—

The Fête for the Million!—For the BENEFIT of Mr JAMES ELLIS (original promoter of this truly-magnificent place of rendezvous and amusement), and last night of Mr T. B. Simpson's direction.

After an absence of long duration from the mother-country, in Australia, where he established with permanent success an Antipodean Cremorne, and various other gigantic sources of recreation for the colonists, Mr Ellis embraces the present congenial opportunity which Mr Simpson has handsomely afforded him, of a reunion with his friends and early supporters.

With respect to the Entertainments of this unique Day and Night Fête, not only will the ordinary and multifarious amusements of Cremorne be displayed in all their variety of form and excellence, but many additional wonderful and astounding novelties will be added to the attractions of the Monster Programme—being ovations of respect and friendship from professional friends anxious to compliment Mr Ellis on his return to the scene of his early successes, and comprising the highest amount of artistic talent.

THE UNIVERSAL PRIVATE TELEGRAPH COMPANY.

Incorporated by Special Act of Parliament, 24 and 25 Vict. (Royal Assent 7th June, 1861), by which shareholders are exempt from all liability beyond the amount of their shares.

Professor Wheatstone's Patents.

Capital £100,000, in 4,000 shares at £25 each.

DIRECTORS.

D. Salomons, Esq., Alderman, M.P., Chairman.
J. H. Dillon, E·q., Deputy-Chairman.
Joseph Cary, Esq.
William Fairbairn, Esq., C.E., F.R.S.
Dr Edward Frankland, F.R.S.
Frederick C. Gaussen, Esq.
Charles Wheatstone, Esq., F.R.S.

BANKERS.

London and Westminster Bank.

Notice is hereby given, that the call already paid of £25 per share of £100 on the shares subscribed in the late Company (dissolved and incorporated by the above Act) will be credited to shareholders pro-rata, as a payment of the first call of £3 on four shares of £25 each, issued in substitution for each share of £100; and that interest at the rate of £5 per cent. per annum will be allowed on the balance remaining in excess of call.

The powers conferred by the Joint Stock Companies Acts, under which the late Company was formed, having been found insufficient properly to develop or do adequate justice to this new system of telegraphic intercommunication, a special Act of Parliament has been obtained to effect that purpose.

The Directors feel justified in stating, on a careful examination of the business already done, and from the constantly increasing applications to rent wires, that a minimum net dividend of 10 per cent. may fairly be looked for. The expenses and outgoings are limited, and the experience already obtained enables them to make an accurate estimate of their amount. There is no expensive staff to keep up, and the very low rental fixed for the wires brings the advantages offered by the Company within the reach of parties of moderate means, and command business.

The prospectus and forms of application for shares may be obtained at the office of the Company, 3 Hanover square. LEWIS C. HERTSLET, Secretary.

ORIENTAL AND GENERAL MARINE INSURANCE COMPANY.

Incorporated pursuant to the Joint Stock Companies' Act 7th and 8th Vict., cap. 110, and to be conducted on the principle of Limited Liability.

Capital £1,000,000, in 40,000 Shares of £25 each.

Of which it is proposed to call up £100,000.

Deposit 10*s* per share, and £2 on allotment.

COURT OF DIRECTORS.

(With power to add to their number).

Alexr. F. Croom, Esq., King William street, E.C. (late of Shanghai).
R. Bottomley, Esq., Bridgefield Cotton Mills, Lancashire.
Thomas Cave, Esq., Moorgate street.
J. H. Mollwo, Esq. (firm of Mollwo, March, and Co., Leadenhall street).

Messrs Froom Brothers, Change alley.
Samuel Mocatti, Esq, 3 Bartholomew lane, E.C.

SECRETARY (pro tem)—A. H. Gunn, Esq.

TEMPORARY OFFICES.

London: 79 Lombard street, E.C.

ABRIDGED PROSPECTUS.

The Company is established for effecting the General Insurance of Shipping and Cargoes, also the Insurance of Bullion.

The Directors, on publishing the prospectus of the Oriental and General Marine Insurance Company, announce that, in consequence of the progress made since the registration of the Company, they are in a position to state that the allotment of the shares will be proceeded with at an early date.

A clause in the deed of settlement especially provides that every policy issued shall distinctly bear on the face of it that the capital and property of the Company shall alone be answerable for the settlement of its claims and engagements, and that no shareholders shall be liable beyond the amount of his or her share or shares in the stock of the Company.

Prospectuses may be obtained at the temporary offices of the Company, 72 Lombard street, London, E.C.

No application for shares will be taken into consideration unless a deposit of 10*s* per share be paid into the Company's bankers, to be allowed in payment of the first call, or returned in the event of shares not being allotted.

NOTICE.

ORIENTAL AND GENERAL MARINE INSURANCE COMPANY.

Notice is hereby given, that the Share List of this Company will be closed on Thursday next, the 1st day of August, after which the allotment will take place.—By order of the Board, A. H. GUNN, Secretary.

79 Lombard street, London, July 27, 1861.

NOTICE.

ORIENTAL AND GENERAL MARINE INSURANCE COMPANY.

The Directors beg to announce that they have secured the services of Mr Philip Secretan, of Lloyd's, as the Superintendent of the Underwriting Department of this Company.

COMPRESSED COAL COMPANY, LIMITED.

Incorporated under the 19th and 20th Vict., cap. 47; and 20th and 21st Vict., cap. 14, whereby the liability of the Shareholders is limited to the amount subscribed.

Capital £100,000, in 50,000 shares of £2 each, with power to increase. Deposit, 5s per share on application, 15s per share on allotment.

DIRECTORS.

CHAIRMAN—The Hon. F. Henry F. Berkeley, M.P., Bristol; Victoria square, Pimlico, S.W.
A. P. Clayton, Esq., Seven Oaks, Kent.
Sir James Dombrain, K.B., Dublin.

CONSULTING MINING ENGINEER for the West of England and South Wales Districts.
Alexander Bassett, Esq., C.E., Cardiff.

ENGINEER.—Mr J. D. Humphreys.

SECRETARY.—Mr W. Baldock.

OFFICES—14 and 15 St Swithin's lane, London, E.C.

COMPRESSED COAL COMPANY, LIMITED.

The object of this Company is to carry out the process of Compressing Small Coal into Blocks, without the admixture of extraneous cohesive matter: for this purpose the exclusive use of several valuable patents has been secured on very favourable terms, the proprietors having agreed to receive remuneration for the same, mostly in paid-up shares.

The attempt to bring into use the large quantity of slack, or small coal, annually wasted, has engaged the attention of many scientific and practical men, all of whom have admitted that the only mode by which this very desirable result can be obtained, is by consolidating it into Blocks. Numerous plans have been devised, and many patents taken out, to attain this object; but these plans, whatever merit they may have possessed, have more or less failed, from the inefficient or expensive nature of the process employed. A careful investigation of the nature of coal, and its component parts, has led to a more simple and economical method of producing Blocks from "small coal," not only unadulterated with extraneous mixtures, but cleansed from much impurity existing in the raw coal; and this is effected with a very moderate outlay, at a low rate of working cost.

The demand for compact fuel of a regular shape for maritime purposes, and for shipment, for the use of steam vessels on foreign stations, is very great, and has by no means been met by what has yet been done in this way. The objections to the various kinds hitherto made are avoided in the "Compressed Coal." This fuel consists entirely of the better portions of the "Pure Coal," and is free from any mixture of mud, pitch, tar, or worthless substances and deleterious materials, used to produce cohesion or make up weight, which, being found unhealthy and offensive, have caused artificial fuel to be forbidden on board passenger ships.

The first works for supplying the Metropolis will be erected on the banks of the Thames. The Company are now in treaty for a suitable site for the same.

The Company purpose erecting works at Bristol, South Wales, and in the North of England, where slack coal can be contracted for at the pit's mouth, thus enabling the Company to supply fuel for shipping purposes at a rate on a par with the best steam coals. These works will be principally devoted to the manufacture of fuel for maritime purposes, and will be situated at convenient shipping ports, at easy distances from the collieries. The Company will not limit their operations to these works, it being their intention to erect others in favourable localities.

The principal advantages possessed by the "Compressed Coal," are:—

1.—It is a Purified Coal, consisting of those particles which are known to be the best, divested of much of that property which in raw Coal produces smoke, and, escaping without being consumed, carries off a considerable portion of the carbon, preventing its combustion, consequently reducing the heating power, and creating a great and unnecessary nuisance. It is also freed from the stony portions, which, when melted, produce clinkers.

2.—It takes up less space than raw coal, its specific gravity being about 1.160, i.e., containing 72 lbs a cubic foot, a density which may be increased if required.

3.—It can be made into blocks of a size and shape convenient for stowage and all uses, not requiring to be broken, also of a rectangular form for stowage, at a small expense.

4.—It is less brittle than raw coal, the cleavage being destroyed, and the particles brought into more immediate contact.

5.—It will be found more productive of heat than raw coal, in consequence of being freed from these antagonistic ingredients. Peckstone, in his "History of Gas," p. 58, states "that it is well known among the manufacturers of gas, that the coke produced from the retorts is capable of giving out more heat after the gas is extracted from the coal than before it underwent such operation."

6.—It is obvious from the above that the "Compressed Coal," is peculiarly suited to maritime purposes, and adapted to all kinds of furnaces, boilers, locomotives, &c., &c., as well as house fires.

Advantages to Shareholders.

Householders, holding 20 Shares, will be supplied with fuel at a reduction of 10 per cent. on the regular market or selling price of the article for the time being.

Hotel Keepers, holding 40 shares;

Manufacturers, Brewers, &c., holding 100 shares; and

Railway and Steam Packet Companies, holding 600 shares, will also be entitled to the above-mentioned advantages.

Summary of Advantages to Shareholders and Consumers generally.

For Domestic Uses.—Freedom from smoke, dust, and impurities; while from its great cleanliness it can be placed in any part of the house. It emits great heat, burning freely and brightly, and with less liability of being extinguished. It can be made into blocks of all sizes, suitable for the drawing-room or kitchen.

For Maritime Purposes and Furnaces generally.—It occupies much less space than common fuel; and being divested of its impurities, does not waste, form clinkers, or make much smoke. It emits intense heat, and, unlike Anchracite coal, does not destroy the furnace bars. It is free from all danger of spontaneous combustion, and is made into convenient sizes and shapes for stowage.

The saving in price at which it can be supplied is so important a desideratum, that it cannot fail, combined with its superior qualities, to bring it into general use, and the low rate for which it can be made must leave a large amount of profit to the Shareholders.

There can be no doubt that the introduction of this fuel into general use will greatly reduce the nuisance arising from smoke in the Metropolis, and promote the health and domestic comfort of the inhabitants.

The Company will grant Licences to Colliery Proprietors and others at a low rate of Royalty.

Applications for Shares may be addressed to the Secretary, Brokers, and Solicitors of the Company, and must be accompanied either by a remittance, or a Banker's Receipt for the amount of 5s per share, on the number of shares applied for. Three months' notice of future calls will be given.

NORTHERN RAILWAY OF CANADA.

Second Preference Six per Cent. Bonds.

On and after 1st August next, a Half-yearly Dividend will be Payable on the above at this Office. The Bonds will be required to be left for three clear days before payment.

T. S. CUTBILL.

London Agency, 13 Gresham street, July 20, 1861.

MID-WALES RAILWAY COMPANY.

LOANS ON DEBENTURES.

The Directors of this Company are prepared to receive tenders for Debentures, under the Company's Act of 1859, at 5 per cent. per annum, for terms of 3, 5, or 7 years.—Applications to be made to Messrs Sheppards, Pelly, and Allcard, Stock-brokers, Threadneedle street, London, or to the Secretary of the Company, at the Company's offices, Shrewsbury.

R. S. FRANCE, Secretary.

EAST INDIAN RAILWAY COMPANY.—IRON BRIDGE SUPERSTRUCTURE.

—The Board of Directors of the East Indian Railway Company are prepared to receive Tenders for TWELVE SPANS of GIRDERS for the JUMNA (Delhi) BRIDGE. Specifications, drawings, and form of tender, upon which only tenders will be received, may be seen at the Company's offices. Tenders endorsed "Tenders for Iron Bridge Superstructure," must be delivered to the Secretary on or before Twelve o'clock at noon, on Thursday, the 15th August next. The Company is not bound to accept the lowest or any tender.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, 18th July, 1861.

EAST INDIAN RAILWAY COMPANY.—CONTRACT FOR ROLLING STOCK IRONWORK.

—The Board of Directors of the East Indian Railway Company are prepared to receive Tenders for 831 Sets of ROLLING STOCK IRONWORK. Specifications, drawings, and form of tender, upon which only tenders will be received, may be seen at the Company's offices. Tenders endorsed "Tender for Wheels and Axles, Springs," or as the case may be, must be delivered to the Secretary, on or before Twelve o'clock at noon on Thursday, the 15th August next. The Company is not bound to accept the lowest or any tender.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, 18th July, 1861.

DEBENTURES.—SCINDE RAILWAY COMPANY.

The Directors are prepared to receive applications for Debentures at par, in sums of not less than £100, for the unappropriated portion of the £83,000 Debentures about to be issued for the purposes of the Indus Steam Flotilla, bearing interest at the rate of 5 per cent. per annum, for five years, payable by Coupon at the banking house of Messrs Smith, Payne, and Smiths, No. 1 Lombard street.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council, as will appear on the face of the Bonds.

The Debentures are convertible into Indus Steam Flotilla Stock, or may be renewed for a second period of five years, at the option of the holder.

Forms of application may be obtained at the offices of the Company.—By order of the Board,

THOMAS BURNELL, Secretary.

Scinde Railway Offices, Gresham House, Old Broad street, July 9, 1861.

MONKLAND RAILWAYS.

TENDERS FOR STORES.—

The Directors of the Monkland Railways Company are prepared to receive TENDERS for the supply of—

Timber	White and Grey Cotton
Iron Castings	Waste
Ironmongery	Paints and Varnishes
Nails, Spikes, and Screws	Glass
Coal and Dross	Cordage
Oils, Tallow, and Grease	Leather Furnishings

The Contract to extend to Six or Twelve months, from 1st August next. Detailed schedules and specifications may be obtained at the Engineer's office, Moss Side, Coatbridge, after Monday, 15th inst.

Sealed offers, marked "Tender for Stores," must be lodged with the Secretary, at his office, 64 West Regent street, Glasgow, not later than Wednesday, 31st inst.

The Directors do not bind themselves to accept the lowest or any tender.—By order,

JOSEPH COCHRAN, Engineer and Manager.

Monkland Railways office, Coatbridge, July 11, 1861.

MADRAS RAILWAY COMPANY.

—The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary of State for India in Council. The interest is payable by coupon half-yearly at the Union Bank of London. Debentures as above are being issued by the Company of the two following descriptions:—

1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.

2nd. For a term of 4 or 5 years, and convertible at the option of the holder into capital stock of the Company, bearing 5 per cent. interest, guaranteed by the contract entered into with the East India Company.

Forms of application may be obtained at this office.—By order of the Board,

JAMES WALKER, Managing Director.

Company's offices, No. 33 New Broad street, London, E.C., April 30, 1861.

GREAT INDIAN PENINSULA RAILWAY COMPANY.

Notice is hereby given that, in pursuance of a resolution of the Board of Directors, the Shareholders of this Company holding shares upon which £10 per share have been already called up, are requested to pay a further call of £2 per share upon each share (making £12 per share) on or before the 14th day of August prox., at the London and County Bank, South Sea House, Threadneedle street, London; and if such call be not paid on or before the said 14th day of August, the holders of the shares will not be entitled to receive interest upon any portion of their shares so long as such call shall remain unpaid, but will, nevertheless, be chargeable with interest upon the arrears at the rate of 5 per cent. per annum, and the shares will become liable to forfeiture under The Companies Clauses Consolidation Act, 1845.

A letter for the payment of the call will be forwarded to each shareholder.

N.B.—The option of paying in full (the remaining £8 per share) upon any portion of their shares is continued to the shareholders. A letter authorising the Bankers to receive the payment may be obtained on application at this office. THOMAS R. WATT, Secretary.

3 New Broad street, E.C., London, 12th July, 1861.

THE GREAT NORTHERN LONDON CEMETERY COMPANY.

—Cemetery at Colney Hatch. Offices—122 High Holborn, W.C.

The Cemetery is now Open for Interments. It consists of 150 acres of ground (two-thirds of which are consecrated), in a picturesque and secluded situation, at Colney Hatch, within seven miles of town, and on the line of the Great Northern Railway, thus combining the advantages of ready communication with London by railway as well as by road.

A Train, appropriately fitted up, will run daily at 11 a.m., from the Company's Station, in the York road, King's Cross, direct to the Cemetery, for the conveyance of Funerals, Mourners, and Attendants, for whom separate waiting rooms are provided, both at the London Station and at the Cemetery.

The Scale of Charges, for Ground and Conveyance by Railway, is such as greatly to reduce the cost of Funerals.

The Company being anxious to afford the public every facility for inspecting the Cemetery, and the general arrangements for the conduct of Funerals, will issue a limited number of free Railway Tickets for the Present Month, for the Daily Train from the York road station.

Applications for the few remaining Shares, tariff of charges, and Free Tickets to visit the Cemetery, to be made personally or by letter, at the offices of the Company, as above.

HENRY P. HAKEWILL, Manager.

July, 1861.

EDUCATION.—

International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

LAMBERT BROTHERS,
Alpha Tube Works, Walsall, Staffordshire,
Manufacturers of
WROUGHT-IRON WELDED TUBES,
Iron, Brass, and Gun Metal Fittings for Gas, Steam, or Water;
Also of the Patent Metallic Tubular Bedsteads.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH
is the only STARCH used in
HER MAJESTY'S LAUNDRY.
And as some unprincipal Parties are now making and offering for Sale an Imitation of the
GLENFIELD STARCH,
we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.
WOTHERSPOON and CO., Glasgow and London.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross.
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

TRADE 6/P MARK.

BROWN AND POLSON'S
PATENT CORN FLOUR,
In packets 2d, 4d, 8d, and tins 1s, 5s, and 9s 6d.

Considerable extra advantage is allowed upon the sale of articles similar in appearance, to encourage their being recommended in place of Patent Corn Flour, to support which practice unscrupulous announcements are made use of. It is therefore respectfully suggested that Families should observe that no other kinds are substituted for Brown and Polson's, of which the LANCET states (July 24, 1858), "This is superior to anything of the kind known,"—an opinion indisputably confirmed by scientific tests and public appreciation.

BROWN and POLSON, Manufacturers and Purveyors to Her Majesty the Queen: Paisley, Manchester, Dublin, and London.

ATTIRE FOR JUVENILES.—The following, which are the most POPULAR STYLES of Dress for Juveniles, may be obtained in all materials at either of the undermentioned Establishments of E. MOSES and SON.

DR MARSTON'S LECTURES.—FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address Treasurer, Royal Institute, 369 Oxford street, London.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either, from the publisher, J. Allen, 20 Warwick lane; or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

FREDERICK DENT, Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

WARM WEATHER.—RIMMEL'S TOILET VINEGAR will be found a perfect luxury this weather, either used for the toilet or bath, or as a reviving scent for the handkerchief. A special uninflammable sort is prepared to be used in Rimmel's Patent Vaporiser, for purifying the air and fumigating sick rooms. (See Dr Letheby's report.)—Rimmel, Perfumer to the Queen, 96 Strand, and 24 Cornhill, London.

CHUBB'S PATENT SAFES—the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

ROWAN'S NEW PATENT FLAX SCUTCHING MACHINE.

Messrs JOHN ROWAN and SONS, York street Foundry, Belfast, have just finished and patented a new FLAX SCUTCHING MACHINE, which, in point of cheapness and efficiency, surpasses any machine yet made. It is simple in construction, occupies a small space, is easily driven and attended, and can be attached to any motive power. It is worked by two persons, and will clean from 35 lbs to 40 lbs of flax per hour, in a superior manner, and with a great economy of fibre. Descriptive particulars will be forwarded on application. The extremely low price of this machine brings it within the reach of every flax grower. Price £24, f. o. b., or at any of the Belfast railway termini. The machine can be seen at work on Tuesdays and Fridays, between eleven a.m. and four p.m., at the Foundry.

HEALTH AND HAPPINESS FOR the NERVOUS and DEBILITATED.—A single copy of a new medical work, written by one of the most eminent medical men of the present day, solely for the guidance and benefit of that class of sufferers who desire a speedy and private cure, with illustrative cases of parties who have been restored to health by following the advice laid down in this work, free on receipt of stamp.—Address to the Secretary, Institute of Anatomy, Birmingham.

TEETH.—No. 9 Lower Grosvenor street, Grosvenor square (removed from 61).—By Her Majesty's Royal Letters Patent.—Newly-invented Application of Chemically-prepared India-rubber in the Construction of Artificial Teeth, Gums, and Palates.—Mr EPHRAIM MOSELY, Surgeon Dentist, 9 Lower Grosvenor street, sole inventor and patentee. A new, original, and invaluable invention, consisting in the adaptation, with the most absolute perfection and success, of CHEMICALLY-PREPARED WHITE and GUM-COLOURED INDIA-RUBBER, as a lining to the gold or bone frame. The extraordinary results of this application may be briefly noted in a few of their most prominent features. All sharp edges are avoided; no springs, wires, or fastenings are required; a greatly increased freedom of suction is supplied; a natural elasticity hitherto wholly unattainable, and a fit, perfected with the most unerring accuracy, are secured: while from the softness and flexibility of the agents employed, the greatest support is given to the adjoining teeth when loose or rendered tender by the absorption of the gums. The acids of the mouth exert no agency on the chemically-prepared india-rubber, and as it is a non-conductor, fluids of any temperature may be retained in the mouth, all unpleasantness of smell and taste being at the same time wholly provided against by the peculiar nature of its preparation.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr GRANVILLE, F.R.S.—"Dr Granville has found Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LANKESTER, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and of a manufactured compound, in which the efficacy of his invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s capsuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE CONSIGNEES,
ANSAR, HARFORD, and CO., 77 STRAND,
London, W.C.

CAUTION.—Beware of Proposed Substitutions.

ENGLISH, SCOTTISH, AND AUSTRALIAN CHARTERED BANK.

LETTERS OF CREDIT ON THE BRANCHES are GRANTED on the most favourable terms. Bills on the Australian Colonies negotiated and sent for collection.—By order of the Court,

73 Cornhill, E.C. HENRY MOULES, Secretary.

SOUTH AUSTRALIAN BANKING COMPANY.

—Incorporated by Royal Charter, 1847.—Letters of Credit and Bills issued upon Adelaide, Port Adelaide, Gawler, Robe, and Wallaroo. Approved Drafts negotiated and sent for collection.

Every description of Banking business conducted with Victoria and New South Wales, through the Company's Agents. WILLIAM PURDY, Manager.

54 Old Broad street, E.C.

BANK OF EGYPT.—

Notice is hereby given, that an Extraordinary General Meeting of this Corporation will be held at the London Tavern, Bishopsgate street, on Monday, the 5th day of August, at One o'clock p.m. precisely, when the Directors will present a Report and Statement of Accounts, as audited, for the Half-year ending 30th June, 1861.

The Transfer Books will be closed from Friday, the 2nd August, to Monday, the 15th August, both inclusive.—By order of the Court,

EDWARD CHESHIRE, Secretary.

26 Old Broad street, London, 24th July, 1861.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, 30th Aug., 1851.

Paid-up capital, £1,260,000; reserved fund, £252,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Madras, Ceylon, Hongkong, Singapore, Mauritius, Melbourne, Sydney, Auckland, and Wellington, on terms which may be ascertained at their office. They also issue Circular Notes and Letters of Credit for the use of Travellers by the Overland Route. They undertake the agency of parties connected with India, the purchase and sale of Indian Securities, the safe custody of Indian Government Paper, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named dependencies.

They also receive deposits of £100 and upwards, repayable on a notice of 10 days, and allow interest thereon at 1 per cent. below the Bank of England minimum rate of discount, not falling below 2 per cent. nor rising above 5 per cent. Deposits subject to longer notices of repayment bear higher rates which may be ascertained at their office.

Office hours 10 to 3. Saturdays, 10 to 2.

Threadneedle street, London, March 23, 1860.

CHARTERED MERCANTILE BANK of INDIA, LONDON, and CHINA.

Incorporated by Royal Charter.

Paid-up capital, £500,000. Reserve fund, £50,000.

COURT OF DIRECTORS, 1861-62.

William Howard, Esq., Chairman.
George Garden Nicol, Esq., Deputy-Chairman.
George Palmer Robinson, Esq.
George May, Esq.
Donald Larnach, Esq.
William Sollory Grey, Esq.
David Trail Robertson, Esq., Manager, ex officio.
Alexander Anderson, Esq., Chief Manager (Absent).

The Bank negotiates and collects Bills and grant Drafts payable at Bombay, Calcutta, Madras, Colombo, Kandy, Singapore, Penang, Hong Kong, Shanghai, and Mauritius; issues Letters of Credit and Circular Notes for the use of Travellers by the Overland route, terms for which can be ascertained at the Head office in London.

The Bank will effect the purchase or sale of Indian Securities; undertakes the safe custody of same, and the receipt of Interest, Dividends, Pay, Pensions, and other Moneys, for remittance through the Bank or otherwise.

The Bank receives Money on Deposit, on which Interest will be allowed according to the length of time deposited. Particulars as to rates can be ascertained at the Head office, 52 Threadneedle street, London.

Office hours from 10 a.m. to 3 p.m.; Saturdays from 10 a.m. to 2 p.m.

52 Threadneedle street, London, E.C.

THE NATIONAL BANK.

Old Broad street, London, E.C.—July 23, 1861.

Notice is hereby given, that the Court of Directors of the National Bank have declared a Dividend on the paid-up capital of the Company after the rate of £8 per cent. per annum, for the half-year ending the 30th day of June, 1861; as also a Bonus of 15s per share, both free of income tax; and the warrants for the payment of the same will be ready for delivery on and after Monday, the 5th day of August, 1861, between the hours of Ten and Three o'clock, at the Company's office, Old Broad street, London, E.C.; and at the branches of the society in Dublin, Athlone, Athy, Ballina, Ballinasloe, Boyle, Carlow, Carrickmacross, Carrick-on-Suir, Cashel, Castlerea, Charleville, Clonakilty, Clonmel, Cork, Dundalk, Dungarvan, Ennis, Enniscorthy, Fermoy, Galway, Kanturk, Kells, Kilkenny, Killarney, Kilrush, Kingstown, Limerick Lismore, Listowel, Longford, Loughrea, Mallow, Midleton, Mitchelstown, Moate, Mountmellick, Mullingar, Nenagh, Newcastle county Limerick, New Ross, Rathkeale, Roscommon, Roscrea, Thurles, Tipperary, Tralee, Tuam, Waterford, Wexford, and Wicklow.

And further notice is hereby given, that the transfer books of the Company will be closed from Saturday, the 27th of July inst., until after the day fixed for the delivery of the dividend warrants, and no transfer of shares can be registered during that period.—By order of the Court of Directors,

H. B. HYDE, Secretary.

INLAND REVENUE OFFICE,

Somerset House—To all HAWKERS, PEDLARS, and PETTY CHAPMEN.

The Commissioners of Inland Revenue hereby give notice, that all Licences issued from this office on and since the 1st August, 1860, will expire on the 31st July instant; and that new Licences will be ready for delivery on the 1st of August next.

Every hawker found trading without a licence or with an expired licence will be prosecuted.

Every person heretofore licensed must, on application for a new licence, deliver up the old one, and persons not before licensed are to produce a certificate of character as prescribed by the Acts 50 Geo. 3, Cap. 41, Sec. 12, and 24 and 25 Vict., Cap. 21, Sec. 6, without which no new licence will be granted.—By order of the Commissioners, THOMAS SARGENT, Secretary.

NOTE.—Licences may be obtained at the Inland Revenue Office, Somerset House, London, or from any distributor or sub-distributor of stamps in any city or town in England or Wales.

PNEUMATIC DESPATCH COMPANY (LIMITED).

—Trial Experiments at Battersea.—The Public is informed that in compliance with the numerously expressed wish to that effect, the Directors have resolved to continue for some days longer the working of the experimental length of Tube at Battersea, and under arrangements which will admit of its being more generally seen.

The trials will accordingly be repeated on Monday next, the 29th inst., and four following days, between the hours of 2 and 5 p.m., and cards to view may be obtained by written application to the Secretary, at the office of the Company, 6 Victoria street, Westminster Abbey. T. G. MARGARY, Secretary

26th July, 1861.

N.B.—The ground can be conveniently reached from the Battersea steamboat pier, and the Battersea station of the West-end and Crystal Palace Railway Company.

NOTICE TO BONDHOLDERS.—

TURKISH SIX PER CENT. LOAN of 1854.—I, William Webb Venn, of London, notary public by Royal authority duly admitted and sworn, undersigned, do hereby certify and attest unto all whom it may concern that, in compliance with the stipulations of the general bond relating to the Imperial Turkish Six per Cent. Loan of the year 1854, the following numbers of CERTIFICATES of this LOAN, amounting to £40,150, were this day DRAWN by lot, on account of the Sinking Fund, by M. Amant Vital Dumas, notary, of the city of Paris, at the Turkish Embassy, in the said city, in the presence of His Excellency Vely Pasha, Ambassador of the Sublime Porte in France, of Edward Howley Palmer, Esq. (partner in the firm of Messrs Dent, Palmer, and Company), the agents of the said Loan, and of me the undersigned notary; which certificates are to be paid off at par on the 10th day of the month of October next. 171 Certificates, amounting together to the sum of £40,150

In testimony whereof I have hereunto set my notarial firm and official seal, to serve and avail where needful. Done and passed in the city of Paris, this 22nd day of July, 1861. In fidem.

WILLIAM W. VENN, Notary Public.

The holders of these certificates must present them on or after the 10th day of October next, either in London, at the house of Messrs Dent, Palmer, and Co., No. 11 King's Arms yard, Moorgate street; or in Paris, at the house of Messrs Bischoffsheim, Goldschmidt, and Co., No. 26 rue de la Chaussé d'Antin, who are authorised to effect the reimbursement thereof in capital and interest.

N.B. Certificates which are not presented within the delay of a year, reckoned from the period above fixed for their reimbursement, cannot, according to the conditions of the Loan, be paid subsequently, without a special authorisation from the Ambassador of the Sublime Porte in London or in Paris.

THE FRENCH AND GERMAN PROTESTANT COLLEGE,

Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

THE LANDS IMPROVEMENT COMPANY

(incorporated by Special Act of Parliament in 1853), 2 Old Palace yard, Westminster, S.W.—To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales, and in Scotland.—The Company advances money, unlimited in amount, for the following works of agricultural improvement, the whole outlay and expense in all cases being liquidated by a rent-charge for 25 years:—

1. Drainage, irrigation, and warping, embanking, enclosing, clearing, reclamation, planting for any beneficial purpose, engines or machinery for drainage or irrigation.
2. Farm roads, tramways, and railroads for agricultural or farming purposes.
3. Jetties or landing places on the sea-coast or on the banks of navigable rivers or lakes.
4. The erection of farmhouses, labourers' cottages, and other buildings required for farm purposes, and the improvement of and additions to farmhouses and other buildings for farm purposes.

Landowners assessed under the provisions of any Act of Parliament, Royal Charter, or Commission, in respect of any publicor general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses of the lands improved.

No investigation of title is required, and the Company, being of a strictly financial character, do not interfere with the plans and execution of the works, which are controlled only by the Government Enclosure Commissioners.

For further information and for forms of application apply to the Hon. William Napier, Managing Director, 2 Old Palace yard, Westminster, S.W,

W. P. CLIREHUGH, Manager and Actuary.
H. B. TAPLIN, London Secretary.

THE SCOTTISH WIDOWS' FUND and LIFE ASSURANCE SOCIETY is a purely mutual office, in which the whole funds belong to the members, and the profits are divided among them alone. Since it was founded in 1815, its history has been one of constant and increasing prosperity; and it is now, in point of funds, annual revenue, and number of members, one of the largest Life offices in the world. The security presented by the Society to its members and their representatives is of the most unquestionable character, while the returns made in the form of bonuses are, it is believed, not exceeded by those of any other similiar institution. The following is a

MEMORANDUM OF BUSINESS, BONUSES, FUNDS, AND REVENUE,
Extracted from the Society's detailed Prospectus.

	£
1. Total assurances issued	14,621,724
2. Total bonuses declar d	3,033,649
3. Sums assured and bonuses existing	10,886,591
4. Total claims paid exceed	3,600,000
5. Invested funds	3,601,764
6. Annual revenue	425,738

Forms of proposal, detailed prospectuses and reports, and every information may be had at the Head Office, or any of the Society's agents.

SAMUEL RALEIGH, Manager.
J. J. P. ANDERSON, Secretary.

SPECIAL NOTICE.

Proposals dated and lodged at the Head Office, or with any of the Society's agents, during the current year, will secure One Bonus more than those of later date.

LONDON HONORARY BOARD.

George Young, Esq., Mark lane.
Charles Edward Pollock, Esq., Barrister, Temple.

(With power to add to their Number.)

BANKERS.

Messrs Glyn, Mills, and Co., Lombard street.

SOLICITORS.

Messrs Bircham, Dalrymple, and Drake, 46 Parliament street, Westminster.

BROKERS,

Messrs Laurence, Son, and Pearce, Auction Mart, Bartholomew lane, E.C.

Temporary Offices—31 Threadneedle street, London, E.C.

PROSPECTUS.

It is manifestly of great importance to the commercial and general interests of the country, that increased facilities for insurance against Fire should be afforded to the public.

The business and profits of the established companies have largely increased of late years, and from the enormous extension of the trade and commerce of the country, and the growing appreciation of the advantages of insurance, it is evident that there is an abundant source of business for a new company.

Attention has been specially called to the subject by the step recently taken by the old insurance offices of largely increasing their rates.

There cannot be any doubt that the business of a Fire Insurance office can, with proper attention to the nature of the risks undertaken, and a due regard to their classification, be so conducted as to secure to the Shareholders an ample and safe return on their capital invested, without imposing an unduly onerous burden on the insurers.

Impressed with this belief, the Provisional Directors of the "MERCANTILE FIRE INSURANCE COMPANY," who are themselves largely engaged in commercial transactions, have determined on promoting the formation of the Company, in which the mercantile community will have the opportunity of taking a direct and immediate interest as Shareholders, and thus secure to the public that fair and moderate premiums should be charged, proportioned to the risks actually incurred.

So soon as the Legislature extends to Insurance Companies the operation of the present Law of Limited Liability, which governs all other companies, this Company will be registered under the Act. Meanwhile, in every Policy issued by this Company, the liability of the Shareholders will be expressly limited to the amount unpaid on the shares held at the time a claim is made on such policy. The large capital of the Company will secure an ample guarantee to the Insurers, while the Shareholders will be protected from the risk of an unlimited liability.

Prospectuses and forms of application for shares may be obtained of the Company's Brokers, Messrs Laurence, Son, and Pearce, Auction Mart, Bartholomew lane, E.C., or at the temporary offices of the Company, 31 Threadneedle street. A deposit of £1 upon each share applied for, must be paid to the Company's Bankers previously to the application being sent in. This sum will be returned if no allotment is made to the applicant.

MERCANTILE INSURANCES.

NORWICH UNION FIRE INSURANCE SOCIETY.

All policies effected with this office are entitled to participate in the Bonus periodically declared.

The business of the Company exceeds £68,000,000.

The duty paid to Government for the year 1860 was £81,332 9s 9d, and the amount insured on farming stock £9,988,368, thus placing the office Third in order of magnitude among the Insurance Companies of the United Kingdom.

The rates of premium are in no case higher than those charged by the other principal offices making no returns to their insurers.

For prospectuses apply at the Society's offices, Surrey street, Norwich; and 6 Crescent, New Bridge street, Blackfriars, E.C.

NORWICH UNION LIFE INSURANCE SOCIETY.

Instituted 1808.

SECRETARY—Sir Samuel Bignold.

The whole of the profits divided with the assured.

Ample security offered by an accumulated capital of £2,000,000.

One-half of the first five annual premiums may remain as a permanent charge upon policies granted for the whole duration of life.

The income of the Society is upwards of £237,000.

The amount insured is upwards of £5,078,000.

Since its commencement 32,700 policies have been issued, and £5,666,555 paid to the representatives of 6,854 deceased members.

The bonuses may be applied at the option of the assured as follows:—

As a bonus added to the policy, or the amount may be received at once—that is, its cash value, or it may be applied in reduction of the future annual premium.

The rates of premium are lower than those of some offices by nearly 10 per cent., a benefit in itself equivalent to an annual bonus.

For prospectuses apply at the Society's offices, Surrey street, Norwich, and 6 Crescent, Blackfriars, London.

WESTERN LIFE ASSURANCE and ANNUITY SOCIETY,
3 Parliament street, London, S.W.
Established A.D. 1842.

DIRECTORS.

Henry Edgeworth Bicknell, Esq., Upper Bedford place, Russell square.
Thomas Somers Cocks, Esq., J.P., Charing cross; Hereford street, Park lane; and Thames Bank, Marlow, Bucks.
George Henry Drew, Esq., Hibernia chambers, London bridge, and Caterham, Surrey.
William Freeman, Esq., Millbank street, Westminster.
Joseph Henry Goodhart, Esq., J.P., 3, 4 and 5 Ratcliffe highway, and Manor House, Upper Tooting, Surrey.
Edmund Lucas, Esq., Millbank street, Westminster, and Wandsworth, Surrey.
Frederick Boyd Marson, Esq., Brunswick place, Regent's park.
James Lys Seager, Esq., Millbank row, Westminster, and Carroun House Surrey.
John Bazley White, Esq., Blackheath, Kent.

ACTUARY.

Arthur Scratchley, Esq., M.A.

Annual payments to insure £100 at the undermentioned ages:—

	£ s d		£ s d
20	1 14 2	40	2 14 5
25	1 18 6	45	3 2 5
30	2 2 9	50	3 17 0
35	2 8 0	55	4 10 4

Partners in Firms are recommended to give attention to the moderate terms upon which joint life assurances may be effected.

The medical attendants of the lives proposed are always consulted, and paid for their reports.

BONUSES.—The rates of this society, when compared with those of other offices, will be found to give an immediate bonus to assurers, and, in addition, large bonuses are periodically declared out of the surplus profit. The next division will take place in 1865.

Agents wanted in the towns and villages of the United Kingdom where the society is not already represented.

ALLEN'S PATENT PORTMANTEAUS and TRAVELLING BAGS with square openings.

LADIES' WARDROBE TRUNKS, DRESSING BAGS, with silver fittings.

DESPATCH BOXES, WRITING and DRESSING CASES, and 500 other articles for home or continental travelling. Illustrated catalogues post free.

The Political Economist.

THE REDUCTION IN THE BANK RATE OF DISCOUNT.

THERE will be little doubt that the Directors of the Bank of England *were wise in reducing their rate of discount* from six to five per cent. Six per cent. is a very high rate for money—an anomalously high rate. It needs some exceptional circumstances to justify it, and at the present moment—though there are several critical considerations to which we shall presently advert—those exceptional circumstances can scarcely be said to exist. It is quite true that the Bank reserve is not so large now as on the 2nd of January, when the rate of discount was raised from five per cent. to six.:

	£
The reserve of notes and coin in Banking Department is	6,548,768
— — — was on Jan. 2	6,616,244
Total coin and bullion now is	12,196,708
— — was on January 2	12,652,839

But, on the other hand, the liabilities of the Bank are much less now than they then were. This appears from the following figures:—

	July 31.	Jan. 2.
	£	£
Public deposits	3,701,952	7,275,906
Private deposits	12,194,650	13,224,494
Circulation, including Bank post bills	20,998,122	21,152,012

The total deposits, therefore, are now not sixteen millions, while they were more than twenty at the time when the rate was raised from five per cent. to six. It is probably true also that the market rate will again fall below the Bank rate—that the Bank will not get many more bills for the moment at five per cent. than it did at six. In certain states of the market, when money is plentiful and bills and other investments scarce, the outside rate will commonly be less than the Bank rate. As a rule, the dealers in Lombard street give something for their money, and consequently they *must* discount, they *must* lend; and will nearly always underbid the Bank of England, who do not pay a sixpence for their money, and are proportionately indifferent to its momentary employment. *But, nevertheless, the general conclusion is substantially* unaffected. The Bank should follow the market rate unless there is a plain and clear reason to the contrary, and just now there is no such reason.

It is even possible that the delicacy of the money market may reduce the rate *still further*. Trade is somewhat slack, and a slight overplus of bills and short-time investments will, as we have often seen, greatly—almost strangely—affect the value of money. The market of Lombard street is a delicate one; a trifle too much money for the demand, or a trifle too little, will change the rate of interest very materially.

But the permanent circumstances which must affect the value of money are, perhaps, by no means more likely to reduce the value of money than to augment it. The harvest, though the accounts from various parts of the country differ, cannot be more than an average one; and will, in all likelihood, be somewhat less. The Indian loan will certainly remove some capital from this market. The American loan may probably take off [some too—though how much cannot be said easily. It is quite impossible that such a loan can ever be acceptable to the great body of the public. Rightly or wrongly, the ordinary holders of inconsiderable sums of money have of late chosen to invest it in 5 per cent. India Stock to an extent to which they never before invested in any security save Consols. But a loan to America at all times—a war loan to revolutionary America still more—will never be acceptable to most Englishmen. A few persons who have spare money which they do not very much care whether they lose or not, which is not essential to their ordinary habits or their daily comforts,—a few thinking persons who see, or think they see, further than their neighbours,—a few venturesome persons whom the excitement of speculation rather attracts than deters,—will be attracted by seven per cent., and will send their money across the Atlantic. But it is not likely that any large sums will be so abstracted. The classes of whom we have spoken are limited in number, and the amount of money they are ready to use in this way is even more limited. Still, to some extent, the influence of this loan as well as of the Indian loan will tend to raise the value of money.

A still greater influence in the same direction is the diminution in our resources. The failure of last year's harvest has seriously diminished them. The public returns, though they only tell of a few facts, show that this has been the case, and if we could penetrate deeper into the hidden pecuniary secrets of the country, we should unquestionably find that the present scantiness of our available resources was far greater than the surface of business indicates.

The deposits of the Bank of England now are—

	£
Public	3,701,952
Private	12,194,650
	16,906,602

This time last year they were—

	£
Public	4,234,969
Private	14,717,654
	18,952,62

being a reduction of two millions. If we could obtain reliable returns of the country banks in the agricultural districts, we should probably see even a greater proportional diminution.

The circulation of the United Kingdom (Scotland excepted) is likewise much less than it last year was.

	1861		1860.
	£		£
Bank of England circulation, including Bank post bills	20,998,122	...	22,777,539
Private and Joint Stock banks in England	5,746,423	...	6,417,158
Irish banks	5,819,566	...	6,511,687
Scotch banks	4,284,782	...	4,263,174
	36,848,893	...	39,969,558

showing a diminution of 3,120,665*l* in the circulation, and consequently in the disposable pecuniary resources of the United Kingdom.

On the other hand, the state of trade will be unfavourably affected by the American war. We may be in temporary difficulty from the scarcity of American cotton, though not in utter ruin, as the Southern States have absurdly imagined. And it is possible that this cause may be hereafter, as it has lately been, enough to counteract all other causes taken together. But still the most prominent fact in our financial situation is our poverty. The reserve in the Bank of England is not one which will bear any reduction without an augmentation in the value of money, and while that is so, the money market must be, as we have lately found, very delicate.

THE FEW CERTAIN FACTS OF INDIAN FINANCE.

THERE are four questions of Indian finance very important to the English public at the present time:—

1st, What is the last reliable statement of Indian revenue and Indian expenditure?

2ndly, What are the prospects for the period subsequent to that statement?

3rdly, What loans are likely to be required for Indian purposes?

4thly and lastly, Are we pursuing a right course in refusing to give the Imperial guarantee for these loans?

At the risk of writing at considerable length, we shall attempt to reply to each of these.

It is evident that there is a *machinery* for blunders in Indian finance. The accidental blunders of individuals, the occasional incompetence of ill-chosen officers, will not account for the monstrous errors which have occurred. Of the year ending the 30th June, 1860, the last year as to which we have any sufficient means of comparing estimates with reality, "the estimated amount of the expenditure was "46,690,000*l*; the actual expenditure, 50,475,000*l*; the "estimated revenue, 37,796,000*l*; the actual revenue, "39,705,000*l*; the anticipated deficit being thus in round "numbers, 9,000,000*l*; the actual, 10,770,000*l*; while the "actual income was larger than the estimated by about "2,000,000*l*, and the actual expenditure more than the "estimated by about 3,500,000*l*. That appeared to be in-"credible, but no explanation of the matter had been sent "from India."

Again: we not long since called attention to the singular discrepancy between the account given at Calcutta by Mr Laing and the account given in London by Sir C. Wood of the very same figures. Mr Laing said that the expenditure of India was more by 213,000*l* in 1860-61 than it was in 1859-1860; Sir Charles said it was 5,635,000*l* less; showing a difference of more than five millions and three quarters in the reckoning of the two. As Mr Laing has returned to England, they have been able to discuss the discrepancy, and Sir Charles Wood now very calmly tells us that Mr Laing was misled by the official figures of the *Calcutta Gazette*, which turned out to be wholly erroneous, and gives us no further information. Yet surely a Finance Minister should have something better to allege on a question of some millions than that he was deceived by an incorrect publication of his own subordinates.

The cause of these errors we believe to be mainly as follows. The Calcutta financiers do not adequately distinguish between an estimate and a fact. According to every rational system, a Finance Minister should in his Budget speech give an accurate account of the year which is past, and found upon it an estimate for the year which is coming. At Calcutta, however, the Finance Minister cannot give a precise statement of the previous year. As to the last few months, he speaks according to an *estimate*. In the very last Indian Budget, Mr Laing spoke on the 27th of April upon facts up to February, and upon estimates as to the time after February. Perhaps, in ordinary times, and under a stationary system of finance, the difference between history and conjecture might not be primarily important. A good head of a Department could in most countries, under most circumstances, foretell both the credit side and the debit side of his account with some accuracy for some months in advance. But it is not so in India now. Every element of finance is undergoing an alteration. Every effort is being made to reduce the expenditure, and every effort, also, to increase the revenue. What is the probable result? Surely it is that every zealous official will anticipate savings which will never be made, and augmentations of income that will never accrue. The best Indian officials are bent—above all things bent—on making the "two ends meet,"—on making the income equal to the outgoings. Such eager men are commonly sanguine, and most of them will inevitably believe that by their own exertions in their own department they shall get in money, and shall economise money, which, in fact, they will never gain or save. All estimates formed under such circumstances will probably contain great errors,—sometimes they will be even as monstrous as those which Sir C. Wood has explained to us.

When, indeed, we see the nature of an Indian Budget much that seems puzzling is explained to us. It is a *conjecture founded on a conjecture*. A Finance Minister in Mr Laing's position should have been able to estimate what would be in 1861-62 from what was in 1860-61. But he only had before him what it was *hoped* might be the case in 1860-61, and on that questionable basis he further hoped what might be in 1861-1862.

For ourselves, we must, after what has occurred, decline to place any reliance on Indian figures which contain an anticipatory element. It is true, we believe, that greater care is now taken than was formerly taken in making up the needful estimates; but as yet there is no greater correctness. When the estimates formed at Calcutta have been tolerably right for a few years, it will be reasonable to feel a certain confidence in them; but until they have been correct for a certain period, it would be foolish to have, and trifling to affect, even a modified confidence. On this ground we must decline to accept the accounts for 1860-61 which have been laid before Parliament: they were ordered to be printed on the 15th May, and are, therefore, grounded on much the same data as those of Mr Laing's Budget, with which it is an additional difficulty that they do not at all correspond. Such accounts cannot give us authenticated facts respecting what was spent and not spent in all India up to the 30th April. They *may* be true, but it would be unwise not to learn from recent experience. After such startling errors, we must see proof of Indian figures before we can place reliance upon them.

The remedy is in the hands of the Calcutta financiers. They should tell us *first* the facts. They should ground this year's Budget upon last year's experience. Perhaps it may not be possible for a financier to know exactly on the 30th of April what has been done later than the beginning of February; but, if so, let him stop at the beginning of February,—let him give us the actual outgoings and the actual incomings up to the last date that he knows them. Then we may be wrong in our conclusions, but at least we shall be accurate in our *data*.

What, then, are the last real *facts* from India? They are these:—

	1858-59.		1859-60.
	£		£
Expenditure	50,248,405		50,475,683
Revenue	36,060,788		39,705,822
Deficit	14,187,617		10,769,861

After the consolatory accounts which have been given to Parliament, these realised results do not look so cheerful as we might fairly expect, and we are far from saying that they represent the real truth of Indian finance at the present moment. We have no doubt that since the 30th of April, 1860, there have been great improvements, that the revenue has augmented, that the expenditure has diminished. We only say that there are no accurate data,—no figures which do not include a deceptive conjectural element—to any time later than this.

It seems, therefore, hopeless to say very much on our second question,—What are our prospects? As to Mr Laing's estimate of what may be in 1861-62, we decline to form an opinion until we know what has been in 1860-61. Sir Charles Wood estimates that the

	£
Expenditure for the latter period, 1860-61, has been...	46,067,996
Revenue — — — —	39,509,631
	6,558,365

which reduces the deficit on the preceding years by more than four millions. We have no doubt that large reductions have been made in the expenditure, but whether to the great

extent of four millions we cannot say, for the *data* do not exist. The corresponding estimate on which Sir Charles Wood relied last year, and which he published separately (Parliamentary Paper 498, September 1860,) as the basis for his financial statement, having been wrong by millions, we cannot be very sanguine as to this one. We have no doubt that large reductions in the military expenditure have been made, but the estimate for those reductions is 5,600,000*l* (which is partially swallowed up by augmentations in other charges), and we own we *wait* for confirmation of this large diminution within a twelvemonth.

In one respect our prospects are considerably worse than they were. Mr. Laing, in his official financial speech, depreciated the income tax, spoke as if it were needless and as if it were useless, and said he was going to discover a substitute for it—a shadowy sort of licence tax. We ventured to observe that this conduct was not that of a sagacious statesman or of a prudent man in private life. No wise Chancellor of the Exchequer abuses the tax he expects the people to pay: he reserves his objections till he takes off the tax; till he has provided an efficient equivalent. Similarly, few men of business speak depreciatingly of the business they are doing until they see their way to a better business. When Mr Laing's new tax was in a practicable shape, he would have been justified in proposing it in lieu of the measure of his predecessor; but until then he was not justified. The event proves this better than the most elaborate reasoning. Mr Laing has left India, probably for ever, without providing the expected substitute. He has censured what he found, but he has created nothing which he did not find. And though probably the income tax will continue as long as it is wanted—though probably no available substitute for it will be discovered,—yet it is a serious evil that it should be censured by an authority who was especially bound to have supported it. Indian finance can, as yet, throw away no resource, and it was singularly misjudged to weaken by needless speaking the practical efficiency of any measure.

On the whole, therefore, in the absence of reliable documents, we are thrown back on the general principles to which we have formerly had recourse. Of the productive power of India there can be no doubt. Of the probability that the American difficulties will stimulate that productive power, there can be but little doubt; and perhaps few will question that our political tenure of India is stronger than it has ever been, though now, as ever, the most experienced civil servants do not speak with that perfect confidence or unwavering certainty which the English public used to feel, and are beginning again to feel. Our Anglo-Indian Empire is an anomaly without doubt; but it is certainly a beneficial anomaly, and it seems to be an enduring anomaly. The resources of the country are very great, and there can be little doubt that the present pressure on these resources may be very largely diminished. The military expenditure even now is immense, and must be capable of large reductions. We have no doubt that, by efficient management, and a firm adherence to wise principles, the financial difficulties of India may be overcome. As yet, however, they have not been overcome. When our last real information closed, there was still a large annual deficit, and there are as yet only conflicting hopes and inconsistent estimates for all beyond.

Of the two remaining questions which we have mentioned, we will next week speak at length.

It is our anxious desire to be impartial in all matters relating to Indian finance, and we have therefore not mentioned Mr Wilson's name, even when most persons would have thought it natural to mention it. The time, indeed, is not yet come when his financial schemes can be duly estimated. The year for which he is primarily responsible is the year 1860-1861, and for that we have as yet only "estimates." But perhaps our readers will learn with some interest that *the last estimate on which Sir C. Wood says he can place reliance coincides exactly with Mr Wilson's estimate.* Mr Wilson expected that the deficit for 1860-1861 would be 6,348,000*l*; Sir Charles Wood says it has been 6,558,000*l*.

We lay before our readers the following figures, which are the best on the subject, and should be referred to in connection with the remarks which we have made:—

GENERAL ABSTRACT VIEW of the TOTAL REVENUES and CHARGES of INDIA, including the CHARGES disbursed in ENGLAND, for the Year 1859-60, and as estimated for 1860-61.

REVENUES AND RECEIPTS.	1859-60. £		Estimate. 1860-61. £
Land revenues	18,757,400	.....	18,146,551
Income tax	...	.....	803,550
Tributes and subsidies from native states	575,806	.....	546,925
Excise duties in Calcutta	51,036	.....	50,925
Sayer revenue	384,844	.....	337,392
Abkarry ditto	1,161,370	.....	1,187,564
Moturpha, Madras	109,242	.....	108,850
Trade taxes	110,183	.....	213,980
Miscellaneous receipts in the revenue department	263,332	.....	278,504
Customs	3,872,052	.....	3,768,677
Salt (exclusive of customs duty on salt imported)	2,926,436	.....	3,391,630
Opium	5,887,778	.....	5,638,699
Post office collections	661,505	.....	701,101
Stamp duties	737,527	.....	832,670
Mint receipts	392,892	.....	322,960
Marine and pilotage receipts	206,080	.....	130,982
Judicial receipts	441,468	.....	394,764
Contributions from native states on account of contingents	218,614	.....	252,862
Interest on debts due by the Nizam and on other accounts	62,081	.....	57,534
Miscellaneous receipts in the civil and political departments	550,194	.....	681,489
Ditto ditto public works department	725,304	.....	672,607
Ditto ditto military department	1,611,677	.....	988,415
Total revenues and receipts of all the presidencies of India	39,705,822	.....	39,509,631
Excess of expenditure over income	10,769,861	.....	6,558,365
	50,475,683	.....	46,067,996

EXPENDITURE.	1859-60. £		Estimate. 1860-61. £
Repayments:—Allowances, refunds, and drawbacks	162,972	.....	81,220
Charges of collections and other payments in realisation of the revenues, including costs of salt and opium, viz.:—Land, Sayer, Abkarry, &c.	2,141,528	.....	2,209,205
Income and trade taxes	1,498	.....	57,900
Customs	170,848	.....	169,466
Salt:—Cost	284,840	.....	467,580
Charges	328,378	.....	307,479
Opium:—Cost	579,196	.....	1,111,500
Charges	138,804	.....	157,416
Post office	480,637	.....	522,973
Stamps	37,856	.....	45,555
Allowances and assignments payable out of the revenues, in accordance with treaties or other engagements	1,047,803	.....	1,422,865
Allowances to district and village officers and enamdars, including charitable grants	1,164,041	.....	1,152,272
Total of the direct claims and demands upon the revenues, including charges of collection, and cost of salt and opium	6,478,396	.....	7,705,431
Charges of the civil and political establishments, including contingent charges	3,785,782	.....	3,684,451
Judicial and police charges	4,260,679	.....	4,004,500
Buildings, roads and other public works, including repairs and military buildings	4,365,185	.....	4,084,001
Military charges	20,909,307	.....	15,279,005
Indian navy and other marine charges	988,315	.....	856,870
Charges of the Eastern settlements, exclusive of charges of collection, and other payments out of the revenues	118,865	.....	131,411
Mint charges	193,181	.....	223,073
Loss by exchange on railway transactions	429,233	.....	473,324
Interest on debt	3,123,327	.....	3,186,819
Total charges in India	44,622,270	.....	39,610,885
Charges disbursed in England, excluding the value of stores supplied to India (Account, No. 19)	5,042,945	.....	5,384,340
Interest on railway capital, &c., guaranteed in India and in England, deducting net traffic receipts	810,468	.....	1,072,771
	50,475,683	.....	46,067,996

WILL ITALY HOLD TOGETHER?

THE latest accounts from Turin tell us that the loan of twenty millions, recently sanctioned by the Italian Parliament, may be considered secure. The great money houses of Europe have joined in the biddings; the loan is in favour at Paris; and although there is some little difficulty about the portions reserved for Italians, it appears to be rather formal than indicative of any distrust. The loan may be held to be "placed," and amounting as it does to nine months' revenue, the success of the operation is a conspicuous proof of European confidence in the new monarchy. The rate may be high when the resources of Italy are considered; but the ancient Empire of Austria could not contract at any price the loan which Italy has raised at a loss not greatly exceeding that incurred in some of our almost forgotten operations. Simultaneously, however, with this announcement arrive accounts of a kind the most discouraging to all true friends of Italian unity. The Neapolitan problem, which from the first has pressed so severely on the Italian Government, and which embittered the last hours of a statesman so brave and so sanguine as Count Cavour, is daily assuming broader and more dangerous proportions. The official accounts are still tinged with a not unnatural optimism; but private letters leave little doubt that Italy has to commence a task as difficult as that of her liberation, and requiring a longer time and a more sustained exhibition of energy. So grave, indeed, are the circumstances, that even thoughtful

men in Italy itself are beginning to doubt whether Lord John Russell was not in the right, whether dualism would not be the better as well as the easier solution; whether, in fact, Naples *can* be governed except by a Sovereign who attends solely to that one province. We need not say how bitter such a suggestion must be to every man who has watched the progress of the Italian struggle with hope or sympathy; and, as despondency is the most contagious of diseases, our readers may thank us for a brief but exhaustive statement of the facts on both sides of the question.

1. It is useless and injurious to deny any longer that the attempt to administer Naples from Turin has as yet signally failed. Of the four Governments which in rapid succession have followed the surrender of Gaeta, not one has fulfilled the first conditions of a civilised administration. Not only have they not linked the Neapolitan counties into the general framework of Italy, or remedied pre-existing disorders, or started the country on a career of improvement, or done any one of the many things the people of Naples trusted in them to do, but they have not even maintained the most customary social order. Without pressing too far the theory of the political hostility entertained by the peasantry towards the existing *régime*, thu much is apparently certain. An army of nearly a hundred thousand men, broken up into parties and scattered over the face of the country, is in arms against Victor Emanuel. In six of the fifteen counties of Naples social order cannot be said to exist. Throughout the Terra di Lavoro, Foggia, the two Calabrias, the Basilicata, and the Capitauala, &c., life and property are held at the mercy of bands of armed men who roam from village to village,—levy what contributions they please,—slay, torture, and even *burn* persons known to be well affected to the new *régime*,—put an end to all trade, —destroy country houses,—and generally inflict upon wide provinces the horrors which follow the sack of a great city. They fly, it is true, on the approach of the Royal forces, but only to reassemble and recommence devastations which no invading army that valued supplies would have the audacity to commit. Nine-tenths of these men profess to be Bourbonists, and, whether sincerely or not, declare that their primary motive is loyalty to the exiled family. They are supported by the priests, favoured by the peasantry, and led by men with at least some tincture of regular soldiership. With such bands the Government of Naples has heretofore proved itself wholly incompetent to deal. A few of the gangs have been broken up. A good many of the peasants who favour them have been shot. One or two small districts have been filled with soldiers almost as numerous as the population, and restored by that clumsy expedient to acquiescence which is officially called order. But the mass of the evil remains untouched. No civil measure has affected its sources, nor has any military measure impeded, except for short distances, its unpunished and alarming development. The Government has failed in maintaining true order even in the capital. Murders are as frequent in Naples as ever they were. The police is reported by trusted friends of the new Government to be almost as oppressive as that of the Bourbons, yet criminal societies like the Camoriste still levy black mail, and extend their protection to criminals with total impunity. Instead of calmly enforcing the law, if necessary by military rigour, the Government has busied itself with reconstructing society, and successively alienated the most powerful interests of the kingdom. The *doctrinaire* Farini first irritated the *amour propre* of a most sensitive race by "Piedmontising" the bureaus, and then completed the annoyance of the gentry by depriving them off-hand of their right, or asserted right, to property in the commons. The good Prince of Carignan, though an excellent Lord-Lieutenant for a province which needed only an honest ruler, was by no means the man to evolve order from anarchy. His best adviser, the Chevalier di Nigra, though an energetic and upright official, who will yet rise to high position, struck at the priests too hastily. He dissolved the monasteries without increasing the pay of the curés, and thus added at once the orders and the regular clergy to the ranks of the disaffected. The Neapolitan Government has thus the priests, the landlords, and the peasantry against it, while it has still formidable external foes to resist. We do not wish to press the theory of the "machinations" of Rome beyond all visible evidence. Men are very apt to believe in a sort of supernatural agency, and the power, if not the *malignity*, of the Camarillæ is possibly overrated. But it is undeniable that the presence of the ex-King at Rome provides a centre for discontent, and that either the King or the Papal Government finds funds with which to reward the insurgent leaders. There must be some men left in Naples, also, who, from one motive or another, are still heartily loyal to the exiled race, and would risk any not very serious danger to restore them to the throne. Add to this small but important class all the priests; all the disbanded, but not disarmed, soldiery; the large section of peasants who are at the priests' disposal; the number of gentry who, though not disloyal, are savagely discontented; and the immense class who prefer order to any form of freedom,—and we have a body of discontent sufficient to menace the longest established throne in Europe,—a ferment which in any Continental State would be held the forerunner of revolution.

2. We have stated the facts as frankly and with as little bias towards Victor Emanuel as Francis the Second himself could do, but there is a *per contra* apt to be overlooked. In the first place, though the *facts* we have stated are not exaggerated, the *bearing* of them probably is. It is excessively difficult for Englishmen, who in this generation have scarcely seen a serious riot, to estimate the degree of *aggressive* force which anarchy can exert. Though sometimes in exceptional places irresistible, it is often politically trifling. If Paris were in the condition in which Naples now is, the overthrow of the Empire would be imminent, while precisely the same condition of affairs would in Tipperary be almost devoid of political meaning. It is impossible for Englishmen on such a point to offer more than opinions, but ours are founded on wide observations, which have been, we believe, devoid of prejudice, and we cannot but think the political effect of Neapolitan disorders unconsciously overrated. We do not mean to deny that many, perhaps most, of the so-called brigands are more or less Bourbonists at heart. It is possible that if Naples were polled to-morrow, the old dynasty would be restored to power. But we deny that the feeling is strong,—that the insurgents are prepared to suffer *much* for their fancy,—that there is any of that kind of hostility which makes insurrection dangerous. The preference of the Neapolitans for the Bourbons is like the hatred of some Irishmen for the British Government, very strong and above all very loud, but such that it never prevents them accepting service, or induces them to abstain from enlistment, or urges them to refuse the taxes. The disorder is much more important as affording a pretext for French interference, or European reprobation, than as threatening the Government from within. Nor can Englishmen ever reason quite justly as to the social effect of brigandage. It is, perhaps, the one crime which has never appeared even momentarily in England, while it is one our vast realised wealth compels us to regard with horror. Those, however, who have lived where brigandage is common, know that it is often a crime which, though it stops progress, does not destroy society. It is only a class, and that a very limited one which is in danger of life: and the moveable wealth of a country like Naples is extremely limited. Unless the brigands destroy the crops or cut down the trees, their power over the wealth of a poor agricultural community is very restricted, while their influence in driving those they attack towards any political end, is greatly lessened by the hate of which they themselves are the cause. A pillaging visit from Roundheads makes a good many Cavaliers. Then, to deal with less abstract considerations, though four successive Governments have failed to restore order, there is no proof that every Government must of necessity fail. The Dictator never tried to secure order in the interior. Farini was a man specially unfitted for his peculiar *task*, and almost deprived of means. The Chevalier di Nigra committed a blunder at the outset, and had to be removed before his high administrative power had time to display itself. The Count di Martino, a nobler man than either of his predecessors, complains that he was not supported, and was certainly far too susceptible to comment, and too anxious for personal popularity. The work to be done is military, and in displaying his jealousy of Cialdini's military powers, he only

proved himself unequal to a very difficult situation. There is no proof whatever that a General equal to the occasion, and disposed to act without references, will fail to suppress the disorders. The first acts of General Cialdini exhibit a thorough comprehension of the special difficulty to be met. He has armed the National Guard,—that is, he has created a force as widely dispersed as the brigands with the strongest inducements to resist their attacks. Successful resistance daunts marauders of this kind as nothing else will, compels them to inconvenient concentration, draws off the floating villany of the district from their aid, and *renders it safe to split troops into small detachments*. There never was a district yet, not even in Spain, in which a resolute General could not maintain external order, and the sort of nerve which can maintain a guerilla war against all disadvantages is not to be found in these Neapolitans. There is every probability that General Cialdini will obtain military possession of the disturbed districts; and that once secured, the restoration of civil order is a comparatively easy task. Already the tide appears to be turning in his favour. The opposition of the Garibaldians, who, though not disloyal to the King, are bitterly hostile to the Administration, is already at an end, and they are thronging to assist in suppressing the disorders their petulance has helped to create. The latest accounts report the insurrection as everywhere yielding to Cialdini, and though a defeat of this kind will not subjugate either the priests or the peasantry, it will intercept that foreign support on which their political strength depends.

We still, therefore, venture to hope, that in spite of the narratives received from Naples,—in spite of the facts by which those narratives are supported;—in spite, above all, of the grave errors into which the Government of Turin has been betrayed,—the reaction in Naples will prove, like the Jacobite reaction which followed our own change of dynasty, an administrative annoyance rather than a national injury.

ENGLAND AND THE BELGIAN TARIFF.

It is certainly a curious fact that the prepossessions of Belgian Ministers, in commercial matters at least, seem to be in favour of France rather than England. Whether it is that the Belgian Administration feel towards France much as Mr Cobden and Mr Bright feel towards her,—that as she is by far the most formidable and the most probable enemy their country can have, it is well to cultivate her favour first,—whether Belgium feels so completely "at home" with England that she can afford to neglect us without fear of serious consequences,—the fact seems to be that Belgium does, in fact, take considerable pains to conciliate French commerce, and at least does not seem anxious to avoid alienating English commerce. Our export trade is subject to the conditions of the General Tariff of Belgium, while several other nations, France especially, have had special privileges accorded which put English merchants at a great disadvantage. The treaty of commerce between England and Belgium which was ratified in 1852, and which is, we believe, still in force, empowered British goods imported into Belgium under the British flag to be admitted into Belgium "at the same rate "of duty as if imported under the Belgian flag from the "place or in the manner most privileged under the General "Tariff of Belgium," except in one or two specified cases. But, unfortunately, this article is of little or no use to England, as many of her rivals, France especially, is admitted to special privileges under special tariffs which do not apply to English goods. We have, accordingly, frequently applied of late years to be admitted to the same privileges with France, but without any success as yet. First, we were told that as the Belgian treaty with France was soon about *to expire, it would* be well to wait for that period in order that the two tariffs might be arranged at the same time. When it was known that France was arranging a new treaty of commerce with Belgium, our Minister was instructed to apply to the Belgian Minister to be put on the same footing of privilege with France,—a request which, considering our political relations to Belgium, could scarcely be refused. Nor was it refused. We were told in January that the Belgian Government had no intention whatever of excluding us from any privileges granted to France. This assurance was repeated in May; but, nevertheless, the Belgian-French treaty was completed, giving very considerable advantages to France, and no mention was made of any similar concessions to England. When our Foreign Minister again applied for a concession of equality with French commerce to the English, the reply was that the Belgian Chambers had separated, that no law could be passed without their sanction, and that nothing the Ministry could do would be of any use without a law. This certainly looks a little like evasion—since, as Lord John Russell observed, there was no occasion for so early an adjournment, and it is of course quite open to the Government to engage to recommend to the Chambers at the earliest possible opportunity to concede equal privileges to England. We cannot wonder that our English merchants are taking alarm. We observe that they have just addressed a memorial to Lord Palmerston, in which they request that a special embassy shall be sent to Brussels and Berlin to demand that England shall be placed upon the footing of the most favoured nation both in Belgium and in the Zollverein. It is understood that the memorialists wish for the appointment of Mr Cobden, hoping that he will be as successful with the constitutional Governments of Belgium and the united German States as he has been with the virtually absolutist Government of France. This or some equivalent step is well worthy of the consideration of our Government.

The grievances to our merchants under the present Belgian tariff are really very considerable. French worsteds and woollen manufactures are now charged in Belgium with a duty of 225 francs per 100 kilogrammes, which is estimated as being about equivalent to 22 per cent. *ad valorem*, and this duty is to be reduced in October next to an *ad valorem* duty of 15 per cent., and again in 1864 it is to be reduced to 10 per cent. On the other hand, English woollens and worsteds are loaded with a duty of 348 francs per 100 kilogrammes, which is calculated as equivalent to a duty of 37½ per cent. according to Mr Heygate, and 35 per cent. according to Mr W. E. Forster, the member for Bradford. In either case a very high differential duty is levied against English goods, the difference alone amounting to at least 12 per cent. on the value, now, and in October to at least 20 per cent. on the value of the goods. Again, on French woollen yarns the Belgian duty is now 45 francs per 100 kilogrammes, and will in October be about 35 francs, while on English woollen yarns the duty is 116 francs,—leaving a difference of 71 francs now, and in October 81 francs per 100 kilogrammes in favour of French, as compared with English goods. Again, on French silk the Belgian duty is now 4 francs the kilogramme, and after October will be 3 francs, while on English silk it is 11 francs 60 cents. Nor is this all, the Belgian tariff on English goods is specific, and is levied according to a very complicated system. If the Belgian officer thinks that there has been any attempt at fraud in specifying the goods, he has power to levy a very heavy fine, the half of which goes to the custom house officers. Of course, under such circumstances, there are many grievances to English merchants. In future, the duty on the most important classes of French goods will be levied *ad valorem*, which will give the French merchants another and a great advantage over the English merchants.

It is certainly fair that these differences should be put an end to. There is no Power whose hearty good will is more necessary to Belgium than England. It may be, and it is, to her advantage to conciliate France. But she can never depend upon the aid of France to maintain her independence. If once isolated from England, the affection of France would be more likely to be shown by actual annexation than by any international aid. England, on the other hand, has not only guaranteed to Belgium its independence, but it is the avowed purpose of all our statesmen to watch jealously and ward off all that endangers Belgium. Under such circumstances, if we ask commercial equality with France in Belgium, pertinaciously enough, and in the right way, it cannot be long refused,—and it is both our right and our duty to do so. Whether a special messenger be sent for this purpose to Brussels or not,—we are sure that our Government ought to take the highest ground in demanding from Belgium what not only in common justice, but in both ordinary gratitude and gratitude of that prospective kind which has been defined to be "a vivid sense of favours to come," Belgium is bound to concede.

THE BOARD OF TRADE RETURNS FOR JUNE.

THE Returns of the Board of Trade for the month of June have just been published, and exhibit the satisfactory increase in our exports of 1,126,439*l*, or about 11¼ per cent. over the same period of 1860. The principal augmentation has been in cotton manufactures and cotton yarn, the declared value of these two articles being 785,000*l* more than last year, owing in some degree, however, to the increased price of the staple. Linens, silks, machinery, and iron, are also on the favourable side, while haberdashery, woollens, lead, and tin show a reduction. The principal feature in this return is the considerable falling off in the American trade, as will be sufficiently apparent in the following figures.

The total declared value of our exports in the month of June was—

	£
1859	10,665,801
1860	9,236,454
1861	10,362,893

The principal items in the present year being—

	£
Cottons	3,105,519
Cotton yarn	796,306
Haberdashery	221,646
Hardwares	302,342
Linens	315,842
Linen yarn	148,032
Machinery	370,569
Iron	999,392
Silks	193,477
Woollens	686,694
Woollen yarn	330,180

In most of the above articles, one of our greatest customers has been the United States, but the following comparison shows the effect exerted upon our international trade with that country by the outbreak of the civil war. Our exports to America were of—

	1860. £	1861. £
Cottons	141,875	10,743
Haberdashery	71,119	10,133
Hardwares	49,261	48,246
Linens	78,544	4,621
Iron	175,993	36,705
Silk manufactures	7,778	5,253
Woollens	205,944	21,282
	730,514	186,983

The decline thus shown is very large, and is probably below the truth, as in some items, such as linens, woollens, &c., only an approximate estimate can be formed from the mode in which the export tables are drawn up.

It must also be borne in mind that a comparison with the month of June last year is hardly just, since from the adoption at that time of a new regulation, giving a delay of six days to exporters to correct their entries, the returns then showed an exceptional falling off. If we turn to the exports in June, 1859, we find that, as regards America, many of the principal articles figured for double the amount at which they stood in 1860, and thus the decrease exhibited above is liable to be very largely swelled.

It generally happens, however, that a serious falling off in one part of our trade is compensated by increased activity in another. Thus, as regards cottons, a considerable increase has taken place in our exports to Italy, Brazil, China, India, and the British American colonies, the figures in the latter case being nearly the converse of the United States, viz., 11,456*l* in 1860, and 110,801*l* in 1861. It has been suggested that this augmentation may be attributed to smuggling operations consequent on the Morrill tariff. The question, however, admits of easy explanation. For several years the continued failure of the crops and the crisis of 1857 have caused unexampled depression in the British colonies, which has at last been mitigated by the magnificent harvest of last autumn. With increasing wealth, the Canadian farmers are increasing their consumption, and hence there is a considerable augmentation in nearly every article exported to British America. As regards cottons, it must also be pointed out that the total of last year was much below the average. Owing to the working of the new treaty, China is also taking a larger quantity of our goods, and helping to fill the void caused by the United States. The East Indies are also increasing their consumption, and in almost all parts of the world our commerce appears to be rapidly and steadily extending.

With regard to the import trade, the principal features are the importation of cotton and grain. The number of bales of cotton that we received in the month of June, 1861, was 1,349,472, of which 927,813 were from the United States, and 350,273 from India. In the corresponding period of 1860 the total was 2,102,048 bales, of which 1,810,704 were from America, and 189,059 from India. The import of cotton from the two countries is thus proceeding in an inverse ratio, and appears to justify the belief that cotton production in India is merely a question of demand. Of wheat we continue to take large quantities from the United States, the latter having sent us 213,893 quarters out of the total importation in the month of 516,628 quarters. In the first six months of the present year our imports of wheat have been 3,664,529 quarters, of which 1,162,794 quarters came from America. The proportion is still greater as regards flour and meal, the United States figuring for 2,356,851 cwts out of the total imported of 3,677,461 cwts. In money value our imports of wheat and flour since the commencement of the year represent twelve or thirteen millions sterling.

THE COMMERCIAL TREATY WITH TURKEY.

WE give the earlier articles of the Commercial Treaty just concluded between England and Turkey, which is to come into operation on the 1st of October next. The remainder we will give in our next issue :—

Article 1.—All rights, privileges, and immunities, which have been conferred on the subjects or ships of Great Britain by the existing capitulations and treaties, are confirmed now and for ever, with the exception of those clauses of the said capitulations which it is the object of the present treaty to modify; and it is, moreover, expressly stipulated that all rights, privileges, or immunities which the Sublime Porte now grants or may hereafter grant to, or suffer to be enjoyed by, the subjects, ships, commerce, or navigation of any other foreign Power, shall be equally granted to, and exercised and enjoyed by, the subjects, ships, commerce, and navigation of Great Britain.

Art. 2.—The subjects of Her Britannic Majesty, or their agents, shall be permitted to purchase, at all places in the Ottoman dominions and possessions (whether for the purposes of internal trade or of exportation), all articles, without any exception whatsoever, the produce or manufacture of the said dominions and possessions; *and the Sublime Porte having*, in virtue of the second article of the convention of commerce of the 16th of August, 1838, formally engaged to abolish all monopolies of agricultural produce, or of any other articles whatsoever, as well as all permits *(teskeres)* from the local governors, either for the purchase of any article, or for its removal from one place to another when purchased, any attempt to compel the subjects of Her Britannic Majesty to receive such permits from the local governors shall be considered as an infraction of treaties, and the Sublime Porte shall immediately punish with severity any viziers or other officers who shall have been guilty of such misconduct, and shall render full justice to British subjects for all injuries or losses which they may duly prove themselves to have suffered thereby.

Art. 3.—If any article of Turkish produce or manufacture be purchased by British merchants or their agents, for the purpose of selling the same for internal consumption in Turkey, the said British merchants or their agents shall pay, at the purchase and sales of such articles, and in any manner of trade therein, the same duties that are paid in similar circumstances by the most favoured class of Ottoman subjects, or of foreigners engaged in the internal trade of Turkey.

Art. 4.—No other or higher duties or charges shall be imposed in the dominions and possessions of either of the contracting parties, on the exportation of any article to the dominions and possessions of the other, than such as are or may be payable on the exportation of the like article to any other foreign country; nor shall any prohibition be imposed on the exportation of any article from the dominions and possessions of either of the two contracting parties to the dominions and possessions of the other, which shall not equally extend to the exportation of the like article to any other country.

No charge or duty whatsoever will be demanded on any article of Turkish produce or manufacture purchased by British subjects or their agents, either at the place where such article is purchased, or in its transit from that place to the place whence it is exported, at which it will be subject to an export duty not exceeding eight per cent. calculated on the value at the place of shipment, and payable on exportation; and all articles which *shall once* have paid this duty, *shall* not again to liable to the same duty, however they may have changed hands, within any part *of the Ottoman* dominions.

It is furthermore agreed that the duty of eight per cent. above mentioned will be annually reduced by one (1) per cent., until it shall be in this manner finally reduced to a fixed duty of one (1) per cent. ad valorem, destined to cover the general expenses of administration and control.

Art. 5.—No other or higher duties shall be imposed on the importation into the dominions and possessions of Her Britannic Majesty, of any article the produce or manufacture of the dominions and possessions of His Imperial Majesty the Sultan, from whatever

place arriving, whether by sea or by land, and no other or higher duties shall be imposed on the importation into the dominions and possessions of His Imperial Majesty, of any article the produce or manufacture of Her Britannic Majesty's dominions and possessions, from whatever place arriving, than are or may be payable on the like article the produce or manufacture of any other foreign country; nor shall any prohibition be maintained or imposed on the importation of any article the produce or manufacture of the dominions and possessions of either of the contracting parties into the dominions and possessions of the other, which shall not equally extend to the importation of the like articles being the produce or manufacture of any other country.

His Imperial Majesty further engages that, save as hereinafter excepted, he will not prohibit the importation into his dominions and possessions of any article the produce or manufacture of the dominions and possessions of Her Britannic Majesty, from whatever place arriving; and that the duties to be imposed on any article the produce or manufacture of the dominions or possessions of Her Britannic Majesty imported into the dominions or possessions of His Imperial Majesty, shall in no case exceed one fixed rate of eight (8) per cent. ad valorem, or a specific duty, fixed by common assent, equivalent thereto.

Such rate shall be calculated upon the value of such articles at the wharf, and shall be payable at the time of their being landed, if brought by sea, or at the first custom house they may reach, if brought by land.

If these articles, after having paid the import duty of eight (8) per cent., are sold either at the place of their arrival or in the interior of the country, neither the buyer nor the seller shall be charged with any further duty with respect to them; and if such articles should not be sold for consumption in Turkey, but should be re-exported within the space of six months, the same shall be considered as merchandise in transit by land, and be treated as is stated in Article 12; the Administration of the Customs being bound to restore at the time of their re-exportation to the merchant, who shall be required to furnish proof that the goods in question have paid the import duty of eight (8) per cent., the difference between that duty and the duty levied on goods in transit by land, as set forth in the article above cited.

Art. 6.—It is understood than any article the produce or manufacture of a foreign country, intended for importation into the United Principalities of Moldo-Wallachia, or into the Principality of Servia, which shall pass through any other part of the Ottoman dominions, will not be liable to the payment of customs duty until it reaches those principalities; and, on the other hand, that any article of foreign produce or manufacture passing through those principalities, but destined for some other part of the Ottoman dominions, will not be liable to the payment of customs duty until such article reaches the first custom house under the direct administration of the Sublime Porte.

The same course shall be followed with respect to any article the produce or manufacture of those principalities, as well as with respect to any article the produce or manufacture of any other portion of the Ottoman dominions, intended for exportation: such articles will be liable to the payment of customs duties, the former to the custom house of the aforesaid principalities, and the latter to the Ottoman custom house, the object being, that neither import nor export duties shall in any case be payable more than once.

Art. 7.—The subjects of one of the contracting parties shall enjoy, in the dominions and possessions of the other, equality of treatment with native subjects in regard to warehousing, and also in regard to bounties, facilities, and drawbacks.

Art. 8.—All articles which are or may be legally importable into the dominions and possessions of Her Britannic Majesty in British vessels, may likewise be imported in Ottoman vessels, without being liable to any other or higher duties or charges of whatever denomination than if such articles were imported in British vessels; and reciprocally all articles which are or may be legally importable into the dominions and possessions of His Imperial Majesty the Sultan in Ottoman vessels, may likewise be imported in British vessels, without being liable to any other or higher duties or charges of whatever denomination than if such articles were imported in Ottoman vessels. Such reciprocal equality of treatment shall take effect without distinction, whether such articles come directly from the place of origin or from any other country.

In the same manner, there shall be perfect equality of treatment in regard to exportation, so that the same export duties shall be paid, and the same bounties and drawbacks allowed, in the dominions and possessions of either of the contracting parties, on the exportation of any article which is or may be legally exportable therefrom, whether such exportation shall take place in Ottoman or in British vessels, and whatever may be the place of destination, whether a port of either of the contracting parties or of any third Power.

Art. 9.—No duties of tonnage, harbour, pilotage, lighthouse, quarantine or other similar or corresponding duties, of whatever nature, or under whatever denomination, levied in the name or for the profit of government, public functionaries, private individuals, corporations or establishments of any kind, shall be imposed in the ports of the dominions and possessions of either country, upon the vessels of the other country, which shall not equally and under the same conditions be imposed in the like cases on national vessels in general. Such equality of treatment shall apply reciprocally to the respective vessels, from whatever port or place they may arrive, and whatever may be their place of destination.

Art. 10.—All vessels which according to British law are to be deemed British vessels, and all vessels which according to Ottoman law are to be deemed Ottoman vessels, shall for the purposes of this treaty be deemed British or Ottoman vessels respectively.

Art. 11.—No charge whatsoever shall be made upon British goods being the produce or manufacture of the British dominions or possessions, whether in British or other ships, nor upon any goods the produce or manufacture of any other foreign country carried in British ships, when the same shall pass through the Straits of the Dardanelles or of the Bosphorus, whether such goods shall pass through the Straits in the ships that brought them, or shall have been transhipped to other vessels; or whether, after having been sold for exportation, they shall, for a certain limited time, be landed in order to be placed in other vessels for the continuance of their voyage.

In the latter case the goods in question shall be deposited at Constantinople in the magazines of the custom house, called *transit* magazines; and in any other places where there is no *entrepot*, they shall be placed under the charge of the Administration of the Customs.

Agriculture.

USES, ABUSES, AND DEFECTS OF AGRICULTURAL SHOWS.

It cannot be questioned that great good has resulted from the annual exhibitions of the Royal Agricultural Society, and of the other great Societies of the United Kingdom. Farmers, stock-breeders, and implement-makers are brought together from all parts of the kingdom, much interchange of opinion takes place, and few persons engaged in the pursuits of husbandry can go away from one of these meetings without some increase of knowledge of what others in the same line are doing, and more or less of stimulus to additional exertions on their own part. Foreigners, too, who attend these shows generally become purchasers of stock or implements, and thus openings are made for the products of our agriculture and its associated manufactures beyond the limits of our own shores. Yet it is indirectly rather than directly that these benefits are obtained. The Society and its officers are said to be pragmatical, unaccommodating, and slow to yield to the suggestions of practical men,—that the Society constitutes, in fact, a sort of circumlocution office, which, though offering prizes and organising the gathering, rather impedes than assists the efforts of the practical agriculturists who would avail themselves of the opportunities offered by the annual meetings. Thus the shrewd instincts of the North-country farmers have led the Yorkshire Society to adopt the practice of judging the live stock in public. The assembled crowd can see the examinations made by the judges of each class of animals, the gradual rejection of the most inferior, and the tests, touchings, and measurings applied to those of the highest merit, and between which there is a very close competition. There can be no doubt that the exhibitors and their friends are far better satisfied with the results of a public judging of the stock than with the awards made in private examinations; while farmers, who witness the process of examination and decision, derive much instruction therefrom. Yet, though this has been pressed on the attention of the Council of the Royal Agricultural Society, they have resisted or disregarded the pressure. It is true that at the recent show of stock at Leeds, the judges of cattle not having completed their examination before the time fixed for the admission of the public, the latter portion of their examination was conducted in public, and, as we hear, without any inconvenience to themselves, and with much satisfaction to the onlookers. Then the delay which takes place in affixing the awards to the prize and commended animals has been much complained of. These are defects which ought to be and might be easily corrected.

There are abuses incident to the stock shows not so easily dealt with. Thus, cattle must be made so fat in order to have the slightest chance of successful competition that they are often rendered unfit for breeding purposes. And breeders regard exhibiting very much in the light of a sacrifice of some of their stock to make known the merits of their herds. Remedies for this evil have often been talked about, but no remedy has been found. We can suggest none; for let two bulls or two cows be in every other respect equal, the fattest is sure to win. It is said that quality, as indicated by the touch, almost invariably carries off the prizes and commendations in the cattle classes, in comparative disregard of symmetry. Colour, too, especially the dark roan at present so fashionable, is reputed to have something more than its due weight with the judges of Shorthorns. Yet these are the chances and difficulties exhibitors must make up their minds to face.

There is another class of abuses which may be more readily dealt with. For instance, at one time great suspicion existed whether

the ages of the pigs exhibited were correctly stated in the certificates of the breeders; but, now, we learn that veterinary inspection of the teeth has put a stop to such frauds. In the sheep classes there is a prevalent fraud of another sort. Mr Beale Brown, often a successful exhibitor of Cotswold sheep, stated, at the Leeds dinner, "That some alteration in the regulations of the Society, in regard to the feeding and clipping of sheep, was necessary. With regard to feeding, every one is now aware that, except animals are shown fat, they had better be kept at home, so far as the chance of a prize is concerned. He was sure that no judge could understand what an animal was when it was overlaid with fat, and his own experience satisfied him that the most erroneous decisions were in consequence given. He on one occasion exhibited a horse fed naturally which did not take a prize, but having permitted his man to feed him up, the next year he carried off the premium, and was declared to have eclipsed all competitors. On another occasion he accidentally got hold of a great coarse-boned mare which was fed up with the same effect. It was just the same with sheep. If they wished to see the points of the animals they must feed them naturally, and clip the sheep a fortnight before the show, because if they were covered with fat from artificial food, or a thick coat of wool, it was impossible to tell what they were. He suggested, therefore, that there should be some regulation to the effect that all cattle and sheep sent for exhibition should be fed upon purely vegetable food, and that the exhibitor and his servant should be required to make an affidavit that they had not used either corn, cake, or drugs." To this the President said it was the intention of the Council to obtain in writing the opinions of practical breeders as to the best means of checking the practice of overfeeding. The trimming of sheep is carried so far that inferior sheep, dexterously trimmed, were placed over more symmetrical animals, and persons who examined some of the Cotswold and Shropshire tups at Leeds, had detected parts of the fleece more than twice as long as other parts, and that the beautiful level back was sometimes due to a judicious use of the shears. This ought to be put a stop to with prompt decision.

A great feature of the Leeds implement show consisted in the exhibition of steam ploughs and cultivators, and the numerous orders said to have been given for these implements prove that steam ploughing is rapidly coming into use; and the same remark applies to the mowing and reaping machines. The grass-mowing machine, being simpler in its operation, is more successful than the reaper.

Some of the great firms of implement-makers say that the trials of all the implements at these meetings are so imperfect as to afford little or no test of their real or relative merits. Messrs Ransomes and Sims, of Ipswich, who have declined to compete at the Society's shows, in their explanatory advertisement say the trials should be of much longer duration, and conducted at the season of the year when the implements under trial would be used in the practical operations of the farm. They also require that the judges should accompany their awards of prizes "by a report explanatory of the trials, and of the reasons which have governed the decisions of the judges." They admit such trials would be costly in time and money; but they would check "the incessant rage for mere novelty" of which they complain. Such complaints, however, it must be remembered, are those of first-rate and established manufacturers, who have profited not a little from the opportunities afforded to them by the Society's shows, and it is perhaps more natural than reasonable that they should now seek to stay the demand for novelties which young and enterprising houses in the trade as naturally desire to supply. No doubt the trials must in some degree be imperfect, but the experienced farmer will gather, in some measure, from the holiday trials of July what a given implement will perform on his own farm and at the proper season, and will take the trial for what it is worth. It will often determine him to try a new implement, which may or may not afterwards justify its selection

Literature.

COMMERCIAL LITERATURE.

CHAMBERS'S SOCIAL SCIENCE TRACTS. TRADES UNIONS, STRIKES, AND LOCKS-OUT. W. and R. Chambers, London and Edinburgh.

IF anything could cure the working classes of their strange infatuation on the subject of strikes and trades unions this pamphlet might prove effectual. Its principal facts are drawn from the unimpeachable testimony of the report presented to the National Association for Promotion of Social Science in 1860 by a committee appointed to investigate the subject, and its language is convincing, plain, and temperate. It is almost superfluous to state that the tract condemns the erroneous views upon labour entertained by apparently the great majority of the working classes, and that it clearly points out not only the suffering and demoralisation caused by the attempts of trades unions to forcibly regulate the price of a marketable commodity, but also shows, as might naturally be expected, their utter futility for the purpose they have in view.

POLICE TORTURE AND MURDER IN BENGAL. Calcutta: Savielle and Cranenburgh.

THIS pamphlet contains the judicial proceedings taken against the native police of the district of Burdwan, for two gross outrages committed in endeavouring to extort the confession of theft, which in one case was followed by death. It is satisfactory to record that the delinquents were brought to justice, and received the punishment due for their crimes. The facts appear to have been published by the indigo planters of Bengal with a view of showing that the Lieutenant-Governor of the Presidency, while ready to denounce the planters as guilty of unjustifiable oppression, allows the most flagrant acts to pass within 70 miles from Calcutta without in any way bringing to account the European Commissioner of the district.

ARTHUR YOUNG'S FARMERS' CALENDAR. Part IV. Routledge, Warne, and Routledge, Farringdon street. 1861.

THE fourth part has just been issued of the above useful work, which has already run through twenty editions, and is now rewritten and extended by Mr J. Chalmers Morton. Its subject is described as the "business necessary to be performed on various kinds of farms during every month in the year."

GENERAL LITERATURE.

THE ROYAL ATLAS OF MODERN GEOGRAPHY: exhibiting, in a Series of entirely original and authentic Maps, the Present Condition of Geographical Discovery and Research in the several Countries, Empires, and States of the World. By ALEXANDER KEITH JOHNSTON, Geographer to the Queen for Scotland. With a Special Index to each Map. William Blackwood and Sons, Edinburgh and London. 1861.

ALL who are acquainted with the admirable maps of Physical Geography issued by Mr Keith Johnston some years ago, will be prepared to expect much from this new Atlas of general modern geography. It is a magnificent volume, to whose preparation and production the author has devoted nearly five years of constant labour, while it embodies the results of his systematic study of practical geography for more than a quarter of a century. The Atlas consists of 48 maps, of which five relate to Great Britain and Ireland, nineteen to Continental Europe, nine to Asia and Oceania, four to Africa, and eight to the Americas; two maps of the World and a large map of the Basin of the North Atlantic completing the series. The engraving is exquisite, and the type remarkably distinct. All the hydrography is in blue, an arrangement which greatly simplifies the labour of hunting out any required name, besides facilitating the student's comprehension of the physical features of any district before him. For instance, in the Liim Fiord in Denmark, or in the windings of the Danube in the neighbourhood of Vienna, the contrasts of colour at once show the relative proportions of land and water with a distinctness unattainable where rivers are marked in the same black hue as the roads and railways, or where the inland fiords are not coloured at all. The map of the North Atlantic Basin, showing all the ocean currents, and the elaborate map of Switzerland, are gems of modern physical geography. The latter, with its clearly-marked mountain-slopes, and the blue streams threading every valley, is almost pictorial, and will be found very useful by tourists. In the large double map of Scotland, Mr Johnston has patriotically enlightened our ignorance by appending a glossary of Scottish words that enter into the names of places, such as aber, inver, monadh, strath, &c. Both the English and Scottish maps are especially full of information, containing the names of many antiquities, cairns, abbeys, Druid circles, Roman camps, "Flora Macdonald's grave," &c., and also lighthouses, distinguished in each case as fixed, flashing, or revolving. The maps of Italy embody all the territorial changes up to the present time, and explanatory notes are printed off the coast at certain points, stating what extent of country was included in the ancient Latium, Emilia, Umbria, &c. The maps of Africa include the latest discoveries of Burton and Petherick, and the map of North America embodies the last facts ascertained by M'Clintock, including the site of the Franklin relics.

In comparing this beautiful and valuable Atlas with previous collections, every one must be struck, not only by the immense advances in geographical knowledge, but by the greatly-increased power of representing that knowledge to the eye, in the course of the last thirty years. At the same time we cannot but regret that while so much has been added to our Atlases, a few things have been taken from them which they can ill spare. For instance, the chain of volcanoes in Kamschatka and the Indian Archipelago, and the great volcanoes of Mexico and Owhyhee, are precisely the features we should have reckoned on finding in an Atlas by Keith Johnston; but they are represented by a very small fraction of the real number. This is a practical inconvenience which will unfortunately tend to prevent the new maps from quite superseding older ones. We also regret that many parts of the world are only given on a comparatively small scale, when larger ones would have been often acceptable. The map of New Zealand is particularly defective; and why is the Bahr-el-Abiad or White Nile marked (S.E. of the Lake of the Gazelles) as the Tubiri? We must not

conclude without mentioning that an index *of* names is printed after each map, a plan which will probably be found much more useful than a general index.

AWAS-I-HIND; or, A Voice from the Ganges; being a Solution of the True Source of Christianity. *By an* INDIAN OFFICER. London: George Manwaring. *1861.*

THE writer of this work tells us that he has passed "the monotonous tedium of an Indian officer's life" "in a critical examination of the Christian religion." The book appears to be chiefly derived from several well-known works on the anti-Christian side, which relate merely to the external and credal aspects of the subject. These works are quoted in a very loose sort of way, without full titles or distinct references, so that readers who are new to that line of study will seldom gather much from the quotations beyond the fact that some writer, in some part of some book, agrees with the present author in disbelieving some Christian statement of fact or doctrine. Even of the religious school of non-Christian Theists, such as Parker, Newman, Greg, &c., the author appears to know nothing. The "solution of the true source of Christianity" which he offers us is somewhat ingenious. He supposes the founder of the Christian religion to have been the same person as the fanatic who is described by Josephus as "one Jesus the son of Ananas, a plebeian and husbandman," who went about crying "Woe, woe, to Jerusalem," and was killed by a stone from a Roman engine during the last siege of the city,—a hypothesis which may stand for what it is worth. The only real contribution to the criticism of the New Testament which we can find in this book is a curious anecdote which is worth quoting:—

> The belief of the possession of devils, in the human body, is as prevalent in the East at the present day as in the time of the Apostles; and the Brahmins are believed to possess the power of expelling them by incantations and prayer. The surgeon of a Sepoy corps, in illustration, related to me, that one day his native assistant reported that a Sepoy was seriously ill, possessed of the devil, "*Sheitan ooske budun pukra.*" On visiting him, the surgeon found him seated on the ground, foaming, raving, and talking incoherently with great excitement. He was surrounded by a crowd of Brahmins and others, repeating their *Munturs* or incantations to drive out the evil spirit. They begged the surgeon not to interfere at present, promising to hand the patient over to him if they failed. In a short time, the native assistant came to say, that they agreed to leave the case in his hands. The doctor accordingly went to the man, called for his Cutora or drinking cup filled with water, and passing his hand over it, sprinkled a pinch of tartar emetic into the cup, repeating three times the name of the Hindoo god, *Ram*. The man drank off the whole at a draught, the surgeon commanding the devil to come out of him. Presently his raving and violence ceased, he became quiet, and silent, and sick, and copious vomiting ensued; the Brahmins declaring that each time a devil was expelled. Shortly after the man quietly gathered himself up, quite restored, and returned to his friends. *And the multitude went away amazed and wondering!*—(Pp. 113-4.)

POPULAR EDUCATION IN ENGLAND: Being an Abstract of the Report of the Royal Commissioners on Education. With an Introduction and Summary Tables. By HERBERT S. SKEATS. Bradbury and Evans, 11 Bouverie street.

THE laborious task of the Royal Commissioners is at last ended, and their report of the state of education in England and Wales is before the public. The interest felt by all classes in the general diffusion of education spreads wider and deeper every year, and a degree of eagerness will be felt by most people to know the conclusions arrived at by such able and competent judges as those who have for the last three years applied themselves to the investigation of the subject. Six goodly octavo volumes however may well act as a check to the most lively appetite for knowledge; and many no doubt sincerely desirous of learning the true facts of a matter of universal importance will be deterred by having to seek them out for themselves from a voluminous mass of evidence. Some work therefore which brings the desired information within moderate compass and the reach of those not given to the study of blue books cannot fail to be appreciated, and Mr H. S. Skeats' "Abstract of the Report of the Royal Commissioners" is at once comprehensive, concise, and clear. All the really important points either as to matters of fact or of suggestion are compressed into the compass of one small volume. Yet the arrangement is so good that there is no consequent confusion or obscurity; while the outline of what has been done, is doing, or is proposed to be done for the formation of a sound and wide-spread education among the people, is simple, brief, and intelligible, without being bald and uninteresting from its brevity. It is a useful work well done.

SELF-CULTURE; a Complete Guide to Self Instruction. By JOHN R. BEARD, D.D. Manchester: John Heywood, 143 Deansgate. London: Simpkin and Marshall; and Houlston and Wright.

THIS "manual for the self-taught" is unnecessarily diffuse, and displays great want of method; but we are not disposed to dwell on the faults of a work of which the purpose is so excellent, and the general contents so useful. The subject of self-instruction is divided into three parts:—"What to Learn, How to Learn, and When to Learn,"—copious advice being given under each head, largely interspersed with anecdotes and short biographies of self-taught persons. Many of these are contained in autobiographic letters addressed to the author by the individuals themselves, and are very interesting. Dr Beard gives full lists of the books requisite for the different lines of study, usually appending the price of each work. His advice to the self-educating students for whom he writes is of a wholesome and sensible character, and we are glad to see that he counsels his pupils not to be turned from regular study by "the flood of periodicals," which, as he truly says, give rise so "superficiality of knowledge, scatteredness and infirmity of mind." This manual may be very useful to the earnest-minded artisans for whom it is designed, and we hope it may find the circulation which it deserves.

THE PLAY-BOOK OF METALS; including Personal Narratives of Visits to Coal, Lead, Copper, and Tin Mines; with a large Number of Interesting Experiments relating to Alchemy and the Chemistry of the Fifty Metallic Elements. By JOHN HENRY PEPPER, F.C.S., A. Inst. C.E., late Professor of Chemistry at the Royal Polytechnic, Author of "The Play-Book of Science." Illustrated with nearly 300 Engravings. London: Routledge. 1861.

THIS thick volume contains a large store of information, presented in a popular and entertaining form, and illustrated by a profusion of woodcuts, which are usually good, and sometimes very curious. They are, however, frequently introduced upon pretexts whose far-fetched ingenuity is too suggestive of book-making. The most interesting parts of the work are the long chapter on "Coal and Coal Mines" (which is made to include the outlines of geology and a discussion of divers geological theories, and is interspersed with illustrations of "the earth before the separation" of the old world from the American continent,—the primæval forests, the Dead Sea, the Pyramids of Ghizeh, &c., &c.), and the historical sketch of the alchemists. There is also at pp. 152-3, a very useful table of the fifty-one metallic elements, which not only presents their symbols and equivalents, but the derivation of their names (such as "Arsenic: *Arsenicon*, potent: Greek"), which will probably render those names much easier to retain. As an introduction to regular study, this "play-book" may be very useful as well as amusing to many young readers.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

The Minister of Finance publishes a new report to the Emperor on the subject of the subscription for the 300,000 railway bonds which the Government has had to issue owing to its inability to pay the Companies the subventions promised. The total number of subscribers for all France was, it appears, 189,767, and the quantity of bonds they demanded 4,695,413. The Minister has resolved to give one bond to 146,879 of the subscribers who asked for only one; also one to 34,574 other persons who asked for from 2 to 35; and to divide the remainder among the other subscribers at the rate of 2.79 per cent. of their demands.

Imperial decrees grant the privilege of conveying mails to the Compagnie Générale Maritime by the steamers it is about to establish between France, the United States, and the West Indies; also to the Company of the Services Maritimes des Messageries Imperiales on its lines from Suez to China, Reunion, the French possessions in the East Indies, and the Dutch and Spanish colonies. The latter Company has obtained from the Viceroy of Egypt a concession of land at Suez for constructing docks.

The shareholders of the Comptoir d'Escompte held their annual meeting yesterday. A report giving a favourable account of the operations of the establishment was read, and a dividend of 22f for the half-year ending the 30th of June was declared. This makes the total dividend for the year 44f. The report drew special attention to the fact, that the dividend was obtained notwithstanding the number of shares has been doubled since the 1st of January, and that the profits realised by the branches established at Calcutta and Shanghai are not counted.

The ironmasters of the Marne are, it appears, still sorrowing over the reduction of the import duties on iron, and refuse to be comforted. Moved by their complaints of having been brought to distress by the recent commercial changes, the Eastern Railway

Company lately offered to carry coal to their works at a greatly reduced tariff from the pits in Prussia, provided they would endeavour to obtain a reduction of price in that country, and also a reduction in the import duties in France. A more advantageous offer could not have been made to them, seeing that cheap fuel is the principal thing they require to sustain competition with foreign iron; but they answered that though they were willing to solicit a reduction in the selling price, their principles forbade them to pray for a lowering of the Customs duties! Could stupidity go further?

It is stated on what appears to be good authority, that the Russian Government has made somewhat important concessions to the Great Russian Railway Company—namely, 1, to guarantee the payment in specie of interest of 5 per cent., or 25f per share, the payment to be effected at the will of the shareholder at Paris, London, Amsterdam, Berlin, or St Petersburg; 2, to supply the funds necessary for terminating the line from St Petersburg to Warsaw with the embranchment on the Prussian frontier, and that from Moscow to Nijni Novogorod, subject to the condition of the Company sharing with the Government, until its advances be paid, the profits above 5 per cent.; 3, to relieve the Company from the obligation of constructing the lines from Moscow to Theodosia, and from Kursk or Ourel to Liebau.

On the Bourse to-day there was a certain degree of activity, owing to the news from London of the reduction of the rate of discount by the Bank of England. The following are the quotations of the week :—

You are aware that the French Government every year publishes a large volume of statistics relative to trade and commerce. That of the present year has just appeared, and I shall have occasion hereafter to notice its principal features. For the present, I may state that it shows that the *actual value* of all sorts of merchandise imported into France *for consumption* was in the year 1860, 1,897,300,000f (75,892,000*l*); in 1859, 1,640,700,000f; and in 1858, 1,562,800,000f; whilst the *actual value* of *French articles* exported in 1860 was 2,271,100,000f (90,844,000*l*); in 1859, 2,266,400,000f; in 1858, 1,887,300,000f. In these items the precious metals are not included.

The Customs returns for July have been produced within the last few days. As regards imports, they are decidedly satisfactory, inasmuch as they show a very considerable increase in the quantities of the principal descriptions of merchandise taken out of bond for consumption in the first six months of the present year, compared with the corresponding periods of the years 1860 and 1859. Not to fill space by repetition of figures, it will suffice to direct attention in the following table to the items coffee, cotton, oleaginous seeds, coal, wool, pig iron, bar iron, &c.—articles, be it remembered, on which large reductions of duty have taken place either in virtue of Imperial decrees or of the commercial treaty with England. The amount of import duties, too, in spite of these reductions, is creeping up: it was 9,316,000f in June, whilst in the same month of last year it was not more than 11,969,000f, and in that of 1859 it was 18,667,000f: for the first six months of the present year the import duties were 55,470,000f; same period of last year, 69,181,000f; and in that of 1859, 95,207,00f. As to exports, it will be observed that, generally speaking, they present a decline.

The following is an account of the principal imports for consumption in France :—

	Six months of 1861.	Six months of 1860.	Six months of 1859.
Oxen and sheep ..... head	282826	205146	180196

Subjoined is an account of the markets :—

FLOUR has again advanced at *Paris*, the quotation yesterday having been 74f and 75f to 80f the sack of 159 kilogrammes. Four marks were 79f 50c and 80f for all epochs.

WHEAT.—At *Paris*, yesterday, a new advance took place, the quotations varying from 41f to 43f for ordinary sorts, and 44f to 45f and 45f 50c for good qualities per sack of 120 kilogrammes. One lot of new wheat from the Centre fetched 46f. In foreign much business was done: American being 43f 50c to 44f; Californian, 45f; Hamburg, 43f to 43f 50c; Danube, Black Sea, and Baltic ordinary, 40f to 42f; some lots from the banks of the Rhine, 42f 40c to 43f. As to the country markets, as many as 113 present a rise of from 11c to 3f 50c the hectolitre, 22 a fall of from 1f 11c to 1f 50c; 11 are reported firm, 12 without variation, 1 calm.

COTTON.—At *Havre*, the sales in the week ending Friday were 16,008 bales, and the arrivals 1,784. Closing prices were 1f to 2f higher for very low, low, and very ordinary qualities, and 1f for all other sorts. Very low New Orleans was consequently 100f the 50 kilogs; low ditto, 123f; and very ordinary, 118f. On the first days of the present week business was calm, without any visible change in quotations; and the same was the case yesterday.

COFFEE.—Business at *Havre*, in the week ending Friday, was more animated. 1,000 casks Hayti Port-au-Prince, disposable, went at 76f 50c to 77f 50c the 50 kilogs in bond; 363 ditto for delivery, 77f; 500 ditto Cape, disposable, 80f; 800 for delivery, 79f 50c; 100 Gonaives, ordinary, 78f 75c; 3,900 Rio, not washed, disposable, from 60f to 72f; 500 ditto for delivery, 67f; 244 Rio, washed, from 81f to 87f 50c; 100 for delivery 83f 50c; a small lot from St Thomas, 60f; 319 sacks Ceylon, 103f 50c duty paid; a lot ditto plantations, at different prices; and 614 Java, from 110f to 111f. Various lots of damaged Hayti, Rio, and Ceylon were also sold by auction. The arrivals were not quite 12,000 sacks. This week, Porto Rico has been at 86f and 87f; Hayti Cape, 77f to 81f; Ceylon, triage, 104f in bond; Rio, 62f to 66f; Gonaives, 81f. At *Bordeaux*, last week, 250 sacks Guayra for delivery went at 82f; 1,290 ditto disposable, 80f to 89f; a small lot of Santiago, 75f 50c; 919 sacks Java, 111f; 3,100 sacks Java not washed, 69f 50c to 74f; 270 ditto, washed, 87f 50c to 89f; 1,530 sacks Malabar, 106f; 400 Salem, for delivery, 117f. This week, a lot of Java has been sold at 112f 50c; Rio, not washed, 75f 50c; Mysore, 108f; Guayra at different prices, and some at 82f 50c to 85f. At *Nantes*, last week, nothing was done. This week, some damaged Hayti Port-au-Prince has been sold. At *Marseilles*, last week, various lots of Rio were disposed of at 55f to 70f. This week, some Rio ordinary has been sold at 55f, and some Malabar at 80f.

SUGAR.—The demand at *Havre*, for the week ending Friday, was not very active. 120 casks French West India went at 47f 50c the 50 kilogs, duty paid; 10 ditto usine, 58f; a small lot ditto, 61f 50c; 1,160 casks Havana disposable, 34f 25c in bond; ditto crystallised, 35f; ditto *old, 33f 25c.* Some lots of damaged Havana and Bahia were sold also by auction. The arrivals exceed 10,000 casks and 1,000 sacks. This week, Havana has been at 34f; San Yago, 46f. At *Nantes*, last week, 3,721 bales Reunion went for gros grain at 55f to 57f; ordinary, 51f to 51f 75c; very common, 40f 25c; 2,055 sacks Mauritius went at 54f 50c; a small lot of French West India, 48f; ditto usine, 58f 25c. This week, Reunion has been at 51f 75c; Mayotte, 47f. At *Bordeaux*, last week, the demand was not active: 210 French West India, 46f 50c to 49f 50c; 150 bales Reunion gros grain, 53f 50c. This week, French West India has been at 46f 50c. At *Marseilles*, last week, some small sales of Havana were made, and this week some lots of the same description have been taken at 35f.

INDIGO.—At *Havre*, in the week ending Friday, business was calm. The only sales were 9 chests Bengal, at 11f the half-kilog. No arrivals. This week, nothing has been done. At *Bordeaux*, last week, 14 chests Madras and 17 Bengal were sold; prices not stated. This week, some chests of Bengal, Madras, and Kurpah have been sold; quotations not given.

HIDES.—The demand at *Havre*, in the week ending Friday, was more active. 4,000 La Plata dry were sold from 96f to 120f the 50 kilogs; 1,150 salted ditto, 70f to 72f; 682 Porto Cabello dry, 85f; 182 Bahia dry, same price; 590 Lima dry, same price; 2,000 New York salted, 42f 50c; 1,400 New Orleans, 44f and 40f for kips; 380 horse, La Plata dry, 5f each. The arrivals were about 4,600. This week, Buenos Ayres salted has been at 51f to 86f; Rio Grande (South) salted, 65f; New York salted, 42f: New Orleans salted light, 40f; Monte Video, 70f.

WOOL.—At *Havre*, in the week ending Friday, 90 bales La Plata, not washed, went at 1f 40c to 2f 37c the kilog; 44 bales ditto sheepskin, not washed, from 85c to 1f 87½c. The arrivals were about 800 bales. This week, Monte Video, washed, has been 2f 75c.

TALLOW.—At *Havre*, in the week ending Friday, there were neither sales nor arrivals. This week, nothing has been done. At *Paris*, yesterday, the 100 kilogs were 112f,—a heavy fall on last week's quotations.

SPIRITS.—At *Paris*, yesterday, 3·6 of 90 deg., first quality, were 85f to 86f the hectolitre; Montpellier, disposable, 115f. At *Bordeaux*, the day before yesterday, 3·6 Languedoc was 105f; ditto beetroot, first quality, 88f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The annexed commercial report is dated Calcutta, June 22 :—*Produce Market.*—The inclement weather which has prevailed lately has greatly interfered with all business, and tended to increase the prevailing stagnation. A greater disposition is shown to operate, and, as stocks are mostly limited, an improvement is looked for. *Import Market.*—Scarcity of money in the Bazaar and the absence of remittances from up country, together with failures of dealers and apprehensions of further failures, limit business to the supply of immediate wants. We have accordingly to report a very small business since our last, and the impossibility of placing any considerable quantity of goods at present. There have, however, been more inquiries for goods, and this has been attended with some improvement in values, particularly of heavy shirtings. There are orders to buy for the Upper Provinces, but the large amount of capital locked up in grain prevents their execution, and it will be some time yet before this can be brought into circulation.

The following communication is dated Quebec, July 19 :—The arrivals of white pine have been heavy. The demand for it is not active, but owing to the ease in our money market, lumberers are not forcing sales. Several rafts have found purchasers, at about 6d for 55 feet, and 6½d to 8d for 60 to 80 feet average, all measured off. Waney board wood is offered freely, but the few sales have been effected at lower prices, and much that is offered as such is not really prime. Red pine is dull; no change in value. Elm—The quantity in market is ample, and it is difficult to effect sales. Oak—A prime lot in shipping order fetched 19d. 17½d is asked for first-class wood measured off, and 15½d for inferior. Staves are firm. The quantity to arrive will fall very short of last year. Deals—Sales of bright superior descriptions have been made at 15*l*, 10*l*, and 5*l*. Floated are unaltered. Birch—No demand.

The following has reached us by the last West India mail :—A Kingston coffee was quoted at 45s, and sugar from 13s to 17s, according to quality. The Barbadoes markets remained in a very unsettled condition, and imports from the United States were declining in price. At Demerara the exports for the fortnight had been :—Sugar, 2,204 hhds 159 tierces 788 barrels 106 bags; rum, 630 puncheons 91 hhds 69 barrels; molasses, 4 casks; cocoanuts, 9,600. From Grenada we learn that wet weather was still the cause of much anxiety in the agricultural districts. The following is an account of the staples shipped to date :—Sugar, 3,927 hhds 753 tierces 1,368 barrels 146 bags; rum, 754 puncheons 6 hhds 5 quarter-casks 10 djons 3 kegs; shrub, 5 casks, cocoa, 7,428 bags; molasses, 161 puncheons. The quanity of sugar, as shown above, is equal to 4,513 hhds of 16 cwts, against 5,177 hhds at the corresponding period last year. There is an increase in rum and cocoa as compared with last year :—736 against 695 puncheons rum; and 7,428 against 5,630 bags cocoa.

An account of the importations and exportations of bullion and specie registered in the week ended 31st July, 1861 :—

Advices from Cape Town are to June 21. Annexed are current prices of exports:—Argol, per 100 lbs, 75s; ostrich feathers, first quality, 14*l*; second, 12*l*; third, 10*l*; grey, 7*l*; black, 2*l* 10s; ox and cow hides, dry per hide, 17s; wet, per lb, 5½d. Wine—White and Pontac, nominal; sweet, 17*l*; Constantia, 50*l*. Wool, unwashed; 8½d washed, 1s to 1s 6d per lb.

Advices from Havana are to the 5th ult. The following is Messrs Van Notten and Co.'s market report:—Sugar—Since the 6th ult. the exportation has continued on a large scale, and the total shipments from both ports since the 1st of January amount to 1,007,443 boxes against 826,393 boxes last year. Stocks have considerably diminished, amounting to-day between here and Matanzas to only about 237,000 against about 380,000 boxes last year at the same period. This circumstance has caused a good deal of speculation in our market, and prices have advanced 1½ to 1½ rls for all descriptions. Nos. 7 to 10, 18s 5d to 21s 5d; 11 to 12, 22s 1d to 22s 8d; 13 to 14, 23s 3d to 23s 10d; 15 to 17, 24s 6d to 25s 8d; 18 to 20, 26s 11d to 28s 1d; white, low to prime, 28s 8d to 33s 7d, at 9 per cent. f. o. b. Muscovado sugars, owing to the more favourable advices from the United States, have advanced 1 rl. Freights—Arrivals have been numerous, and the present tonnage in port is about 48,000 tons, which is enough to take off the present stock here and at Matanzas. We quote:—Cowes and Falmouth, for orders, 1*l* 15s to 3*l* 5s; Great Britain direct, 1*l* 15s to 3*l* per ton. Imports—Rice—Supplies from Europe having been more abundant, prices of East India and Valencia sorts have continued to decline, whilst Carolina, of which but very little has been offered, has advanced. Our market closes firm, with an upward tendency.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, July 17.—A rather better feeling has pervaded the market for State and Western flour since our last, and a moderate demand has prevailed, both for the home and Eastern trade and for shipment to Europe. There has been no marked improvement in price, though our quotations are somewhat higher. Canada flour continues in fair demand, and prices are rather firmer. Southern flour remains in moderate demand at about previous quotations.

EXPORT from 1st to 16th July.

	1861. barrels	1860. barrels
Wheat Flour	124,983	122,512

With a fair demand for wheat, the market has continued steady, and holders have for the most part been enabled to obtain full prices for all kinds, while on some descriptions a slight improvement has taken place. Corn has been in fair demand for the most part, but the market was heavy yesterday, at about late quotations.

EXPORT from 1st to 16th July.

	1861. bushels	1860. bushels
Wheat	1,765,246	761,198
Corn	182,369	116,021

NEW YORK, July 20.—Holders of flour are firm in their demands, and prices have an upward tendency. Wheat is held at extreme rates, and the value of corn is quite supported.

MONTREAL, July 20.—Flour steady and in good demand; receipts moderate. Sales of No. 1 on spot, 4 dols 70c to 4 dols 80c. Sales of 4,500 barrels of No. 1 for August delivery are reported at 4 dols 80c. Wheat steady. Upper Canada spring, 95c to 1 dol; Chicago, No. 1, on the spot, 98c to 1 dol.

EXPORT of BREADSTUFFS from the UNITED STATES to GREAT BRITAIN and IRELAND, since September 1, 1860.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Notwithstanding that increased supplies of English wheat have been on offer, this week, the demand for both red and white qualities has ruled steady, and prices have been well supported. Foreign wheat—the arrivals of which have continued moderately good—has changed hands freely, at full quotations. There has been only a limited inquiry for both English and foreign barley, at late currencies. Fine malt has moved off steadily, other kinds slowly, on former terms. There has been a good consumptive inquiry for oats, and the best samples have produced rather more money. Beans and peas have commanded very little attention, but there has been an improved sale for flour, at extreme rates.

The advices from most parts of the country in reference to the crops continue favourable. As yet, however, very little wheat has been carried. The potato disease has not increased in any quarter.

On the Continent, wheat has ruled about stationary, and there has been a fair demand for spring corn, at full quotations. The latest accounts from New York state that both wheat and flour were in improved request.

The Scotch markets have continued firm for wheat and oats. All other produce, however, has moved off slowly, at late currencies. The crops are represented as looking remarkably well.

In Ireland, scarcely any change has taken place in the value of produce; but the demand generally has been somewhat restricted. The exports have not increased. The potato crops promises to be very abundant.

The supply of English wheat at Mark lane, to-day, was moderate, and the trade—owing to the favourable weather for harvest work, as well as to the large importation of foreign wheat and flour, chiefly from America—was in a very dull state, and sales could only be effected by submitting to lower prices. A few parcels of new Talavera wheat were on offer of good, though by no means prime, quality, and weighing about 63 lbs per bushel. Foreign wheat moved off heavily, and, in most instances, the quotations were lower. Barley, oats, beans, and peas were without quotable change in value, but the tendency was decidedly drooping. There were a few samples of new peas in the market. Most kinds of flour commanded a fair amount of attention, and all good and fine marks steadily supported previous currencies.

Mr E. Rainford furnishes the following information in reference to the floating trade:— There have been 40 arrivals off coast for orders since the 24th ult. to last night, comprising 20 cargoes of wheat, 8 maize, and 12 miscellaneous,—the wheat is principally from the United States. The following are the prices paid since this day week:—Wheat, arrived, per 492 lbs, for the United Kingdom, Marianople, 52s 6d; per 480 lbs, red American, nearly perfect, equal to 46s 8d; Milwaukee, imperfect, equal to 43s 8d and 45s 1½d; Wisconsin, 50s 3d; Ibraila, 40s; Saide, 34s 3d and 34s 6d; for Havre, red American, equal to 50s 1½d; for the Continent, Milwaukee, equal to 52s; Iowa, 51s 3d; Saide, 35s 6d; on passage, per 492 lbs, for the United Kingdom, Taganrog Ghirka, 48s and 48s 6d; per 480 lbs, red winter American, 53s; for Havre, Milwaukee, 50s 3d. Maize, arrived, per 492 lbs, Galatz, imperfect, 30s 6d; per 480 lbs, American, 28s 9d; Bulgarian, 30s 3d; now shipping, per 492 lbs, Galatz (3,500 quarters), 31s; per 480 lbs, Ibraila, 29s 6d. Barley, arrived, per 400 lbs, Smyrna, supposed 23s 9d. Beans, arrived, per 480 lbs, new Barbary, equal to 33s 6d and 33s 9d.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 31st day of July, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	26,004,700	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	11,354,700
		Silver Bullion	..
	26,004,700		26,004,700

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,466,279
Rest	3,412,974	Other Securities	18,547,711
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	3 701,952	Notes	5,706,760
Other Deposits	12,194,650	Gold and Silver Coin	842,008
Seven Day and other Bills	700,182		
	34,562,758		34,562,758

Dated the 1st August, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,998,122	Securities	28,110,990
Public Deposits	3,701,952	Coin and Bullion	12,196,708
Private Deposits	12,194,650		
	36,894,724		40,307,698

The balance of Assets above Liabilities being 3,412,974*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£228,331
A DECREASE of Public Deposits of	421,508
An INCREASE of Other Deposits of	210,423
A DECREASE of Government Securities of	40,000
A DECREASE of Other Securities of	307,072
An INCREASE of Bullion of	476,618
An INCREASE of Rest of	13,800
An INCREASE of Reserve of	321,442

The increase in the bullion shown above is less than had been expected, the amount of bar gold and foreign coin known to have been taken to the Bank being about 200,000*l* more. Apparently, however, there have been some large withdrawals of sovereigns for the harvest. Owing to the limited demand for money, another decrease is shown in the other securities. There is a large augmentation in the reserve.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 21,615,843	£ 21,602 431	£ 23 130,567	£ 22,777,539	£ 20,998,122
Public deposits	4,758,458	4,103,125	5,323,259	4,234,969	3,701,952
Other deposits	9,002,461	14 319,608	14,351,004	14,717,654	12,194,650
Government securities	13,464,021	10,774,367	11,208,572	9,758,795	9,466,279
Other securities	11,800.143	15,400,163	17,390,057	19,712,700	18,547,711

Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	4 p. c.	5 p. c.
Price of Consols	96⅝	96½	95¾	93⅝	90½
Average price of wheat	42s 4d	45s 6d	43s 0d	57s 0d	51s 2d
Exchange on Paris (shrt)	25 25 5	25 5 10	25 5 12½	25 10 17½	25 37½ 45
— Amsterdam ditto	11 16½ 16⅝	11 16	11 12½ 13	11 14½ 14⅝	11 18⅝ 19
— Hamburg (3months)	13 8½	13 7 7½	13 4⅝ 5½	13 5½ 6	13 10½ 10⅝

In the corresponding week of 1851, Mr Gladstone's celebrated letters on the tyranny and misgovernment of the Courts of Naples and Rome were exciting a great sensation, The Ecclesiastical Titles Bill had just passed the House of Lords. The Great Exhibition continued to attract crowds, and the policy of removing the building from Hyde Park was being discussed. The reactionary movement in Germany was making further progress, the Duke of Anhalt-Dessau having suspended the constitution to which he had deliberately pledged himself. There was less ease in the London money market, but the best bills were taken at 3½ per cent.

In 1858, the approaching issue of a fresh batch of Indian Government debentures did not prevent a steady rise in the funds, which were also favourably affected by the receipt of more encouraging advices from the Paris Bourse. Good securities of all descriptions were in increased demand for investment. Great excitement had been occasioned by the announcement that the Atlantic Telegraph had been successfully laid.

In 1859, an increased demand for money arose in consequence of the extension of trade following the restoration of peace between France and Austria. Money was ½ per cent. higher in the general discount market than at the Bank of England, and the great Lombard street establishments raised the rate they allowed for money at 7 days' call from 1½ to 2 per cent.

In 1860, an important letter from the Emperor Napoleon to Count de Persigny, his ambassador in London, on the policy of France towards England, had just been published. After some negotiation, the representatives of the great Powers had agreed to a convention respecting the proposed French intervention in Syria. At home, attention was chiefly directed to the intended outlay of 9,000,000*l*, extending, however, over several years, which had just been voted by the House of Commons for fortifications. Money was in rather more demand in London at 4 per cent.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 2,797,682*l*; in 1858, a deficiency of 1,081,155*l*; in 1859, a deficiency of 3,339,053*l*; and in 1860, a deficiency of 4,995,046*l*. In 1861, the deficiency is 6,353,061*l*.

DISCOUNT AND MONEY MARKET.—The Directors of the Bank of England, at their weekly court, yesterday, reduced their rate of discount from 6 per cent., at which it has stood since the 16th of May, to 5 per cent.

This alteration was fully expected, and exercised no effect on the stock market. During the early part of the week there had been scarcely any demand for money, and the rate in the general market had fallen to 5 per cent.; while yesterday, after the decision of the Bank was known, the best bills were taken at 4¾ per cent. To-day the demand has again been moderate, and occasional transactions have taken place at 4⅝. At the Bank, however, this afternoon, the applications have been rather more numerous, probably owing to exceptional circumstances, but were not very considerable. On the Stock Exchange there has been more inquiry for loans on Government securities, and 4 per cent. has been readily paid.

In consequence of the reduction in the Bank rate, the joint stock banks and discount houses have lowered their allowance on deposits. The former give 4 per cent., and the latter 4 per cent. for money at call, and 4¼ with seven days' notice. The London and Westminster Bank, however, only allow three per cent. on sums below 500*l*.

The following are the rates of discount in the principal cities of the Continent. The only alteration is at Turin, where the National Bank have just reduced their rate 1 per cent.

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5½
Berlin	4	2½
Frankfort	3	2
Amsterdam	3	3
Turin	5	5
Brussels	3	3
Hamburg	...	2¾
St Petersburg	7	...

The time for sending in the tenders for the half of the Sardinian loan of 20,000,000*l*, now being contracted in Turin, which has been reserved for the public, is extended to the 5th of August. The applications are expected to prove very large.

ENGLISH FUNDS.—Owing to the fineness of the weather, the diminished shipments of gold to America, and the reduction in the Bank rates, the funds this week have been rather firmer. Any rise, however, is followed by realisations, partly for the Court of Chancery, and partly, it is believed, on account of the great Insurance Offices to meet their losses by the late fire. The Bank also appear to have been latterly selling stock. The public continue to purchase to a very moderate extent only, owing to the preference shown for competing securities bearing a higher rate of interest, and especially the Indian loan. Compared with last Friday, an advance has taken place in Consols of fully ¼ per cent., the last prices being 90⅛ to ¼ for money, and 90⅜ to ½ for the new account in September.

Exchequer bills remain out of favour, and have experienced another slight decline, the March issue being

LONDON:—Printed and Published by DAVID AIRD, of 18½ Exeter street, Strand, in the parish of St Paul, Covent Garden, at the ECONOMIST OFFICE, 340 Strand, parish of St Mary-le-Strand, in the county of Middlesex.—Saturday, August 3, 1861.

quoted 13s to 8s discount, and the June 4s discount to par. Notwithstanding the additional advantages granted by the Government of a comparatively high interest, and the privilege after a certain interval of being received in payment of taxes, it would be impossible to effect sales to any amount in the market. India bonds, on the other hand, are improving, and closed at 10s to 5s discount.

The scrip of the new Indian Five per Cent. loan has shown renewed buoyancy, a rise having occurred to 100⅛ to ⅜. The old stock is also higher, at 99⅜ to ⅝.

FOREIGN STOCKS.—The principal movement in the foreign market is the continued advance in Turkish Six per Cents. of 1858, which to-day marked as high as 70. A partial reaction then followed, and the final quotation was 69 to ½. The rise is chiefly occasioned by speculative purchases on the reforms of the new Sultan, but is in part due to investments by the public, who appear to have been latterly buying at the low prices. The 1854 loan is also higher. Mexican has fallen on the unfavourable news from Mexico, but to-day there was a slightly better tendency. Peruvian bonds have been in demand at an advance. Sardinian has likewise improved on the expected success of the new loan, and the decline in the rate of interest at Turin. There have been some inquiries lately for Dutch stocks.

The closing prices of French Three per Cents. on the Paris Bourse this evening were 68f 5c for money, and 68f 20c for the end of the month, showing a rise on the week of about three-eighths per cent.

Later advices from New Granada contradict the reported defeat of General Mosquera by the Government, and state, on the other hand, that he is on the point of entering, or has entered, Bogota, the capital.

The following communication has been received from the Committee of Mexican bondholders:—

"The Committee have by the present packet only received a letter from their agents in Vera Cruz, of the 1st inst., which merely says that, besides the 47,777 dols mentioned in Mr Whitehead's letter of the 14th of June, additional 5,556 dols had been received by them in duty bills, but at the same time confirms the suspension of all further payments. The *Progress*, of Vera Cruz, of the 2nd inst., contains news from the city of Mexico down to the evening of the 25th ult., from which it may be inferred that no mail-bag from the interior reached Vera Cruz in time for the packet. It seems that on the 23rd ult. a force, under General Valle, had been sent from the capital to Toluca against a reactionary band under one Galvez, but that Marquez having, on advices received from his friends in the capital, joined this latter, it encountered three times its own number, and was routed, with the loss of three mountain guns and several prisoners, including General Valle, who, by Marquez's order, were all shot. It is said that within five days he had ordered 37 persons to be executed, and that not less than 45 generals were with him, his whole force being estimated at 4,000 men. On the afternoon of the 25th ult. some reactionary troops made their appearance at San Cosme, and on the same day the Congress declared the capital in a state of siege, and was prorogued. The National Guard had been armed the day before, and foreign residents had been authorised to enter into an armed organisation for the protection of their property. Senor Bas had been appointed Governor of the Federal district, and General Uraga was indicated by public opinion as the fittest man to take the military command of the capital. General Ortega, with some troops, had on the 25th ult. reached Tlalpam, and was ordered to attack the rear-guard of Marquez, in case the latter should make any attempt on the capital during the night. The President's Cabinet seems to have resigned.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

RAILWAY AND OTHER SHARES.—The railway market has been affected by the announcement of some of the proposed dividends, that of the Great Northern having especially caused much disappointment. At the same time the public do not effect sales, and at the fortnightly settlement this week there was in some cases a demand for stock for transfer. The speculative tendency, however, is for a decline, and the market thus remains weak and unsettled. Caledonian is exceptionally well supported. The general business transacted during the week has been altogether unimportant.

In the colonial market, Indian guaranteed stocks have been firm, with little doing. Canadian descriptions have been rather depressed, especially Great Western shares.

The principal change in foreign railways is a rise in Lombardo-Venetian to ½ prem. on the improvement in the traffic. Bahia are also higher, while Great Luxembourg have relapsed. There have been some good purchases of Erie preference shares, and a consequent rise in the price.

In the miscellaneous market, few transactions have been recorded, and the closing quotations are generally without change. Ocean Marine Insurance relapsed to 4½ to ¾ prem., London and Provincial Marine left off at par, and Labuan Coal 2¼ to ⅝ prem. The shares of the new Mercantile Life Insurance Company are quoted 1½ to ¾ prem.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

RAILWAYS.	Closing prices last Friday.	Closing prices to-day.

FOREIGN EXCHANGES.—The rates this week have been rather firm, especially the Paris quotation, notwithstanding that the reduction in the Bank rate was rather calculated to cause a decline.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley on the movements in bullion during the week, and the transactions in Indian rupee paper:—

Gold.—As we anticipated in our last circular, of 25th July, the Bank of England have been large purchasers of gold, no less than 512,000*l* having been sent in since the date referred to. The demand for export has almost entirely ceased. The imports this week comprise 70,000*l* by the Tasmanian, from the West Indies; about 123,000*l* in Imperials from Russia; and other, though smaller amounts, from different parts of the Continent. The Tyne, from the Brazils, has also arrived at Lisbon with 24,700*l*. The shipments to America are still upon a reduced scale, viz., 28,484*l*, per Anglo Saxon, to Quebec; 39,978*l*, per Europa, to United States; 19,943*l*, per Etna, to United States. 11,010*l* was despatched to Bombay, per Peninsular and Oriental Company's steamer Delta, on 27th July.

Silver.—We have still to report inaction in the silver market. The Tasmanian from the West Indies has brought 175,000*l*, which has been sold for the Continent, at 60½d per oz standard. The demand for the East is exceedingly limited; 5,150*l* only was shipped for Bombay on 27th July, per Delta.

Mexican dollars have not been in great demand. Sales during the past week have been effected at 59¼d per ounce; we quote the price this day as ranging rather lower, viz., from 59d to 59⅜d per ounce. The amount brought by the Tasmanian from the West Indies is smaller than was expected, no specie, as we understand, having been shipped at Tampico.

Exchange for 60 days' sight drafts by banks on Bombay and Calcutta is 1s 11⅛d to 1s 11¾d. Bills with documents, 1s 11d to 1s 11¼d. Banks' drafts on Madras, 1s 11⅛d to 1s 11¾d.

Indian Government Loan Notes are better since our last, and we are glad to quote a marked improvement, the 5½ per Cents. being this day 101½ to 102, and 5 per Cents. 94½ to 95.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9¼d per oz std; bar gold refinable, 77s 11d per oz std; Spanish doubloons, 77s to 77s 6d nominal; South American doubloons, 73s 6d to 73s 9d per oz, last price; United States gold coin, scarce. Silver—Bar silver, 5s 0¼d per oz std, last price; bar silver, containing 5 grs gold, 5s 0⅛d per oz std, last price; fine cake silver, 5s 4⅛d per oz, last price; Mexican dollars, 4s 11d per oz, last price; Spanish dollars (Carolus) in demand, scarce.

The amount of gold purchased by the Bank yesterday was 20,000*l*, and to-day 8,000*l*, making a total of 28,000*l* since making up the account appearing above.

The dollars by the last West India steamer, together with some amounts standing over from previous arrivals, were sold to-day at 58⅞d per ounce, being an advance of ⅜d over those brought by the preceding packet. In the interval, however, some small parcels have been disposed of at 59¼d.

The steamer sailing with the outward East India and China mail on Sunday will take 94,488*l* in specie, all on private account. The particulars are—3,000*l* in gold to Alexandria, 2,410*l* in gold and 13,200*l* in silver for Calcutta and Madras, and 5,000*l* in gold and 70,878*l* in silver for China and the Straits.

PUBLIC COMPANIES.—The half-yearly meeting of the London and County Bank took place yesterday, when the report announcing a dividend at the rate of 5 per cent. for the past six months, free of income tax, was adopted unanimously. The available balance was 44,473*l*, and after providing for the dividend a sum will remain of 19,473*l*. The Directors have thought it prudent to carry forward so large an amount, as the suit about the Chandos estate, which involves about 100,000*l*, is still undecided, although they confidently expect a favourable decision before the next meeting. The general business of the bank during the past half-year has been satisfactory, and many of the advances recently made to aid customers in the agricultural districts who had suffered from the failure of last year's harvest have been repaid. No inconvenience has been experienced from the crisis in America. With regard to the accounts, there has been an increase in the reserve of 15,000*l*, in the customers' balances of 136,000*l* (which would probably have been three or four times greater if the crops had not failed last year), in the gross profit of 20,000*l*, and in the interest paid to depositors of 15,000*l*. The operations of the bank are thus satisfactorily extending, 1,850 additional accounts having been opened in the last half-year. The auditors reported that they have fully examined the securities and cash at the bank, and consider the system of cheques used at the branches as perfect as can be devised. In answer to a question, it was mentioned that the loss by the failure of Messrs Smith, Sinclair, and Co., is only about 500*l* or 600*l*, out of about 10,000*l* of paper under discount.

At the half-yearly meeting of the English, Scottish, and Australian Chartered Bank this week, it was announced that the disposable balance was 16,600*l*, of which 15,000*l* was appropriated to the payment of a dividend at the rate of 6 per cent. per annum, 500*l* was written off preliminary expenses, and 1,000*l* off bank premises and furniture accounts, leaving 100*l* to be added to the reserve, which now amounts to 22,587*l*. The profits in the past half-year have been nearly 5,000*l* more than on any previous occasion, but on the other hand there have been losses by failures during the late depression in the colonies. The Directors, however, are disposed to view the future with confidence, as the position of affairs is now improving. In answer to a question, it was mentioned that the Chancery suit with the West India Steam Company is still undecided, but the Directors of this bank continue confident in their eventual success. The law expenses on this account are wittten off half-yearly.

The annual meeting of the Australian Agricultural Company was held on Tuesday, when the report, recommending the usual dividend of 15s per share for the past six months, making a total distribution of 35s for the year 1860, was agreed to. It was stated that, notwithstanding the colliery has been worked under many disadvantages, the revenue from it has been fully maintained. There has been an increase in the quantity raised of 4,016 tons, while the profit per ton is but a trifle lower, being 4s 2½d, instead of 4s 4d in 1859. The disadvantages have been augmented working expenditure, outlay for repairs and additional stock, the slackness of trade during a portion of the year, a combination among the miners not to work after 11s 4d a day has been gained, although an ordinary miner can easily earn 18s, and, finally, the absence of a chief officer throughout the whole of the year. A material augmentation has taken place in the quantity of coal shipped for foreign ports In the stock department the revenue has fallen off, owing to the decline in the price of meat in Sydney and the breaking out of disease among the herd. The sales of land have been unimportant. Some discussion took place upon the character of the management, but the explanations of the Directors were considered satisfactory.

A meeting took place yesterday of the Electric Telegraph Company, when the report was adopted, and a dividend declared at the recommended rate of 3½ per cent. for the past half-year out of the available balance of 33,733*l*, leaving a sum of 4,757*l* to be added to the reserve, which now amounts to 41,117*l*. The cables have worked well during the half-year without casualty, and the general business has increased. The whole of the works of the Company are in good order, and have been fully maintained. Some minor extensions for railway companies are about to be carried out. The litigation with reference to the submarine lines to Holland, which has now been going on for eight years, has been at last satisfactorily settled. With regard to the proposal of the United Kingdom Company to take messages to Oxford, Manchester, and Liverpool at 1s each, an opinion was expressed that the plan cannot possibly answer.

At a meeting of the Netherlands Land Enclosure Company, the report stated that an agreement has been come to with the Dutch Government, the terms of which appear below. Plans have been prepared in anticipation of its being ratified, and next spring a fresh enclosure of about 800 acres will take place. The funds required will be supplied from the balance of the caution money and the amount at present in hand. The Bath polder presents every appearance of yielding a large crop this year, except as regards colza. The claim of the contractors has been finally fixed at 32,000*l*, including the price of the plant, &c., at the canal works. Annexed are the terms of the agreement with the Government, which has already been approved by one Chamber and is not expected to be opposed in the other :—

1. The Company to be relieved from the obligation of making the canal through South Beverland; of the embankment or barrage of the Eastern Scheldt; and of the large works specified in the concession in connection with the above works.

2. The Company to retain the area of land comprised within the two polders enclosed; and in addition to have a strip of land of 300 metres in width extending beyond and around the banks of those polders.

3. The above to be held for the original term of 99 years from October, 1849, subject to a rent of 5 florins for each hectare enclosed, and subject to Art. 4.

4. The Government makes no claim in respect of 600 hectares (1,500 acres) of the above land, which is to be the freehold of the Company.

5. The Government in the construction of the Flushing Railway to be at liberty to cross the Company's land, paying for such portion as is required at the rate of 2,000fl per hectare (66*l* 12s per acre).

6. The Company transfers to the State the canal works and the land purchased in the line of the canal, and all the plant and materials at the works.

7. The caution money to be returned to the Company subject to any claims of Dutch subjects in reference to works constructed for the Company.

8. The agreement to be subject to the sanction of the Legislature.

The proprietors of the City of London Brewery Company have declared a dividend on both the ordinary and preference

stock, at the rate of 6 per cent. per annum. The business of the undertaking was stated to continue to prosper.

The shareholders of the Port Philip and Colonial Gold Mining Company have agreed to the proposed distribution of 1s per share, an amendment substituting 1s 6d, which had been moved, not being put, as legally inadmissible. It appeared from a speech read by the the chairman, Mr J. D. Powles, together with statements made by a gentleman of colonial experience, that the supply of quartz from the Clunes Mine, by the crushing of which this Company realises about 18,000*l* a year, is practically inexhaustible, and that in sinking there is no perceptible variation in its quality. The profit for the month of April was 2,205*l*, and about as much is expected to be realised in May.

A meeting of the Australian Mining Company was held on Monday. The report stated that the land sold in the past year has been 247 acres at Allen's Creek for 725*l*, while mining materials have been disposed of to the amount 241*l*. The Directors have submitted to public sale the Tungkillo and Charlton properties in accordance with the resolution passed two years ago. The only bids, however, being 5,000*l* for the former, and 300*l* for the latter, they were withdrawn. The half-acre section at Port Augusta is also still unsod. The accounts showing a sum of about 3,000*l* in hand, exclusive of a current balance of a few hundred pounds at the bankers, a motion was proposed to divide the greater part of that sum; but, after some discussion, a resolution was carried to the effect that it was desirable to distribute the assets realised as early as possible, and requesting the Directors to take the necessary steps for that purpose.

At a meeting of the Clarendon Mining Company of Jamaica, the report stated that the operations at Stamford Hill are progressing satisfactorily, and that the lode gives a better yield than had been expected. The cash in hand on the 30th June was 5,692*l*.

The dividend declared by the Cobre Copper Company on Tuesday was at the reduced rate of 1*l* per share. The Directors stated that, notwithstanding the temporary cessation in the produce of ore towards the end of the year through accidents to the machinery, the dividend could have been maintained if the price of copper had not fallen 13*l* 10*s* per ton, making a difference of 2*l* per ton in the value of the Company's ore. This reduction, when calculated upon the 1,100 tons raised every month, will amount to a very considerable sum. The total of the ore produced in the past year was 13,601 tons, showing a diminution, compared with 1859, of 211 tons. In the first five months of the current year there has been an increase of 386 tons, and the working generally has been satisfactory.

At a meeting of the Mariquita and New Granada Mining Company, the report stated that the quantity of ore raised at the Santa Ana mine in the twelve months ending the 31st of March was 2,490 tons, producing 84,771 ounces of silver, or 55,838 ounces less than in the preceding year. The decline in the yield, however, is attributable to the carrying out of necessary repairs, and the further developing of the mine, which had been allowed to fall into an unsafe and unsatisfactory condition. At the Marmato mine the proceedings have been on the whole satisfactory, the produce being 5,059 ounces of fine gold, and 3,150 ounces of silver. The profit for the year amounts to 1,083*l*. With regard to the general position of the undertaking, it was mentioned that the management has been greatly strengthened, and a more efficient system of supervision introduced. An improved method of ventilation has likewise been adopted.

At a meeting of the United Mexican Mining Company, it was stated that the mine is making satisfactory progress, and that the advices for the first quarter of the present year are especially encouraging. In 1860, the profits realised were about 7,500*l*, against 3,400*l* in 1859 and 2,400*l* in 1858. But for the state of anarchy in which the country is plunged, probably 6,000*l* more would have been gained. The London financial statement shows assets 9,448*l*, and liabilities 7,920*l*.

At a meeting of the District Telegraph Company, to-day, the report stated that a satisfactory increase is taking place in the receipts, while it is hoped that the working expenses are now at their highest. Twenty new stations have been opened since the last meeting. The miles of line now completed are 78½, and the miles of wire 350.

We understand that the subscription lists of the Compressed Coal Company will be closed this week.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The *North British Daily Mail* announces the failure of Messrs Scott, Colquhoun, and Co., of Glasgow and Montreal, with liabilities for about 21,645*l* on this side, besides a small amount in Canada. The estate is expected to turn out favourably.

At a meeting, to-day, of creditors of H. Brooks and Co., pianoforte-action manufacturers, it was resolved to accept a composition of 7*s* in the pound in cash, in addition to 2*s* 6*d* paid under a previous arrangement.

An order has been made to-day by Vice-Chancellor Wood for winding up the Life Assurance Treasury and Deposit and Discount Bank, and appointing Mr Harding, of the firm of Harding, Pullein, and Co, accountants, to act as interim manager.

MISCELLANEOUS.—The following regarding the resumption of the fortnightly mail to China appears in the *London and China Telegraph*:—

We have authority for stating that the negotiations for the continuation of the semi-monthly mail to China have been finally concluded with the Peninsular and Oriental Steam Navigation Company, and that instructions will be forwarded by the mail of the 3rd inst. to Bombay, to despatch the necessary steamer to Galle to convey the mails leaving this on the 20-26th inst. The rate of postage, as already stated, will be increased from 6d to 1s per half-ounce, and this rate will also apply between China and Australia.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.37½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17*s* 10½*d* per ounce for standard gold, it appears that gold is about 5-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 428 per mark, and the short exchange on London is 13.8½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 9-10ths per cent. dearer in than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 106¾ to 107 per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

Imports of the week ..... 276,365 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There were about 50 quarters of *new* Talavera wheat, grown in Essex, on offer at Mark lane, to-day, in good saleable condition. It was disposed of at 72*s* per quarter. All other kinds of wheat, both English and foreign, were very dull, and Monday's prices were with difficulty supported. The transactions in Spring corn and flour were on a very moderate scale, at about previous rates. The imports of foreign produce, this week, have amounted to 42,500 quarters of wheat, 1,000 barley, 32,750 oats, and 34,120 barrels of flour.

At Liverpool, this morning, wheat was in fair demand, at Tuesday's advance. Otherwise the trade ruled steady.

Annexed is Mr Othon Trithen's monthly report of the corn trade at Odessa, under date July 19:—"The arrivals of wheat from the interior have continued during the whole month of June to be very large, but the condition is unfortunately not much improved. Before these can be made fit for shipment the products of the new harvest will arrive, and there is no doubt that they will depreciate the value of the old. The transactions in cereals have been tolerably numerous. Speculation is principally directed to maize, which has risen 25 copecs. Current prices of produce, free on board, are as follows.—Superior Polish Odessa wheat, 41s 3d; fair average ditto, 39s 6d; fair average Sandomirka ditto, 41s per 480 lbs; fair average Ghirka ditto, 38s 6d; hard ditto, 39s 9d; maize, 23*s* per 492 lbs; barley, 17s 6d per 400 lbs; oats, 14s 6d per 300 lbs; rye, 20s 6d per 480 lbs; superior sifted linseed, 47s; fair average sifted ditto, 46s 6d; unsifted ditto, 45*s*; fair average rapeseed, 24s 6d per quarter.

The wheat trade at Alexandria, for the week ending July 18, had undergone very little change. Beans, however, were firmer, and prices had an upward tendency. The following are the sales, with prices free on board:—Wheat, Saide, private trade produce, 2,060 qrs, 28s 6d to 29s; Saide, Pasha's produce, 310 qrs, 29s 7d; Beheireh, private trade produce, 2,490 qrs, 27s to 28s; Beheireh, private trade produce, white, 200 qrs, 28s 6d to 29s 6d; Beheireh, Pasha's produce, white, 2,560 qrs, 28s 6d: beans, Saide, private trade produce, 11,420 qrs, 24s 6d to 25s; Beheireh, private trade produce, 6,570 qrs, 23s to 24s; Beheireh, Pasha's produce, 750 qrs, 23s to 24s: barley, 6,470 qrs, 16s to 17s 10d; lentils, 125 qrs, 22s 6d to 23s; ceci, 85 qrs, 35s 6d per quarter. Linseed—A parcel of 1,000 ardebs of Pacha's linseed has been sold at 43s 2d per quarter, f.o.b. Freights—The rates by steamer to Liverpool had advanced to 3s per quarter for wheat, beans, or other grain or pulse. Sailing vessels to the United Kingdom for orders, 5*s* to 5*s* 4*d* per quarter for beans, wheat, or other grain or seed in proportion; to a direct port, 4s 6d to 5*s*.

Although there has not been so excited a tone in the Liverpool cotton market during the present as in the previous weeks, still the demand has been to a fair extent, and prices have been firmly maintained. The total sales of the week amount to 70,000 bales, and include 49,000 bales to spinners, 12,000 bales to speculators, and 9,000 bales for export. Quotations are unchanged since Friday last. The market during the last two or three days has become suddenly very quiet, the usual result after a season of great activity, but without any giving way in prices. To-day's sales are 5,000 bales only, at unchanged prices.

Messrs Briggs and Co., writing from Alexandria to the 19th ult., remark as follows on the cotton trade: — "An active inquiry characterises the market, and prices are undoubtedly rising, although, as already mentioned in our former reports, it is difficult to establish positive quotations. The sales have been:—34 bales sweepings, 6.46d to 7.03d; 207 very ordinary to middling, 7.84d to 8.05d; 193 good middling to fair, 8.16d to 8.44d; 523 good fair to good, 8.47d to 8.73d; 43 good to fine, 8.80d to 9.27d per lb, free on board. Freights by steamers are at 3-16ths of a penny per lb.

The public sales of tea, held this week, have gone off slowly, at, in some instances, a slight decline in the quotations. By private contract very little has been passing.

The annexed intelligence in reference to tea and silk is dated Hong Kong, June 12:—

Tea—During the fortnight the business done has been very limited. Settlements of country congou are six chops, at previous rates. Stock,

two chops. Tayshan teas are quite neglected, owing to the unfavourable news from England and the inferior quality of the new crop. Greens have been in more active inquiry for the English and American markets. Sales are as follows:—Congou—Six chops; *Ohnams*, at 21 to 21½ taels; Oopacks, at 26 to 28½ taels. Canton-packed *Congou*—900 half-chests, at 18 to 18½ taels. Tayshan Congou—No sales. Scented Orange Pekoe—1,500 boxes, at 26 to 28½ taels. Scented Caper—1,600 boxes, at 25 to 32 taels. Canton Green Teas—Gunpowder, 3,500 boxes and 1,700 half-chests, at 17 to 22 taels; young hyson, 4,200 half-chests, at 16 to 27 taels. Country Green Tea—Sales, 1,400 packages. Hyson skin, common to good, at 21 to 28 taels; young hyson, medium, at 27 to 28 taels; superior, at 29 to 30 taels; fine to finest, at 34 to 42 taels; hyson, medium to good, 30 to 42 taels; gunpowder and imperial, medium to finest, at 32 to 45 taels. Freights to London, 3*l*. Foochow advices are to the 1st instant. Tea—Settlements in old tea are only 400 chests congou at 12-2 to 18 taels. Lower prices would be accepted, but the quality of what remains was so inferior that there was no demand. Stock 6,000 chests. New Teas—Arrivals amount to 30,000 chests, including 6,000 chests contract, against the same time last year 30,000 chests. The market teas comprise very few of fine quality, while among the contracts were some parcels of fine and finest; but, on the whole, it was thought that the crop will be found inferior, and not equal to last season's. The market opened on the 31st ult. at 27 to 31 taels short, and the sales reported amount to 7,700 chests congou. Souchong—Nothing yet known respecting it. Flowery Pekoe—Only two musters of inferior quality have been shown. Oolong—None had yet come in. The rates in the country were said to be lower than last year. Shanghai advices are to the 3rd inst. Silk—Settlements for the fortnight amounted to about 1,000 bales, making the total settlements for the season 83,000 bales. Prices had been fairly maintained, and there was little change to report. Stock on the market was about 3,000 bales. Arrivals of the new crop were expected at Ningpo in about a fortnight. Total export of silk from China to Europe is 83,400 bales, against 67,221 bales the same time last year, or an increase for this season of 16,179 bales. Tea—Settlements of black are reported at three chops Ningchow, at 24 to 26¾ taels, and three chops of Hohow, at 22½ to 23 taels, showing a reduction of 1 tael on last quotations. Greens—About 16,000 packages had been settled during the fortnight, the greater portion having been brought up from Ningpo, and resold at Shanghai. Of Japan growth about 1,200 half-chests had found buyers. Stock of black, 6,300 chests; greens, 3,000 half-chests China, and 3,500 half-chests Japan. Total export of tea from China to Great Britain is 81,103,200 lbs, against 78,718,100 lbs last year, or an increase for this season of 2,385,100 lbs. To the United States the export is 25,453,700 lbs, against 30,782,700 lbs last year, showing a decrease for this season of 5,329,000 lbs.

There has been a very quiet market for all kinds of raw sugar; nevertheless, no change has taken place in the quotations. Refined goods are heavy, at the recent decline in value. The demand for coffee has been somewhat restricted, at late currencies.

We extract the following from Messrs Trueman and Rouse's circular:—

IMPORTS and STOCKS of SUGAR and COFFEE at the PRINCIPAL EUROPEAN PORTS, for the Six Months ending 30th June, 1860 and 1861.

Messrs Fryer, Schultze, and Co., writing from Colombo, June 29, thus refer to the state of the coffee trade:—"Although the weather has been frequently unfavourable since our last, a good deal of coffee has gone forward, as may be seen by reference to the figures below, showing exports to date:—

PLANTATION COFFEE.

To Great Britain	cwts 381,957	against last year,	cwts	354,834
Foreign Ports	23,814	—	—	30,391
Australia and India	9,193	—	—	9,150
	414,964			394,375

NATIVE COFFEE.

To Great Britain	cwts 66,937	against last year,	cwts	73,128
Foreign Ports	50,052	—	—	67,269
Australia and India	4,303	—	—	2,376
	121,292			142,773

Plantation coffee is quoted at 68s 11d, and native ditto at 55s 6d per cwt, cost, free on board, including exchange and freight. Freights are advancing—coffee in casks being 5*l*, and in bags 2*l* 10s to 3*l* per ton."

The quarterly public sales of cinnamon, held on Monday, were rather large, viz., 2,514 bales 25 half-bales 47 boxes and 69 parcels Ceylon, which went off with little animation on rather easier terms for the greater part, but the finer qualities of first and second sorts were fully sustained. Of the whole quantity, 1,993 bales 25 half-bales 62 parcels and 32 boxes were sold at the following prices:—First sort, grocery kind, 2s 4d to 2s 5d; ditto, good even, 2s to 2s 2d; ditto, middling, 1s 7d to 2s 1d; ditto, sea-damaged, 1s 4d to 2s: second sort, fine quill, bright, 1s 7d to 1s 10d; ditto, middling to good, 1s 5d to 1s 6d; ditto, ordinary to middling, 1s 3d to 1s 5d; ditto, sea-damaged, 1s to 1s 4d: third sort, good, 1s 2d to 1s 3d; ordinary to middling, 1s to 1s 2d; ditto, sea-damaged, 10d to 1s 1d: fourth sort, 8d to 10d; ditto, sea-damaged, 8d to 9d: broken ends, sound, 8d to 11d; ditto, sea-damaged, 7d to 8d: pieces, thick coarse, not worked, 7d per lb.

The transactions in rice have been somewhat restricted; prices, however, may be considered steady.

A moderate business has been passing in Scotch pig iron, at 51s 6d per ton, cash, for mixed numbers. The market for foreign tin, however, has continued dull, at the recent depression. The following is the monthly statement of deliveries of Banca in Holland:—

	1861. slabs	1860. slabs	1859. slabs
The stock on warrants amounted on July 30	14076	17525	13250
Quantities in public sale	156008	151513	139128
	170084	169038	152378
Deliveries in July	29342	38536	25655
Stock on warrants July 31	140742	130502	126723
Stock in hands of Trading Society July 31	17465	9880	19369

The state of the tobacco trade for the past month is thus reported by Messrs Grant, Hodgson, and Co.:—We leave no change to report in the character of the market to that which we gave in our last month's circular. Sales have been unusually limited, and the few transactions entered into have been at extreme quotations; holders have continued very reluctant sellers, and there has been very little disposition on the part of the trade to purchase beyond their immediate requirements. We have made no alteration in our quotations, which must be considered in a great measure nominal. Latest advices from America report unfavourably of the crops. Imports—5,305 hhds. Deliveries—871 hhds, against 1,055 hhds in the corresponding month of last year. Stock—22,375 hhds, against 14,466 hhds in 1860; 10,512 hhds in 1859; 7,477 hhds in 1858; 9,367 hhds in 1857; and 5,729 hhds in 1856.

A Government contract for 50,000 gallons of rum has been announced. The spirit market, however, is inactive, at last week's quotations.

Linseed oil is firm, at 32s per cwt on the spot; and there is rather a better feeling in the demand for other oils, at full prices. American turpentine is freely offered at 50s per cwt. Rough is held at 16s.

Tallow has become somewhat firmer. P.Y.C., on the spot, is quoted at 47s to 46s; September, 47s; October to December, 47s 6d; January to March, 48s per cwt. Town tallow, 46s 6d net cash.

"The money market," observes the New York *Shipping List* of the 17th ult., "continues unmarked by any event of interest. Capital is abundantly easy of access where the securities are of the most unexceptionable character, at extremely low rates of interest, ranging from 4 to 5 per cent. In other than the first-class collaterals, there is little doing, and our rates below are entirely nominal. We quote:—

	Per cent. per annum.
Loans on call, stock securities	4 to 5
Do. bond and mortgage	6 7
Prime endorsed bills, 60 to 90 days	6 7
Do. 4 to 6 months	9 10
First-class single signatures	7 ...
Other good bills	... ...

In the sales of discount and bank notes, there is very little change to note. The changes in weekly banks' statement, especially in

the loan and specie columns, are rather more moderate than was generally expected, though the difference is not important. The following are the figures:—

	July 6. dols		July 13. dols			dols
Loans	112,134,668	...	112,445,542	...	Inc.	310,874
Specie	45,630,625	...	45,016,836	...	Dec.	613,189
Circulation	8,862,799	...	8,499,699	...	Dec.	363,100
Deposits	90,579,753	...	91,805,937	...	Inc.	1,226,184

The imports continue very light, both in dry goods and general merchandise. Stocks, generally, are buoyant, and prices are steadily on the advance."

COTTON.

The advices from Liverpool have been without influence on the market, which remains quiet, though very firm. We re-insert our previous quotations, but remark that some holders demand higher rates. The supply is light, but there being no demand for export, and the transactions being almost wholly speculative, the reduction in the stock is hardly perceptible. The sales do not exceed 2,000 bales. We quote:—

NEW YORK CLASSIFICATION.

	Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	13¼	13¼	13⅜	13⅞

The cotton market has been much quieter this week than for some time past. Manufacturers had possessed themselves of a liberal stock, and other buyers were holding largely at its commencement; but notwithstanding the subdued tone of the market, we find several of our quotations for American have again to be slightly raised, as holders continue rather to raise their demands. Egyptian have been in good demand, but their value remains unchanged. Brazil have been sold freely, at firm prices. East India have not altered in value, but are in good demand. The sales to-day are 5,000 bales. The market remains quiet. The reported export amounts to 9,180 bales, consisting of 3,500 American, 300 Brazil, and 5,380 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

On the whole, an increased amount of business has been transacted in the manufacturing markets held this week, and, in some instances, prices have had an upward tendency. The stocks are by no means large, the time of year considered. The iron trade continues in a healthy state, and there has been a fair business doing in coals, at very full prices.

MANCHESTER, August 1.—The market has this week shown much firmness at the higher rates which were last week established for both yarns and goods. Indeed, for many classes of yarns, in particular cops for the home trade, ⅛d to ¼d per lb more has been again required. But buyers have seemed to think there was less need for urgency in the execution of orders, and the amount of transactions, though still liberal, has been less than in each of the few last weeks. These former transactions have both improved the position of sellers for the present and partly satisfied the wants of buyers. And the slight pause which has occurred in the cotton market has thrown a degree of uncertainty on further proceedings. Still the reduction in the rate of discount is encouraging a few to operate in such articles and for such quarters as have been long neglected.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

RAW COTTON.	Price Aug. 1 1861	Price Aug. 1860	Price Aug. 1859	Price Aug. 1858	Price Aug. 1857	Price Aug. 1856

BRADFORD.—The tone of the wool market is a little firmer. Among other causes, the lowering in the discount rate is not without its influence. There has been a fair number of small sales made, and the prices given have shown a little rallying from the recent depression. The market here is well supplied, though much of the new clip is still in the farmers' hands. There is perhaps a rather more cheerful tone in the yarn market. Spinners are not asking any advance, but there seems a little more disposition to effect sales at late prices. There has been a rather better inquiry for plain goods, and a slightly improved feeling has been visible amongst merchants.

LEEDS.—There was no new feature to notice in the woollen cloth market. Prices were steady, and the reports from the chief manufacturing villages are as good as last week.

ROCHDALE.—The flannel trade still continues dull, the period of the year considered. A few manufacturers are working to order, but the most are engaged on stocks, which, it is understood, are not very large, though a little in excess of what is usually found in the possession of manufacturers at almost the advent of autumn. Not much activity has been shown in wools, but last week's prices are maintained.

LEICESTER.—The hosiery trade is in a quiet state, and much less than an average business is doing; still the tone of trade is healthy and no stocks are accumulating. At Hinckley, Loughborough, and the country districts business is decidedly quiet. There is no change in yarns, and spinners continue to produce cautiously. Wools are selling at recent rates.

NOTTINGHAM.—There is less doing in the lace trade than there has been for some time past; business in some departments is nearly at a stand. The cotton branch was hardly ever in so depressed a state as it is at the present time. There is very little doing in foundation nets; indeed, nearly every description of cotton goods is difficult to sell. The silk lace trade is also extremely dull, and numbers of good hands are unemployed. There is very little doing in the hosiery trade. Home business is below an

average, and shipping orders are extremely scarce. Stocks are kept down as much as possible. Yarns are firm at higher prices.

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 0s, at the works; best bars, 8*l* 0s; sheets, 8*l* 10s; doubles, 10*l* 0s; nail sheets, 8*l* 0s; latten, 11*l* 10s; boiler plates, 8*l* 10s; best and best best in proportion; common rods, 7*l* 0s; hoops, 8*l* 0s; gas strip, 7*l* 10s; Canada plates, 11*l* 10s; and all other sorts in proportion. Second and third-class makers are selling below these rates. Current prices of pig iron:—Staffordshire cold blast, 4*l* 5s; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, 4*l*; Old Windmill End, second quality, Nos. 1 and 2, melting pig iron, 3*l*; Old Windmill End Mine forge pig iron, 3*l* 5s to 3*l* 7s 6d; best native hydrate pigs, 3*l* 7s 6d to 4*l*, according to the brand; first-class All Mine grey forge pigs, 3*l* 5s to 3*l* 7s 6d; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2s 6d; Seend Mine melting pigs, 3*l* 10s to 3*l* 15s; good mine pigs, with a modicum of flue cinder, 2*l* 10s to 2*l* 15s; mine pigs, deteriorated by cinder, 2*l* 7s 6d to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; Barrow hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; Workington hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; grey forge cinder pig iron, 2*l* 5s to 2*l* 10s; white forge cinder pigs, 2*l* 2s to 2*l* 7s 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of mine melting iron, 3*l* 2s 6d to 3*l* 15s, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Gadlys (Aberdare, South Wales), No. 1 foundry pig, cold blast, 4*l* 10s f.o.b. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12s 6d to 3*l* 15s delivered; Northern hæmatites from 3*l* 2s 6d to 3*l* 7s 6d, according to brand or quality.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market is still flat and unsettled, owing to the continued increase in the stocks of foreign. With less extensive supplies, however, quotations do not show any general reduction. Fine grainy sorts have sold at the full quotations, and yesterday floating cargoes of Havana were more in demand for export. The deliveries, last week, amounted to 4,814 tons, and the net decrease since the commencement of the year is 5,000 tons. There has been a further addition to the stock, which now comprises 73,700 tons, against 70,830 tons in 1860 at the corresponding period. The transactions in West India for the three days were 1,193 casks at former rates. 301 casks Barbadoes, by auction, partly sold at 33s 6d to 41s 6d. 125 casks Jamaica: low grey to good yellow, 35s to 38s per cwt. The Netherland Trading Company's sale of 60,800 baskets Java, held on the 30th instant, went off well, although at 1d to 1½d under the May rates for lower descriptions.

Mauritius.—5,990 bags principally found buyers as follows: low to good brown, 29s to 34s; good to fine crystallised yellow, 43s to 44s 6d per cwt.

Bengal.—At auction, 1,698 bags about half sold: Gurpatta date sorts, brown to low middling yellow, 32s to 35s; middling to good bright, 36s 6d to 40s; fine Bally taken in at 45s 6d per cwt.

Madras.—1,755 bags native were bought in at 31s 6d to 32s per cwt.

Penang.—1,434 bags went as follows: brown and yellow, 31s 6d to 37s 6d; good pale yellow to white, 38s 6d to 41s per cwt.

Foreign.—A floating cargo of Havana has sold for Antwerp at 25s 9d, No. 11½; and one, No. 13½, at 26s 9d for the United Kingdom. One of brown Bahia, 21s 9d for Gottenburg. Yesterday, one No. 14 to 14½, sold for the same destination at 28s; two for near ports, No. 14 to 14½, 28s; No. 11, 25s 4½d. A cargo of Cuba muscovado for the United Kingdom, 23s. By auction, 1,737 casks Cuba partially met with buyers at 33s to 40s for brown to good yellow. Of 380 casks Porto Rico, a portion sold at 36s to 42s. 598 boxes grainy Cuba realised 36s to 40s 6d per cwt.

Refined.—The market is quiet, and the refiners have occasionally made some slight concession in prices for dry goods, but a moderate inquiry now prevails.

MELADO.—1,137 casks were chiefly bought in at 21s to 26s 6d; a few casks dry, 30s to 30s 6d per cwt.

MOLASSES.—Antigua and St Kitt's has sold at 15s 6d to 16s; Porto Rico at 14s per cwt.

RUM.—Several sales have been made at rather irregular prices, including Penang in first hands at 1s 6½d, and 300 casks Cuba at 1s 5½d, with Demerara at 1s 9d to 1s 10d. Choice Jamaica as high as 6s 6d; common at 3s to 3s 2d per gallon. Another Government contract of 50,000 gallons is declared. The aggregate stock is 27,300 puns 5,000 hhds, against 28,000 puns 6,100 hhds last year at the same period.

COCOA.—420 bags Trinidad partly met with buyers, and the lower qualities went at 2s to 3s cheaper. Grey to good red ranged from 49s to 63s 6d. 844 bags Grenada were chiefly sold at 49s to 51s per cwt.

TEA.—The private contract business has again been small. On Tuesday some further public sales were held, viz., 11,250 packages, including 9,139 packages printed "without reserve." The parcels offered on the latter condition only sold. There was little alteration in prices, except for common red and black leaf congou under 1s 1d. These kinds, comprising the bulk of the sold portion, went rather irregularly, and in some cases at ¼d decline. Some good Tayshaans realised 11d, and a parcel of fair scented caper 1s; also Canton scented orange pekoe 1s 2¼d and 1s 2½d per lb.

COFFEE.—There were not any public sales held to yesterday, but the additional arrivals from Colombo will soon afford a better supply; meanwhile, the market is firm. The parcel of Singapore Java kind taken in last week has sold at about 46s. A floating cargo of Rio has sold at 47s per cwt for a near port.

RICE is less actively inquired after than last week, but prices remain unaltered. By auction, 4,000 bags common Necrancie Arracan were bought in at 9s 6d. 1,760 Bengal partly sold at 14s to 14s 6d for good white; 614 pockets middling, 11s 6d. 5,012 bags pinky Madras were bought in at 11s, and since partly sold at 6d less. Four cargoes of soft grain descriptions have sold at 10s, and one at 10s 1½d per cwt, the latter Moulmein.

IMPORTS and DELIVERIES of RICE to July 27, with STOCKS on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

SAGO.—25 boxes very fine white small grain realised 22s 6d per cwt.

SPICES.—The public sales, which have been of moderate extent, do not exhibit any material change in prices. 90 cases cassia lignea of indirect import realised 80s to 88s. 140 cases from China: 1st pile, 88s; 100 cases mixed Cochin ginger, 46s; 113 barrels Jamaica, 42s to 74s, being full rates in both instances. 500 bags African were bought in at 36s per cwt. Of 1,896 bags Singapore black pepper the sound was taken in at 3¾d to 4d. 116 bags Zanzibar cloves withdrawn at 3¾d. 136 bags pimento realised 2¾d to 2¾d per lb for ordinary to middling quality. 2,503 bales 25 half-bales Ceylon cinnamon in the quarterly sales on Monday went at previous rates to 2d per lb decline.

SALTPETRE.—A few contracts have been made in Bengal at 6d decline latterly, including refraction 4 to 2⅔, from 36s to 36s 6d. 1,320 bags Bombay, by auction, realised 30s to 31s 6d per cwt, refraction 46 to 26¾ per cent.

IMPORTS and DELIVERIES of SALTPETRE to July 27, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	7400	8250	11910	6400
Delivered	6960	7455	10430	8570
Stock	3765	4630	4425	4470

The deliveries last week were 400 tons.

COCHINEAL is very firm.

LAC DYE.—Some few lots of good, by auction, sold at 1s 4¼d to 1s 5d per lb.

OTHER DYESTUFFS.—Heated Gambier has been sold at 14s 9d. A parcel of good Cutch at 23s 6d per cwt. Safflower is steady.

JUTE.—3,224 bales about two-thirds sold at full rates, from 12*l* 5s to 19*l* per ton.

METALS, with few exceptions, remain quiet. Tin is still difficult to sell, owing to the depressed state of manufactured goods. Good Straits has sold at 110s per cwt. English unaltered, but must soon be reduced in value again. Spelter has been firmer, at 16*l* to 16*l* 10s per cwt: the latter is now demanded. The iron trade presents no new feature as regards British made. Scotch pig steady at 52s per ton for mixed numbers. Copper can be obtained on lower terms.

HIDES.—The public sales of East India held yesterday, went off with more spirit, and at rather higher rates.

OILS.—Olive has suddenly advanced 1*l* 10s to 2*l* for Mogadore, which sold at 48*l* to 48*l* 10s. Gallipoli quoted 58*l*. A floating cargo has sold 53*l* 5s per tun. All kinds of fish oil are slow of sale at unaltered quotations. Palm dull at 42s 6d to 43s. A steady demand exists for cocoa-nut, chiefly from the shippers: Cochin, 44s 9d to 45s; Ceylon, 43s 9d to 44s. The linseed oil market has further advanced 1s, 32s being the latest price paid. Rape firmer; foreign refined, 42s 6d to 43s; brown, 40s 6d to 41s per cwt.

TURPENTINE.—No arrivals or sales of rough have taken place; parcels in store are held for 16s per cwt, 14s would be given; the theoretical assumption in some of our leading journals of an adjustment of American affairs has induced consumers of spirits to buy with caution. American in barrels offer at 50s; the deliveries from warehouse continue large, averaging 650 barrels a week.

TALLOW.—There has been a good demand for foreign at the decline established, and the moderate prices induce the consumers to supply themselves freely for forward delivery. This morning Y.C. may be quoted at 46s to 46s 6d; new, 48s per cwt, and the same for delivery to the end of the year.

PARTICULARS of TALLOW.—Monday, July 29.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market was firm to-day. Sales of West India for the week 1,170 casks, including the few parcels brought to auction to-day. 6,956 bags Mauritius realised the previous quotations to a slight advance. 700 bags native Madras, 29s to 31s. 360 casks Cuba at the previous value. A floating cargo of Cuba muscovado sold for the United Kingdom at 22s 3d per cwt.

COFFEE.—A few lots of plantation Ceylon realised the full valuations, 590 quarter bales Mocha withdrawn at 110s per cwt. A floating cargo of St Domingo sold at 59s per cwt for a near port.

RICE.—1,350 bags Bengal were taken in at 13s per cwt.

SALTPETRE.—220 bags Bombay, refraction 60¾ to 49¾, sold at 30s 6d.

SPICES.—496 bags pimento were bought in at 3¾d. 46 barrels Jamaica ginger went at 1*l* 19s to 2*l* 5s per cwt.

SAFFLOWER.—95 bales Bengal sold at 3*l* to 7*l* 2s 6d per cwt.

LINSEED.—Calcutta, 55s 6d to 56s; Bombay, 56s 6d. Taganrog afloat has sold at 55s per quarter, which is higher.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues quiet. Treacle firm for the best qualities. The accounts from Holland represent the market for crushed firm.

DRY FRUIT.—The currant market is unmoved by the reports of rain. Very little business has been done during the week. One parcel of finest Gulf has been disposed of at 29s, which is lower; but on the other hand there are some samples offering under 27s, thereby bringing the range of market prices into a still smaller compass. Raisins are entirely neglected. At auction a few sultanas sold at 41s; and about 60 tons of dates from Bussorah sold at 11s to 14s, being an improvement of about 2s per cwt.

ENGLISH WOOL continues very quiet; no change in prices.

COLONIAL WOOL.—The sales progress without change. The attendance is rather better, and the fine weather and reduction in the Bank rate are likely to give confidence.

FLAX.—Market quiet; not any business to report.

HEMP.—Quiet at our quotations.

COTTON.—Sales of cotton, from Friday, 26th July, to Thursday, 1st August, inclusive:—700 bales Surat, at 7⅞d for good sawginned Dharwar, and for middling fair Dhollera, 5⅝d to 5½d for middling Oomrawatty, 5½d for fair Compta; 50 bales Western Madras, at 5⅝d for good fair; 200 bales Tinnevelly, at 6¼d for fully fair; total, 950 bales. There has been less activity this week, and the transactions have been rather limited, with a quiet market. Holders, however, evince great firmness, and there is no change in prices, which are well maintained. 850 bales new Broach have been sold for arrival at 6¾d, guaranteed fair.

SILK.—Trade still continues quiet, without alteration in prices.

TOBACCO.—A very limited business has been transacted in most descriptions. The market remains firm, and holders appear disinclined to make sales at present quotations, unless for small lots or parts of parcels.

LEATHER AND HIDES.—The transactions in leather during the past week again show an improvement in extent, and, although the demand for some articles continues dull, a better feeling generally pervades the trade. The articles most in request continue to be prime English butts of middle and heavy weights, good heavy foreign butts, and calf-skins of 40 lbs to 60 lbs per dozen. Good crop hides and best heavy harness hides are also wanted. Prices remain unaltered.

METALS.—We find a better feeling prevailing in our market, which has induced some movement in business generally. Copper is quoted firmer on all hands, and more money has been paid for foreign. Iron is mostly unchanged, excepting that Scotch pig rules firmer. Tin has recovered the drooping tendency of the last week or two, and quotations are now maintained. Spelter has advanced in price nearly 20s per ton. Tin plates and lead are still dull of sale, and unchanged in prices.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	49	3
Fat by ditto	2	5½
Yellow Russian	49	0
Melted stuff	34	6
Rough ditto	19	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Bacon market dull this week, at 76s f.o.b. Deliveries smaller this week than for the past two months, Hamburg selling well at former prices. Friesland 104s. Slow market and quality bad. Jersey dull, at 86s to 90s. All other provisions in very little demand.

METROPOLITAN CATTLE MARKET.

THURSDAY, Aug. 1.—Our market, to-day, was but moderately supplied with beasts, both as to number and quality, nevertheless all breeds moved off slowly, at Monday's decline in the quotations. The extreme value of the best Scots was 4s 10d per 8 lbs. The show of sheep was moderately good. Downs and half-breds commanded a steady inquiry, at full prices. All other breeds moved off slowly, at late rates. The best old Downs sold at 5s 4d per 8 lbs. Lambs—the supply of which was good—changed hands slowly, at late rates—viz., from 5s to 6s per 8 lbs. There was very little inquiry for calves, at a further decline in value of 2d per 8 lbs. Pigs and milch cows were dull, but not cheaper.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	2	3	6	Prime Southdown sheep	5	0	5	4
Second quality ditto	3	8	4	0	Large coarse calves	3	4	3	10

Large Pork	4	0	4	6	Lamb	4	8	5	4
Inferior mutton	3	4	3	8					

HOP MARKET.

BOROUGH, Monday, July 29.—The accounts from Mid and East Kent report a further improvement in the plantations of those districts; but from the Weald of Kent and Sussex we have no better reports. The duty is estimated at 110,000*l* to 120,000*l*. Mid and East Kents, 90s, 150s, 210s; Weald of Kents, 80s, 130s, 180s; Sussex, 75s, 90s, 140s; Yearlings, 120s, 160s, 210s.

FRIDAY, Aug. 2.—The plantation accounts continue favourable on the whole, and the duty is estimated at from 110,000*l* to 120,000*l*. All kinds of hops are a dull inquiry, and the currencies rule next to nominal.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, July 29.—The supply of home-grown potatoes on sale here is seasonably extensive; but the imports of foreign have been very limited. Most kinds move off slowly, and prices show an important reduction, when compared with last week. Shaws are quoted at 60s to 70s, and Regents at 80s to 100s per ton.

FRIDAY, Aug. 2.—The supply of home-grown potatoes is somewhat extensive, and the trade is in a sluggish state for all qualities. Shaws are selling at from 50s to 75s; and Regents, 80s to 100s per ton. The crop is very favourably spoken of in most parts of the kingdom.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Old meadow hay, 2*l* 0s to 5*l* 0s; new do., 2*l* 10s to 4*l* 0s; old clover ditto, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 10s to 5*l* 0s; and straw, 1*l* 10s to 2*l* 0s per load. A slow trade.

CUMBERLAND.—Old meadow hay, 2*l* 5s to 5*l* 0s; new ditto, 2*l* 10s to 4*l* 0s; old clover, 3*l* 10s to 5*l* 15s; new ditto, 3*l* 10s to 5*l* 0s; and straw, 1*l* 10s to 2*l* 0s per load. Trade heavy.

WHITECHAPEL.—Old meadow hay, 2*l* 0s to 5*l* 0s; new ditto, 2*l* 10s to 4*l* 0s; old clover, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 10s to 5*l* 0s; and straw, 1*l* 10s to 2*l* 0s per load. Trade dull.

COAL MARKET.

FRIDAY, Aug. 2.—South Hetton 19s 3d—Tees 19s—Lambton 19s—Kepier Grange 18s—Braddyll's 18s—Acorn Close 17s 6d—Carr's Hartley 16s 6d—Lambert's 16s 3d—Tanfield Butes 12s 9d. Ships at market, 51; sold, 31.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 2.—The demand continues very languid, and the transactions are of a limited character at prices tending in favour of buyers. Stocks however, with one or two exceptions, do not materially increase, as the imports are not on a par with those of last year.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug 2.—Market fairly attended. Wheat in fair request, at late prices. Flour meets a steady demand, at full prices. Oats and oat-meal dull. Beans open firmer. Indian corn mostly held for an advance, and sound parcels not freely offered.

METALS.

[FROM OUR OWN CORRESPONDENT.]

FRIDAY, Aug. 2.—There still exists much inactivity in the market for manufactured iron, but there is little or no change to note in prices. In Scotch pig iron there has been an advancing tendency during the week, and the market has a firm appearance. The demand for copper has somewhat improved, and some business has been done at a slight advance. In spelter there has been more animation, and higher rates have been paid for it. Most other metals as before.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 20th of July amounted to 578,440*l*, and for the corresponding week of last year to 558,050*l*, showing an increase of 20,390*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 268,287*l*, and for the corresponding week of 1860 to 262,136*l*, showing an decrease of 6,151*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, July 29.—The railway market was chiefly occupied with the preparations for the fortnightly settlement. Several of the leading stocks were in some demand for transfer, but the speculative tendency was, nevertheless, unfavourable, owing to the less satisfactory dividends already announced. The proposed distribution of the North Staffordshire is at the rate of 3½ per cent. per annum, against 4 per cent. last year. Compared with Saturday, North-Eastern descriptions showed a recovery of ⅜ to ½ per cent., while South-Western and North British were a fraction lower. In the colonial market, Grand Trunk of Canada improved in the afternoon to 18 to 19, and Great Western shares to 10 to ¼. Foreign descriptions were steady, except Bahia, which were quoted a shade lower; Lombardo-Venetian, on the other hand, advanced to ⅛ pm., buyers. American securities were firmer, especially Erie shares and Illinois Central.

TUESDAY, July 30.—The railway market improved in the morning, particularly Lancashire and Yorkshire, South-Eastern, and Midland, but a reaction took place in the afternoon, and the tendency at the close was decidedly unfavourable. Notwithstanding the present quotations were for the new account, most of the leading stocks showed a decline of ⅛ to ⅜ per cent. London and North-Western was especially flat, and ½ per cent. lower. Sheffield also receded considerably. In the colonial market the improvement of yesterday in Grand Trunk of Canada was not maintained. Foreign descriptions were steady; French railways especially showed an advance. Lombardo-Venetian were also firm at ⅛ pm. The only alteration in American securities was a partial relapse in Illinois Central. There was little doing in mines, and prices were generally without change. In joint stock banks, Ottoman and Australasia shares were firmer. Miscellaneous descriptions left off about the same as yesterday.

WEDNESDAY, July 31.—The railway market to-day was quiet, but rather firmer. In the principal speculative stocks an advance of about ¼ per cent. took place, especially in London and North-Western, Midland, Great Western, and South-Eastern. Berwick and North British, however declined. The lower traffic returns in the morning temporarily affected the market. In the colonial market, Great Western of Canada shares receded to 9⅞ to 10. Indian guaranteed stocks were steady. Scarcely any alteration occurred in foreign shares. Great Luxembourg slightly receded, while Lombardo-Venetian were firm at ⅛ to ¼ pm.; and Victor Emmanuel obligations improved ¼ per cent. In American securities there was a rise in Erie preference, and a decline in Illinois Central. The principal change in mines was an improvement in Bon Accord Copper and St John del Rey. Joint stock banks and miscellaneous descriptions closed about the same as yesterday.

THURSDAY, Aug. 1.—The principal feature in the railway market was a heavy decline in the morning in Great Northern on the announcement of the dividend, from which there was scarcely any recovery. The ordinary stock closed at 106½ to 107, being a reduction of 1¼ per cent., and the A stock 95 to ½, or nearly 3 per cent. lower. Sheffield likewise receded ¾ per cent., and London and North-Western, South-Western, North British, and Eastern Counties, ⅛ to ¼. Midland and Caledonian slightly improved. In the colonial market, Great Western of Canada shares were better. Indian guaranteed stocks were firm, and continued with an improved tendency. The only feature in foreign descriptions was a rise in Bahia and Lombardo-Venetian. In American securities, Virginia Six per Cents. and Erie preference shares were higher. Mines were dull at an occasional decline.

FRIDAY, Aug. 2.—The railway share market was rather flatter, and a slight decline occurred in several instances. The reduction in Great Western and South-Eastern stocks amounted to ¼ per cent, and in London and North-Western and Midland to ½. Other descriptions were much the same as yesterday. Lombardo-Venetian railway shares advanced to ⅛ to ¼ prem. Indian railway stocks were more inquired for. In mines the dealings were very limited, at about previous rates.

London Houses:—
Corner of MINORIES and ALDGATE.
NEW OXFORD STREET, corner of HART STREET.
Corner of TOTTENHAM COURT ROAD and EUSTON ROAD.

Country Establishments:—
SHEFFIELD and BRADFORD, YORKSHIRE.

BLAIR'S GOUT AND RHEUMATIC PILLS.—Price 1s 1½d and 2s 9d per box.

This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century, to speak of a cure for the gout was considered a romance; but now the efficacy and safety of this medicine is so fully demonstrated, by unsolicited testimonials from persons in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.

Sold by all medicine venders. See the name of "Thomas Prout, 229 Strand, London," on the Government stamp.

HOLLOWAY'S OINTMENT AND PILLS.—Disfigurements removed.—From the quickened action of the heart in summer, conjoined with variable temperatures, many affections of the skin are now prevalent, such as Boils, Pimples, Tumours, Blotches, &c. In treating such complaints, "Cosmetics" are worse than useless: the only rational mode of cure consists in subduing the local disease, whilst the impurities producing it are being expelled from the blood and glandular system. Holloway's Ointment ensures the former object, whilst his Pills promote most perfect depuration of blood, glands, absorbents, and capillaries. The humours being thus expelled, continuance in the same course benefits digestion, and the complexion assumes a wholesome clearness, irreconcileable with the idea of depraved or suspended action.

CURE OF BILIOUS COMPLAINT by DR HUGO'S MEDICAL ATOMS.—Sir,—Your Medical Atoms have quite set me up. For twenty-five years I was a victim to a monthly bilious attack—head-ache, sickness, bad sleep, bad dreams, and want of appetite; but two boxes of atoms, taken freely at the time, relieved me at once (now eighteen months ago), and I have not had the least relapse. You may publish my name, if you think proper, as no medicine I ever tried produced the same rapid and permanent effect.—J. WATERLEA, 27, Skinner street. Dr Hugo's Medical Atoms purify the blood and relieve the head, heart, and stomach. Their action is immediate; they are small, and agreeable to the taste, so that they may be swallowed whole, or eaten as confectionary. Price 1s 1½d, 2s 9d, and 4s 6d. Sold by all Druggists.

DR CURTIS'S MEDICAL WORK, "MANHOOD An Essay on Nervous and Generative Diseases. The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

FREDERICK DENT, Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

WARM WEATHER.—RIMMEL'S TOILET VINEGAR will be found a perfect luxury this weather, either used for the toilet or bath, or as a reviving scent for the handkerchief. A special uninflammable sort is prepared to be used in Rimmel's Patent Vaporiser, for purifying the air and fumigating sick rooms. (See Dr Letheby's report.)—Rimmel, Perfumer to the Queen, 96 Strand, and 24 Cornhill, London.

HEALTH AND HAPPINESS FOR the NERVOUS and DEBILITATED.—A single copy of a new medical work, written by one of the most eminent medical men of the present day, solely for the guidance and benefit of that class of sufferers who desire a speedy and private cure, with illustrative cases of parties who have been restored to health by following the advice laid down in this work, free on receipt of stamp.—Address to the Secretary, Institute of Anatomy, Birmingham.

DR MARSTON'S LECTURES.—FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

FRAMPTON'S PILL OF HEALTH, Price 1s 1½d and 2s 9d per box

This excellent Family Pill is a medicine of long-tried efficacy for purifying the blood, and correcting all disorders of the stomach and bowels. Two or three doses will convince the afflicted of its salutary effects. The stomach will speedily regain its strength; a healthy action of the liver, bowels, and kidneys will rapidly take place; and renewed health will be the quick result of taking this medicine, according to the directions accompanying each box.

Persons of a Full Habit, who are subject to headache, giddiness, drowsiness, and singing in the ears, arising from too great a flow of blood to the head, should never be without them, as many dangerous symptoms will be entirely carried off by their timely use, and for elderly people, where an occasional aperient is required, nothing can be better adapted.

These Pills require no restraint of diet or confinement during their use; and in consequence of the great and increasing demand, the Proprietor has obtained permission from Her Majesty's Commissioners to have the name and address of "Thomas Prout, 229 Strand, London," impressed upon the Government stamp affixed to each box. Sold by all venders of medicine.

EXTRAORDINARY DISCOVERY—NEW THEORY. (Medicines Superseded.)

NERVOUS DEBILITY AND ITS train of evils, such as self-distrust, timidity, pimples on the skin, loss of memory, thoughts of suicide, trembling of the limbs, depression and prostration of the system &c., immediately checked and speedily cured by the Newly-Discovered Patent Appliance. Advice and instructions post free on receipt of two stamps, by Dr Watson, U.S., F.R.A.S., President of the Medical Reform Society of Great Britain, No. 27 Alfred place, Bedford square, London. Consultations daily from 11 till 2 and 6 till 8 on all these ailments and infirmities peculiar to youth, manhood, and old age, which tend to embitter and shorten life. For distinguished qualifications vide diplomas.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

CHUBB'S PATENT SAFES —the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey, YOUNG Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German, Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

KEATING'S PERSIAN INSECT DESTROYING POWDER.

This powder is quite harmless to animal life, but is unrivalled in destroying fleas, bugs, emmets, flies, cockroaches, beetles, gnats, mosquitoes, moths in furs, and every other species of insects in all stages of metamorphosis.

Sportsmen will find this an invaluable remedy for destroying fleas in their dogs, as also ladies for their pet dogs, and sprinkled about the nests of poultry, it will be found extremely efficacious in exterminating those insects with which they are usually infested. It is perfectly harmless in its nature, and may be applied without any apprehension, as it has no qualities deleterious to animal life.

Sold in packets, 1s, 2s 6d, and 4s 6d each, or post free for 14, or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79 St Paul's churchyard, London, E.C.

Take notice, each genuine packet bears the above name and address.

JOZEAU'S COPAHINE, or SAGCHARATED CAPSULES.—Copaiba and Cubebs are, doubtless, the best remedies, but these drugs are of a repulsive taste and odour, and occasion colicky pains, nausea, and gastric disturbance. M. Jozeau has succeeded in rendering these valuable therapeutic agents perfectly innocuous by increasing, in his Copahine, all the curative properties. This preparation has been adopted by the Paris Academy of Medicine, after more than a thousand trials in Paris and the different London hospitals, viz., St Thomas's, Guy's, and St Bartholomew's, under the care of Messrs Lloyd, Poland, and Legros Clark, LANCET, Nov. 6, and Dec. 10, 1857. The Copahine, which is in form of a pretty pink sugar plum, effects a cure in about six days, either in recent or chronic diseases. 100 capsules, 4s 6d; post free, 5s 2d. Post-office order required; at G. Jozeau's, French Chemist, 49 Haymarket, London; 22 Rue St Quentin, Paris; and all the most important Chemists.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either, from the publisher, J. Allen, 20 Warwick lane: or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White *Zinc* Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and *does not* stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of *thirty* per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, *no* workman can produce *good work* with such material. Workmen who have once used the *Patent* Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

ATTIRE FOR JUVENILES.—

The following, which are the most POPULAR STYLES of Dress for *Juveniles*, may be obtained in all materials at either of the undermentioned Establishments of E. MOSES and SON.

DINNEFORD'S PURE FLUID

MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

ALLSOPP'S PALE OR BITTER

ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross.
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE

CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6*d*.

WHITE, MANUFACTURER, 228 Piccadilly, London.

SAFE AND PROFITABLE MINING INVESTMENT.

MR T. E. W. THOMAS,

16 Hackins Hey, Liverpool, transacts business in every description of Mining property, and can recommend at the present time as secure and good stock a few Shares in the best DIVIDEND MINES, as also in Mines promising very early Dividends, which, at the present low prices now ruling in the market, cannot fail to be very profitable to an investor.

Mines inspected and reports furnished.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,

Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr GRANVILLE, F.R.S.—"Dr Granville has found Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LANKESTER, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and of a manufactured compound, in which the efficacy of his invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE CONSIGNEES,
ANSAR, HARFORD, and CO., 77 STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

TO MERCHANTS,

SHIPOWNERS, and FORWARDERS.—For Rates of Freight per Grand Trunk Railway, the most direct and only safe route, to all parts of Canada and the Western States, apply at the Grand Trunk Railway Offices, 21 Old Broad street, London, E.C.

OVERLAND ROUTE.—

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

GENERAL MANAGER.—WILLIAM M'KEWAN, Esq.

Head Office, 21 Lombard street.

At present temporarily at the South Sea House, Threadneedle street.

At the Half-yearly Meeting of the proprietors, held on Thursday, the 1st August, 1861, at the London Tavern, Bishopsgate street, the following report for the half-year ending the 30th June, 1861, was read by the Secretary:—

WILLIAM CHAMPION JONES, Esq., in the chair.

REPORT.

Your Directors have the pleasure to lay before the proprietors of the bank their report and balance sheet for the six months ended on the 30th June last.

These accounts have been examined and signed by the auditors. They show a net profit for the half-year of £44,473 3s 3d, after payment of interest to customers £47,451 0s 5d, and of the expenses at the head office and branches, income tax, rebate on bills discounted and not due, and making provision for bad and doubtful debts.

Your Directors have declared a dividend of 5 per cent. for the half-year out of the net profit, as above stated, and carried forward the balance of £19,473 3s 3d.

The dividend will be payable at the head office, or any of the branches, on and after Monday, the 12th inst.

We, the undersigned, have examined the foregoing balance sheet, and have found the same to be correct.

(Signed) FRED. HARRISON, HENRY OVERTON, JOHN WRIGHT, } Auditors.

London and County Bank, 25th July, 1861.

The foregoing report having been read by the Secretary the following resolutions were proposed and unanimously adopted:—

1. That the report be received and adopted, and printed for the use of the shareholders.
2. That the thanks of this meeting be given to the Board of Directors for the able manner in which they have conducted the affairs of the company.

W. C. JONES, Chairman.

The Chairman having quitted the chair, it was resolved and carried unanimously:—

That the cordial thanks of this meeting be presented to William Champion Jones, Esq., for his able and courteous conduct in the chair.

(Signed) P. P. BLYTH, Deputy-Chairman.

Extracted from the Minutes.

(Signed) R. P. NICHOLS, Secretary.

LONDON AND COUNTY BANKING COMPANY.

Alexander Bassett, Esq., C.E., Cardiff.

ENGINEER.—Mr J. D. Humphreys.

SECRETARY.—Mr W. Baldock.

OFFICES—14 and 15 St Swithin's lane, London, E.C.

The object of this Company is to carry out the process of Compressing Small Coal into Blocks, without the admixture of extraneous cohesive matter: for this purpose the exclusive use of several valuable patents has been secured on very favourable terms.

By this process the immense quantity of slack or small coal annually wasted is rendered not only equal, but in many important points superior, to the ordinary coal, or any artificial fuel at present manufactured.

This fuel is applicable for maritime, manufacturing, and domestic purposes, and special advantages are held out to shareholders.

Applications for Shares may be addressed to the Secretary, Brokers, and Solicitors of the Company, and must be accompanied either by a remittance, or a Banker's Receipt for the amount of 5s per share, on the number of shares applied for. Three months' notice of future calls will be given.

Detailed prospectuses, and all information may be had on application at the Offices of the Company.

COMPRESSED COAL COAPANY, LIMITED.

Notice is hereby given, that the Directors will proceed to an Allotment of Shares in this Company, on and after Friday, the 9th August.—By order of the Board,

WM. BALDOCK, Secretary.

14 and 15, St Swithin's lane, London E.C., 31st July, 1861.

TRADE MARK.

BROWN AND POLSON'S

PATENT CORN FLOUR,

In packets 2d, 4d, 8d, and tins 1s, 5s, and 9s 6d.

Considerable extra advantage is allowed upon the sale of articles similar in appearance, to encourage their being recommended in place of Patent Corn Flour, to support which practice unscrupulous announcements are made use of. It is therefore respectfully suggested that Families should observe that no other kinds are substituted for Brown and Polson's, of which the LANCET states (July 24, 1858), "This is superior to anything of the kind known,"—an opinion indisputably confirmed by scientific tests and public appreciation.

BROWN and POLSON, Manufacturers and Purveyors to Her Majesty the Queen: Paisley, Manchester, Dublin, and London.

ST MARGARET'S COLLEGE, CRIEFF.

N.B.—For the Education of Young Ladies.

Principal—The Rev. A. LENDRUM, M.A.

For prospectuses, examination papers, and all particulars, apply to the Rev. the Principal.

N.B.—The next Term will commence on Tuesday, the 20th of August, when there will be vacancies for three Clergymen's Daughters at the reduced rate of £40 a year.

ST MARGARET'S COLLEGE, NORTH-END, FULHAM, London, S.W., for the Education of Young Ladies.

Principal—The Rev. A. LENDRUM, M.A.

Vice-Principal—The Rev. FREDERICK TAUNTON, M.A.

For prospectuses and all particulars apply to the Rev. the Vice-Principal.

N.B.—All the Pupils are resident in the College.

The next Term will commence on Thursday, the 19th of September.

GLENFIELD PATENT STARCH, USED in the ROYAL LAUNDRY.

The Ladies are respectfully informed that this Starch is EXCLUSIVELY USED in the ROYAL LAUNDRY, and Her Majesty's Laundress says, that although she has tried Wheaten, Rice, and other Powder Starches, she has found none of them equal to the GLENFIELD, which is the FINEST STARCH SHE EVER USED.

WHEN YOU ASK FOR GLENFIELD PATENT STARCH, see that you get it, as inferior kinds are often substituted.

WOTHERSPOON and CO., Glasgow and London.

DEANE'S TWO-HOLE BLACKPENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

Under the Patronage of the Governments of Great Britain, Spain, Denmark, Brazil, Russia, &c., &c.

EASTON'S PATENT BOILER.

FLUID effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M. steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Xurrachee, and by engineers and manufacturers thro h out the country.

Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

NEW THEATRE ROYAL ADELPHI.

Sole Proprietor and Manager, Mr B. Webster.

The great Sensation Drama of THE DEAD HEART.

Continued success of

THE PRETTY HORSEBREAKERS.

On Monday and during the week, THE DEAD HEART. Messrs B. Webster, J. L. Toole, D. Fisher, Billington, P. Bedford, Eburne, Romer, C. J. Smith; Miss Woolgar, K. Kelly, and Laidlaw. To conclude with THE PRETTY HORSEBREAKERS. Messrs J. L Toole, P. Bedford; Miss Woolgar, K. Kelly, E. Thorne, and Laidlaw. Commence at 7.

POLYTECHNIC.

Every Novelty in Science, Art, or Amusement will be brought before the public as it occurs. Magnificent new series of dissolving views, executed regardless of cost—Trip up Switzerland, returning through France—conflagration of Glarus—novel effects—three hundred houses burnt—Mr George Buckland's humorous entertainment—Master Arlidge, the youthful flautest.—Open morning and evening.

Polytechnic Institution (Limited), 309 Regent street.

MR W. S. WOODIN'S NEW ENTERTAINMENT, the CABINET of CURIOSITIES, at the Polygraphic Hall, King William street, Charing cross, every evening (except Saturday) at 8.; Private boxes, £1 1s; stalls and box stalls 3s; area, 2s; amphitheatre, 1s. A plan of the stalls may be seen and seats secured (without extra charge), at the box office, from 10 till 4.

MR AND MRS GERMAN REED,

with Mr JOHN PARRY, will give their entirely New and Original Entertainment, Our Card Basket and the Two Rival Companies, every evening (except Saturday) at eight o'clock; Thursday and Saturday at three o'clock, at the Royal Gallery of Illustration, 14 Regent street. Mr German Reed will give his musical recital entitled "A Day with the Hounds." Mrs German Reed will sing her new and original song, "I never does nothing at all." Mr John Parry will sing his new and original song, "Paterfamilias; or, A Treat for the Juveniles," with Pictorial Illustrations. Unreserved Seats, 1s, 2s; Stalls, 3s; Stall Chairs, 5s; can be secured at the Gallery in advance, and at Messrs Cramer, Beale, and Co., 201 Regent street.

SOUTH AUSTRALIAN BANKING COMPANY.

—Incorporated by Royal Charter, 1847.—Letters of Credit and Bills issued upon Adelaide, Port Adelaide, Gawler, Robe, and Wallaroo. Approved Drafts negotiated and sent for collection.

Every description of Banking business conducted with Victoria and New South Wales, through the Company's Agents. WILLIAM PURDY, Manager.

54 Old Broad street, E.C.

BANK OF EGYPT.—

Notice is hereby given, that an Extraordinary General Meeting of this Corporation will be held at the London Tavern, Bishopsgate street, on Monday, the 5th day of August, at One o'clock p.m. precisely, when the Directors will present a Report and Statement of Accounts, as audited, for the Half-year ending 30th June, 1861.

The Transfer Books will be closed from Friday, the 2nd August, to Monday, the 12th August, both inclusive.

—By order of the Court,

EDWARD CHESHIRE, Secretary.

26 Old Broad street, London, 24th July, 1861.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, 30th Aug., 1851.

Paid-up capital, £1,260,000; reserved fund, £252,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Madras, Ceylon, Hongkong, Singapore, Mauritius, Melbourne, Sydney, Auckland, and Wellington, on terms which may be ascertained at their office. They also issue Circular Notes and Letters of Credit for the use of Travellers by the Overland Route. They undertake the agency of parties connected with India, the purchase and sale of Indian Securities, the safe custody of Indian Government Paper, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named dependencies.

They also receive deposits of £100 and upwards, repayable on a notice of 10 days, and allow interest thereon at 1 per cent. below the Bank of England minimum rate of discount, not falling below 2 per cent. nor rising above 5 per cent. Deposits subject to longer notices of repayment bear higher rates which may be ascertained at their office.

Office hours 10 to 3. Saturdays, 10 to 2.

SHIPPING HOUSES of Manchester Goods from London, Liverpool, or Hull, of known respectability, can have their orders executed on liberal terms, with ample banking facilities, by a Commission House of twelve years' standing in Manchester, and their interests well attended to and promoted. A safe employment of time and means is the object of the Advertiser. All applications stating ~~satisfactory~~ business, confidential or anonymous.—Address, in the first instance, A.B, care of Henry Greenwood, Advertising Agents, Liverpool.

WHOLESALE HOUSES, Merchants, Shippers, &c., requiring Bookkeepers, Travellers, Clerks, Warehousemen, or other Assistants, can have the same forwarded for approval (without charge) by addressing a letter, stating their want, to Smith, Barry, and Co., 12 Bucklersbury, sole proprietors of the "Employers' Assistant," which always contains particulars of very eligible parties seeking employment of time and capital. S., B., and Co., do not in any way interfere with or make themselves responsible for the characters of applicants. Those seeking employment can obtain prospectuses with full particulars on application at 12 and 13 Bucklersbury.

LOANS ON DEBENTURES.—The London, Chatham, and Dover Railway Company are prepared to receive Tenders for Loans of £100 and upwards, on Mortgage of the Metropolitan Extension Lines, authorised by Act of Parliament, to last for three or five years, at 6 per cent. per annum.—By order,

G. F. HOLROYD, Secretary.

Offices, 3 Victoria street.

FRENCH WINE BOTTLES, Soda Water Bottles, Confectioners' Bottles, Drug, Dispensing, and Castor Oil Bottles, Wine, Ale, and Porter Bottles, from Stock in London or direct from the Works.—AIRE and CALDER GLASS BOTTLE COMPANY, Castleford; Free Trade Wharf, Ratcliff; and 61 King William street, E.C. The Patent Stoppered Bottles of all kinds

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons. Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

NOTICE TO INVENTORS.—Office for Patents, 4 Trafalgar square, Charing cross.—Printed instructions (gratis) as to the cost of Patents for Great Britain or foreign countries. Advice and assistance in disposing of or working inventions. Branch offices and agencies in every continental state and in America. Established 20 years. Full information as to expired or existing patents at home or abroad.—Apply personally or by letter to Messrs Prince and Co., Patent Office, 4 Trafalgar square, Charing cross, W.C.

WANTED, BY AN OLD LIVERPOOL House engaged in the manufacture of Pickles, Sauces, Jams, British Wines, &c., a Partner with £1,000. To a good man of business this would prove an invaluable opportunity.—Full particulars on application to J. C. S., 9 Great George square, Liverpool.

TO PURCHASERS OF CONSOLS, DEBENTURES and FOREIGN SECURITIES.—For your guide and protection against error use "Jones's Stock Tables," and "Jones's Debenture and Investment Tables." E. and E. H. Jones, Gresham chambers, 75 Old Broad street.

TO MERCHANTS AND CAPITALISTS.—A Gentleman thoroughly acquainted with Raw and Thrown Silk, and possessing a good routine of general business, is desirous to go out to Shanghai or Japan for a firm of good standing as its Representative, or to make arrangements with some firm or capitalist here in London to commence the Silk trade, for which he can influence a considerable foreign and home Commission Business. He speaks and corresponds fluently in three languages, and has first-rate references at his disposal.—Apply, in the first instance, by letter, to M. B., Post Office, 104 Strand.

£3,500 TO £4,000.—TO CAPITALISTS.—Wanted, on West India freehold Estates of upwards of 6,000 acres, unrivalled for the growth of "Sea Island" cotton, situated in one of the healthiest and oldest of our colonies, and rapidly increasing in value. As the money is required for the bona fide purpose of giving profitable effect to investigations and discoveries of a valuable nature made by the proprietor in a particular portion of Africa, and to enable him to embark in legitimate commercial operations, in which, by the use of capital, enormous profits can with the greatest certainty be made, a liberal interest will be given for a prompt advance in time to enable the approaching season's trade to be taken advantage of. Or the proprietor, who has acquired the language and minutely studied the trade, and who has acquired valuable and exclusive information by travelling into the interior, would be glad to find a capitalist who would be disposed to enable him to give the matter a wider extension than what the guarantee of his property would afford him. Or a partnership with one-third profits, yielding a preferential income of £750, would be granted for an advance of £5,000 to £6,000, but upwards of £1,000 might be confidently expected. Some enviable public prominence might be confidently expected, as one feature of the matter would have a more powerful and rapid effect in the creation and extension of a source of cotton supply, especially available to England, than any efforts or measures attempted by Government or any other persons whatever up to the present time in India or elsewhere are calculated to produce. Principals or their authorised agents only, apply for interviews and particulars to E. P., care Messrs Davies and Co., Advertising Agents, 7 Finch lane, Cornhill, London.

BRITISH AND FOREIGN INVESTMENT.

Mr THOMAS SPARGO, of 224 and 225 Gresham house, Old Broad street, London, E.C., transacts every description of business in the PURCHASE and SALE of SHARES in BANKS, Canals, Railways, Bridges, Insurances, and all other British and foreign stock. Mr Spargo has for sale shares in English mines paying from 20 to 25 per cent. upon the present price in bi-monthly and quarterly dividends, as also a number of shares in good progressive mines, some of which he specially recommends to the public as sound investments. Mr Spargo gives advice and accurate information as to the position and prospects of all mining undertakings upon application, either personally or by letter, and has published the following works, viz.:—Statistics and Observations upon the Mines of Devon and Cornwall, for 1859, price 2s 6d; ditto for 1860, 2s 6d; Physical, Geological, and Parish Map of Cornwall, 10s 6d; Geological Maps of various Mining Districts of Cornwall, showing Boundary Lines of every Mine, with the lodes, cross-courses, and elvans traversing each, 2s 6d each; and a Relief Model Map of Cornwall, price £5 5s. Dividends received, calls paid, and all orders negotiated on a commission of 2½ per cent.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8 WATERLOO PLACE, PALL MALL, S. W.

THE HON. FRANCIS SCOTT, CHAIRMAN.
CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.
FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December, 1861, should make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these bonuses amount to, the three following cases are given as examples:—

Sum Insured.	Bonuses added.		Amount payable up to Dec., 1854	
£	£	s	£	s
5,000	1,987	10	6,987	10
1,000	397	10	1,397	10
100	39	15	139	15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the policy.

The Assets of the Company at the 31st December, 1860, amounted to £730,665 7s 10d, all of which had been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

For prospectuses, &c., apply to the Resident Director, No. 8 Waterloo place, Pall Mall.

By order, E. L. BOYD, Resident Director.

MERCANTILE INSURANCES.

NORWICH UNION FIRE INSURANCE SOCIETY.

All policies effected with this office are entitled to participate in the Bonus periodically declared.

The business of the Company exceeds £68,000,000.

The duty paid to Government for the year 1860 was £81,332 9s 9d, and the amount insured on farming stock £9,988,368, thus placing the office Third in order of magnitude among the Insurance Companies of the United Kingdom.

The rates of premium are in no case higher than those charged by the other principal offices making no returns to their insurers.

For prospectuses apply at the Society's offices, Surrey street, Norwich; and 6 Crescent, New Bridge street, Blackfriars, E.C.

QUEEN INSURANCE COMPANY

(FIRE, LIFE).

Chief Office—Queen Insurance buildings, Liverpool.

Offices in London—83 King William street, E.C.

Capital—Half-a-Million, with power to increase to One Million.

LONDON BOARD.

CHAIRMAN—Henry Bruce, Esq., merchant, Bell court, Mincing lane.

Edward P. Alderson, Esq., (firm, Kelson, Tritton, and Co.), Old Broad street.

Henry Fowler, Esq., (firm, H. and R. Fowler), St Saviour's Dock, Southwark.

Thomas Wm. Kough, Esq., (firm, Jones Brothers), Upper Thames street.

Samuel Lloyd Stacey, Esq., (firm, Corbyn, Stacey, Messer, and Co.), Holborn.

BANKERS—Messrs Barclay, Bevan, Tritton, and Co.

Mercantile and other descriptions of Fire Insurances effected.

Losses promptly and liberally settled.

Life assurance in every branch.

Days of Grace.—Full protection granted under both fire and life policies during the period allowed for their renewal.

W. P. CLIREHUGH, Manager and Actuary.
H. B. TAPLIN, London Secretary.

THE SCOTTISH WIDOWS' FUND

and LIFE ASSURANCE SOCIETY is a purely mutual office, in which the whole funds belong to the members, and the profits are divided among them alone. Since it was founded in 1815, its history has been one of constant and increasing prosperity; and it is now, in point of funds, annual revenue, and number of members, one of the largest Life offices in the world. The security presented by the Society to its members and their representatives is of the most unquestionable character, while the returns made in the form of bonuses are, it is believed, not exceeded by those of any other similiar institution. The following is a

MEMORANDUM OF BUSINESS, BONUSES, FUNDS, AND REVENUE,

Extracted from the Society's detailed Prospectus.

	£
1. Total assurances issued	14,621,724
2. Total bonuses declared	3 033,049
3. Sums assured and bonuses existing	10,836,591
4. Total claims paid exceed	3,600,000
5. Invested funds	3,601,764
6. Annual revenue	425,738

Forms of proposal, detailed prospectuses and reports, and every information may be had at the Head Office, or any of the Society's agents.

SAMUEL RALEIGH, Manager.
J. J. P. ANDERSON, Secretary.

SPECIAL NOTICE.

Proposals dated and lodged at the Head Office, or with any of the Society's agents, during the current year, will secure One Bonus more than those of later date.

LONDON HONORARY BOARD.

George Young, Esq., Mark lane.
Charles Edward Pollock, Esq., Barrister, Temple.
David Hill, Esq., Sussex square.
John Murray, Esq., Publisher, Albemarle street.
Samuel Laing, Esq., Indian Finance.
Sir John Thomas Briggs, Admiralty.
Leonard Horner, Esq., F.R.S.
Jas. Anderson, Esq., Q.C., Lincoln's inn.

AGENTS for LONDON and the SUBURBS.

Central Agent { Hugh M'Kean, 4 Royal Exchange buildings, Cornhill.

District Agents { Major R. S. Ridge, 49 Pall Mall, Agent for the West-end District.
Benton Seeley, Islington green, Agent for Islington District.

ROBERTSON and WHITE, Accountants, 4 Princes street, Bank E.C.

WESTERN LIFE ASSURANCE

and ANNUITY SOCIETY,
3 Parliament street, London, S.W.
Established A.D. 1842.

DIRECTORS.

Henry Edgeworth Bicknell, Esq., Upper Bedford place, Russell square.

Thomas Somers Cocks, Esq., J.P., Charing cross; Hereford street, Park lane; and Thames Bank, Marlow, Bucks.

George Henry Drew, Esq., Hibernia chambers, London bridge, and Caterham, Surrey.

William Freeman, Esq., Millbank street, Westminster.

Joseph Henry Goodhart, Esq., J.P., 3, 4 and 5 Ratcliffe highway, and Manor House, Upper Tooting, Surrey.

Edmund Lucas, Esq., Millbank street, Westminster, and Wandsworth, Surrey.

Frederick Boyd Marson, Esq., Brunswick place, Regent's park.

James Lys Seager, Esq., Millbank row, Westminster, and Carreau House Surrey.

John Bazley White, Esq., Blackheath, Kent.

ACTUARY.

Arthur Scratchley, Esq., M.A.

Annual payments to insure £100 at the undermentioned ages:—

	£	s	d		£	s	d
20	1	14	2	40	2	14	5
25	1	18	6	45	3	2	5
30	2	2	9	50	3	17	0
35	2	8	0	55	4	10	4

Partners in Firms are recommended to give attention to the moderate terms upon which joint life assurances may be effected.

The medical attendants of the lives proposed are always consulted, and paid for their reports.

BONUSES.—The rates of this society, when compared with those of other offices, will be found to give an immediate bonus to assurers, and, in addition, large bonuses are periodically declared out of the surplus profit. The next division will take place in 1865.

Agents wanted in the towns and villages of the United Kingdom where the society is not already represented.

IMPERIAL LIFE INSURANCE

COMPANY, No. 1 Old Broad street, London, E.C. Instituted 1820.

DIRECTORS—1861.

Thomas Newman Hunt, Esq., Chairman.
James Gordon Murdoch, Esq., Deputy-Chairman

Thos. G. Barclay, Esq.	George Field, Esq.
James C. C. Bell, Esq.	George Hibbert, Esq.
Charles Cave, Esq.	Samuel Hibbert, Esq.
Ed. H. Chapman, Esq.	Frederick Pattison, Esq.
Geo. W. Cattam, Esq.	W. R. Robinson, Esq.
Geo. Henry Cutler, Esq.	M. T. Smith, Esq., M.P.
Henry Davidson, Esq.	Newman Smith, Esq.

Profits.—Four-fifths, or 80 per cent. of the profits are assigned to policies every fifth year. The assured are entitled to participate after payment of one premium.

Bonus.—The decennial additions made to policies issued before the 4th of January, 1842, vary from £78 to £16 15s per cent. on the sums insured, according to their respective dates.

The quinquennial additions made to policies issued after the 4th of January, 1842, vary in like manner from £28 17s to £1 5s per cent. on the sums insured.

Purchase of Policies.—A liberal allowance is made on the surrender of a policy, either by a cash payment or the issue of a policy free of premium.

Loans.—The Directors will lend sums of £50 and upwards on the security of policies effected with this Company for the whole term of life, when they have acquired an adequate value.

Insurances without participation in profits may be effected at reduced rates.

Prospectuses and further information may be had at the chief office as above; at the branch office, 16 Pall Mall; or of the agents in town and country.

SAMUEL INGALL, Actuary.

MERCANTILE SHIPPING

AGENCY. Established upwards of 80 years.

The mercantile community is respectfully informed that Merchandise of every description is received, forwarded, and insured, agreeably with instructions, to and from all parts of the world, by steam or sailing vessels.

W. J. HALL and Co., Sworn Brokers,
(Successors of Holmes, Hall, and Sons,)

Wharfingers and Bonded Warehouse Keepers, under special security, Custom House and Wool Quays, Lower Thames street, London, E.C.

ROYAL INSURANCE COMPANY.

Head Offices:—29 Lombard street, London, and Royal Insurance Buildings, Liverpool.

Branch Offices:—Manchester, Birmingham, Bristol, Leeds, Dublin, Glasgow, and Edinburgh.

Extracts from the Report for the Year 1860.

"The success of the Company, even in its earliest years, received the marked attention, and elicited the surprised comments of writers best acquainted with the history of Insurance Companies.

"Fire Premiums for 1860 equal the Total Fire Premiums for the Seven Years 1845 to 1851.

"Life Premiums for 1860 exceed the Entire Life Premiums for the Eight Years ending 1852.

"Purchase of Annuities in 1860 largely exceeds the similar receipts for the first Ten Years 1845 to 1854.

"This progress, it is believed, is unsurpassed, considering that it applies to each of the three branches of the business."

FIRE BRANCH.

"The Fire Branch has certainly shown no exhaustion during the year 1860 of that impetus which had previously brought it to a position of the first magnitude among the Insurance Companies of the United Kingdom. The Fire Premiums in 1859 had advanced to the sum of £228,314 7s 3d. In 1860, the amount of Fire Premiums has arrived at a sum of £262,977 19s 11d, showing an increase of £34,663 12s 8d, exceeding the large advance of the preceding year, so that in two years the Fire Revenue of the Company has been enhanced by the enormous sum of £66,829 17s 5d.

"The Parliamentary Report of Returns of Duty paid to Government for the year 1860 exhibits the augmentation of the business in a more prominent way, as it affords the means of comparison with other Companies. The Proprietors will be gratified to learn that the increase of Duty paid by the Royal in the last year is more than double that of any other Company, either London or Provincial, whilst only one of those Companies even approaches to 50 per cent. of the advance of this Company. Our increase actually equals 30 per cent. of the entire increase of the whole of the Metropolitan Offices combined, whilst of the Provincial Offices it forms upwards of 30 per cent. of the total advance of the other 28 offices established out of London."

LIFE BRANCH.

"The Reports of the Company for several years have had invariably to announce a constant periodical expansion of Life Business, the new Policies of each succeeding year showing an advance over the one that had immediately preceded it. A similar result is shown in the year 1860, the Premiums of New Policies, after deducting Guarantees, being £15,079 17s 10d, which is an increase in that item of £1,993 17s 5d above the amount received for the year 1859.

"But even this advance is small when compared with the sudden and remarkable momentum which has been given to this branch of the business in the present year (1861).

"It was not until the commencement of the year that the public seemed to have become fully acquainted with the fact that the Royal Insurance Company had published late in the last year an account of the investigation into the assets and liabilities of its Life Department, under a novel form, and in as plain and intelligible a manner as the abstruseness of the subject admitted, together with the entire statements and valuations necessary for that purpose.

"It is conjectured from the extensive notices of this pamphlet and its accompanying diagrams, which have appeared in the periodicals of the day, that it has largely attracted the attention of vast numbers of persons in all parts of the United Kingdom as well as in other parts of the world. Indeed, a most satisfactory and conclusive evidence that such is the case is afforded by the fact that the sum assured on new policies in the six months to the 3rd June of the present year is actually fifty per cent. in excess of the sum assured in the corresponding months of the year 1860, although the latter amount in itself exceeded the sum assured in any like previous period of time.

"If this success be continued, the Royal Insurance Company would, with respect to the amount of its new business, be at once placed (at least with one or two exceptions) at the head of all the Insurance Companies doing business in this country, and the anticipations of the last report, to the effect that the details of the life business then to be published would form an epoch of the establishment, will have a speedy and a very happy realisation."

SPECIAL ADVANTAGES OF THE LIFE BRANCH.

PROFITS.—Large proportion returned every five years to policies then in existence two entire years.

Expenses chiefly borne by the Fire Branch, in order to increase the bonus to be returned.

LIFE BONUSES DECLARED,

Two per cent. per annum on the sum assured; the greatest bonus ever continuously declared by any Company.

SECURITY FOR BOTH FIRE AND LIFE BRANCHES.

Capital, Two Millions sterling.

Accumulated funds in hand exceeds £800,000.

PERCY M. DOVE, Manager and Actuary.
JOHN B. JOHNSTON, Secretary.

Under the Patronage of the Governments of Great Britain, Spain, Denmark, Brazil, Russia, &c., &c.

EASTON'S PATENT BOILER

FLUID effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M. steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Xurrachee, and by engineers and manufacturers thro h-out the country.

Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

COTTON AND CIVIL WAR.

THE true mercantile instinct interpreted with true mercantile promptitude the practical meaning of the disastrous defeat of the Federal troops with which the news of this week opened. The tidings only reached Liverpool on Sunday afternoon, and on Monday a large business was transacted in cotton at an advance of ½d a lb. Commercial sagacity, well trained in the faculty of discerning the bearings of political events on the price of commodities, concluded with singular unanimity that the first and most certain issue of the battle at Manassas Junction must be to postpone all chance of compromise and to prolong and exacerbate the war. We have no doubt the inference is a correct one. The South, whose tone has all along been so lofty and whose demands have all along been so peremptory, will assuredly have their pretensions confirmed and their confidence restored by a victory which has certainly surpassed in completeness the expectations even of the most sanguine. They have always been resolute and hopeful, determined to be content with nothing short of absolute independence, and confident of ultimate success; but at the same time prepared, especially of late, to anticipate a long and terrible struggle and severe sacrifices and privation. But though they entertained no doubt of being able to hold their own, they did not venture to count on so early and decisive a victory. Their tone is consequently higher and more imperative than ever; and they are prepared, rather too boastfully, to count on a series of similar successes. The North, on the other hand, conscious of vast superiority of resource, furious at an unexpected check, and sore to a not unnatural degree at a defeat which in its details is so *like humiliation*, are burning to avenge their losses and to redeem their military reputation, and are bound by every motive of interest, of passion, and of pride to make the most vigorous efforts to prosecute the war and to wipe out the memory of their disaster. It would be simply *impossible* for them now to listen to any terms of compromise or accommodation—even were their antagonists in the mood to offer such. The controversy *must* now be fought out; and the result of the first battle clearly intimates that this "fighting out" will be a somewhat long business.

At the same time this signal victory, won at the very outset by that party which was believed and is still generally admitted to be the weakest, will we expect do much towards determining the ultimate issue of the contest. It was not needed to confirm those convictions which we on this side of the Atlantic have expressed from the beginning, that the disruption of the Union must be the inevitable result and was in fact already consummated; but it will probably tend materially to infuse something of the same conviction into the minds of the Northerners. Their expectations of being able to subdue and re-incorporate the South—so far as they were genuine and rational at all—were based upon two assumptions:—*first*, that they were so incomparably the stronger, as well as the richer and more numerous party, that their victory would be very speedy and very thorough,—that, in short, defeat in the field and blockade of the ports would make short work of their antagonists;—and *secondly*, that there was a large "Union" party in the Slave States, which, if not a majority, was at least a very powerful minority, and which, as soon as any decided reverse sustained by the Secession army made it safe to show itself, would rise to the surface and overpower those who now suppressed them. Both these assumptions must have been rudely shaken, if not entirely dissipated, by the late disaster. The Northerners must now admit that their antagonists have, to say the least, been far better handled than their own troops and have shown superior military aptitudes, and are not men to be easily or speedily crushed;—and the moment anything like an equality of strength between the combatants is admitted or is made obvious, the project of subduing the South becomes simply insane, and must ere long be tacitly abandoned or avowedly renounced. It is clear, too, that even if there be, or has been, such an "anti-Secession" party in the South as the Federalists believe, such a victory as that at Manassas Junction will not only diminish their number, but will crush their hopes and dissipate their courage; that, if they have been cowed and silenced hitherto, still more will they be cowed and silenced now. On the whole, therefore,—and in this we only give expression to the sentiments of all the more dispassionate and well-informed of the mercantile community,—the effect of the opening event of the campaign will be at once to make the final issue of the contest more certain, and to prevent that issue from being reached so soon as sanguine men hoped a week ago.

The influence of these conclusions on the cotton market and on our cotton prospects is apparent at a glance. Since the war must continue till the North has, in the first place, wiped out the humiliation of its late defeat, and convinced itself, in the second place, of the capacity of the South to hold its own and to make good its position; and since one of its principal instruments of warfare, and that from which it looks for the greatest results, is the strict blockade of the Southern ports,—it is obvious that our chances of receiving within any moderate time any considerable proportion of the growing crop are greatly diminished. The controversy cannot now be speedily settled. At least six months, probably twelve months, must elapse according to all seeming before the Southern ports will be again open to free intercourse with Europe. If the blockade is really made effective—and the Federal Government, we may be sure, will spare no exertion to make it so—then our usual supply of cotton from the States must be wholly or mainly foregone. We

shall have to depend for the next year chiefly upon our present stock and upon our Indian resources. Under the operation of this conviction, prices which have hitherto advanced but slowly and inadequately will take a decided upward tendency, and orders to India will be sent out with much greater confidence than heretofore, and at much more liberal limits. Unusually large quantities are already on the way from that country, and from first to last we shall perhaps receive a million of bales.

Meanwhile, the pressure has as yet been little felt in our manufacturing districts. The spinners, as a rule, are unusually well stocked with the raw material—many people say as far forward as October. The expectation of an advance in price, which was certain to be considerable and might be enormous, has induced purchasers to supply themselves freely with goods and yarn; and as producers were determined not to allow their produce to accumulate, they have met the demand readily. And as they could, generally, at existing prices "cover themselves" (as the phrase is)—that is, escape actual loss—they have gone on producing nearly at their ordinary rate. Now, however, there is the commencement of a lull in the demand; and as manufacturers are determined not to "stock," they will produce only as much as they can sell, and we shall soon see short time resorted to as a general measure. Already a few mills are working only four days a week. There is no panic and little speculation: caution is the order of the day: people are resolved to "feel their "way"; and in the prevalence of this temper merchants will probably find an escape from ruinous losses and operatives a security against utter destitution and non-employment.

We must now add a few words on a subject which we have more than once considered in this journal, and on which we have been at considerable pains to arrive at all the light that is attainable—viz., the probability and the means of any material proportion of the American crop reaching us by illegitimate or circuitous channels. We are disposed to think that our prospect is rather better than it at first appeared. In the *first* place, the wild notion originally entertained by the Confederate States—that the dearth of cotton would entail such horrible suffering and ruin on the industrial populations of Europe that France and England would interfere to break the blockade, and under the influence of which they were inclined to second the Federalists in preventing its exportation—is fast giving way to saner expectations; and we are satisfied from inquiry in the quarters most concerned, that the Planters and the Planting States are now quite as willing and anxious to send us their cotton as we are to receive it. The sole question, therefore, now is, what is the extent and the completeness of the impediments which a hostile force can place between eager sellers and eager buyers? The United States will of course, especially since their defeat by land, proceed to render their blockading squadron as ample and efficient as they can; and they either have now or will soon have vessels enough for the purpose. But there is much inevitable *leakage* even in the strictest blockade where a large extent of coast has to be watched,—where the weather is sometimes very boisterous (especially in autumn),—and where harbours of refuge are few and not near at hand, as is the case in the Gulf of Mexico. Vessels will lie ready laden at their safe anchorage within harbour, waiting to take advantage of any favourable opportunity, which keen-eyed watchers and handy telegraphs will instantly announce to them. Storms arise, and the blockading squadron is blown off shore and obliged to run out to sea for shelter; or fogs sweep over the coast and obscure everything for miles around:—these are incidents which we have all read of in the history of every naval blockade. The merchant-ships with their valuable cargoes will seize the critical moment, and in twelve hours will be far beyond the grasp of the blockaders. Many, no doubt, will escape in this way. It is not a week since a vessel arrived in Liverpool, with the Confederate flag flying, from one of the blockaded ports (Wilmington, we believe). She had put out to sea on an evening when the Federal cruiser had left her ground on some casual errand, and had traversed the Atlantic without any interruption. That we have not already had many such instances is probably much less owing to the vigilance and efficiency of the blockading ships, han to the fact that there are scarcely any vessels in the Southern harbours (and they must go in before they can come out), and that we have already received all the cargoes they have to send us. There are now only 50 bales of cotton at sea, it is said. The whole of last year's crop has come forward, and this year's crop is not yet picked.

Again. Though the large harbours of the South are few and easily guarded, the navigable creeks are many, and very difficult to watch. Small craft, of a few hundred tons burden, can without much danger steal in and out, and run with their cargoes to Havana or some other neighbouring and neutral port, in about 30 or 40 hours;—and once there, are safe. Cuba will thus, in all likelihood, become the depôt for American cotton, which will soon find its way to England in British or Spanish or even American bottoms. The extent to which, in dark nights and in hazy weather, this contrivance may be practised with success, it is of course impossible at present to predict; but well-informed men, who know the facilities for the purpose afforded by the Planting States, anticipate a considerable supply from this source. We may observe, too, in passing, that the same contrivance will do much to mitigate the expected severity of the *internal* blockade. It is almost as easy, on a long line of coast, to effect ingress as egress; and the same swift-sailing cutters which carry out cotton, will bring in wine, spirits, and coffee (which are much less bulky and more valuable articles), and, to a certain extent, clothing likewise. So that, after all, the Southern deprivation of luxuries may not be so complete as their enemies had flattered themselves they could make it, and one of their chief inducements to submission will be removed.

Thirdly. We do not anticipate any *corrupt* connivance on the part of the Federal cruisers, which would allow cotton vessels to slip through the blockade; but we do anticipate a *cunning* connivance of this sort—and on a very extensive scale. It must never be forgotten that the North want cotton even more imperiously than we do. By preventing any cotton being exported, the Northern cruisers are stopping the mills and ruining the trade of their own manufacturers: they are cutting their own throats. They will soon begin to reflect that they will injure and impoverish their antagonists quite as effectually by capturing their cotton at sea as by preventing it from putting to sea at all,—while they will benefit themselves incomparably more. By winking or hiding away while the valuable cargo steals out of port and then pursuing and confiscating it, they effect three objects at once: they rob the Secessionists; they supply the Massachusetts spinners; and they put prize-money into their own pockets. They have the fun of the chase; they spoil the Egyptians; and they enrich the Israelites. If they were *certain* of being able to capture the escaping vessels, of course it would be far the wisest plan to allow them to run out;—if they have a very high *probability* of capturing them, it might still on the whole be a "smart" dodge and a profitable speculation;—and we may be very sure that their self-confidence will go far in their minds to represent a chance as a certainty. We cannot but think there will be much done in this way. Some will be captured: some will escape:—in any case, our market will be relieved and supplied. What escapes will come to Liverpool; what is taken will go to Boston or New York; but all will be available for the consumption of the world.

Lastly. We share to a considerable extent the instinctive conviction of the Lancashire merchants and manufacturers, that an article grown by an eager seller and consumed by an eager buyer *will* find its way from the one to the other, in spite of all hostile barriers and prohibitions. The question is after all one of degree—and of price. We must remember that the same cause—the blockade—which raises cotton so much in Liverpool and Havre, lowers it as much in New Orleans and Mobile. The export being prevented and there being no buyers, cotton becomes "a drug" in the Planting States, at the very moment when it is becoming as precious as gold in England;—and when the same article is worth *twelve pence* on one side of the water, and *six cents* on the other, while the freight is not *two cents*, the *loss* of every other cargo to the adventurous merchant who determined to run the gauntlet through the blockading squadron would still leave him a handsome profit on the entire transaction. With such a prospect before him,—to say nothing of the

allurement of the gambling character of such a trade to the speculative man,—we may be perfectly sure that the venture will be made, and made on a large scale;—and before long the insurance offices will begin to take cognisance of such transactions.

THE LATE SESSION AND THE ALLEGED REACTION.

THE Session which has ended has been much censured by some influential organs of ultra-Liberal opinion. 'It has,' they say, 'done little and undone much; the trifling reforms it has effected are an imperceptible instalment of 'what the people have a right to demand; its positive 'work has been very little—almost nothing. On the other 'hand, its negative work has been disastrous; it has seen 'the practical relinquishment of many pledges, and the 'indefinite postponement of many hopes. This time last 'year both Lord Derby and Lord Palmerston were bound, 'or half bound at least, to some revision of our representative 'system; but now they are scarcely so bound. Lord John 'Russell, in so many words, said that he—by far the 'sincerest Parliamentary reformer among our statesmen—'was tired of abortive attempts at it. Altogether the 'Session has been unsatisfactory.' So say the ultra-Liberal journals, and the Conservative journals turn the same facts the other way, and say, 'See what a reaction in *our* 'favour!' A very few words will enable us to measure the respective amounts of truth and error in these assertions.

There can be no doubt that the English people—the ordinary mass of sensible cultivated men—are sincerely indisposed to any sweeping measure of organic reform. Formerly, the subject of Parliamentary Reform was discussed in a sort of traditional political dialect, of which few remembered the origin and none considered the meaning;—a vague conception of "progress" was connected with an indefinite reduction of the suffrage qualification, and it was not remembered that such a reduction—heedlessly, inconsiderately and uniformly pursued—must end in the practical disfranchisement of the educated few, and the real omnipotence of the uneducated many. This obvious truth is now well understood: so strongly is the House of Commons and the country convinced of it, that both were opposed to the proposed creation of a new metropolitan constituency in which it was believed that cultivated wealth would have no influence, and comparative ignorance and comparative poverty would have very much. The late Session has decidedly marked the fixed resolution of the English nation not at present to accede to large proposals of organic innovation.

But in this there is nothing which is new. The real public opinion, as we have often shown, has been for many years on this subject very much what it now is. It never desired such an enfranchisement of the many as would have been accompanied by the disfranchisement of the intelligent. Our statesmen had contracted a habit of repeating certain traditional phrases, but even they did not wish what their words implied,—did not mean what they seemed to mean. But the country at large never joined even in this thoughtless use of misleading language. It never cared for the schemes proposed to it; at heart, it disliked them. Here and there some moderate reformer like ourselves was earnestly alive to the importance of some well-considered scheme for giving the working classes some power in the State, and yet not giving to them the entire power. But such reformers were few. The nation was divided between an influential minority who wished for a great and uniform reduction in the borough franchise, and a very large majority who were wholly disinclined to it. In the course of the recent Session, this state of feeling has become more apparent, but it has existed underneath the surface of politics for many years. But the opinion of the nation is not less moderately Liberal. Moderate rational improvement was never in such favour as now. Whoever is in power will have to pursue it according to his ability. Whether Lord Derby come in or Lord Palmerston stay in, the educated thought and cultivated reason of the country will dictate the same measures. As at the commencement of the Session, so at the end, public opinion adheres to the present Cabinet, because it contains the ablest men and most practised administrators in the country, and because its opinions, when it is united, are generally the national opinions.

It may, indeed, be said that at a time when no great organic change is desired, the Conservative party have a natural advantage. 'When nothing is to be done,' it may be said 'Conservatives are the people to do nothing.' But it is a gross misapprehension of the national opinion to say that it wishes that nothing should be done. It wishes a careful course of detailed improvement,—a gradual succession of steady alterations and business-like reforms. It wishes to see the affairs of the country competently conducted, both at home and abroad. These wishes are favourable to the present Cabinet, because the official experience it contains is not only greater, but immeasurably greater than the experience of any Cabinet which their opponents could construct.

The Conservatives, too, have gone out of their way to prepare for themselves a difficulty. Satirists say they "angled for the Irish vote,"—but, be that as it may, they have given a needless publicity to their support of the Pope. It is possible that they may win a few votes in Ireland by such means,—they may gain a stray Catholic, perhaps, here and there in England. But at what price? Can it be imagined that under any Government England would ever endure that her influence should be used against the Kingdom of Italy, and in favour of the conspirators who have taken shelter under the remnants of the Pope's temporal power? If Lord Derby were permanently in power, he would have to adopt the national policy in Italy: his administration could not last six months unless he did so, and of what use would the "Catholic vote" be to him then? It would be an additional difficulty that he had ever professed an anti-national policy.

INDIAN FINANCE.

THE question how much are the Indian Government likely to borrow, is closely connected with the question we last week discussed, 'what is the present relation of the Indian 'revenue to the Indian expenditure?' We last week showed that, putting estimates and conjectures aside, this was as yet not satisfactory. The last point of time as to which we have real information—an authentic statement of accomplished fact—is the 30th April, 1860:—

	£
For the year then just closed the expenditure was.....	50,475,683
The revenue	39,705,822
Deficit	10,769,861

By what is called the regular estimate, which is based on facts up to Feb., 1861, and on conjectures afterwards,

	£
The expenditure is to be reduced to	46,067,996
The revenue is to be,.....	39,509,631
Reducing the deficit to	6,558,365

And this is mainly accomplished by diminishing the military expenditure in India, which

	£
In 1859-1860 was	20,909,307
In 1860-1861 is to be	15,279,005
Giving a diminution	5,630,302

Mainly by another great reduction of the military expenditure, Sir C. Wood hopes to reduce the deficit to 1,000,000*l*, and Mr Laing, with great courage, foretells a surplus. *We decline to prophesy.* We think there are no data upon which the public can depend,—no data which, by their correctness in the past, will justify a reliance upon them in the future. We can only say that such very large reductions in the Indian expenditure, and principally in the military Indian expenditure, are rather surprising; that they will be satisfactory if true, but that conclusive evidence is needful to prove that they are true; that the reduction of a large expenditure is usually a slow, tedious, and difficult process; that we have heard similar anticipations in Indian finance before, which have not proved to be in the least correct.

Is there, however, any reason to believe that the large deficit which indisputably did exist in Indian finance, and which has only disappeared entirely in very sanguine anticipations, will necessitate a loan? Sir Charles Wood expressly tells us that he only wants money for the construction of railways, not for the ordinary Indian expenditure. Do the figures confirm what he tells? Perhaps they do, though it

is difficult to say. The cash balances at the disposal of the Indian Government, though enormously reduced since last year, will still bear some reduction. On the 30th April, 1861 and 1860 respectively, the accounts stood thus:—

CASH BALANCES in the TREASURIES in INDIA on the 30th April, 1861.

	£	£
Government of India	3,740,198	
Bengal	1,593,059	
North-Western Provinces	1,346,846	
Punjaub	1,214,947	
Madras	1,640,695	
Bombay	1,912,389	
		11,448,134
Estimated balance remaining in the Treasury in England on the same day		2,653,063
		14,101,197

CASH BALANCES remaining in the TREASURIES in INDIA on the 30th April, 1860.

	£	£
Government of India	4,951,288	
Bengal	1,438,149	
North Western Provinces	2,597,236	
Punjaub	1,395,729	
Madras	2,424,695	
Bombay	3,994,615	
		16,801,712
Balance remaining in the Treasury in England on the same day		4,196,094
Total cash balance in India and at home on the 30th April, 1860		20,997,806

But it appears from an account appended to Mr Wilson's Budget, that in the *Indian* Treasury alone, and exclusive of the home accounts, the cash balance was:—

	£
30 April, 1853	15,439,134
— 1854	13,778,698
— 1855	10,049,202
— 1856	12,846,222
— 1857	13,611,534
— 1858	14,411,359
— 1859	10,797,020

showing, therefore, that though the cash balance of the Indian Treasury is now in a fairly satisfactory state, it is not in a condition (as far as the published accounts show) to meet indefinite deficits, or satisfy a continued series of exaggerated demands.

The actual cash requirement of the Treasury is, however, one of the points which a Finance Minister is likely to know much better than any other person, though of course he may be misled by the sanguine conjectures of distant officials or by erroneous anticipations of his own. *Still it is a point specially for him.*

Of railway requirements, the official account, dated 1st of May, 1861, says:—"Taking the estimate of 55,680,000*l* as "the sum requisite for the completion of the railways which "have been sanctioned, but which, it should be observed, "is pronounced by some of the Companies to be excessive, "about 14,000,000*l* remains, exclusive of the 7,000,000*l* or "8,000,000*l* required ultimately for suspended works, to be "raised for the lines in course of execution. The expendi- "ture of this sum will be spread over this and the next "three or four years; and, looking to the progress made in "some lines, and to the expected completion of a consider- "able addition within the next twelve months, it will pro- "bably be distributed as follows:—

	£	England. £	India. £
In 1861-2	8,000,000	2,000,000	6,000,000
1862-3	4,000,000	750,000	3,250,000
1863-4	1,500,000	300,000	1,200,000
1864-5	500,000	100,000	400,000

"But before the arrival of the year 1864, it will have to be con- "sidered whether the postponed works, as well as the exten- "sions of the Great Southern and the Eastern Bengal Railways "should not be commenced. If this question is decided in "the affirmative, the expenditure would be raised to, and "maintained at, from two and a half to three millions a "year for that and the three following years": and towards this Sir C. Wood borrowed in July 4,000,000*l*, and has just taken power to raise 5,000,000*l* more. The remainder will have to be raised either by the Indian Government itself, or by the Railway Companies with the guarantee of that Government.

Are we, then, right in refusing to give the Imperial guarantee for the large loans which the Indian mutiny and the construction of the Indian railways has compelled the Indian Exchequer to contract?

Some time since this question was almost universally answered in the affirmative. It was thought that the augmented economy which was expected to accrue from undiminished responsibility, from the feeling that "they "could not have the money unless they found the money," was amply sufficient to counterbalance any excess of interest which the refusal to pledge the Imperial credit might occasion. Subsequent events, and especially the great popularity of the Indian Five per Cents., have unquestionably weakened this opinion, though they have by no means dissipated it.

First. It is said that 'you do not obtain that which you 'wish. There is no *bonâ fide* pressure upon the Indian Ad- 'ministration. So far from their having to find the money 'in India, the Secretary of State can borrow it for them to 'any extent, and at any time, in the English money market.' He borrows it no doubt more dearly than Mr Gladstone would, but he is as certain to borrow it. Practically, it is felt that whatever is wanted for India can be obtained in London, and no more is needed to remove the final responsibility from Calcutta.

Secondly. It is alleged that, though the advantage of giving the Imperial guarantee is not obtained, the danger of giving that guarantee is nevertheless incurred. '*If* we were to lose 'India,' it is argued, 'to-morrow, the Indian debt would be 'paid just as if it were an English debt. The securities of 'the Indian Government are held by so large a class that no 'Government would incur the odium of permitting them to 'be unpaid,—they are held by so influential a class that no 'Government could refuse to pay them. Between the popular 'outcry of the holders of Indian Five per Cents. and the 'Parliamentary influence of the holders of Indian de- 'bentures and Indian bonds, no Government, least of all a 'Government with a small and a precarious majority, will 'venture to refuse the regular payment of the interest or the 'proper liquidation of whatever part of the principal the 'holders can demand.' The Cabinet would dread a cry of repudiation which was diffused through the community, and was well supported in the House of Commons.

Thirdly. It is said, 'You are doing more harm than you 'are aware of. You are introducing a dangerous competitor 'to Consols. The new issue of Indian Five per Cents. is even 'now depressing the price of the English funds. If the 'Chancellor of the Exchequer should ever have to borrow on 'a large scale, he will deeply regret the competition he has 'allowed.'

It is impossible to deny that these arguments have had much influence, and yet it is also impossible to admit that they prove the conclusion in favour of which they are alleged. Let us for the present put the Indian railways out of our consideration, and think only of loans required for the necessities of customary Indian expenditure.

Is it, then, true that we get no augmented economy by refusing our guarantee? We maintain that it is not true. We maintain that the pressure *even now* upon the Local Administration in the East, and the Home Administration in London is very different from what it would have been if the Imperial guarantee had been given. The Secretary of State for India has to find the money, and it is true that his credit being at present excellent he finds it easily; but is not this easier than sending a requisition to Mr Gladstone? Is not his responsibility greater? Is he not more likely to encourage improvements in revenue, to promote savings in expenditure even now, than if he had merely to draw a bill on another public officer? And if this be so in some degree at the present moment, it is even more likely to be so in the future. We, at least, do not believe that even the marvellous popularity of the Indian Five per Cents. would endure a succession of loans every year for many years. The holders have been studiously encouraged to expect a rapid disappearance of the Indian deficit:—if that should not happen, their price will gradually fall, and their reputation will steadily decline. If the Indian debt had been borrowed *in Consols, the last Consols would be nearly* as good as the first—quite as good to the Indian Secretary of State; but he would find it difficult, at any rate much more difficult, to borrow five years hence if there should still be a deficit in India—if he should no longer be able to throw out encouraging anticipations—if he could no longer say that he was borrowing on behalf of the railways. We do not say—we do not believe—that so dismal an anticipation will probably be realised; but in arguing pecuniary questions, it is peculiarly advisable to investigate the worst contingency.

Secondly. We do not believe that the whole principal and the whole interest of the Indian debt would be paid in full if we were to lose India. We do not think it likely that the whole liability would be repudiated; but we apprehend that, as usual in England, there would be a compromise. The holders would get *something*. They would not be told that their sole legal security was gone, and that no aid beyond that security would be offered to them. But it would also be considered that the holders of these securities had taken the risk of a certain contingency, and that the contingency had occurred. Such persons could not claim to receive both the high interest which was the compensation for the imperfection of their securities, and also their full principal when that security was swept away. An equitable adjustment would be made, but it would be attended with difficulty and preceded by doubt.

Thirdly. Although it is quite true that the Indian Five per Cents. have, as the phrase is, "taken up Consol "money,"—have, that is to say, attracted a class of investors who were before constant to the Three per Cents., —we do not think they have injured the Chancellor of the Exchequer *more* than if he had borrowed the same amount in Consols. In that case the whole of the loan would have been taken from a species of money which he thinks peculiarly his own,—from the pockets of the class of persons who *in* ordinary cases exclusively favour his securities. Now, a part, perhaps a large part, has been so taken, but certainly not the whole.

Lastly. There is an argument against the Imperial guarantee which it is difficult to state with adequate force at the end of a long article, but which would of itself outweigh in our judgment a vast variety of other reasons. If you have the Imperial guarantee, you must have Imperial control and Imperial interference. If the Treasury is to be responsible, *the* Treasury must be despotic; and if we once begin to govern India, exclusively or principally, in detail from England, we shall not very long retain India to govern in any way.

In these remarks, we have spoken only of loans to satisfy what we may call a political deficit,—to meet the difference between the political expenditure and the political revenue of India. We shall on an early occasion consider whether the same arguments do or do not apply equally to an Imperial guarantee upon loans for the construction of railways.

LORD HERBERT.

Lord Herbert's untimely death is one of those rare calamities which all men of all parties unite not only in deploring as a public loss, but in feeling as a personal grief. We cannot say, "we could have better spared a better man,"—for among our statesmen no better man was to be found; but assuredly we could better have spared a cleverer man,—and many cleverer undoubtedly exist. But Lord Herbert was a unique man;—and unique men are of all the most difficult to replace. He was also an unstained and undamaged man; —and such can seldom be met with among politicians who for years have taken a prominent part in the struggles of the Parliamentary arena or the toils of official life, and are perhaps scarcer than ever now. He was in the prime of his mature strength; he had the highest position in the State in almost certain prospect; and, what was more important still, he had great services yet to render to his country. He did much, but has left his special work undone.

Lord Herbert's abilities were not of the *first* order, but they were of a very high order; and, at a time when moral qualities are more essential, more rare, and more influential than intellectual ones, were amply sufficient, in combination with his character and his manners, to have made him the beloved leader of a great Party, and the combining if not the controlling head of a powerful Cabinet. He was not fitted for very troubled or dangerous times; he was not made to be the Supreme Minister of an autocratic Sovereign; he would probably have been a poor Dictator; he could not have filled the place of Richelieu or, of Pitt. But at a period and in a country when no Minister, however great his abilities or however vehement his will, would be allowed to have his own way; when the wisest must often temporise, and the most resolute must often yield, and the cleverest must be often baffled; when the most honest and sagacious can do little more than follow public opinion and do its behests to the best of his powers, endeavouring to enlighten it when benighted or misled, and refusing to obey it or be its tool when manifestly mischievous or wrong; when to inspire public confidence, to conciliate opposing wills, to blend and harmonise incongruous elements, to work steadily for valuable aims, satisfied to do whatever good is practicable in whatever way is open and to whatever extent public indifference and official antagonism will permit, is nearly all that any statesman can achieve,—Lord Herbert was precisely the man for the situation. He was earnest; he saw the evil which required remedy and the purpose which demanded attainment; and he set it before him as his work, and followed it like a determined and industrious labourer. The soldier will long bless his memory: his quiet, judicious, pertinacious pursuit of sanitary reform in the army will yearly save thousands of precious lives and hundreds of thousands in hard cash; and successors will be found to carry out and complete his plans. He was disinterested and sincere; he was not specially ambitious of distinction or of power; he was fortunate in that his position as to rank and wealth left him nothing to desire; more fortunate still in that this happy independence was in him combined with a public courage which is not always its concomitant. From his freedom, from his honesty, from his earnestness, he drew that proper spirit—half the inheritance of the English gentleman, half the endowment of the moral and religious thinker—which refused to fall in with popular prejudice or to bow to popular clamour. He sympathised largely and warmly with the people; he served them zealously and faithfully; but never for a moment would he either flatter them or yield to them. On the question of Reform his views were liberal as well as moderate; he repeated no party Shibboleth; he really studied the subject, and was one of the few public men who showed himself a willing and intelligent recipient of new ideas. Gentleness and geniality, absence of excess and of animosity, indeed, marked all his opinions as well as all his intercourse and all his actions;—and it was this peculiarity which would have made him so admirable a *solvent*, so good a *vinculum* between inharmonious politicians,—a character which in a year or two will probably be more needed than any other. If he had lived, he must sooner or later have been Premier: every one loved him, no one mistrusted him; his colleagues could always have relied upon his loyalty and honour; his opponents would have felt secure that his political warfare would have been invariably conducted with a high-minded scorn of all the mean trickery which has of late so frequently disgraced our party conflicts; the country would have had confidence in his spirit and integrity; and patriots and thinkers would have felt safe and proud in the certainty that Lord Herbert of Lea at least—in this age of timidity and truckling—would never, for any motive or in any crisis, have stooped to stain his name by a cowardly, a frivolous, or an unconscientious act. Power, in his estimation, was too sacred a trust to be either neglected or abused: he *could* not, knowingly, have made a bad appointment; he could not have deliberately foisted into the public service an incompetent relative or friend; he could not, at the head of a great department, have suffered recognised abuses to survive, if a way of reforming them could be devised. He was, above everything, a man *to confide in;* you always knew where to find him; he had courage, but it was not aggressive; he had zeal, but it was according to knowledge. He has left no similitude behind him.

THE QUEEN'S SPEECH.

Parliament was prorogued by commission on Tuesday last. The Royal Speech was as follows:—

My Lords and Gentlemen,

We are commanded by Her Majesty to release you from further attendance in Parliament, and at the same time to convey to you Her Majesty's acknowledgments for the zeal and assiduity with which you have applied yourselves to the performance of your duties during the Session of Parliament now brought to a close.

Her Majesty commands us to inform you that her relations with foreign Powers are friendly and satisfactory, and Her Majesty trusts that there is no danger of any disturbance of the peace of Europe.

The progress of events in Italy has led to the union of the greater part of that peninsula in one monarchy under King Victor

Emanuel. Her Majesty has throughout abstained from any active interference in the transactions which have led to this result, and her earnest wish as to these affairs is that it may be settled in the manner best suited to the welfare and happiness of the Italian people.

The dissensions which arose some months ago in the United States of North America have, unfortunately, assumed the character of open war. Her Majesty, deeply lamenting this calamitous result, has determined, in common with the other Powers of Europe, to preserve a strict neutrality between the contending parties.

Her Majesty commands us to inform you that the measures adopted for the restoration of order and tranquillity in Syria, in virtue of Conventions between Her Majesty, the Emperor of Austria, the Emperor of the French, the King of Prussia, the Emperor of Russia, and the Sultan, having accomplished their purpose, the European troops which, in pursuance of those Conventions, were for a time stationed in Syria to co-operate with the troops and authorities of the Sultan have been withdrawn; and Her Majesty trusts that the arrangements which have been made for the administration of the districts which had been disturbed will henceforward secure their internal tranquillity.

Her Majesty has seen with satisfaction the rapid improvement in the internal condition of her East Indian territories, and the progress which has been made towards equalising the revenue and expenditure of that part of her Empire.

GENTLEMEN OF THE HOUSE OF COMMONS,

Her Majesty commands us to convey to you her warm acknowledgements for the liberal supplies which you have granted for the service of the present year; and Her Majesty has seen with satisfaction that, after amply providing for the wants of the public service, you have been able to make a sensible diminution in the taxes levied upon her people.

MY LORDS AND GENTLEMEN,

Her Majesty commands us to express to you the deep gratification with which she has witnessed the spirit of devoted patriotism which continues to animate her volunteer forces; and the admiration with which she has observed their rapid progress in discipline and military efficiency.

Her Majesty has given her cordial assent to the Act for completing the number of the members of the House of Commons by allotting the forfeited seats of Sudbury and St Albans.

Her Majesty trusts that the Act for improving the laws relating to Bankruptcy and Insolvency will be productive of important advantage to the trade and commerce of her subjects.

Her Majesty has given her ready assent to Acts for consolidating and assimilating the Criminal Law of England and Ireland, and for promoting the revision of the Statute Law.

Her Majesty has given her assent to important Acts which she trusts will have the effect of opening more largely employment in the public service to the European and native inhabitants of India, of improving the means of legislation, of furthering the ends of justice, and of promoting the contentment and well-being of all classes of Her Majesty's Indian subjects.

Her Majesty has assented with pleasure to the Act for the Improvement of Harbours on the Coast of the United Kingdom, and for Relieving Merchant Shipping from Passing Tolls, and also to the Act for improving the Administration of the Law relating to the Relief and the Removal of the Poor.

Her Majesty trusts that the Act for rendering more easy arrangements connected with the Drainage of Land will assist agricultural improvements in many parts of the United Kingdom.

Her Majesty has gladly given her assent to many other measures of public usefulness, the results of your labours during the session now brought to its close.

Her Majesty has observed, with heartfelt satisfaction, the spirit of loyalty, of order, and of obedience to the law, which prevails throughout all her dominions, and she trusts that by wise legislation, and a just administration of the law, the continuance of this happy state of things will be secured.

On returning to your respective counties you will still have important public duties to perform; and Her Majesty fervently prays that the blessing of Almighty God may attend your exertions, and may guide them to the attainment of the objects of Her Majesty's constant solicitude—the welfare and happiness of her people.

THE COMMERCIAL TREATY WITH TURKEY.

(CONTINUED FROM OUR LAST.)

Art. 12.—The Sublime Porte desiring to grant by means of gradual concessions all facilities in its power to transit by land, it is stipulated and agreed that the duty of three (3) per cent. levied up to this time on articles imported into Turkey, in their passage through Turkey to other countries, shall be reduced to two (2) per cent., payable, as the duty of three per cent. has been paid hitherto, on arriving in the Ottoman dominions; and at the end of eight years, to be reckoned from the day of the exchange of the ratifications of the present treaty, to a fixed and definite tax of one (1) per cent., which shall be levied, as is to be the case with respect to Turkish produce exported, to defray the expense of registration.

The Sublime Porte at the same time declares that it reserves to itself the right to establish, by a special enactment, the measures to be adopted for the prevention of fraud.

Art. 13.—Her Britannic Majesty's subjects, or their agents, trading in goods the produce or manufacture of foreign countries, shall be subject to the same taxes, and enjoy the same rights, privileges, and immunities as foreign subjects dealing in goods the produce or manufacture of their own country.

Art. 14.—An exception to the stipulations laid down in the 5th article shall be made in regard to tobacco, in any shape whatsoever, and also in regard to salt, which two articles shall cease to be included among those which the subjects of Her Britannic Majesty are permitted to import into the Ottoman dominions.

British subjects, however, or their agents, buying or selling tobacco or salt for consumption in Turkey, shall be subject to the same regulations, and shall pay the same duties as the most favoured Ottoman subjects trading in the two articles aforesaid; and furthermore, as a compensation for the prohibition of the two articles above-mentioned, no duty whatsoever shall in future be levied on those articles when exported from Turkey by the subjects of Her Britannic Majesty.

British subjects shall, nevertheless, be bound to declare the quantity of tobacco and salt thus exported to the proper custom house authorities, who shall, as heretofore, have the right to watch over the export of these articles, without thereby being entitled to levy any tax thereon on any pretence whatsoever.

Art. 15.—It is understood between the two high contracting parties, that the Sublime Porte reserves to itself the faculty and right of issuing a general prohibition against the importation into the Ottoman dominions of gunpowder, cannon, arms of war, or military stores; but such prohibition will not come into operation until it shall have been officially notified, and will apply only to the articles mentioned in the decree enacting the prohibition. Any of these articles which have not been so specifically prohibited, shall, on being imported into the Ottoman dominions, be subject to the local regulations, unless Her Britannic Majesty's Embassy shall think fit to apply for a special licence, which licence will in that case be granted, provided no valid objection thereto can be alleged.

Gunpowder, in particular, when allowed to be imported, will be liable to the following stipulations:—

1st. It shall not be sold by subjects of Her Britannic Majesty in quantities exceeding the quantities prescribed in the local regulations.

2nd. When a cargo or a large quantity of gunpowder arrives in an Ottoman port on board a British vessel, such vessel shall be anchored at a particular spot to be designated by the local authorities, and the gunpowder shall thence be conveyed, under the inspection of such authorities, to depots or fitting places designated by the Government, to which the parties interested shall have access under due regulations.

Fowling-pieces, pistols, and ornamental or fancy weapons, as also small quantities of gunpowder for sporting, reserved for private use, shall not be subject to the stipulations of the present article.

Art. 16.—The firmans required for British merchant vessels, on passing through the Dardanelles and the Bosphorus, shall always be delivered in such manner as to occasion to such vessels the least possible delay.

Art. 17.—The captains of British merchant vessels, with goods on board destined for the Ottoman Empire, shall be obliged, immediately on their arrival at the port to which they are bound, to deposit in the custom house of the said port a true copy of their manifest.

Art. 18.—Contraband goods will be liable to confiscation by the Ottoman treasury; but a report or *proces-verbal* of the alleged act of contraband must, as soon as the said goods are seized by the authorities, be drawn up and communicated to the consular authority of the foreign subject to whom the goods said to be contraband shall belong, and no goods can be confiscated as contraband unless the fraud with regard to them shall be duly and legally proved.

Art. 19.—All merchandise the produce or manufacture of the Ottoman dominions and possessions, imported into the dominions and possessions of Her Britannic Majesty, shall be treated in the same manner as the like merchandise the produce or manufacture of the most favoured nation.

All rights, privileges, or immunities which are now or may hereafter be granted to, or suffered to be enjoyed by, the subjects, ships, commerce, or navigation of any foreign Power in the British dominions or possessions, shall be equally granted to, and exercised and enjoyed by, the subjects, ships, commerce, and navigation of the Ottoman Porte.

Art. 20.—The present treaty, when ratified, shall be substituted for the convention concluded between the two high contracting parties on the 16th August, 1838, and shall remain in force twenty-eight years from the day of exchange of the ratifications; each of the high contracting parties being, however, at liberty to give to the other, at the end of fourteen years (that time being fixed, as the provisions of this treaty will then have come into full force), notice for its revision, or for its determination at the

expiration of a year from the date of that notice, and so again at the end of twenty-one years.

The present treaty shall receive its execution in all and every one of the provinces of the Ottoman Empire, that is to say, in all the possessions of His Imperial Majesty the Sultan, situated in Europe or in Asia, in Egypt, and in the other parts of Africa belonging to the Sublime Porte, in Servia, and in the United Principalities of Moldavia and Wallachia.

The Sublime Porte declares that she is ready to grant to other foreign Powers who may seek to obtain them, the commercial advantages contained in the stipulations of the present treaty.

Art. 21.—It is always understood that Her Britannic Majesty does not pretend, by any article in the present treaty, to stipulate for more than the plain and fair construction of the terms employed, nor to preclude in any manner the Ottoman Government from the exercise of its rights of internal administration, where the exercise of those rights does not evidently infringe upon the privileges accorded by ancient treaties, or by the present treaty, to British subjects or British merchandise.

Art. 22.—The high contracting parties have agreed to appoint, jointly, commissioners for the settlement of a tariff of custom house duties, to be levied in conformity with the stipulations of the present treaty, as well upon merchandise of every description, being the produce or manufacture of the British dominions and possessions imported into the Sultan's dominions and possessions, as upon articles of every description the produce or manufacture of the dominions and possessions of the Sultan, which British subjects, or their agents, are free to purchase in any part of the Ottoman dominions and possessions for exportation to Great Britain or to any other country.

The new tariff to be so concluded shall remain in force during seven years, dating from the 1st of October, 1861.

Each of the contracting parties shall have the right, a year before the expiration of that term, to demand the revision of the tariff. But if, during the seventh year, neither the one nor the other of the contracting parties shall avail itself of this right, the tariff then existing shall continue to have the force of law for seven more years, dating from the day of the expiration of the seven preceding years; and the same shall be the case with respect to every successive period of seven years.

Art. 23.—The present treaty shall be ratified, and the ratifications shall be exchanged at Constantinople in two calendar months, or sooner if possible, and shall be carried into execution from the 1st of October, 1861.

Done at Kanlidja, on the 29th day of April, 1861.

(L.S.) AALI.

LABOUR IN THE WEST INDIES.

[COMMUNICATED.]

THE Jamaica Cotton Company's agent in Jamaica thus accounts for the deficiency of labour often complained of on some properties, whilst in other districts of the country there is a positive redundancy:—"To show (says he in a letter dated 8th ult.) that the abandoned estates do not contribute to the working population, I have only to instance the Plantain Garden River district, one of the largest sugar-producing districts in the island. When I came to the country some twenty years ago, the eight estates there were making about 3,000 hogsheads of sugar annually; there were some twenty or thirty estates surrounding them making about the same quantity. All the latter have been thrown out of cultivation, yet the eight estates before mentioned are more in want of labourers than they were before, and do not make on an average more sugar. The people of England do not understand how this can be. I will explain it. The labourers have bought land on the properties abandoned. Every family has its pigs, fowls, and garden to take care of, and will not leave them to go a distance to work, so as to be away the whole week. The able men only do so, to make at task-work 1s 6d or 2s a day, and return home on the Friday night. It is only such work as they like that they will do. When the estates have finished crop, they will not stay from home to weed the canes, but leave this to be done by the people near. They work their provision grounds until crop begins again, when they leave their families to keep the provision grounds clean. Those people who cannot, and those who will not, go far from home, will be glad to be employed near their homes, and all those properties now abandoned as sugar estates have the same people settled on them, and would make fine cotton plantations if their owners had money and energy to employ the people and cultivate the land. I have proved this myself by turning out 100 people to plant cotton, and could do so, if I had money, on every property here." A most respectable meeting has been recently held at Bristol, to extend the operations of the Company, of which the writer of this letter is the agent, in that district of Jamaica to which he refers. About 100 acres of land there have already been planted with cotton, and much more than this would have been planted, if seed could have been procured. The Company have sent a considerable quantity by the last steamer, and at least 300 acres will be planted between this and October, which is said to be a good time for planting in Jamaica.

[It will be very satisfactory to all friends of civilisation if the Jamaica Cotton Company can realise their anticipations. It will cure two evils at once. It will relieve the great depression of the most important of our West India Islands, and diminish our dependence on the precarious produce of slave cultivation.—ED. ECON.]

Agriculture.

THE CROPS AND THE COMING HARVEST.

THE close dependence of the crops on the weather was never more plainly marked than in the present season. The efforts of the cultivator are comparatively powerless to contend with atmospheric influences, though high and clean cultivation affords great advantages under all conditions of weather and climate. Now the history of the last nine months' weather is the history of our growing wheat crops. Early in last autumn there was a short break in the almost continuous wet weather of the previous twelve months, during which a small breadth of wheat was sown. Then followed a period of heavy rains down to the setting in of the frost. This carried us on to the middle of January of the present year. On the breaking up of the frost there was a short interval of dry weather, followed again by five or six weeks of wet, downright wet weather. Then in March and April we had a long spell of dry weather, during which the arable land was got into fair order, much spring wheat was sown, and the Lent corn crops committed to the soil in good order. Some rain in May was followed by very hot and dry weather in June, from the middling of which month down to the end of July the alternations of rain and sunshine have been surprisingly frequent. For some days previously to last Thursday, there was a return of real summer weather. At present the aspect is somewhat dubious.

Let us trace how the crops have been affected by this succession of atmospheric changes. First, of the wheat. The comparatively small breadth which was sown early in last autumn established before the frost a full plant, and the fields thus sown present generally full crops. In some places we hear of red gum and mildew affecting the wheat, as the consequence of the frequent, though not long-continued rains of July, but we believe that such complaints apply only to limited areas. The crops, however, thus affected, are amongst the early-sown autumn wheats, which down to a very recent period have been the most promising. After the recommencement of last autumn's rain, but little wheat was sown before the frost, and that little was sown on land in a very unkindly condition. Not much could be done in the way of cleaning, and, except on the very light lands, the soil presented a very bad seed-bed. The wheats sown at this period made a wretched appearance after the frost broke up and throughout the early spring. The plant was thin, and in many instances such wheat land was ploughed up and resown with barley or oats. Some of these late autumn wheats were "mended" with spring wheat, and where the land is in good condition, and has since been vigorously hoed, the recovery of many fields under the influence of favourable spring and summer weather has been most surprising. Still all the late sown autumn wheat is thin, and can only yield a moderate quantity, certainly below an average crop. Next, we have the wheats sown immediately after the breaking up of the frost. These went in well, came up quickly and kindly, and will probably prove the best and best yielding crops of the year. Lastly, spring wheat is a larger breadth than has been known in England for many years, and it varies very much. Where the land was tolerably clean the crop will be good, but there has been a great deal of foul land sown with spring wheat.

From the beginning of April the weather has been the most favourable for the wheat crops, under their actual condition, it is possible to conceive. The dry weather of the spring corrected the sodden state of the soil and enabled the plant to establish a most vigorous root, the benefit of which was disclosed during the warm forcing weather of June. Then the rains of July, following close on the blooming season, have given a development to the wheat plant which in March would have been regarded as impossible. Rain falling frequently on the land which had become dry, the temperature being commonly that of a fair summer heat, has filled the ear and given to the wheat crops that rich golden tint which is a certain indication of good quality and a full, weighty berry. The present prospect of the wheat crops may be thus summarised. With certain exceptions, the plant is thin and the ear is short, but well filled and bulky, while there have been both moisture and heat enough to develop to the utmost the flour-producing capacity of the grain. The grain, too, will be thoroughly ripened. Thus, although the total produce of the country will probably fall short of an average,—the breadth of wheat sown being deficient and the plant thin on the ground,—we are prepared to find a better yield per acre than has been anticipated; and certainly, if we have dry weather for the harvest, the quality of the wheat will equal that of our finest seasons. The straw is for the most part short, and consequently the crops usually stand up well,

notwithstanding the prevalence of high winds and the occurrence of some very heavy thunder rains. Where the crops are heavy the wheat has, however, been laid, and from several districts we have complaints that the straw has been a good deal twisted and blown about by storms. Many accounts from Scotland speak of the wheat crops there as being very good. A more moderate estimate, however, such as we have ventured to make, is applicable to nearly all parts of England.

The oat and barley crops of England are almost universally described as good, better than the average, and large breadths of both grains have been sown. Of oats, especially, so many have not been sown for some years, very many farmers preferring oats to spring wheat where from the bad weather they had lost some of their autumn wheat season; and the oat crops are unusually bulky.

The state of the root crops is more various. The early part of the spring was unfavourable for planting mangolds, the land being rough, and by the time it was reduced the dry weather had set in, and last year's seed being of doubtful fertility, and a very imperfect plant has frequently been the result. The most successful mangold growers this year are those who have used the old seed of 1859. As the rule, there is a deficient plant of mangold. Turnips, on the other hand, have been uncommonly successful. The fly has scarcely appeared and has done no damage whatever. In addition to the regular swede crops, the mangold fields have been supplemented with swedes sown in the vacancies of the rows. We have not for many years seen or heard of such a full plant of swedes as is met with in all parts of the South of England. With a dry August or September, we may find our swedes affected by mildew. That is the hazard of the swede crops here in the South, otherwise swedes promise to make up for the deficiencies of mangold.

Beans vary greatly, but an irregular and scanty plant is most general. The beans have been a good deal blighted and attacked by insects. Peas, on the contrary, are everywhere good, and are well cornel.

Of the grasses, the clover and artificial grass crops, especially second cuttings, have proved abundant, while the earlier cuttings on the permanent meadows were not more than two-thirds of an average. Where the meadows have been cut late, heavier swath has been obtained. Seldom have farmers had more vexation and anxiety in haymaking. Though the aggregate fall of rain has been nothing like that of last summer, the showers have been so frequent and the intervening periods of sunshine so short, that the difficulty of saving hay has been very great. The active, who have not feared the necessary expense, have got most of their hay in fair condition, but there is a good deal of both field and meadow hay stacked which must cut out very badly. The best plan, this year, has been to allow the grass to lie as long as possible in the grass swath; then it having become well withered in that way, to turn it about as much as possible and carry it to stack in the short intervals of fine weather, which, during July, seldom exceeded eight and forty hours together. Hay so made loses some of its brightness and fragrance. We have found it, however, the safest and least expensive plan in a catching season. There is a great growth of aftergrass, and all kinds of stock on the pastures are doing well.

The potato disease has appeared early, and in many places is very virulent. The breadth planted was large, and the growth of the crop has been particularly luxuriant. The yield also is large, but the indications of disease have been so general, that everywhere farmers are cutting the haulm in the hope of preventing the further progress of disease, and saving the tubers in their actual state. We have heard of instances where, on digging the potatoes, fully one-half have proved unsound. So extensive of late years has become the culture of potatoes, that to many farmers the present access of disease will be a very serious loss.

The great and general anxiety, however, is for a dry harvest. Should such weather prevail as we had last month—heavy rains alternating with warm days—the harvest must be a difficult one, for when the intervals of dry weather are so short, the corn can scarcely be left in the field long enough to be carried in thoroughly dry and hard condition. Let farmers, should the harvest prove as precarious as the haymaking, recollect that patience is as necessary as activity, that they had better run some risk in order to keep out their corn till it is in good condition, and that there is much sound philosophy in the old proverb, "that corn had better spoil in the field than in the barn."

Literature.

COMMERCIAL LITERATURE.

A History of American Manufactures from 1608 to 1860. By J. Leander Bishop, M.D. Vol. I. Philadelphia: E. Young and Co. London: Sampson Low, Son, and Co. 1861.

The above is the first volume of an interesting and comprehensive work on the manufactures of the United States. Dr Bishop commences by a general sketch of the origin of American manufactures, and then proceeds to review in detail the progress of each particular branch. The book is full of curious and instructive information, and is well worthy of perusal. The author has adopted what may be presumed to be the new American style of spelling, as, besides such words as *armor*, *succor*, and the like, we find the following deviations from the mode which obtains in England, viz., marvelous, skillful, defense, &c.

Arthur Young's Farmer's Calendar. By John Chalmers Morton. London: Routledge, Warne, and Routledge.

Part V. of the twenty-first edition of this work, rewritten and extended, has just appeared. The present number concludes the month of May, and contains the commencement of the farming operations necessary to be performed in June.

GENERAL LITERATURE.

Sketches in North America; with some Account of Congress and the Slavery Question. By H. Reid. Longman, Green, Longman, and Roberts.

This little book is worth reading. Its aim is to show in as clear a light and as few words as possible the ground of dissension between North and South in the once United States of America; and to trace the gradual growth of those germs of disunion, hidden with the constitution, that have since resulted in open disruption. The events, indeed, to which Mr Reid only looked forward as inevitable have now become facts, so that his work can tell nothing new to a close observer of American politics; but the personal observations and impressions of a sensible, intelligent, and impartial looker-on, who watched, on the spot, the signs of approaching convulsion, cannot but be interesting and instructive. Mr Reid has taken some pains to understand the American character, and has given us the results of his study in many shrewd and amusing but good-natured portraitures; which, though they will hardly convert us to the opinion of the American Magazine that "Jonathan may be described as the finished model of the Anglo-Saxon, of which John Bull is the rough cast," yet go far to prove that his individual self-esteem has a solid foundation in many estimable and praiseworthy qualities.

Mr Reid was at Washington during the election of the last Speaker of the House of Representatives, and was a spectator of the energetic efforts of the Southern members to preserve the ascendancy that was passing from their grasp. The scenes he himself witnessed, or that he gives in the words of contemporary newspaper reports, are discreditable enough; but such as we are accustomed to hear of in American legislative deliberations. On the whole, however, he says, "We cannot but admire the singular ability and legislative capacity exhibited by the two Assemblies." He is greatly struck by the fire, energy, intelligence, frankness, and intellectual power of the Americans; he does full justice to their capability of local self-government, to their schools and public institutions, to the beauty and cleanliness of their cities, and to their marvellous growth in material civilisation;—but he also shows us the wrong side of the cloth; the corruption of public men; the violence of party faction; the recklessness, indecent personalities and general low character of the public press; the insolence of the mob, and the contempt for law and order visible in all ranks of society. "Nothing," he says, "is more striking to an Englishman, accustomed to the respect for, and instant submission to the law, which prevail in Britain, than the turbulent disregard of the legal authorities and their decisions evinced in the British Colonies and in the United States."

"Rowdyism," it seems, is not confined to the States, but it finds there its most congenial soil. "The greatest evil of America is rowdyism; it is worse than slavery; for the latter is local and must ere long come to an end,—the other is universal, no one sees how it is to be checked, and we cannot but look forward with great anxiety to the time, slowly but surely approaching, when population will press upon the means of subsistence, when the Far West will no longer afford an outlet, and the Eastern regions will be crowded with a dense mass of needy and desperate persons." He proceeds to quote, as one among many proofs of the unexaggerated nature of these forbodings, an extract from a respectable New York paper:—

> We have in Baltimore some three clubs or fraternities of reckless and abandoned men, known under the grotesque appellation of "Plug-Uglies," "Rip Raps," and "Black Snakes." These men have no bond of union but the lowest dissipation, and no motive but riot and bloodshed. At all our elections these last three years these gangs of cut-throats have driven from the polls with knives and pistols all classes of our citizens until the franchise has become a nullity. But their violence has not stopped here.....The boldest criminals escape in the face of the most clear and irrefragable proofs. What is the matter? We will tell you, gentle reader, that the matter is not, as generally charged, with the laws or the judges. Never had a country better laws than ours; and in the main, at any rate in the open adjudications of the bench, the judges are upright and correct; but the true trouble is that the *people are corrupt*. The maxim that "All's fair in politics," operating upon a population relaxed by an overwhelming prosperity, cursed with a preternatural shrewdness, and haunted with a love of place which makes murderers and perjurers of kings, has debauched the morality of the whole nation, and prepared every man to look with more or less lenity upon the various phases of corresponding guilt.

To a people thus degenerating under power, plenty, and prosperity, the "uses of adversity" may be sweet, and the disruption of their empire, the sacrifices and ruinous consequences of a civil

war—that worst of all cures for a nation's sickness—may prove the means of regeneration, and the beginning of a healthier because a soberer prosperity. We earnestly trust that it may be so; and that the principles of such men as the Philosopher of Concord, "who, backed by the House of Representatives at Boston, had the honour and glory of bidding defiance to the Senate of the United States, may cease to be those of the bulk of the community." The *Boston Courier* states:—"The Philosopher of Concord informed his fellow-citizens that it was on general principles the duty of the States to resist the United States Government; of the cities to resist the States; and of the villages to resist the cities." "Why," continues Mr Reid, "the philosopher stopped there, we do not know. He ought to have added that it was the duty of each householder to resist the municipal authority of the village, and of each individual to resist the head of the family." Perhaps the philosopher knew these last duties to be too well known and too widely practised to need enforcement.

We have dwelt hitherto upon the darker side of American political and social life, rather than upon the sunnier pictures in which Mr Reid's volume is by no means wanting, because we need a lesson ourselves as to the natural development, when left unchecked as in America, of those democratic tendencies that are perceptible in our national life. If in many things we may with advantage copy the intelligent activity of our brethren across the water, we ought not to neglect at the same time the warning they hold out to us, that true liberty stands in allegiance to duty, which alone is "victory and law," and not in "unchartered freedom." No more conclusive testimony need be desired than that borne by a writer in a New York paper against the ballot and universal suffrage:—

> We believe we express only the settled judgment of reflecting men when we say that *self-government with universal suffrage in large towns has proved a failure.* It does not answer the purpose of government. It does not give us security either for our persons or our property. It does not preserve order or prevent crime. It does not check ruffianism nor prevent pauperism. It gives us neither clean streets nor safe walks. It is neither a terror to evil-doers nor a praise to them that do well. It gives us dishonest law-makers, corrupt judges, and imbecile executives. It elevates the lowest men to the highest places, and stifles the voices of good men when raised even in remonstrance.....This is not the experience of New York alone. Every city in America is showing the same results and teaching the same lesson.

The chapters in which Mr Reid traces the rise of the present difficulties (to use a mild term) in the United States, are clearly and carefully written. We differ from him, however, on two points. We think he lays too much blame upon the North, and especially upon the Abolitionists, for the ill-feeling that has grown up between North and South; and that he attributes too immediate an influence to the slavery question upon the present war. Fundamentally, no doubt, slavery is the cause of strife. It has fostered all the vices of the Southern character, and embittered their relations with the North. It has been always a standing difficulty and annoyance,—a reproach to the Northern States which they have felt deeply even while covering it over with vain vauntings and empty boasts; but immediately it has not been the cause of that which was at first, whatever it may hereafter become, a struggle for political dominion between North and South. Southern planters were in no danger of a crusade against their peculiar institution, nor is the North, excepting in the case of the Abolitionists, at all a lover of the slave. Mr Reid ignores the true point at issue when he tells the Northern States that they should have seceded themselves if they disliked slavery and loathed the task of acting as slave-catchers to the Southern planter. What the North desired was the prosperity and greatness of the United States, and their own supremacy *within* the Union; for this they have made repeated compromises that sufficiently show how little the hatred of slavery has hitherto had to do with their political actions. Mr Reid is no apologist for slavery; but we think he is a trifle too much the apologist of the South.

We will now, in concluding our brief notice of this most readable book, give a few short extracts illustrating our author's style of writing, quickness of observation, and hearty appreciation of all that was excellent in what he saw in America. Of the condition of the labouring classes he writes:—

> In the United States it is delightful to see the bright, animated, intelligent look of the working man, and the air of dignity and self-respect that distinguishes him. We see in these, in the superior tone of address that characterises him, and in his whole aspect and bearing, the result of early education, of comfortable circumstances, of taste and opportunities for intellectual pursuits, of the universally diffused feeling of "equality," and perhaps, also, of the political privileges he enjoys.

We have already seen the reverse of this picture, and therefore need follow Mr Reid no further here, but let him describe for us "*the Northerner*, the New Englander, the real Yankee":—"In him we see a new race springing up. Spare in face and figure, he is distinguished by a clear penetrating eye, a singularly intellectual aspect, a frank open expression, a quick, impressive, nervous manner; his bearing is marked by restlessness and a sort of explosive energy; there is no repose in his character; one feels quite *slow* beside a genuine New Englander. His temperament seems in the *highest* degree nervous-sanguine, with the former element preponderating. He has a constant craving for action, for *change*, for *excitement*. He is the very embodiment of the spirit of scheming, speculation, and enterprise, has faith in himself, goes a-head with a reckless confidence and headlong stick-at-nothingism, and more, perhaps, than any nation upon earth exemplifies the Scotch saying, "He will make a spoon or spoil a horn." He often does spoil a horn; but, with wonderful elasticity, springs up again, perhaps on the very spot where he fell, like a Phœnix from the ashes—perhaps in the far West, into which he carries the same dash and daring. An American and Nova Scotian were discoursing of banking after the crisis of 1857. The latter was praising the banking system pursued in his province, in which, he said, the banks never failed. 'What, sir,' said the lively Yankee, 'your banks never fail! *The people can have no enterprise.*' That remark is a perfect picture of the disposition of the New Englander. He is a great character; he has made New England the envy and admiration of all America; and has filled the great West with his genius and his institutions."

It is a curious fact that in Massachusetts the proportion of children between 5 and 15 who attend at some school or other, is almost precisely the same as in England; namely, 1 in 7 of the whole population. The difference between ourselves, then, and one of the most forward States of America lies not in the amount, but in the quality of the instruction within reach of the people. On the excellence of the public schools, and the thoroughness of the teaching given within their walls, Mr Reid is emphatic.

He concludes with a sketch of Nova Scotia Acadia, "no longer the home of the happy," but "a political pandemonium if there is one upon earth." Changeable in climate as in politics; behindhand in all the amenities of life, and the dullest of all dull places to the English resident; but healthy, prosperous, and rapidly increasing in commerce and in population.

THE CORNHILL MAGAZINE. August. Smith and Elder.
MACMILLAN'S MAGAZINE. August. Macmillan.
TEMPLE BAR. August. Temple Bar Office.
THE SIXPENNY MAGAZINE. No. 2. Ward and Lock.
FRASER'S MAGAZINE. August. Parker and Bourn.
THE DUBLIN UNIVERSITY MAGAZINE for August. No. 344 Hurst and Blackett.
THE ST JAMES'S MAGAZINE for August. No. 5. Kent.

THE present time is confessedly a dull one for literature, and the magazines are no exception to the general rule. There is no paper of very great interest amongst them. Mr Thackeray's tale in the "Cornhill" improves, and the present are, perhaps, the best chapters that have yet appeared; but the "Roundabout Papers' we would strongly advise him to discontinue, as they are fast sinking into twaddle of the most puerile description, and will by no means add to his reputation. Mr Thackeray should look to his laurels,—a suspiciously yellow leaf is appearing here and there. There is a paper of interest on the American struggle, arguing the question on purely Unionist grounds.

In "Macmillan," the gap made by Tom Brown is not filled up,—at least by any tale. There is an interesting article from the pen of Mr Hughes, addressed "to Mr Cobden and other public men in search of work," recommending the strike question to their consideration. That Mr Hughes's feelings are with the men is certain, but that he argues the matter with fairness and with a strong desire for justice on both sides is no less so. He urges that the only means of settling this much-vexed question is for the masters to face the matter boldly, and make some final and just settlement of the claims of master and man. "Ravenshoe" continues as lively and stirring as ever. There is a tendency to startling situations verging too much on the melodramatic, which we regret to see in writing so vigorous, manly, and graphic as Mr Henry Kingsley's. If he avoid this, we cannot but think that we possess in him a novelist whose freshness and vigour will compensate for many of the used-up conventionalities which are given to us at present in the shape of novels.

This is a fair number of "Fraser." "Reminiscences of New Zealand" is an interesting paper, written by one who went out with the pioneers of the Otago settlement, and gives a very pleasant account of the country. His stay was but for eighteen months, and he only visited the provinces of Wellington, Nelson, and Otago, but what he has seen is well described. The country round Nelson appears to be particularly beautiful. The new extracts published by Mr Froude from the "Archives of Simancas" go far to disprove all that was novel and astounding in his previous paper. They seem to show that the dethronement of Queen Elizabeth was never contemplated by Cecil,—that his plans never went beyond fixing on the Earl of Huntingdon as a Protestant successor to the Queen,—and that her passion for Dudley, although openly avowed, never led her into anything that was "unseemly," and was kept under by the Queen's own good sense, who was quite aware of the danger to which it exposed her influence, if not her crown. "Ida Conway" is finished, to our great relief. Some of the characters are well drawn, but as a whole it is insupportably tedious. "Good for Nothing," by Mr Whyte Melville, is lively and amusing as usual. Mr Boyd contributes one of his pleasant and rather prosy papers on "Immaturity," which

he typifies by *veal*, and discourses thereon with his accustomed good feeling and good sense, but rather lengthily.

We have not left ourselves much room to speak of the remaining magazines on our list. "Temple Bar" presents no new features, except that repulsive excitement is carried a little further than is usual even in this magazine in two of the tales. "The Seven Sons of Mammon" makes small progress this month. A model lodging-house, unpopular till christened the "Monmouth Chambers," when it fills rapidly, is very well described with its motley inhabitants. These sketches are life-like and vivid, and are what Mr Sala really excels in. When he draws upon his imagination for his improbable and we may venture to say impossible heroines, his Mrs Armytages and Magdalen Hills, he signally fails. We confess to a liking for good-natured Lady Goldthorpe, and sympathise with her in her aspirations for the time when "the wicked cease from worritin,' and there's no more bother, and the weary are nice and comfortable."

There is little to notice in the "Sixpenny Magazine," except the continuation of Edmund About's very amusing "King of the Mountains," made still more diverting by some extremely clever little woodcuts. Mrs Simons in her riding habit is quite irresistible; but for this we must refer our readers to the magazine itself: these little illustrations are worth more than the price of the whole number. We cannot speak so highly of the remaining woodcuts; the magazine would be better without them.

This is a fair number of the "Dublin University Magazine" in point of writing, but deficient in subjects of present interest. The only political article, on the "Revolution in East and West," is very slight. Of Buckle we have had enough, and the writer has nothing new to contribute. A few additions to our previous knowledge of Spenser's doings in Ireland, gathered from the State-paper Records, are welcome. "The Life and Times of Dr Doyle" is one of the best articles.

"The St James's Magazine" is mildly entertaining and cheerfully instructive in its graver articles; in its tales it aims at "sensation," and falls into pure rant. We have seldom read anything more dreary than Mrs S. C. Hall's "Can Wrong be Right?" and the authoress of Paul Ferroll has done great injustice to her unquestionable talents in "Nadrione Spetnione, or Wishes Fulfilled," that reaches its conclusion in this number.

THE POETICAL WORKS OF JOHN MILTON, with a Memoir and Critical Remarks on his Genius and Writings by JAMES MONTGOMERY. With an Index to Paradise Lost, Todd's Verbal Index to all the Poems, and a Variorum Selection of Explanatory Notes by HENRY G. BOHN. Henry G. Bohn, York street, Covent garden.

IT is a pity that Mr Bohn has thought it necessary to spoil, in great measure, this very complete edition of Milton's Poetical Works by the inferior drawings scattered so liberally throughout its pages. It would, perhaps, be unreasonable to expect, in this case, that the artist's pencil should come at all up to the level of the poems he professes to adorn; but the illustrations to these volumes fall below the usual level of such productions; and the words of Milton do not render us especially tolerant of designs that would be suitable enough to a magazine. In other respects the edition is deserving of all praise. It is founded upon that published by Tilt and Bogue in 1843, and at that time revised by the poet Montgomery. The collection of poems is complete, the paper good, the type clear and handsome, the notes and indexes ample. The numbering of the lines in Paradise Lost and Regained is an improvement that will greatly increase the facility of reference.

THE LEIGHS; or, the Discipline of Daily Life. By MISS PALMER. With Illustrations by Walter Ray Woods. James Hogg and Sons.

THE best thing about this little book is its gay and pretty binding, the worst its engravings; the tale itself holds a middle place, neither good nor bad. The title is severe; but the young ladies, for whose exclusive benefit we presume this tale to have been written, need feel no alarm on that score. The "discipline" of life, according to its teachings, is not a formidable thing at all, but quite easy and pleasant. Miss Palmer is no abettor of the mean economy that would make virtue its own reward; she knows its value better, and gives it light work and high pay. Few of us, perhaps,—to say nothing of young girls, whose imaginations are readily captivated by the word "heiress,"—would object to regulating our tempers in moderation, and to dabbling a little in benevolence, or even in humility, if we were assured of an ample repayment of our self-denial in the shape of approving consciences, applauding friends, and the inheritance of a fine estate.

Foreign Correspondence.

FROM OUR CORRESPONDENT.)

PARIS, Thursday.

An Imperial decree allows foreign tobacco to be imported into Gaudeloupe and Martinique at 120*f* the 100 kilogs (4*l* 16s the 2 cwts) in leaf, and at 240*f* prepared.

M. Mires has published a letter to the shareholders of the Caisse Generale des Chemins de Fer. In this lucubration he, notwithstanding the condemnation pronounced on him and the facts revealed at his trial, has the extraordinary assurance to describe himself as "a man who has not a single reproach of want of probity to address to himself, who did not for a single instant forget his duty towards his shareholders, and who defended with abnegation and devotedness the interests confided to him!" He affirms that the sales of shares and other securities belonging to the Caisse, and the purchase of them back again, were for the interest of the shareholders, and that the two operations resulted in a profit of 83,000f. He declares that the "execution" of his customers—that is, the sale without their knowledge and at a loss of the securities they had deposited with him—was both for their interest and that of the Caisse. He contends that he was justified in selling when he thought fit those securities, because, contrary to the custom of the Bank of France, he never undertook to restore the identical ones deposited with him, but only to produce others of corresponding value; and he maintains that his inventories were perfectly exact. He finally repeats that if he had not been placed in the hands of justice in December last, his Ottoman loan would have succeeded, and he would thereby have been able to get out of all his difficulties. This letter of his is not likely to modify the unfavourable opinion which the public has formed of his case.

The report of the Comptoir d'Escompte (Discount Bank) presented at the recent meeting of shareholders shows that the establishment is prosperous. Its total operations for the year ending the 30th June amount to 1,034,736,753f, which was 302,247,933f more than that of the preceding year, and in it the discount of bills figured for 843,057,573f—an increase upon last year of 230,353,514f. The clear profits of the year were 3,306,585f. The dividend of 44f per share, which we stated last week was declared, was very nearly 9 per cent. on the capital. The report, contrary to expectation, only speaks very briefly of the branches established in Asia, from which great things were expected. It says:—"In the report presented last year, the Directors announced that the Comptoir had been authorised by the Minister of Finance to form agencies at Shanghai, Calcutta, Madras, Bombay, and Pondicherry, and it stated that the persons composing the agency of Shanghai had already left, and that those of that of Calcutta were about to leave. These two agencies are now installed, and their operations have already commenced, that of Shanghai being under the direction of M. Cordier, and that of Calcutta under M. Pietsch. We must wait for a year at least, in order to appreciate the success of these recent creations. We may, however, state that these two branches of the Comptoir, confided to experienced men, operate according to the instructions and under the authority of your Board of Directors, and are besides placed under the surveillance of eminent men, chosen by us from among the merchants of each locality. We will add that the results obtained thus far are not below those which we could legitimately hope for, and that these establishments, which already occupy an important place in the relations of our commerce with Indo-China, will make a satisfactory addition to our future profits."

The Board of Customs has decided that importers of machinery shall be relieved from the necessity of producing plans and descriptions thereof. This concession is of considerable importance.

M. Calley Saint Paul, responsible Director of the Company of the Salines de l'Est, has to-day been condemned by the Tribunal of Correctional Police to 3,000f fine, for having distributed dividends out of capital instead of out of profits—one of the grounds of accusation against Mires. He was also accused of clandestinely issuing shares, and of trafficking in shares at the Bourse to the prejudice of the shareholders; but these two charges were not established to the satisfaction of the Court. As he is well known in the financial world, his trial, which has lasted several days, excited great interest, and at one time the belief was entertained that it would lead to the revelation of scandals like those in the Mires case. It has not done that, but it has proved anew that the dividends distributed by French Companies are not always fairly earned.

The report was spread that Solar, who was condemned in conjunction with Mires to five years' imprisonment and 3,000f fine for frauds in connection with the Caisse Generale des Chemins de Fer, would give himself into custody in order to be regularly tried. He was called up to-day before the Tribunal of Correctional Police, but he did not present himself. The report was unfounded.

The following is a detailed account of the quantities and actual value of the goods imported into France *for consumption* in the last three years:—

	Quantities.			Actual Value.		
	1858.	1859.	1860.	1858.	1859.	1860.

Subjoined is the weekly report of the markets:—

FLOUR.—A new rise has taken place at *Paris*. Yesterday, the sack of 159 kilogrammes was from 78f to 83f, and for choice qualities even 84f. Four marks, however, began at 80f 50c to 81f and 81f 50c, but afterwards fell to from 80f to 81f 25c.

WHEAT.—At *Paris*, yesterday, the average price of good qualities, old and new, was 45f to 46f 50c the sack of 120 kilogrammes. Some new wheat of very superior quality, however, went at 49f to 49f 50c. Higher prices would even have been obtained if large offers of foreign had not been made. Of foreign, Spanish went at 47f 50c to 48f; American, 43f to 46f; North Sea, 44f to 44f 50c; Baltic, Danube, Black Sea, &c., 41f to 43f. With regard to the provincial markets, not fewer than 119 present a rise of from 6c to 3f 50c the hectolitre, only 21 a fall of from 15c to 1f 60c; 12 markets are reported firm, 6 without variation.

COTTON.—The sales at *Havre*, in the week ending Friday, were 5,076 bales, and the arrivals only 619. The closing prices were 1f lower for low New Orleans and Mobile, all other quotations being unchanged. Very low New Orleans was consequently 1 00f the 50 kilogs; low ditto, 112f; and very ordinary, 118f. The stock on the 1st of this month was 275,190 bales; same date last year it was 239,970. On the first two days of this week business was tolerably active, and a slight advance took place in quotations. Yesterday, the market was calmer, and prices were not affected.

COFFEE.—At *Havre*, in the week ending Friday, the demand was active, and quotations improved. 1,130 sacks Hayti Port-au-Prince disposable went at 77f the 50 kilogs in bond; 1,165 Gonaives, 80f to 81f; 350 Cape for delivery, 81f; 2,345 Rio not washed, disposable, 62f to 67f 50c; 1,900 ditto for delivery, 67f to 70f; 100 Rio washed, disposable, 86f; a lot of Porto Rico, 86f to 87f; 25 sacks Ceylon triage, 104f duty paid. The arrivals were 8,500 sacks and some casks. The stock on the 1st was 8,589 tons; same date last year, 6,131. This week, Rio has been at 65f 50c to 72f; ditto washed, 83f 50c; Hayti, 77f to 77f 50c. At *Nantes*, last week, 227 sacks Gonaives went at 81f 25c, and some damaged Port-au-Prince were also sold. This week, a quantity of Java has been disposed of at 107f, some Trinidad at 75f. At *Bordeaux*, last week, about 2,500 sacks La Guayra *grage* and *non-grage* went at 82f 50c to 85f; 550 sacks Rio not washed, 74f to 75f 50c; 2,300 Java, 112f 50c; and 900 ditto, 115f; 1,600 sacks Mysore, 108f. This week, some Guayra has been sold at different prices: Guadeloupe "habitant" at 104f; Mysore, 110f. At *Marseilles*, last week, 2,500 sacks Rio went at 60f; 1,400 Malabar at 80f; 180 San Yago, 95f; 500 Rio, inferior quality, 55f; and 1,500 ditto from 60f to 70f, according to quality. This week, some Rio has been sold at 60f.

SUGAR.—The market at *Havre*, in the week ending Friday, was quiet. 50 casks French West India "usine" went at 52f the 50 kilogs duty paid; 396 casks San Yago, 46f; 750 Havana, 34f in bond; 3,500 ditto, for delivery, same price. The arrivals were about 4,000 casks and 1,000 sacks. The stock of French West India on the 1st was 12,280 casks; same date last year it was 9,800. This week, French West India has been at 47f; Havana, 34f; Reunion, 50f 25c. At *Nantes*, last week, 2,200 sacks Reunion went at 51f 75c; 400 Mayotte, 47f; 1,748 Reunion gros grain, 56f 50c; a small lot of Martinique, 52f 50c. This week, Guadeloupe "usine" has been at 64f 50c; Reunion gros grain, 50f 50c; Reunion ordinary, 40f. At *Bordeaux*, last week, about 600 casks French West India went at 46f 25c to 46f 75c; and 25 ditto usine, 57f; 7,552 bales Reunion at established prices; 400 ditto gros grain, 56f; 136 casks Brazil at prices kept secret. Stock on the 1st, 30,800 bales Reunion and Mauritius, 1,240 casks French West India, 1,360 casks Havana. This week, French West India has been at 46f 50c. At *Marseilles*, last week, in addition, a small lot of French West India; upwards of 4,000 casks Havana at 35f and 36f. This week, Havana has been at 36f; superior ditto, 44f.

INDIGO.—At *Havre*, in the week ending Friday, only 28 chests Bengal were sold, and prices were kept secret. The arrivals were 103. The stock on the 1st was more than 1,000. This week, there have been no sales. As *Bordeaux*, last week, 98 chests Bengal, 20 Madras, 8 Kurpah, and 110 Guatemala and Mexico were sold: prices not stated. This week, a small quantity of Bengal has been sold: quotations not given.

HIDES.—The demand at *Havre* was more active in the week ending Friday: 1,020 Monte Video dry went at 100f the 50 kilogs; 8,700 La Plata, salted, 70f to 72f for ox, 65f to 65f 50c for cow; 1,054 ditto Mataderos, 50f to 51f 70c; Rio Grande, salted, 66f; 1,400 New Orleans, salted, 40f; 2,070 New York ditto, 40f 50c to 42f; 1,850 horse La

Plata, salted, were also disposed of at 85f to 86f the 100 kilogs; 2,000 ditto Monte Video, for delivery, 83f. The arrivals were 29,000. This week, New York has been at 41f; Calcutta, cow, 105f; Buenos Ayres, salted, 51f.

WOOL.—At *Havre*, last week, 9 bales Buenos Ayres were sold at 1f 72½c the kilog, and 4 Monte Video washed at 2f 75c. The stock on the 1st was 10,824 bales. The arrivals of the week were nearly 1,000. This week, nothing has been done.

TALLOW.—At *Havre*, last week, nothing was done, and the arrivals were 97 casks. The stock on the 1st was only about 200 casks. This week, no sales have been made. At *Paris*, yesterday, the 100 kilogs were 112f.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 degs., first quality, were 85f the hectolitre; Montpellier, disposable, 86 degs., 115f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc were 110f; ditto beetroot, first quality, 99f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The half-yearly meetings of the several joint stock banks in London being now completed, the subjoined tables have been made up, exhibiting their position. The first shows the period at which each bank was founded, together with its subscribed and paid-up capital; the second shows the amount of liabilities and assets; and the third the net profits, and rates of dividend and bonus. The current accounts and deposits held by these seven establishments now amount to a total of 47,315,356*l*, or 5,407,772*l* more than at the corresponding period of last year. The London and Westminster shows an increase of 2,902,079*l* (of which 500,000*l* is from its absorption of the business of the Commercial Bank); the London Joint Stock, 1,591,531*l*; the Union of London, 674,472*l*; the London and County, 607,221*l*; the City, 498,911*l*; the Bank of London, 84,498*l*; and the Unity, 16,769*l*. The Commercial Bank has ceased to exist, its business having been transferred to the London and Westminster in February:—

The following returns show the state of the note circulation of the United Kingdom during the four weeks ending June 26, 1861, compared with the previous month:—

	June 1, 1861.	June 29, 1861.	Increase.	Decrease.
	£	£	£	£
Bank of England	19850426	19399794	...	450632
Private Banks	3209275	3008977	...	200298
Joint Stock Banks	2942162	2737446	...	204716
Total in England	26001863	25146217	...	855646
Scotland	4553809	4284782	...	249027
Ireland	6329831	5819566	...	510265
United Kingdom	36885503	35250565	...	1614938

And, as compared with the month ending the 30th of June, 1860, the above returns show a decrease of 2,276,383*l* in the circulation of notes in England, and a decrease of 2,946,896*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks, the following is the state of the circulation:—The English private banks are below their fixed issue 1,338,931*l*, the English joint stock banks are below their fixed issue 564,911*l*,—total below fixed issue in England 1,903,842*l*; the Scotch banks are above their fixed issue 1,535,511*l*, the Irish banks are below their fixed issue 534,928*l*. The average stock of bullion held by the Bank of England in both departments during the month ending the 26th of June was 12,248,294*l*, being a decrease of 106,564*l* as compared with the previous month, and a decrease of 4,053,756*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month ending the 29th June:—Gold and silver held by the Scotch banks, 2,591,610*l*; gold and silver held by the Irish banks, 2,139,352*l*; total, 4,730,962*l*; being a decrease of 159,566*l* as compared with the previous return, and a decrease of 132,867*l* when compared with the corresponding period last year.

An Account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 27th day of July, 1861:—

Within the last 10 years there have been coined at the Mint 48,911,848 sovereigns, 14,416,569 half-sovereigns, 466 crowns, 1,493 half-crowns, 15,633,372 florins, 23,025,506 shillings, 21,735,183 sixpences, 1,880,874 groats, 41,580 fourpences, 13,605,101 threepences, 47,520 silver twopences, and 78,408 silver pence. The copper and bronze money coined has been 23,232,384 pence, 35,739,421 halfpence, 22,456,276 farthings, and 3,535,776 half-farthings.

The activity which prevailed last week in various branches of the iron trade is to some extent explained by the immense shipments made of *materiel* to India, on account of the vast railway works now in progress. It appears from an official return that last year no less than 234,710 tons of materials were despatched to India, of the collective value of 2,140,703*l*, being the largest consignment made in any one year since the works were commenced. The proportion of material taken by each company was as follows, omitting fractions:—East India, 56,448 tons, of the value of 580,387*l*; Madras, 38,348 tons, of the value of 296,842*l*; Great Indian Peninsula, 25,971 tons, of the value of 286,365*l*; Bombay, Baroda, and Central India, 32,981 tons, of the value of 335,668*l*; Scinde, 2,056 tons, of the value of 26,582*l*; Punjab, 24,107 tons, of the value of 241,211*l*; Indus Steam Flotilla, 1,240 tons, of the value of 17,215*l*; Great Southern of India, 17,139 tons, of the value of 118,574*l*; Calcutta and South-Eastern, 6,088 tons, of the value of 74,174*l*; Eastern Bengal, 30,333 tons, of the value of 213,686*l*.

The total quantity of seaborne coal imported into London in July last was 290,918 tons, against 297,580 tons in July, 1860:—

	ships.	tons.
Imported from Jan. 1 to July 31, 1860	6,596	2,091,992

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

New York, July 27.—The demand for State and Western flour has been decidedly more active since our last, both for the local trade and for shipment. The scarcity of freight-room, and consequent advance in the rates of freight, have operated very unfavourably, however, though full prices have in all cases been realised, while in some instances an advance has been obtained. Canada flour continues in fair demand and the market is firm at somewhat advanced rates. The market for Southern flour remains steady, under a moderate demand, without change in prices.

Export from 1st to 23rd July.

	1861. barrels	1860. barrels
Wheat Flour	211,343	178,765

The demand for wheat has been more active, but sales have been restricted by the advance in the rates of freight. Transactions have nevertheless been to a fair extent, however, and nearly all kinds may be written somewhat higher, though the advance is not very marked. There has prevailed a steady demand for corn, and the sales have been large, though at slightly lower rates for Western mixed.

Export from 1st to 23rd July.

	1861. bushels	1860. bushels
Wheat	2,493,632	1,134,910
Corn	290,350	145,704

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

Mark Lane, Friday Evening.

Most of the leading markets held this week have been but moderately supplied with home-grown wheat. Good and fine samples have been disposed of at full prices; but low and damp qualities have changed hands slowly, at barely late rates. At the outports, foreign wheats have commanded rather more attention, at full currencies. The transactions in barley have continued much restricted; nevertheless, no change of importance has taken place in prices. Malt, oats, beans, and peas, have ruled about stationary. The flour trade has been tolerably firm.

Samples of new wheat, barley, oats, and peas have been on offer in, for the most part, fine condition. The quantity of wheat yet secured is small, but in most counties cutting is progressing steadily.

Throughout the Continent, there has been only a moderate inquiry for wheat, at about stationary prices. Spring corn has mostly realised extreme rates. The latest advices from New York state that both wheat and flour were held for more money, although the supplies on offer were seasonably good.

In Scotland, most kinds of wheat have commanded full prices; but the demand has not improved. All other articles have moved off slowly, at late rates.

The Irish markets have been heavy for nearly all descriptions of produce. Prices, however, have been supported. The potato crop is likely to turn out a most abundant one. At present, there are very few signs of disease amongst it.

At Mak lane, to day, the show of old English wheat was very moderate; nevertheless, the trade ruled slow for both red and white qualities, at Monday's currency. About 200 quarters of new Talavera wheat were on sale, in very good condition, and which changed hands at from 65s to 68s per quarter. In foreign wheat, sales progressed slowly, and there was less demand on French account. Prices, however, ruled about stationary. New malting barley was worth 38s to 40s per quarter; but old grinding and distilling samples were a dull inquiry, at barely late rates. Good and fine oats were steady in price; but inferior parcels were only saleable, at a reduction of 6s per quarter. Beans and peas were dull, and rather easier to buy. New grey peas were quoted at 38s to 40s per quarter. Good and fine marks of flour were in steady request, at full quotations. Inferior kinds, however, and especially American barrels, barely maintained previous rates.

Mr E. Rainford furnishes us with the annexed remarks on the floating trade:—Since the 2nd inst. to last night 39 arrivals are reported, comprising 19 cargoes of wheat, 14 maize, and 6 miscellaneous, viz.:—Wheat, 2 cargoes from Taganrog, 1 Alexandria, 7 New York, 3 Montreal, 2 Berdianski, 1 Marianople, 1 Ancona, 2 Philadelphia; maize, 6 Sulina, 6 Ibraila, 1 Reni, 1 Galatz; flour and wheat, 1 Montreal, 1 New York; rye, 1 Odessa, 1 Galatz; beans, 1 Casabianca; maize, flour, and peas, 1 Montreal. Several of the above had changed owners before arrival. There has been a fair business in cargoes afloat during the week, and the following prices have been paid:—Wheat, arrived, per 492 lbs, hard Taganrog (for the Continent), 48s; Berdianski (for the United Kingdom), 52s; on passage, Taganrog Ghirka, 49s 3d; per 480 lbs (for the United Kingdom), Galatz, 41s; fine red American, nearly perfect, 48s; red American (slight dry warmth not objected to), equal to 46s 10½d; Chicago, 50s; white American (from Philadelphia), 60s; for the Continent, Milwaukee, supposed 51s 6d; on passage for the United Kingdom, Milwaukee, 48s. Rye, arrived, per 480 lbs, Odessa, imperfect, about 30s. Maize, arrived, per 492 lbs, for the United Kingdom, Galatz, not perfect, 31s 6d; Reni, 32s; on passage, Galatz, 5,500 quarters per steamer to Waterford, 32s; Ismail, 31s 6d; arrived, per 480 lbs, Bulgarian (according to condition), 30s, 30s 6d, and equal to 31s 1d; Galatz, equal to 31s 3d; Ibraila, 30s 9d; Giurgevo, 6,000 quarters per steamer to Waterford, 30s 6d; Wallachian, equal to 30s 10d; on passage, Wallachian, equal to 31s 3d (sold in Dublin); shipping or shipped, Ibraila, 30s 9d. Barley, arrived, per 400 lbs (for the United Kingdom), Galatz, heated and discoloured, 19s 6d; Ibraila, imperfect, 21s 6d. Beans, arrived, per 480 lbs, new Barbary, equal to 33s 6d.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 7th day of August, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	26,131,675	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	11,481,675
		Silver Bullion	..
	26,131,675		26,131,675

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,900,800
Rest	3,520,452	Other Securities	17,909,650
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	3 843,763	Notes	5,784,730
		Gold and Silver Coin	878,770
Other Deposits	11,818,980		
Seven Day and other Bills	737,755		
	34,473,950		34,473,950

Dated the 8th August, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,084,700	Securities	27,907,450
Public Deposits	3,843,763	Coin and Bullion	12,360,445
Private Deposits	11,818,980		
	36,747,443		40,267,895

The balance of Assets above Liabilities being 3,520,452*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£86,578
An INCREASE of Public Deposits of	141,811
A DECREASE of Other Deposits of	375,670
An INCREASE of Government Securities of	434,521
A DECREASE of Other Securities of	638,061
An INCREASE of Bullion of	163,737
An INCREASE of Rest of	107,478
An INCREASE of Reserve of	114,732

The above return is less favourable than might have been expected. Notwithstanding the large sums in Australian and foreign gold taken to the Bank since the date of the last return, the increase shown in the bullion is only moderate, considerable withdrawals of coin having been made for the purposes of the harvest. A large augmentation is shown in the Government securities, and the reserve also exhibits a satisfactory increase.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 21,391,635	£ 21,361 596	£ 22 815,374	£ 22,421,532	£ 21,084,700
Public deposits	5,513,244	4,668,793	5,912,118	4,823,222	3,843,763
Other deposits	8,719,460	13,902,964	14,675,929	14,003,280	11,818,980
Government securities	13,464,021	10,871,054	11,208,572	9,804,273	9,900,800
Other securities	12,078,245	15,316,060	18,474,568	19.433,547	17,909,650
Reserve of notes & coin	7,802,136	11,122,825	9,747,893	8,319,154	6,663,500
Coin and bullion	13,953,521	17,238,250	17,231,888	15,551,544	12,360,445
Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	4 p. c.	5 p. c.
Price of Consols	96⅞	96¼	95½	93½	90⅝
Average price of wheat	42s 3d	44s 10d	43s 7d	58s 7d	51s 3d
Exchange on Paris (shrt)	25 2½ 10	25 7¼ 12½	25 10 15	25 12½ 17	25 35 42½
— Amsterdam ditto	11 16⅛ 17	11 15½ 17	11 13 14	11 14⅜ 15	11 19 19⅛
— Hamburg (3months)	13 8 8¼	13 8 8¼	13 5¼ 6	13 6 6½	13 10 10¼

In the corresponding week of 1851, the prorogation of Parliament had just taken place. Grand entertainments in honour of the Great Exhibition had been given by the Municipality of Paris to the Royal Commissioners, the Lord Mayor, and other distinguished personages from London. A five per cent. loan of 8,000,000*l* was about to be issued by Austria at the price of 93 or 94. Some attention was directed to the arbitrary and illegal proceedings of the Prussian police against the press. The accounts from the United States mentioned that secession movements continued to occur in South Carolina.

In 1858, the rate of discount for the best bills was 2½ per cent. Eighty-five per cent. had been paid on account of the Indian debenture loan of 4,421,000*l*. The negotiation of another batch of debentures was pending.

In 1859, the prospectuses appeared of an Indian loan in a five per cent. stock to the amount of 5,000,000*l*, and of a Russian loan of 12,000,000*l* three per cent. stock at the issue price of 68. Money was abundant at 2½ per cent., but had rather an upward tendency.

In 1860, the House of Commons, after some debate, passed the resolutions proposed by the Government on the subject of the paper duties. French troops had just left for Syria. Garibaldi was continuing his preparations in the island of Sicily for a descent on the mainland. A Sardinian loan of 6,000,000*l* at 80½ had been announced in Turin, and the subscriptions were expected to be three or four times the amount required.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 3,358,785*l*; in 1858, a deficiency of 1,413,096*l*; in 1859, a deficiency of 3,798,639*l*; and in 1860, a deficiency of 5,480,067*l*. In 1861, the deficiency is 6,090,670*l*.

DISCOUNT AND MONEY MARKET.—The demand for discount this week has been generally moderate, although yesterday and to-day money has been a little more in request. In the open market the best paper has been negotiated at 4⅜ per cent., or a quarter below the Bank minimum, and exceptional transactions have taken place at 4⅛. There continues to be a general stagnation in business, and the commercial bills offering remain consequently limited. On the Stock Exchange, loans on Government securities have been in more demand, owing to some large sales of stock for immediate delivery, but the rate has in few cases exceeded 4 per cent.

The new Italian loan has proved a complete success, a much larger sum than had been asked for having been subscribed. It is stated that some rather considerable amounts were tendered from this country, the terms being viewed in some quarters as very favourable. *It* is believed that the general subscribers will only receive about 15 per cent. of their applications.

The following are the rates of discount in the principal cities of the Continent:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5½
Berlin	4	2½
Frankfort	3	2
Amsterdam	3	3
Turin	5	5
Brussels	3	3
Hamburg	...	2¾
St Petersburg	7	...

ENGLISH FUNDS.—Consols were firmer in the earlier part of the week, but the unfavourable change in the weather, together with heavy sales, it is said on account of the Court of Chancery, have since occasioned a reaction. Some large purchases of stock appear, on the other hand, to have been made by the Bank. The last official quotations this afternoon were 90⅛ to ⅜ for money, and 90⅛ to ⅝ for the account, but after regular hours the tendency was again adverse, and the final price cash was 90⅛ to ¼, and for the 10th of September 90⅜ to ½.

The March issue of Exchequer bills have fallen to 16s to 11s discount, while the June closed without alteration at 4s discount to par. India bonds continue to improve, and left off this evening at 9s to 4s discount.

India 5 per Cent. scrip was quiet in the commencement of the week, but this morning there was an increased demand, and an advance took place to 100½ to ⅝. A partial reaction then ensued, and the final price was 100⅜ to ½, or a quarter per cent. higher than last Friday. The old stock closed at 99⅞ to ⅞.

FOREIGN STOCKS.—There has been another advance this week in Turkish Six per Cents. of 1858, the quotation at one period being 71 to ½; but to-day a reaction has taken place on the announcement that the rate of exchange at Constantinople has experienced a further unfavourable change by rising to 198, and that the local Government securities continue to droop. A steady improvement has occurred in Peruvian descriptions, especially the Uribarren bonds, in anticipation of the purchases for extinction through the sinking fund. Russian bonds continue out of favour, and the Three per Cents. show a decline. There is also little disposition to invest in Brazilian stocks, notwithstanding their present low prices. Buenos Ayres bonds are depressed and difficult of sale.

The closing quotation of French Three per Cents., this evening, on the Paris Bourse, was 68f 30c, showing on the

week another rise of an eighth. The day before yesterday, however, Rentes stood at 68f 50c.

The monthly return of the Bank of France, published this morning, exhibits the following results:—

	£
INCREASE.	
Cash in hand	488,000
Bills discounted	192,000
Circulation	1,073,000
Treasury balance	616,000
DECREASE.	
Advances	60,000
Current accounts	856,000

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

RAILWAYS AND OTHER SHARES.—The railway market, this week, has been very depressed, especially within the last day or two, the dividends that have been announced being even lower than had been expected. The principal decline is in Great Western, but several other stocks have also fallen heavily. The circumstance that the present dividends are unfavourable has additional effect upon the market from the knowledge that the receipts in the current half-year cannot in many cases equal the past six months, owing to the disturbance in trade from the American crisis. There is, therefore, a probability that not only will the succeeding dividends be as unfavourable as the present, but that they may even be still lower. The reduction in price of the principal stocks does not appear hitherto to have brought in the public as purchasers. Caledonian, and London, Chatham, and Dover are exceptionally firm. The accrued dividend on the preference stock of the latter is notified to be paid on the 15th of next month.

There have been few transactions in the colonial department, and prices are generally unaltered. Indian guaranteed stocks are firm.

The principal change in the foreign market is a rise in Lombardo-Venetian, on the favourable prospects of the line. To-day, however, there is a reaction, on reported adverse intelligence from Vienna. San Paulo shares are higher.

A general and heavy fall has taken place in American State and Railway securities, on the intelligence of the defeat of the Northern army and the subsequent decline in the New York market.

Miscellaneous descriptions remain without material variation. The shares of the New Mercantile Fire Insurance Company have receded to ⅝ to ¾ premium, on the announcement that other new schemes are about to be brought before the public forthwith.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

RAILWAYS.	Closing prices last Friday.	Closing prices to-day.
Bristol and Exeter	92 3	91 2

FOREIGN EXCHANGES.—In the foreign exchanges this week there has been a slight advance in the Paris and Vienna rates, and a decline in that on Hamburg.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the movements in bullion during the week, and the transactions in Indian rupee paper:—

Gold.—The demand for export has not increased since our last. The bulk of all arrivals finds its way to the Bank, where about 415,000*l* has been purchased since the 1st inst., mainly Australian, but including French and other foreign gold. The arrivals have been—The Tyne, from the Brazils, 25,000*l*; the Great Britain, from Australia, 330,000*l*; French and other foreign coin, 100,000*l*. A portion of the Great Britain's gold has yet to be sent to the Bank. The exports have been as follows:—10,000*l* to India, by the Indus; 25,000*l* to Quebec, by the Nova Scotian; 10,000*l* to the West Indies, by the Seine; and 55,000*l* to New York, by the Persia, Edinburgh, and Bremen.

Silver.—The market continues very quiet, with buyers for the Continent at 60¼d; some amounts have been purchased at 60⅜d to 60½d, for export to other quarters. The present price is 60¼d to 60⅜d, as operators may respectively happen to be sellers or buyers. The Indus took out 13,000*l* to India on 2nd of August.

Mexican Dollars.—Those by the last West India packet were sold, on the 2d instant, at 58⅞d; since then there have not been any operations, and we quote the price as quite nominal, at about 59d per oz. The Indus took out 72,000*l* to China on the 2nd instant.

Exchange on Bombay and Calcutta for Banks' drafts, at 60 days' sight, is 1s 11⅛d to 1s 11⅜d; bills with documents, 1s 11d to 1s 11⅛d. Madras, 1s 11⅛d to 1s 11⅜d Banks' drafts; documents, 1s 11d.

India Government loan notes remain the same as at this day week, viz., 101⅛ to 102 for 5½ per Cent. paper; and 94¾ to 95 for 5 per Cents., with a steady market.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9¼d per oz std; bar gold refinable, 77s 11d per oz std; Spanish doubloons, 76s 6d to 77s nominal; South American doubloons, 73s 6d to 73s 9d per oz, last price; United States gold coin, scarce. Silver—Bar silver, 5s 0¼d to 5s 0⅜d per oz std; bar silver, containing 5 grs gold, 5s 0⅜d per oz std, last price; Mexican dollars, 4s 11d per oz, nominal; Spanish dollars (Carolus) in demand, scarce.

Messrs Haggard and Co. report:—

Since our last circular, our market has been moderately active, and prices have in some instances improved. The amount of gold sent to America has again been very small, sterling exchange at New York being quoted higher. On the other hand, the amount sold to the Bank has been large, viz., 411,000*l*. There has again been no demand for the Continent. There is a good demand for silver, principally for the Continent, and a few parcels have realised slightly increased prices, but the market is now quiet.

The amount of gold, chiefly in bars, purchased by the Bank yesterday was 112,000*l*, and to-day 72,000*l*, being a total of 184,000*l* since making up the last return.

The out-going mail steamer for Brazil to-day has taken 11,435*l*, chiefly silver.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The suspension has been announced of Messrs James Coster, Beater, Dennant, and Russ, warehousemen, of Aldermanbury, with liabilities estimated to amount to 200,000*l*, a large portion of which is due to the executors of Mr James Coster, who died about four years ago, although his name was retained at the head of the firm. The house was of old standing, and enjoyed the highest credit and reputation. It is apprehended in some quarters that the liquidation will prove unfavourable. Annexed is the circular issued:—

3 and 4 Aldermanbury, London, August 7, 1861.

Gentlemen,—We deeply regret to inform you, that having sustained heavy losses during the last four years, and having now discovered considerable delinquency on the part of our two principal clerks, we deem it advisable to suspend payment.

Our affairs have been placed in the hands of Messrs Humphrys, Honey, and Honey, of Ironmonger lane, accountants, who will

submit a statement to you as soon as possible. Trusting to your forbearance, we are, &c.,

BEATER, DENNANT, AND RUSS,
Trading as James Coster, Beater, Dennant, and Russ.

Another small failure in this trade has occurred that of Messrs Nottingham, Clougg, and George, but the liabilities are believed to be very moderate.

A meeting of creditors of Mr James Grieves, Australian merchant, who stopped payment about three weeks back, was held yesterday, when a statement was read, showing liabilities about 54,777*l*, and assets estimated to realise 38,890*l*. It was resolved to accept a composition of 12s 6d in the pound in five instalments, the last of 2s 6d, at 15 months, to be secured, besides a special guarantee by Mr Grieves' family creditors for 11,392*l* refraining from taking any dividend or security until the four first instalments shall have been paid. The failure was attributed to losses by consignments, chiefly to Australia.

PUBLIC COMPANIES.—A half-yearly meeting of the Bank of Egypt took place on Monday, when the report was adopted and a dividend declared at the rate of 7 per cent. per annum, free of income tax, out of the available balance of 12,479*l*, leaving 3,729*l* to be carried forward. The debt of El Hami Pasha, about which some hasty and ill-advised proceedings were taken a year ago by the former managers, has now been reduced to 30,000*l*, including interest, and this sum is amply secured. The claim was originally for 162,000*l*, and in December last stood at 90,000*l*. The Viceroy has throughout the affair acted with honour and liberality, and has shown much consideration for the Bank. The trade of Egypt was stated to be rapidly increasing, and thus to afford a good prospect of the Bank doing a large and profitable business. In the past half-year the profit has considerably exceeded the same period of 1860. The branch at Cairo has realised 3,800*l* net. The present rate of exchange, 95⅞ to 96, is 1½ per cent. in favour of the assets of the Bank, which are taken at the par of 97½. The permanent expenses have been reduced by 3,000*l* in the last six months. In answer to a question, it was mentioned that 30,000*l* has been realised of the dependencies other than the debt due from El Hami Pasha, but at a loss of 8,000*l*. It is hoped, however, that the future sums that will be recovered may be at a less cost.

Some important modifications have been granted in the concession from the Danish Government to Colonel Shaffner for the North Atlantic Telegraph. The caution money of 20,000*l* has been returned, and the term for the completion of the line extended to 1874.

A meeting of the proprietors in the North of Europe Steam Company was held on Tuesday to receive the liquidators' report. It stated that the open account with the Eastern Counties Railway, containing many disputed items, has been finally and satisfactorily arranged. Some delay has taken place in the completion of the sale of the factory at Lowestoft, mentioned in the last report. The suit with Captain Andrews, the late manager, is almost terminated, and a sum of about 400*l* is shortly expected to be received from him. A further distribution of 6s or 7s will be divisible among the shareholders from the funds in hand, in addition to the 2*l* 5s already returned on each 20*l* share.

The report of the East India Irrigation Company, issued preparatory to their meeting next Thursday, details at length the preliminary proceedings in the formation of the undertaking, and announces that the Government of India have conceded to the Company the interpretation they had placed upon the terms of their agreement. The execution of the works, it is hoped, will now proceed satisfactorily.

A meeting of the Mediterranean Extension Telegraph Company took place on Wednesday. The report stated that the receipts for messages in the past half-year have considerably increased, and that the position of the Company was generally more satisfactory. The full amount of the annual subsidy is at present receivable, but the Directors look forward with confidence to a period when the receipts will be more than proportionate to the working expenses, thereby reducing the claims of the Company on the Government. A considerable accession of traffic is anticipated on the completion in the present month of the Government line from Malta to Alexandria. The cables between Corfu and Otranto, and between Malta and Sicily, continue in excellent working order. Any further attempt to restore the original line to Cagliari is abandoned for the present. Greater speed and regularity will shortly be attained in the transmission of messages to England, by the completion of a new wire for the special use of the Company and the establishment of two new translating stations. After a short conversation, the report was adopted, and a dividend declared on the preference shares. It is hoped that the Company will soon be in a position to make a distribution on the ordinary stock.

The annual meeting of the Royal Insurance Company took place at Liverpool on the 2nd instant, when it was announced that the premiums in the fire department in 1860 amounted to 262,977*l*, showing an increase of 34,663*l*. over the preceding year, and of 66,829*l* over 1858, an augmentation having consequently taken place of 34 per cent. in two years. The transactions of the year in the fire department have realised a profit of 41,067*l*. In the life department the premiums received on new policies amounted to 15,079*l*, being an increase of nearly 2,000*l* over the preceding year. It was also mentioned that the net loss by the great fire near London bridge will be about 75,000*l*, which is believed to be less than the average of the fire offices generally. A dividend and bonus were declared of 7s per share, free of income tax.

The liquidators of the London Discount Company announce a further return to the shareholders of 8½ per cent. of the capital, making a total distribution to the present date of 88½ per cent. About 6 per cent. more is expected to be realised.

The first report of the East India Irrigation and Canal Company has been issued, from which we learn that all obstacles to this undertaking have been removed, and that the works for irrigating and draining the proposed districts will becommenced as soon as sufficient capital has been subscribed.

The Directors of the National Company for Boat Building by Machinery having resolved to limit their first issue of stock to 70,000*l*, and this having been in all respects approved of by them, have this day allotted the shares.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.35 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 4-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 428 per mark, and the short exchange on London is 13.8 per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 7-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 107½ to 108 per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

The Commercial Times.

RE-ESTABLISHMENT OF SECOND MONTHLY MAIL TO PENANG, SINGAPORE, AND CHINA.—In consequence of the urgent applications made to Her Majesty's Government for the restoration of the second monthly mail service between this country and China, which was discontinued last month, it has been determined to re-establish this service. Mails for Penang, Singapore, and China will accordingly be made up in London on the morning of the 20th instant, for despatch via Southampton, and on the evening of the 26th instant for despatch via Marseilles, and thenceforward the mails will be despatched twice a month, as formerly, viz.:—On the mornings of the 4th and 20th, via Southampton; on the evenings of the 10th and 26th, via Marseilles. As the revenue derived from the correspondence conveyed by the line of packets between Point de Galle and Shanghai is insufficient to cover the cost of this double service, the Lords Commissioners of the Treasury have, by warrant, directed that the postage upon such correspondence shall be increased. All letters, therefore, for Penang, Singapore, Hong Kong, and all other parts of China, Japan, Java, the Philippine Islands, Labuan, Borneo, Siam, Sumatra, and the Moluccas, will in future be chargeable with the following rates of postage, viz.:—Via Southampton—For a letter not exceeding ½ oz, 1s; above ½ oz and not exceeding 1 oz, 2s; above 1 oz and not exceeding 2 oz, 4s; above 2 oz and not exceeding 3 oz, 6s. Via Marseilles—For a letter not exceeding ½ oz, 1s 3d; above ½ and not exceeding ½ oz, 1s 6d; above ½ oz and not exceeding ¾ oz, 2s 9d; above ¾ oz and not exceeding 1 oz, 3s.

Imports of the week ..... 270,670 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

At Mark lane, to-day, there were about 200 quarters of *new* Talavera wheat on offer, for the most part in very good condition, and the demand for it ruled steady, at from 65s to 70s per quarter. Old home-grown wheats moved off slowly, at Monday's currency, and there appeared rather less demand on French account for foreign samples, but without leading to any quotable change in their value. Barley, oats, beans and peas were a dull inquiry, and, in some instances, prices were the turn in favour of buyers. *New* malting barley was selling at 34s to 40s: *new* Canadian oats, 32s to 34s; and *new* grey peas at 38s to 40s per quarter. This week's imports of foreign produce have amounted to 27,290 quarters of wheat; 2,430 barley; 12,320 oats; 250 sacks and 23,630 barrels of flour.

At Liverpool, this morning, wheat was in fair demand, partly for France, at full prices. Flour ruled somewhat firmer, and spring corn was steady in price.

At Galatz, for the week ending July 27, there was considerable firmness in the corn trade, and good and fine produce was held for rather more money. The accounts respecting the crops in Moldavia and Wallachia were very satisfactory, both as regards quantity and quality.

A fair extent of business has been transacted in the Liverpool cotton market during the present week, but without any appearance of animation. The total sales have reached 63,000 bales, and include 32,000 bales to spinners, 19,000 bales on speculation, and 12,000 bales for export. Quotations for some descriptions are ⅛d per lb dearer than on Friday last, but quotations in general are unchanged for the week. To-day the market closes quiet, but steady, with sales of 8,000 bales at former rates.

Good and fine qualities of coffee have ruled steady, at full quotations; otherwise, the trade has been in a sluggish state, at barely late rates.

A commercial report from Rio, dated July 8, says:—

As regards the yield of the new crop of coffee, it will turn out a very moderate one, the various estimates ranging from 1,400,000 to 1,600,000 bags. The export tables lead to the following statement:—

	bags.
Shipment from July 1, 1860, to June 30, 1861	2,562,000
Balance of sales June 30, 1861	93,000
Stock on hand July 1, 1861	90,000
Estimate of old coffee in the interior	900,000
	3,650,000
Less—	
Carried over on July 1, 1860, belonging to crop 1859-60	30,000
Shipped and part of stock belonging to crop 1861-62	40,000
	70,000
Yield of crop 1860-61	3,580,000

All kinds of raw sugar have moved off slowly, and prices, although not quotably lower, have shown a tendency to give way. In refined goods, only a moderate business has been transacted, on former terms.

The public sales of tea, held this week, have gone off heavily, and, in some instances, the quotations have ruled in favour of buyers. Privately, the market has been inactive, but without change in prices.

IMPORT and DELIVERY of TEA in London, from Jan. 1 to July 31, 1860 and 1861, with STOCK on hand on August 1, 1860 and 1861.

In cocoa, the dealings have been to a limited extent; but in the market for rice, although the business doing has been very moderate, a fair amount of firmness has been observed.

Messrs Witherby and Son report as follows on the dry fruit trade for the past month:—Currants—The inactivity noticed in our last as having been so long prevalent has continued, and there are no transactions of importance to record. It is a remarkable fact, and shows the tenacity of holders, that there has been this summer an entire absence of public sales without reserve. The market nevertheless, passively, shows a decline in finest sorts; offers that were made a few weeks since not now being obtainable. Low fruit at 26s is inquired for, but is scarce, while on the other hand finest Gulf has been sold at 29s, still further reducing the small range to which we alluded last month. The essence of the sundry advices about the coming crop seems to be favourable as to quantity. There is a probability of a smaller yield from the islands, but from the Morea it is anticipated the weight will be equal to last year. There is no doubt the first arrivals at this port will be some days later than last year, when the London arrived on the 30th August. Raisins—Clearances in July 314 tons for consumption, against 314 tons in 1860, and 240 tons in bond, against 491; total deliveries in July, 554 tons. There is no change in prices of any description what little business has been done being of a retail character. Accounts of a favourable crop of all raisins continue to be received. New Valencias may be expected a few days later than last year, when the price opened at 35s on 27th August. Figs—An abundant supply expected at very moderate rates. Dates—A good trade has of late been done in Bombay dates, from 5s for damaged to 14 for finest quality. Much carelessness is shown by shippers in not sorting the fruit; the several parcels now on sale are very irregular, and give rise to great complaints from dealers. This article is reaping the full benefit it was entitled to by the abolition of the duty.

Annexed are Messrs Durant and Co.'s monthly remarks concerning the silk trade:—"We have nothing favourable to report as to silk. The market has remained in the same quiet state throughout the entire month. Some little symptom of business was manifested in the first three days of this month, but the American news on the morning of the 5th seemed to check the incipient disposition to purchase, and we are now nearly as quiet as ever, although the requirements of consumers, reduced as they are to nearly the smallest possible scale, oblige them to appear occasionally as buyers. The deliveries are still very small. In Bengal silk we have nothing to notice, but the same disinclination to purchase. Of the European crop we hear very little, but samples are sent forward in the attempt to elicit offers, and prices are talked of which sound very different to those of late years; still they fail to make business, and are indeed much beyond the parity of China silk. In Brutia, and Persian silk, nothing.

STATE of the SILK WAREHOUSES.

In rum, we have to report a somewhat improved demand, more especially for common qualities, at very full prices. The brandy market hsa been firm.

With regard to the state of the leather trade for the past month, Messrs Powell and Co. observe:—The changes in the leather market during the past month are not very important or decisive, but it is satisfactory to be able to report that, although prices remain nearly unaltered, the better feeling which we noticed in our last as then existing has strengthened, as the prospect of a good harvest has become more certain, and has resulted in a gradual increase of business. The best descriptions of sole leather have been most prominently in demand, but the stocks generally have rather diminished than increased throughout the month, and we may hope, as dealers and consumers have for a long time past bought chiefly to supply immediate wants, that, with a good harvest, and a reduction in the value of money, the present improved tone of the market will at least be maintained. In raw goods we have again to call attention to the large importation and stock of South American hides. The importers are generlly firm at existing rates, but we hope that tanners will continue to exercise the caution with which they have hitherto acted throughout the present year, as the only means of realising the much desired result of a fair comparative value of hides and leather. Other descriptions of salted hides show a moderate import, and rather declining rates. The whole amount of business is rather below an average.

The annexed is from Messrs Churchill and Sim's timber circular:—

COMPARATIVE STOCK of TIMBER at the PUBLIC DOCKS.

	Aug. 1, 1861.	Aug. 1, 1860.	Aug. 1, 1859.
Foreign deals pieces	1,054,000	750,000	718,000

Scotch pig iron is less firm, at 51s 3d per ton cash for mixed numbers. English tin has fallen 3*l* per ton. Spelter, however, has advanced to 17*l* 5s to 17s 10s per ton.

Linseed oil moves off steadily, at 32s per cwt on the spot. Rape, olive, and cocoa-nut oils rule steady. Turpentine is lower, and American barrels are selling at 49s per cwt.

Tallow has further declined in value, the quotation for P.Y.C. being 45s to 46s per cwt on the spot. Town tallow, 49s 3d per cwt.

"The state of trade," observes the *New York Shipping List* of the 27th ult, "is most unmistakeably dull and unsatisfactory, and the week closes with about the same features of general inactivity which were the leading characteristics chronicled in our last issue. We have nothing new to say in reference to the crops; certainly nothing to militate against the favourable accounts from most sections of the country, to which we have had occasion to allude from time to time in this summary. Harvesting is progressing favourably, and new wheat has already made its advent in market. Throughout the West the accounts concur in reporting a fair yield to the acre, and as a large section was turned up last 'fall,' the aggregate crop may reasonably be expected to be pretty large. The same, we believe, is true of the corn crop, though it is too early as yet to speak with any degree of certainty in regard to the probable yield."

The cotton market has been much more subdued in tone this week; but whilst the trade have curtailed their operations other buyers have purchased pretty freely, and on one or two days transacted a large business. Prices of American in the medium and better qualities are again higher, and our quotations have to be raised in these ⅛d per lb. Egyptians have commanded full rates, many holders keeping their stocks off the market. Brazil continues firm. East Indias are abundant and by no means buoyant, but maintain their ground. The sales to-day are 8,000 bales. The market is quiet but firm.

MARKETS IN THE MANUFACTURING DISTRICTS.

The unfavourable news at hand from America has had a depressing influence upon trade in the manufacturing districts. No actual change has taken place in prices, but transactions, generally, have been on a most restricted scale. The stocks, however, are not to say large for the time of year. Both iron and coals have sold somewhat freely, at full quotations.

MANCHESTER, Aug. 8.—We repeat our quotations from last week, at which sellers remain firm, but little business has been done, for most buyers have been well supplied at rather lower rates, and seeing how much hinges on the future of cotton, have been comparatively undecided as to further proceedings. The absence also of the India mail has kept buyers for that market in suspense; on its arrival some little activity is expected. For the Continent and home trade we report almost a cessation of transactions.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—The tone of the wool market is quiet. But little is changing hands, and that not at all on speculation. There appears to be rather more willingness to sell, but the complaint is still made of the farmers holding with such firmness that a profit can hardly be made in this market. Foreign buyers have for the most part supplied their wants, which adds to the quietness. We can quote no improvement in yarns. Spinners are chiefly employed for the home consumption, the quantity of yarns exported from this market being very limited, either for Germany or Russia. The piece market offers no new feature of moment.

LEEDS.—The demand is mostly in the home trade. Recently some large orders for Canada have been made up, but there is no new demand for that market, the trade with which will not improve from recent occurrences in the nominally United States. The tone of the market was altogether one of quietness, but no change of importance can be noticed in either goods or wool.

ROCHDALE.—The American news has not improved the flannel market, which has been of a very quiet character. A few Yorkshire makers, however, did a stroke more business than last week. Prices kept steady, manufacturers making only a slight concession from last month's rates. A small amount of business was done in wool, chiefly at last week's prices.

LEICESTER.—Most departments of the hosiery trade continue in a healthy condition, and there has been a fair business doing in the warehouses. The glove trade continues flat. At Loughborough and the adjacent districts business is, upon the whole, rather quiet. There is no change in wools, prices remaining firm. Yarns are in tolerable request, at recent prices.

NOTTINGHAM.—There is very little business doing in the lace trade; most departments are dull, and there is no immediate prospect of a beneficial change. All kinds of cotton goods are a bad sale, particularly plain foundation nets, which were, perhaps, never at any former period in less request. The silk branch is quite as flat as for some time past, and employment is becoming

more scarce. There is no favourable change to report in the hosiery trade. The foreign demand is trifling, and the home trade is not equal to an average. Stocks are low, and manufacturers are keeping them down as much as possible. Yarns hold high in price.

BELFAST.—Exports of goods have been more extensive, chiefly to the new markets. Brazil has been taking considerable quantities of light linens. The West India trade continues steady. Goods suited to the French trade are held at firmer prices. Stocks of fine goods, which had accumulated considerably in the earlier months of the year, are only moderate.

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 0s, at the works; best bars, 8*l* 0s; sheets, 8*l* 10s; doubles, 10*l* 0s; nail sheets, 8*l* 0s; latten, 11*l* 10s; boiler plates, 8*l* 10s; best and best best in proportion; common rods, 7*l* 0s; hoops, 8*l* 0s; gas strip, 7*l* 10s; Canada plates, 11*l* 10s.; and all other sorts in proportion. Second and third-class makers are selling below these rates. Current prices of pig iron:—Staffordshire cold blast, 4*l* 5s; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, 4*l*; Old Windmill End, second quality, Nos. 1 and 2, melting pig iron, 3*l*; Old Windmill End Mine forge pig iron, 3*l* 5s to 3*l* 7s 6d; best native hydrate pigs, 3*l* 7s 6d to 4*l*, according to the brand; first-class All Mine grey forge pigs, 3*l* 5s to 3*l* 7s 6d; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2s 6d; Seend Mine melting pigs, 3*l* 10s to 3*l* 15s; good mine pigs, with a modicum of fine cinder, 2*l* 10s to 2*l* 15s; mine pigs, deteriorated by cinder, 2*l* 7s 6d to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; Barrow hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; Workington hæmatites, 3*l* 6s 3d to 3*l* 7s 6d; grey forge cinder pig iron, 2*l* 5s to 2*l* 10s; white forge cinder pigs, 2*l* 2s to 2*l* 7s 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of mine melting iron, 3*l* 2s 6d to 3*l* 15s, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Gadlys (Aberdare, South Wales), No. 1 foundry pig, cold blast, 4*l* 10s f.o.b. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12s 6d to 3*l* 15s delivered; Northern hæmatites from 3*l* 2s 6d to 3*l* 7s 6d, according to brand or quality.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The demand has been inactive, and quotations have shown a little alteration throughout the week. Up to yesterday no general decline occurred, but soft Cuba muscovado went cheap in several instances. Floating cargoes of foreign are still in demand for the United Kingdom. The sales of West India to yesterday reached 2,550 casks. 350 casks Barbadoes by auction partly sold at 33s to 41s for brown to good yellow. The deliveries, last week, were 4,800 tons, and the diminution for home consumption since the commencement of the year is 5,600 tons. Owing to the heavy landings the stock at the close was augmented to 76,250 tons, against 71,450 tons last year. There is an increase in the stock of Great Britain amounting to 11,000 tons over the previous season's.

Mauritius.—3,411 bags partly met with buyers: black and low brown, 28s to 30s 6d; middling brown to low grey, 31s to 34s 6d; soft grey and yellow, 34s to 38s; grainy, 38s to 39s 6d per cwt.

Bengal.—2,115 bags partly sold at 44s to 47s for white Benares.

Penang.—2,923 bags of indirect import were partly sold at 33s 6d to 39s per cwt for brown to very good yellow.

Foreign.—Four floating cargoes of Cuba have sold for the United Kingdom, at 21s to 22s 9d; three of Havana, No. 10 to 11½, 24s 9d to 25s 1½d. By auction, 819 boxes Havana partly found buyers at 33s to 39s for brown to good yellow; florettes and white bought in at 45s 6d to 51s. 448 casks Cuba partly sold at 33s to 37s. 511 casks 280 barrels Porto Rico were also partially disposed of: brown to low yellow, 33s 6d to 36s; low middling to good pale, 36s 6d to 42s 6d per cwt.

Refined.—The market has been quiet since last Friday, and some few transactions have occurred in dry goods, at rather easier rates.

MELADO.—482 casks were partly sold at 26s per cwt.

RUM.—A more active inquiry has sprung up within the past two days, when considerable sales of East India occurred at 1s 6½d. Leewards have sold at 1s 7d, and good to fine Demerara at 1s 10d to 2s 2d per proof gallon, according to quality and package. Jamaica, 2s 10d to 4s 6d per gallon.

COCOA.—Grenada is more readily saleable at the recent decline, 49s to 51s being paid, owing to the small supply. 671 bags Trinidad were partly sold at 50s to 72s 6d per cwt for grey to good red.

COFFEE.—The market has not at present been affected by the increased supplies of plantation Ceylon brought forward, which generally realised the previous value. 915 casks 818 barrels and bags in public sale chiefly sold at 68s to 75s 6d for fine ordinary to good middling. 869 bags native at 60s to 62s. Some business is reported privately in the latter at 61s for good ordinary quality. 899 bags Costa Rica brought 68s to 74s 6d for fine ordinary to middling. A floating cargo of St Domingo is reported at 60s 9d for the Mediterranean, and one of good firsts Rio at 47s per cwt for a near port.

TEA.—A limited business has been done by private contract during the week. Of 10,082 packages offered by auction, yesterday, 6,253 sold, rather more than three-fourths being "without reserve." Canton gunpowder sold at ½d to 1d decline. Several other kinds, including the congou disposed of and scented orange pekoe, showed a decline of ½d per lb.

RICE.—Transactions to a fair extent have taken place by private contract: white Bengal, 11s 3d to 14s; soft grain, 9s to 9s 6d; Bassein equal to 9s 9d. 100 tons Ballam sold at 9s 6d or 9s 9d landed. Of 5,113 bags Bengal, by auction, about 1,900 bags old yellowish white grain realised 10s. 500 bags Moulmein were taken in at 9s. Two floating cargoes of Necrancie Arracan have sold at 10s 4½d, with quality guaranteed.

IMPORTS and DELIVERIES of RICE to August 3, with STOCKS on hand.

* The deliveries of duty-free goods for export are not given now and the total will be shown under the head of home consumption.

SAGO.—1,000 boxes good small pearl have sold at 19s to 20s per cwt, being about 1s per cwt dearer.

SPICES.—222 bags pimento, by auction, were taken in at 2⅝d to 2¾d. A few lots mace and nutmegs realised the former value. 96 boxes cassia lignea partly sold at 87s to 89s. Black and white pepper are quiet.

SALTPETRE.—About 1,200 bags Bengal, refracting 9¼ to 8¼, brought 34s 6d to 34s 9d per cwt, being the previous value, and there is less pressure to sell.

IMPORTS and DELIVERIES of SALTPETRE to August 3, with STOCKS on hand.

Deliveries	10015	9730	10950	9100
Stock	7800	6400	3150	4100

SHELLAC remains firm. Native orange has sold at 9*l* 7s 6d to 9*l* 15s; fair liver, 8*l* 15s to 8*l* 17s 6d.

SAFFLOWER.—207 bales Bengal sold at rather lower rates for the common kinds, middling to good being firm: low to good, 2*l* 7s 6d to 6*l* 10s per cwt.

CUTCH.—1,443 bags from Macao, of middling quality, were bought in at 21s 6d to 22s. The market is quiet, but good commands 22s 6d to 23s per cwt.

GAMBIER is quiet.

METALS.—The principal feature noticeable in the market has been a further considerable advance upon spelter, now quoted at 16*l* 10s to 17*l*; and 17*l* 5s per ton paid for late delivery. Straits tin has sold at 111s to 111s 6d per cwt, but the market is quiet. Scotch pig iron closes at 51s 3d to 51s 6d per ton for mixed numbers.

JUTE.—The transactions by private treaty have been limited, but the holders seem less desirous to realise, as the stock is reduced to 9,250 tons. On Wednesday, the public sales, comprising 3,000 bales, went off without spirit at previous rates, ranging from 12*l* 10s to 18*l* 2s 6d for ordinary to good qualities.

HEMP.—Roping quality has lately sold under 19*l* per ton for cash.

LINSEED.—Sales of Bombay have been made at 58s, and Calcutta at 55s 6d. A cargo of Black Sea or Azoff has sold at 55s 6d per quarter.

OILS.—Olive supports the advance last quoted. A large business has been done in sperm at 93*l* to 94*l* per tun. Linseed remains firm at 32s. Rape firm with a steady demand: foreign refined, 42s 6d to 43s; brown, 40s 6d to 41s: 44s and 42s respectively paid for monthly deliveries up to December. Cocoa-nut keeps firm: Ceylon, 43s 6d to 44s; Cochin, 44s 6d to 45s. Palm quiet at 43s per cwt.

TURPENTINE.—Spirits sell slowly at 49s per cwt for American in barrels.

TALLOW.—There is rather less buoyancy in the market than last noticed, but quotations show slight alteration: 1st sort Y.C., 45s 6d to 46s; new, for delivery in the last three months, 46s 6d; spring, 47s per cwt.

PARTICULARS OF TALLOW.—Monday, August 5.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market was flat to-day. 3,555 casks West India have however sold for the week, without change in prices. No public sales of Mauritius or East India held to-day.

COFFEE.—2,200 bags native Ceylon half sold at 59s 6d to 63s for ordinary to superior bold. 274 casks 204 barrels and bags plantation at full rates; also 4,168 bags Costa Rica, the latter bringing 65s 6d to 77s per cwt.

RICE.—5,000 bags new Bassein were bought in at 10s per cwt.

SAGO.—762 boxes were chiefly bought in, a small portion selling at 18s 6d per cwt for small greyish medium sort.

GINGER.—210 cases Cochin brought 43s to 75s for small to good bold. 341 barrels Jamaica, 40s to 68s per cwt for ordinary to middling.

CASSIA LIGNEA.—50 boxes pile 2 were bought in at 87s per cwt.

CUTCH.—350 bags Calcutta were bought in at 22s per cwt.

LAC DYE.—123 chests were taken in at 1s 5½d to 1s 7½d.

SHELLAC.—140 chests common dark garnet bought in at 8*l* 10s per cwt.

OILS.—730 casks palm part sold at 42s 9d to to 43s. 250 casks cocoa-nut bought in: Cochin, 44s 6d; Ceylon, 43s 6d per cwt. 72 tuns colonial sperm were part sold at 94*l*. 45 tuns seal: yellow to pale, 32*l* 5s to 36*l* 10s per tun.

TIN.—English reduced 3s per cwt, but the price is still much higher than foreign.

TALLOW.—By auction, 2,554 casks old St Petersburg only partly sold at 44s 3d to 45s. 593 casks 100 boxes South American, 41s 9d to 47s. 41 casks Australian, 43s 6d to 43s 9d.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues very quiet. Dutch crushed remains firm.

GREEN FRUIT.—The demand for West India pine apples continues good; many have been landed in bad condition, owing to rainy weather when shipped. Lemons of good and sound quality improved in value. A parcel of Lisbon, sold by Keeling and Hunt at public sale, went at improved prices. The accounts of the new crops of fruit, particularly from the "Azores," are of a promising character.

DRY FRUIT.—A firm, but completely stagnant market.

COLONIAL WOOL.—The sales progress steadily, at former rates.

FLAX.—Market steady, at our quotations.

HEMP.—Market dull, and very few sales again this week to report.

TOBACCO.—A slightly improved demand has existed during the last three or four days, and sales effected at outside quotations. The market remains firm, and purchasers have experienced some difficulty in operating at present quotations.

METALS.—Copper maintains the firmer tone assumed under the recently improved demand, and a fair business has been done in most kinds. Iron continues quiet, but the tendency has rather inclined to improvement than otherwise. Tin has maintained a steady price until to-day, when English fell 3*l* per ton in consequence of slack demand. A substantial advance in prices has been established in spelter. Stock on 1st instant, 4,711 tons. Lead is quoted a shade higher, but operations continue to be limited. Tin plates show little change, the demand being still too small, although it has not diminished.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	49	3
Fat by ditto	2	5½
Yellow Russian	48	6
Melted stuff	34	6
Rough ditto	19	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Bacon market dull, but prices are firm at 76s to 78s landed. Very little bacon coming forward for the next fortnight. A very small stock at wharves. Friesland butter, 106s: quality better than last week. In all other provisions very little doing.

METROPOLITAN CATTLE MARKET.

MONDAY, Aug. 5.—The total imports of foreign stock into London, last week, amounted to 13,191 head. In the corresponding period in 1860, we received 13,484; in 1859, 11,626; in 1858, 9,553; in 1857, 8,108; in 1856, 7,216; and in 1855, 9,566 head.

There was a large number of foreign stock on offer in to-day's market; but its general quality was very middling. The arrivals of beasts fresh up from our own grazing districts were somewhat extensive, and, for the most part, in fair average condition. Although the attendance of buyers was large, all breeds of beasts moved off slowly, at a decline in the quotations, compared with Monday last, of 2d per 8 lbs. A few very superior Scots realised 4s 10d, but the general top figure for beef was 4s 8d per 8 lbs. About 2,000 Shorthorns, crosses, &c., came to hand from Lincolnshire, Leicestershire, and Northamptonshire; 900 various breeds from other parts of England; 180 Scots and crosses from Scotland; and 200 oxen and heifers from Ireland. We were seasonably well supplied with sheep as to number; but at least a moiety of them were in comparatively poor condition. Prime Devons and half-breds moved off steadily, at full quotations, a few of the former having realised 5s 6d per 8 lbs; otherwise the mutton trade was in a sluggish state, on former terms. Lambs met a dull inquiry, at further depressed rates, viz., from 4s 10d to 5s 8d per 8 lbs. The supply was tolerably good. There was a slow inquiry for calves, at Thursday's decline in the quotations.

SUPPLIES.	Aug 6, 1860.	Aug 5, 1861.
Beasts	4900	4720
Sheep and lambs	27300	27190
Calves	355	294
Pigs	310	410

THURSDAY, Aug. 8.—There was a fair average supply of beasts on offer in to-day's market, and all breeds met a dull inquiry, at Monday's decline in the quotations. The extreme value of the best Scots was 4s 8d per 8 lbs. We were fairly supplied with sheep, in but middling condition. The mutton trade ruled somewhat heavy, and prices had a drooping tendency. The extreme value of Downs was 5s 4d per 8 lbs. Lambs, the show of which was good, changed hands slowly, at Monday's currency. There was a slight improvement in the veal trade, at fully late rates. Pigs and milch cows were very dull, but not cheaper.

Per 8 lbs to sink the offal.

Lambs, 4s 10d to 5s 8d.

Total supply—Beasts, 1,040; sheep and lambs, 11,620; calves, 480; pigs, 420.
Foreign supply—Beasts, 390; sheep 1,800; calves, 310.

NEWGATE AND LEADENHALL.

FRIDAY, Aug. 9.—The supplies of both town and country-killed meat are by no means extensive, and the trade, on the whole, rules steady at our quotations.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d

HOP MARKET.

BOROUGH, Monday, Aug. 5.—We have no alteration to report in the hop market since our last. The duty is called 110,000*l*. Mid and East Kents, 90s, 150s, 210s; Weald of Kents, 80s, 130s, 180s; Sussex, 75s, 90s, 140s; Yearlings, 120s, 160s, 210s.

FRIDAY, Aug. 9.—The accounts from the plantations have varied little since the above report, and cannot be said to be of an unfavourable nature, the duty being estimated at from 100,000*l* to 110,000*l*. The business doing in our market is very limited, and prices are barely supported.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, Aug. 5.—The supply of home-grown potatoes on sale here is moderately good; but the imports of foreign since our last have been confined to a few small parcels. Generally speaking the trade is in a sluggish state, and prices have a drooping tendency. Shaws are quoted at 50s to 70s, and Regents 75s to 100s per ton. The crop is very favourably spoken of in nearly all parts of Great Britain, and in Ireland we understand that it will probably be a very abundant one.

FRIDAY, Aug. 9.—The supplies of home-grown potatoes are less extensive, and the trade rules firm, on rather higher terms. Shaws are selling at from 60s to 70s, and Regents 75s to 100s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Old meadow hay, 2*l* 0s to 5*l* 0s; new do., 2*l* 10s to 4*l* 0s; old clover ditto, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 10s to 5*l* 0s; and straw, 1*l* 10s to 2*l* 0s per load. A slow trade.

CUMBERLAND.—Old meadow hay, 2*l* 5s to 5*l* 0s; new ditto, 2*l* 10s to 4*l* 0s; old clover, 3*l* 10s to 5*l* 17s; new ditto, 3*l* 10s to 5*l* 0s; and straw, 1*l* 10s to 2*l* 0s per load. Trade dull.

WHITECHAPEL.—Old meadow hay, 2*l* 0s to 5*l* 0s; new ditto, 2*l* 10s to 4*l* 0s; old clover, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 10s to 5*l* 0s; and straw, 1*l* 10s to 2*l* 0s per load. Trade very inactive.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 9.—The demand continues languid, and the transactions are quite of a retail character. Prices, however, remain unaltered, as stocks generally are by no means heavy.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 9.—Fair attendance at to-day's market. Wheat moderate; consumptive demand at full prices of Tuesday. Demand for France still continues for low qualities. Flour, a shade firmer; rather more doing. Indian corn in fair request; 30s 6d to 31s for old mixed. Beans steady at the late advance. Oats and oatmeal dull.

The Gazette.

TUESDAY, Aug 6.

BANKRUPTS.

J. Moss, Hounsditch, wholesale clothier.
W. Elsam and J. F. Wallace, Gresham house, Old Broad street, East India merchants.
C. Gibbs, Droitwich, baker.

EPITOME OF RAILWAY NEWS.

MIDLAND.—The directors have decided to recommend to the proprietors a dividend on the ordinary stock, for the half-year ending 30th June, at the rate of 6¼ per cent. per annum.

BLACKWALL.—The dividend for the half-year ending June 30 is at the rate of 2*l* 15s per cent. per annum.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 27th of July amounted to 572,220*l*, and for the corresponding week of last year to 569,680*l*, showing an increase of 2,540*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 272,220*l*, and for the corresponding week of 1860 to 270,063*l*, showing an increase of 2,626*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Aug. 5.—The railway market was inactive to-day, and the general tendency was unfavourable. Great Northern and London and North-Western showed the chief heaviness; the former declined more than 1 per cent. In most of the other leading railways a reduction took place of ⅛ to ⅜. London, Chatham, and Dover stocks were exceptionally firm, the preference advancing to 95, on a statement that the arrears of dividend will shortly be paid. Colonial descriptions remained about the same as on Saturday; Ceylon shares were a fraction higher. In the foreign market, Lombardo-Venetian were steady. Mines were quiet, but generally steady.

TUESDAY, August 6.—The railway market was dull in the morning, but on the announcement that the proposed dividend on the Midland was at the rate of 6¼ per cent. per annum, an advance of nearly 1 per cent. took place in that stock. Compared with yesterday, Lancashire and Yorkshire, Great Western, North-Eastern descriptions, and North British were slightly lower. Great Northern, on the other hand, and London and North-Western fractionally improved. London, Chatham, and Dover preference marked 96. Colonial descriptions remained without material change. Grand Trunk stock left off at 18½ to ¾, and Great Western of Canada shares 9⅞ to 10. In foreign railways, Lombardo-Venetian shares were firmer, at ¾ prem. In American securities, United States and Virginia stocks again declined. There was little business doing in mines, and some British adventures were quoted lower. Foreign were generally steady.

WEDNESDAY, Aug. 7.—The railway market was rather firmer in the morning, but later in the day there was a tendency to relapse. London and North-Western and Great Western were especially flat at a decline of ¼ and 1 per cent. on the expectation of unfavourable dividends. Eastern Counties was also lower. Midland, on the other hand, and Caledonian improved. In the colonial market, Indian guaranteed stocks were steady. The principal change in foreign descriptions was a further rise in Lombardo-Venetian to 1 to ¼ prem. San Paulo shares also advanced. Cape of Good Hope Government debentures were quoted higher. American securities continued flat, owing to the further fall reported from New York, United States and Virginia stocks, Erie shares, and Illinois Central showing a reduction.

THURSDAY, Aug. 8.—The railway market underwent little change in the morning, but was considerably depressed later in the day, the dividends further announced proving even more unfavourable than had been expected. Compared with yesterday, Great Western fell 2½ per cent., Eastern Counties 1⅜, Great Northern ⅝, and Midland, Lancashire and Yorkshire, and York and North-Midland ¼ to ⅜. Caledonian and North British exceptionally improved, and London and North-Western was a shade firmer. In the colonial market, East India stock was firm at 99½ to 100. No change of importance occurred in foreign descriptions. Mines were dull, at about previous rates.

FRIDAY, Aug. 9.—The railway share market continued to show depression, and a fresh fall in prices occurred. The reduction amounted to 1 per cent. in Great Western and Eastern Counties stocks, ⅝ in Midland and Caledonian, and ½ to ⅝ in several of the other principal lines. Great Western is now quoted 65½ to 66. Lombardo-Venetian Railway shares receded to 13-16 to 15-16 prem. There was no alteration in the Indian and Canadian lines. In mines, a limited business was doing, at about previous quotations.

ROYAL LYCEUM THEATRE will open for an autumn season on Monday, August 19, under the management of Mr Edmund Falconer, when will be produced a new and original comedy, in which Mrs Charles Young will appear.

Mr Alfred Mellon opens the Royal Italian Opera house for a few weeks with a series of promenade concerts. From his success of last season at the Floral hall with the distinguished artists which he engaged, we may look for great attraction.

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. 'Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the eneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings.

By SAMUEL HARE, F.R.C.S., &c.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

"Mr Hare is, we think, a sound and successful practitioner.'—MEDICAL CIRCULAR.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

London: John Churchill; and may be had of all booksellers

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German, Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

DR CURTIS'S MEDICAL WORK. "MANHOOD An Essay on Nervous and Generative Diseases. The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

EXTRAORDINARY DISCOVERY—NEW THEORY. (Medicines Superseded.)

NERVOUS DEBILITY AND ITS train of evils, such as self-distrust, timidity, pimples on the skin, loss of memory, thoughts of suicide, trembling of the limbs, depression and prostration of the system &c., immediately checked and speedily cured by the Newly-Discovered Patent Appliance. Advice and instructions post free on receipt of two stamps, by Dr Watson, U.S., F.R.A.S., President of the Medical Reform Society of Great Britain. No. 27 Alfred place, Bedford square, London. Consultations daily from 11 till 2 and 6 till 8 on all these ailments and infirmities peculiar to youth, manhood, and old age, which tend to embitter and shorten life. For distinguished qualifications vide diplomas.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either, from the publisher, J. Allen, 20 Warwick lane: or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.
Sir HENRY MARSH, Bart., *M.D.*, Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."
Dr GRANVILLE, F.R.S.—"Dr Granville has found Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."
Dr LANKESTER, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."
Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and of a manufactured compound, in which the efficacy of his invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold *only* in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.
SOLE CONSIGNEES,
ANSAR, HARFORD, and CO., 77 STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

FRAMPTON'S PILL OF HEALTH,
Price 1s 1½d and 2s 9d per box
This excellent Family Pill is a medicine of long-tried efficacy for purifying the blood, and correcting all disorders of the stomach and bowels. Two or three doses will convince the afflicted of its salutary effects. The stomach will speedily regain its strength; a healthy action of the liver, bowels, and kidneys will rapidly take place; and renewed health will be the quick result of taking this medicine, according to the directions accompanying each box.
Persons of a Full Habit, who are subject to headache, giddiness, drowsiness, and singing in the ears, arising from too great a flow of blood to the head, should never be without them, as many dangerous symptoms will be entirely carried off by their timely use, and for elderly people, where an occasional aperient is required, nothing can be better adapted.
These Pills require no restraint of diet or confinement during their use; and in consequence of the great and increasing demand, the Proprietor has obtained permission from Her Majesty's Commissioners to have the name and address of "Thomas Prout, 229 Strand, London," impressed upon the Government stamp affixed to each box. Sold by all venders of medicine.

HOLLOWAY'S OINTMENT AND PILLS.—One hope yet remains.—However long continued their disease, however severe their sufferings, let no invalid despair of being cured till these potent remedies have had a fair trial. The one or other invariably succeeds. Both Ointment and Pills operate by purifying and regulating every function. These qualities advantageously display themselves in various disorders which differ in several particulars. The Ointment speedily removes all outward blemishes. The Pills improve the digestion and promote the formation of healthy bile, so essential to digestion, cheerfulness, and vigour. In cases of obstinate costiveness, no purgative can be prescribed so well calculated to produce the desired effect. They relax the bile-ducts, and liberate the natural aperient of the system.

CURE OF CONSTANT HEADACHE,
HEAVINESS, and DIMNESS of SIGHT, by Dr HUGO'S MEDICAL ATOMS.—Sir,—For more than ten years I was subject to constant pains in my head, so that at times I could hardly hold it up, my sight was dim, and my spirits always depressed, so that I felt life a misery; and having taken much medical advice and medicine, I had began quitet o despair, when a friend gave me a packet of *our glorious* medicine. After three doses, I felt quiet like another man, and after a fortnight, I entirely discontinued the medicine, and now I have not taken any for three months, and feel as well as ever I did in my life, &c. (Signed) JAMES HEWET, Thames street, Kingston, April 4, 1861.—Dr Hugo's Medical Atoms give immediate relief to all disorders of the head, heart, and stomach. They have no taste of medicine, are small, and may be eaten as sweets. Sold by Barclay and Sons, Farringdon, street, and all druggists, at 1s 1½d, 2s 9d, and 4s 6d per packet.

FREDERICK DENT,
Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

LAMBERT BROTHERS,
Alpha Tube Works, Walsall, Staffordshire,
(Established 1830,)
Manufacturers of
WROUGHT-IRON WELDED TUBES,
Iron, Brass, and Gun Metal Fittings for Gas, Steam, or Water;
Also of the Patent Metallic Tubular Pillar Bedsteads for exportation.

GLENFIELD PATENT STARCH,
USED in the ROYAL LAUNDRY.
The Ladies are respectfully informed that this Starch is EXCLUSIVELY USED in the ROYAL LAUNDRY, and Her Majesty's Laundress says, that although she has tried Wheaten, Rice, and other Powder Starches, she has found none of them equal to the GLENFIELD, which is the FINEST STARCH SHE EVER USED.
WHEN YOU ASK FOR
GLENFIELD PATENT STARCH,
see that you get it, as inferior kinds are often substituted.
WOTHERSPOON and CO., Glasgow and London.

ICE, AND REFRIGERATORS FOR preserving Ice and cooling Wine, Water, Butter Cream, Jellies, and provisions of all kinds, manufactured by the WENHAM LAKE ICE COMPANY, of the best make, and at the lowest cash prices. Pure spring-water Ice, in blocks, delivered to most parts of town daily, and packages of 2s 6d, 5s, 9s, and upwards, forwarded any distance by "Goods train," without perceptible waste. Freezing Powders, machines for making and moulding Ices, either with or without Ice. Wine-coolers, and everything connected with Freezing, of the best, cheapest, and most reliable character. Carbonators for making soda water. The Company appoint no agents. Full particulars furnished by post, free. Wenham Lake Ice Company, 140 Strand, London, W.C.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

TEETH.—No. 9 Lower Grosvenor street, Grosvenor square (removed from 61).—By Her Majesty's Royal Letters Patent.—Newly-invented Application of Chemically-prepared India-rubber in the Construction of Artificial Teeth, Gums, and Palates.—Mr EPHRAIM MOSELY, Surgeon Dentist, 9 Lower Grosvenor street, sole inventor and patentee. A new, original, and invaluable invention, consisting in the adaptation, with the most absolute perfection and success, of CHEMICALLY-PREPARED WHITE and GUM-COLOURED INDIA-RUBBER, as a lining to the gold or bone frame. The extraordinary results of this application may be briefly noted in a few of their most prominent features. All sharp edges are avoided; no springs, wires, or fastenings are required; a greatly increased freedom of suction is supplied; a natural elasticity hitherto wholly unattainable, and a fit, perfected with the most unerring accuracy, are secured: while from the softness and flexibility of the agents employed, the greatest support is given to the adjoining teeth when loose or rendered tender by the absorption of the gums. The acids of the mouth exert no agency on the chemically-prepared india-rubber, and as it is a non-conductor, fluids of any temperature may be retained in the mouth, all unpleasantness of smell and taste being at the same time wholly provided against by the peculiar nature of its preparation.

DR MARSTON'S LECTURES.—FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.
No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.
No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.
No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.
No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.
"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.
State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

NEW THEATRE ROYAL ADELPHI.

Mr German Reed will give his musical recital entitled "A Day with the Hounds." Mrs German Reed will sing her new and original song, "I never does nothing at all." Mr John Parry will sing his new and original song, "Paterfamilias; or, A Treat for the Juveniles," with Pictorial Illustrations. Unreserved Seats, 1s, 2s; Stalls, 3s; Stall Chairs, 5s; can be secured at the Gallery in advance, and at Messrs Cramer, Beale, and Co., 201 Regent street.

TRADE B&P MARK.
BROWN AND POLSON'S
PATENT CORN FLOUR,
In packets 2d, 4d, 8d, and tins 1s, 5s, and 9s 6d.
Considerable extra advantage is allowed upon the sale of articles similar in appearance, to encourage their being recommended in place of Patent Corn Flour, to support which practice unscrupulous announcements are made use of. It is therefore respectfully suggested that Families should observe that no other kinds are substituted for Brown and Polson's, of which the LANCET states (July 24, 1858), "This is superior to anything of the kind known,"—an opinion indisputably confirmed by scientific tests and public appreciation.
BROWN and POLSON, Manufacturers and Purveyors to Her Majesty the Queen: Paisley, Manchester, Dublin, and London.

KEATING'S PERSIAN INSECT DESTROYING POWDER.
This powder is quite harmless to animal life, but is unrivalled in destroying fleas, bugs, emmets, flies, cockroaches, beetles, gnats, mosquitoes, moths in furs, and every other species of insects in all stages of metamorphosis.
Sportsmen will find this an invaluable remedy for destroying fleas in their dogs, as also ladies for their pet dogs, and sprinkled about the nests of poultry, it will be found extremely efficacious in exterminating those insects with which they are usually infested. It is perfectly harmless in its nature, and may be applied without any apprehension, as it has no qualities deleterious to animal life.
Sold in packets, 1s, 2s 6d, and 4s 6d each, or post free for 14, or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79 St Paul's churchyard, London, E.C.
Take notice, each genuine packet bears the above name and address.

JOZEAU'S COPAHINE, or SACCHARATED CAPSULES.—Copaiba and Cubebs are, doubtless, the best remedies, but these drugs are of a repulsive taste and odour, and occasion colicky pains, nausea, and gastric disturbance. M. Jozeau has succeeded in rendering these valuable therapeutic agents perfectly innocuous by increasing, in his Copahine, all the curative properties. This preparation has been adopted by the Paris Academy of Medicine, after more than a thousand trials in Paris and the different London hospitals, viz., St Thomas's, Guy's, and St Bartholomew's, under the care of Messrs Lloyd, Poland, and Legros Clark, LANCET, Nov. 6, and Dec. 10, 1857. The Copahine, which is in form of a pretty pink sugar plum, effects a cure in about six days, either in recent or chronic diseases. 100 capsules, 4s 6d; post free, 5s 2d. Post-office order required; at G. Jozeau's, French Chemist, 49 Haymarket, London; 22 Rue St Quentin, Paris; and all the most important Chemists.

HEALTH AND HAPPINESS FOR the NERVOUS and DEBILITATED.—A single copy of a new medical work, written by one of the most eminent medical men of the present day, solely for the guidance and benefit of that class of sufferers who desire a speedy and private cure, with illustrative cases of parties who have been restored to health by following the advice laid down in this work, free on receipt of stamp.—Address to the Secretary, Institute of Anatomy, Birmingham.

INDIA-RUBBER & CORK FLOOR CLOTH;
As laid at the Houses of Parliament, British Museum, Bank of England, and numerous Public and Private Offices.

Impervious to wet, indestructible by damp, soft to the tread, and warm to the feet. Far superior to every other material ever invented for the Covering of Floors, &c. Invaluable on Stone Floors.

F. G. TRESTRAIL AND CO., 19 AND 20 WALBROOK, LONDON, E.C.
MANUFACTORY—SOUTH LONDON WORKS, LAMBETH.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

CHUBB'S PATENT SAFES

—the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

ALLSOPP'S PALE OR BITTER

ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross.
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufactrer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE

CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

LONDON LIFE ASSOCIATION,

81 King William street, E.C. Instituted 1806.

PRESIDENT—Charles Franks, Esq.

VICE-PRESIDENT—John Benjamin Heath, Esq.

TRUSTEES.

Francis H. Mitchell, Esq. | Robert Hanbury, Esq.
Alfred Head, Esq. | Bonamy Dobree, Esq.

The London Life Association was established more than 50 years ago on the principle of mutual assurance, the whole of the benefits being shared by the members assured. The surplus is ascertained each year and appropriated solely to a reduction of the premiums after seven yearly payments have been made.

If the present rate of reduction be maintained, persons now effecting assurances will be entitled, after seven years, to a reduction of 73½ per cent., whereby each £10 of annual premium will be reduced to £2 13s.

This Society has paid in claims more than £4,150,000.

And has policies now in force amounting to £6,450,000.

For the payment of which it possesses a capital exceeding £2,750,000.

And a gross income from premiums and interest of more than £340,000.

Assurances may be effected for any sum not exceeding £10,000 on the same life.

The Society has no agents, and allows no commission; nevertheless the new assurances effected in the last financial year amounted to £287,240, and the new annual premiums to £10,567.

EDWARD DOCKER, Sec.

THE EAST INDIA IRRIGATION and CANAL COMPANY.

Notice is hereby given, that the First Ordinary General Meeting of the Shareholders of the above Company will be held at the London Tavern, in Bishopsgate street, in the City of London, on Thursday, the 15th day of August, 1861, at One o'clock precisely, to elect Auditors and determine the amount of their remuneration, and also that of the Directors and Secretary; and to determine the time for holding the Yearly and Half-yearly Meetings of the Company, and for other business.

The Transfer Books of the Company will be closed from the 12th to the 15th of August, 1861, both days inclusive.—By order of the Board of Directors,

JOHN WESTWOOD, Secretary.

27 Cannon street, London, E.C., July 31, 1861.

EAST INDIAN RAILWAY COMPANY.

—The Directors of the East Indian Railway Company are prepared to receive Applications for Debentures at par, bearing interest at the rate of 5 per cent. per annum, guaranteed by the Secretary of State for India in Council.

Forms of application and full particulars may be obtained at the offices of the Company.—By order of the Board, D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, E.C., July 27, 1861.

MADRAS RAILWAY COMPANY.

—The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary of State for India in Council. The interest is payable by coupon half-yearly at the Union Bank of London. Debentures as above are being issued by the Company of the two following descriptions:—

1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.

2nd. For a term of 4 or 5 years, and convertible at the option of the holder into capital stock of the Company, bearing 5 per cent. interest, guaranteed by the contract entered into with the East India Company.

Forms of application may be obtained at this office.—By order of the Board,

JAMES WALKER, Managing Director.

Company's offices, No. 33 New Broad street, London, E.C., April 30, 1861.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

BRITISH ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

MANCHESTER MEETING, 4th to 11th September, 1861.

Reception Room, the Portico, Manchester.

PRESIDENT.

WILLIAM FAIRBAIRN, Esq., LL.D., F.R.S., &c.

The objects of the Association are:—"To give a stronger impulse and more systematic direction to scientific inquiry; to promote the intercourse of those who cultivate science in different parts of the British empire with one another and with foreign philosophers; to obtain a more general attention to the objects of science and a removal of disadvantages of a public kind which impede its progress."

GENERAL ARRANGEMENTS.

Wednesday, 4th September.—Opening Meeting, and President's Address, at eight p.m. in the Free-trade Hall.

Sectional Meetings daily, as usual, from the 5th to the 10th inclusive.

Wednesday, 11th September.—Concluding General Meeting, in the Free-trade Hall.

Thursday, 5th September.—Soiree [Microscopes], in the Free-trade Hall.

Friday, 6th September.—Evening Discourse.

Saturday, 7th September.—Soiree [Telegraphs], in the Free-trade Hall.

Monday, 9th September.—Evening Discourse.

Tuesday, 10th September.—Soiree [Field Naturalists' Society], in the Free-trade Hall.

On Thursday, the 12th of September—Important Excursions.

Gentlemen desirous of attending the meeting may make their choice of being proposed as life members, paying £10 as a composition; or annual subscribers, paying an admission fee of £1, and (additional) £1 annually; or associates for the meeting, paying £1.

Ladies may become members on the same terms as gentlemen; or ladies' tickets (transferable to ladies only) may be obtained in the Reception Room, by members, on payment of £1.

Life members receive gratuitously the reports of the Association which may be published after the date of payment.

Annual subscribers receive gratuitously the report of the Association for the year of their subscription, and for every following year of subscription without intermission. Associates for the meeting are entitled to the report of the meeting, at two-thirds of the publication price.

In order to facilitate arrangements for the meeting, it is desirable that application for tickets should be made as early as possible.

Forms of proposal will be supplied in the Reception Room during the meeting; or the names of candidates for admission may be transmitted to the Local Secretaries.

As the funds which the Association has to expend for its scientific objects consist only of the payments made by its members and associates, it is particularly desirable that every opportunity should be taken of increasing their number.

Compositions and subscriptions of new members or associates will be received by the Local Secretaries until the commencement of the meeting; afterwards, as well as the subscriptions and arrears of former members, by the Local Treasurer.

For information respecting the local arrangements, application may be made by letter addressed to any of the Local Secretaries for the meeting, at the "Portico, Manchester."

R. D. DARBISHIRE,
ALFRED NEILD,
ARTHUR RANSOME,

BRITISH ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

MEETING in MANCHESTER, 4th to 11th September 1861.

RAILWAY PASSES.

Reception Room, Portico, Manchester, August, 1861.

The Executive Committee have arranged with the undermentioned Railway and Steam-packet Companies to issue to gentlemen and ladies attending the meeting in September, as members or associates, Passes entitling the bearer to a ticket to Manchester and back, for one fare, between the 2nd and 14th of September:—

Lancashire and Yorkshire Railway Company.
London and North-Western Railway Company.
Manchester, Sheffield, and Lincolnshire Railway Company.
Great Northern Railway Company.
North-Eastern Railway Company.
Midland Railway Company.
Caledonian Railway Company.
Great Western Railway Company.
City of Dublin Steam-packet Company (via Holyhead.)
North Lancashire Steam Navigation Company (to Fleetwood.)
Belfast Steamship Company (*to* Liverpool.)
Glasgow and Liverpool Royal Mail Steam-packet Company.

Application for these passes must be made (the sooner the better) to Local Secretaries, B, A, Portico, Manchester, stating the names of those who will use them; and if any are not yet members or associates, their full names and addresses, and the particular class of membership desired.

The pass cards will have to be exchanged at the railway or packet office for the Company's special ticket.

R. D. DARBISHIRE,
ALFRED NEILD,
ARTHUR RANSOME,
H. E. ROSCOE,
} Local Secretaries for the Meeting.

Baillière's, 219 Regent street, and at the Author's ELECTRO-CHEMICAL BATH Establishment, 9 York place, Baker street, London.

THE LANDS IMPROVEMENT COMPANY (incorporated by Special Act of Parliament in 1853), 2 Old Palace yard, Westminster, S.W.—To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales, and in Scotland.—The Company advances money, unlimited in amount, for the following works of agricultural improvement, the whole outlay and expense in all cases being liquidated by a rent-charge for 25 years:—

1. Drainage, irrigation, and warping, embanking, enclosing, clearing, reclamation, planting for any beneficial purpose, engines or machinery for drainage or irrigation.

2. Farm roads, tramways, and railroads for agricultural or farming purposes.

3. Jetties or landing places on the sea-coast or on the banks of navigable rivers or lakes.

4. The erection of farmhouses, labourers' cottages, and other buildings required for farm purposes, and the improvement of and additions to farmhouses and other buildings for farm purposes.

Landowners assessed under the provisions of any Act of Parliament, Royal Charter, or Commission, in respect of any publicor general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses of the lands improved.

No investigation of title is required, and the Company, being of a strictly financial character, do not interfere with the plans and execution of the works, which are controlled only by the Government Enclosure Commissioners.

For further information and for forms of application apply to the Hon. William Napier, Managing Director, 2 Old Palace yard, Westminster, S.W.

the following resolutions were unanimously carried:—

Moved by Geo. Thomas, Esq., of Drisllington, seconded by Wm. Tanner, Esq.:—

"That this meeting, believing it to be impolitic and unwise to depend so entirely for our cotton supply on the Slave States of America (especially considering the present crisis of affairs), is of opinion that the question of cotton cultivation on a largely extended scale in our colonial possessions is of immense importance as tending both to promote the welfare of the negro population there, and to discourage the employment of slave labour."

Moved by William Terrell, Esq., seconded by Rev. Jno. Burder:—

"That this meeting, having heard from the Secretary, Stephen Bourne, Esq., full particulars of the intentions and prospects of the Jamaica Cotton Company, considers the undertaking worthy of support, and believes that, with good management, there is every probability of an ample return for the capital employed, as well as of improvement of the condition of the Island."

Moved by Thomas Wedmore, Esq., seconded by Rev. W. James:—

"That Messrs R. Charleton, W. Terrell, Handel Cossham, and Archibald Vickers (of the Great Western Cotton Works), having the perfect confidence of this meeting, and of the city and neighbourhood also, be requested to allow their names to be associated with the London Committee for the purposes of management."

A cordial vote of thanks to Mr Charleton for his kindness in taking the chair was carried by acclamation.

A detailed statement of the objects and plans of the promoters of the company, with copies of the letters of commendation of many most trustworthy and influential parties, may be procured on application at the London Office, 55 Charing cross (where samples of Cotton grown in Jamaica may be seen); or of Thomas Clegg, Esq., Manchester; or Messrs Barnard, Thomas, and Co., Bristol, to either of whom application for shares may be made.

CHARING-CROSS HOSPITAL, WEST STRAND.

The Governors earnestly solicit Assistance for this Hospital, which is chiefly dependent upon Voluntary Contributions and Legacies. It provides accommodation for upwards of 100 in-patients constantly, and prompt aid to nearly 3 000 cases of accidents and dangerous emergency annually, besides relief to an unlimited number of sick and disabled poor daily.

Subscriptions are thankfully received by the Secretary at the Hospital; and by Messrs Coutts, Messrs Drummond, and Messrs Hoare; and through all the principal bankers. JOHN ROBERTSON, Hon. Sec.

INVESTMENT OF SAVINGS AND CAPITAL.—The Conservative Land Society.—Share Department, five per cent. per annum. Deposit Department, four per cent. per annum. The Interest Warrants issued half-yearly, and withdrawals at fixed periods, according to the amounts, large or small. No partnership liability, and the taking of land is entirely optional. Prospectuses sent free of charge.

CHARLES LEWIS GRUNEISEN, Secretary.

Offices, 33 Norfolk street, Strand, London, W.C.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

Terms of Subscription.

May be viewed at the Tower from 10 to 4 o'clock, the three working days previous to the day of sale, and catalogues may be had at the War Office, Pall Mall; the Tower; and Royal Arsenal, Woolwich.

NOTICE.—I HAVE THIS DAY established myself at this Port as a GENERAL COMMISSION AGENT.
RICHARD DUDLEY.
Hankow, China, 1st May, 1861.

A HAMBURG GENTLEMAN AT present in town, and well acquainted with the general produce and corn trade, is wishful to receive the agency for a respectable firm.—For particulars, first-rate City references, and a personal interview, address F. Z. D. care of *Mr Aird*, 18 Exeter street, Strand.

A MERCHANT, 25 YEARS OF age, well versed in foreign languages and in the management of import and export business, is desirous to meet with a situation, according to his knowledge, in England or the colonies.—*Address* letters to M. M., 2, Hopcraft's Library, 1 Mincing lane.

WANTED, BY AN OLD LIVERPOOL House engaged in the manufacture of Pickles, Sauces, Jams, British Wines, &c., a Partner with £1,000 To a good man of business this would prove an invaluable opportunity.—Full particulars on application to J. C. S., 9 Great George square, Liverpool.

PARTNERSHIP.—AN ENGLISH Merchant having an established business in the Levant, desires a Partner who can introduce farther capital to the extent of about £10,000 and connections in the cotton and grain trade. References exchanged.—Apply to A.B., Mr Alexander Comrie, 30 Regent street, Piccadilly, S.W.

PARTNERSHIP.—THE Advertiser, who has been several years in the East, is desirous of meeting with an influential party, with a capital of not less than £5,000, to join him in establishing a Commission Business in Bombay.—For particulars, apply to Messrs Bannatynes and Kirkwood, Writers, 151 West George street, Glasgow.

PARTNERSHIP.—A Partner is about retiring from a Brewery, and the firm are prepared to treat with a Gentleman introducing £15,000 in his place. The business is very old-established and prosperous, and the position of the firm well known.—Principals or solicitors may obtain particulars of Mr H. Salter, 17 Abchurch lane, E.C.

TO PUBLIC ACCOUNTANTS.—A Solicitor, of wide home and foreign experience in public and private business, both in his own profession and as a practical accountant, intends to retire from the legal profession, and desires to form a partnership in London with a first-class public accountant. City and other references of the highest order. A personal interview may be arranged by confidential letter, addressed to "Accountant," at Messrs Hooper and Son, Law stationers, 45 Fleet street, E.C.

TO CAPITALISTS.—The Proprietors of a first-class Slate Quarry in North Wales, in full work, and making large returns, desire an additional Capital of about £5,000 for its complete development. The profits are large, and will commence at once. The most satisfactory references will be given as to the position and responsibility of the present proprietors, who have invested £20,000 in the concern.—Principals or their solicitors can obtain introductions of Mr H. Salter, 17 Abchurch lane, E.C.

ALLIANCE (FRANCE AND ENGLAND) BANK.—All persons having CLAIMS upon the Alliance (France and England) Bank, Ch. Stokes and Co., now in liquidation, are requested to send them in to Messrs William Banks and Charles Kennerley Hall, Liquidators, at the offices of the Liquidation, No. 7 Rue le Pelletier, Paris, on or before the 31st day of August next, after which date no further claims can be recognised.—Paris, 30th July, 1861.
WM. BANKS,
CH. KENNERLEY HALL, } Liquidators.

ANGLO-PERUVIAN DEBT.—The DIVIDENDS on the Four-and-a-half per Cent. Active Bonds becoming due on the 1st of September next, will be PAID by Messrs Antony Gibbs and Sons, on any following day, between the hours of Eleven and Two.

Lists may be had on application, on and after the 20th inst., and the Coupons must be left three clear days for examination.

15 Bishopsgate street within, London, Aug. 15, 1861.

IMPERIAL TURKISH SIX PER CENT. LOAN of 1858, £5,000 000.—Notice is hereby given, that the HALF-YEARLY DIVIDEND, due on the 1st September next, on the outstanding Bonds of the above Loan, negotiated by Messrs Dent, Palmer, and Co., will be PAID at their counting house, 11 King's Arms yard, Moorgate street, on Monday, the 2nd September, or any subsequent day (except Saturday), between the hours of 11 and 3. The Coupons, with a list in numerical order, must be left for examination two clear days previously. Coupons are not received on Saturdays.

Printed forms of the lists may be had on application.

London, August 16, 1861.

NOTICE TO INVENTORS.—Office for Patents, 4 Trafalgar square, Charing cross.—Printed instructions (gratis) as to the cost of Patents for Great Britain or foreign countries. Advice and assistance in disposing of or working inventions. Branch offices and agencies in every continental state and in America. Established 20 years. Full information as to expired or existing patents at home or abroad.—Apply personally or by letter to Messrs Prince and Co., Patent Office, 4 Trafalgar square, Charing cross, W.C.

WHOLESALE HOUSES, Merchants, Shippers, &c., requiring Bookkeepers, Travellers, Clerks, Warehousemen, or other Assistants, can have the same forwarded for approval (without charge) by addressing a letter, stating their want, to *Smith, Barry*, and Co., 12 Bucklersbury, sole proprietors of the "Employers' Assistant," which always contains particulars of very eligible parties seeking employment of time and capital. S., B., and Co., do not in any way interfere with or make themselves responsible for the characters of applicants. Those seeking employment can obtain prespectuses with full particulars on application at 12 and 13 Bucklersbury.

FRENCH WINE BOTTLES, Soda Water Bottles, Confectioners' Bottles, Drug, Dispensing, and Castor Oil Bottles, Wine, Ale, and Porter Bottles, from Stock in London or direct from the Works.—AIRE and CALDER GLASS BOTTLE COMPANY, Castleford; Free Trade Wharf, Ratcliff; and 61 King William street, E.C. The Patent Stoppered Bottles of all kinds.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

TO BANKERS, RAILWAY AND OTHER COMPANIES.

BANK NOTES, BILLS OF EXCHANGE, LETTERS OF CREDIT, BONDS, CHEQUES, SHARES CERTIFICATES, &c.

HENRY BRADBURY, WILKINSON, AND CO.

devote their attention exclusively to the production of

BANK NOTES AND ALL DOCUMENTS OF SECURITY,

in which are combined all recent discoveries for the prevention of successful Forgery. A Specimen Book showing the character of work recommended will be submitted, upon application.

12 AND 13 FETTER LANE, LONDON, E.C.

ROYAL INSURANCE COMPANY.

HEAD OFFICES:—29 LOMBARD STREET, LONDON, AND ROYAL INSURANCE BUILDINGS, LIVERPOOL.

Branch Offices:—Manchester, Birmingham, Bristol, Leeds, Dublin, Glasgow, and Edinburgh.

Extracts from the Report for the Year 1860.

"The success of the Company, even in its earliest years, received the marked attention, and elicited the surprised comments of writers best acquainted with the history of Insurance Companies.

"Fire Premiums for 1860 equal the Total Fire Premiums for the Seven Years 1845 to 1851.

"Life Premiums for 1860 exceed the Entire Life Premiums for the Eight Years ending 1852.

"Purchase of Annuities in 1860 largely exceeds the similar receipts for the first Ten Years 1845 to 1854.

"This progress, it is believed, is unsurpassed, considering that it applies to each of the three branches of the business."

FIRE BRANCH.

"The Fire Branch has certainly shown no exhaustion during the year 1860 of that impetus which had previously brought it to a position of the first magnitude among the Insurance Companies of the United Kingdom. The Fire Premiums in 1859 had advanced to thesum of £228,314 7s 3d. In 1860, the amount of Fire Premiums has arrived at a sum of £262,977 19s 11d, showing an increase of £34,663 12s 8d, exceeding the large advance of the preceding year, so that in two years the Fire Revenue of the Company has been enhanced by the enormous sum of £66,829 17s 5d.

"The Parliamentary Report of Returns of Duty paid to Government for the year 1860 exhibits the augmentation of the business in a more prominent way, as it affords the means of comparison with other Companies. The Proprietors will be gratified to learn that the increase of Duty paid by the Royal in the last year is more than double that of any other Company, either London or Provincial, whilst only one of those Companies even approaches to 50 per cent. of the advance of this Company. Our increase actually equals 30 per cent. of the entire increase of the whole of the Metropolitan Offices combined, whilst of the Provincial Offices it forms upwards of 30 per cent. of the total advance of the other 28 offices established out of London."

LIFE BRANCH.

"The Reports of the Company for several years have had invariably to announce a constant periodical expansion of Life Business, the new Policies of each succeeding year showing an advance over the one that had immediately preceded it. A similar result is shown in the year 1860, the Premiums of New Policies, after deducting Guarantees, being £15,079 17s 10d, which is an increase in that item of £1,993 17s 5d above the amount received for the year 1859.

"But even this advance is small when compared with the sudden and remarkable momentum which has been given to this branch of the business in the present year (1861).

"It was not until the commencement of the year that the public seemed to have become fully acquainted with the fact that the Royal Insurance Company had published late in the last year an account of the investigation into the assets and liabilities of its Life Department, under a novel form, and in as plain and intelligible a manner as the abstruseness of the subject admitted, together with the entire statements and valuations necessary for that purpose.

"It is conjectured from the extensive notices of this pamphlet and its accompanying diagrams, which have appeared in the periodicals of the day, that it has largely attracted the attention of vast numbers of persons in all parts of the United Kingdom as well as in other parts of the world. Indeed, a most satisfactory and conclusive evidence that such is the case is afforded by the fact that the sum assured on new policies in the six months to the 3rd June of the present year is actually fifty per cent. in excess of the sum assured in the corresponding months of the year 1860, although the latter amount in itself exceeded the sum assured in any like previous period of time.

"If this success be continued, the Royal Insurance Company would, with respect to the amount of its new business, be at once placed (at least with one or two exceptions) at the head of all the Insurance Companies doing business in this country, and the anticipations of the last report, to the effect that the details of the life business then to be published would form an epoch of the establishment, will have a speedy and a very happy realisation."

SPECIAL ADVANTAGES OF THE LIFE BRANCH.

PROFITS.—Large proportion returned every five years to policies then in existence two entire years.
Expenses chiefly borne by the Fire Branch, in order to increase the bonus to be returned.

LIFE BONUSES DECLARED,

Two per cent. per annum on the sum assured; the greatest bonus ever continuously declared by any Company.

SECURITY FOR BOTH FIRE AND LIFE BRANCHES.

Capital, Two Millions sterling.
Accumulated funds in hand exceeds £600,000.

PERCY M. DOVE, Manager and Actuary.
JOHN B. JOHNSTON, Secretary.

GLOBE INSURANCE,

Cornhill and Charing cross, London.
Established 1803.

John Edward Johnson, Esq., Chairman.

George Carr Glyn, Esq., M.P., Treasurer.

William Chapman, Esq.	Nath. Montefiore, Esq.
Boyce Combe, Esq.	Fowler Newsam, Esq.
Thomas M. Coombs, Esq.	W. H. C. Plowden, Esq., F.R.S.
William Dent, Esq.	
J. W. Freshfield, Esq., F.R.S.	Wm. Tite, Esq., M.P., F.R.S.
John Bankes Friend, Esq.	R. Westmacott, Esq., F.R.S.
Robert Wm. Gaussen, Esq.	Josiah Wilson, Esq.
R. Lambert Jones, Esq.	Benjamin G. Windus, Esq.

AUDITORS.

Lt.-Col. William Elsey.	Alexander Mackenzie, Esq.

The Cash Payment under the division of Profits recently declared on Participating Life Policies, is equal at most ages to considerably more than a Whole Year's Premium on Policies of six years' standing.

Annuities, Reversions, and Endowments.

No Charge for Volunteer, Rifle, and Militia Service within the United Kingdom.

FIRE DEPARTMENT.

Every description of Fire Insurance undertaken at moderate rates.

Forms and full particulars may be obtained at the offices of the Company, or from any of the agents.

WILLIAM NEWMARCH, F.R.S., Secretary.

ALLIANCE BRITISH AND FOREIGN LIFE and FIRE ASSURANCE COMPANY, Bartholomew lane, London, E.C.

Established 1824.

(Branch Offices:—Edinburgh, Ipswich, and Bury St Edmunds.

Capital, Five Millions Sterling.

PRESIDENT.—Sir Moses Montefiore, Bart.

DIRECTORS.

James Alexander, Esq.	Elliot Macnaghten, Esq.
Charles G. Barnett, Esq.	Thomas Masterman, Esq.
George H. Barnett, Esq.	Jos. M. Montefiore, Esq.
Benjamin Cohen, Esq.	Sir A. N. de Rothschild, Bart.
James Fletcher, Esq.	
William Gladstone, Esq.	L. N. de Rothschild, Esq., M.P.
Samuel Gurney, Esq., M.P.	
James Helme, Esq.	Oswald Smith, Esq.
Sampson Lucas, Esq.	Thomas Chas. Smith, Esq.

Life Assurances are granted under an extensive variety of forms, with, or without participation, and at moderate premiums; the rates for the Younger Ages being lower than those of many of the older, and most respectable offices.

Actual Service Risk within the United Kingdom in Volunteer Rifle and Artillery Corps, and in the Militia, is covered by the Company's Policies.

Fire Assurances both at home and abroad are accepted at very moderate premiums.

The Assured participate in the Fire Profits in respect of Policies in force for five complete years.

FRANCIS A. ENGELBACH, Actuary and Secretary.

ACCIDENTS OF ALL KINDS,

and from Any Cause, may be provided against by an Annual payment of £3 to the RAILWAY PASSENGERS ASSURANCE COMPANY, which secures £1,000 at death by Accident, or £6 weekly for Injury.

No Extra Premium for Volunteers.

One Person in every Twelve insured is injured yearly by Accident.

£75,000 has been already paid as Compensation.

For further information apply to the Provincial Agents, the Railway Stations, or at the Head office, 64 Cornhill (late 3 Old Broad street).

Annual Income, £40,000.
Capital, One Million.

W. J. VIAN, Secretary.

64 Cornhill, E.C., January, 1860.

MERCANTILE INSURANCES.

NORWICH UNION FIRE INSURANCE SOCIETY.

All policies effected with this office are entitled to participate in the Bonus periodically declared.

The business of the Company exceeds £68,000,000.

The duty paid to Government for the year 1860 was £81,332 9s 9d, and the amount insured on farming stock £9,988,368, thus placing the office Third in order of magnitude among the Insurance Companies of the United Kingdom.

The rates of premium are in no case higher than those charged by the other principal offices making no returns to their insurers.

For prospectuses apply at the Society's offices, Surrey street, Norwich; and 6 Crescent, New Bridge street, Blackfriars, E.C.

THE COMMERCIAL UNION FIRE INSURANCE COMPANY.—Registered Provisionally, and intended to be Incorporated under the Statute 7 and 8 Vict., cap 110. Capital £2,500,000, in 50,000 Shares of £50 each, of which it is intended to call up only £5 per share. Preliminary Deposit £1 per share on application, and £1 upon allotment.

PROVISIONAL DIRECTORS.

John Kemp Welch, Esq. (Orlando Jones and Co.)

With power to add to their number.

BANKERS—The London and County Bank.

SOLICITORS—Messrs Marten, Thomas, and Hollams, Mincing lane.

BROKERS—George E. Seymour, Esq., 38 Throgmorton street; Messrs Horsfall and Addison, Liverpool.

Temporary offices—34 Gracechurch street, E.C.

PROSPECTUS.

The Committee of Merchants, Brokers, and others appointed at a public meeting held at the Mansion house, on the 25th July, 1861, to consult with the combined Fire Insurance Offices relative to the readjustment of their greatly-increased rates of insurance, have decided upon the establishment of an Independent Company.

Powerful support has been already obtained from the various interests represented at that meeting, and a Provisional Board has been formed from leading commercial houses, and others, who, by their influence and extensive connections, at once secure to this Company a large amount of profitable business.

The first principles of the Company will be the establishment of an equitable classification of risks, as regards both Merchandise and Warehouses, and more liberal arrangements than are now obtainable upon Floating and Short-time Policies. A scale of rates will be adopted which, while fully remunerative, shall be sufficiently moderate to encourage a universal habit of insurance.

It is intended to reserve a per centage of profits for periodical division amongst insurers.

The Company will undertake the insurance of houses and their contents at equitable rates, this class of business having long proved a large source of profit to the existing offices.

The Company will be strictly independent in its operations, and, in pursuance of the comprehensive principle on which the Board has been constituted, will address itself to every class of insurers.

The principle of Limited Liability will be extended to all insurances effected with the Company, by the introduction of the usual clause, limiting the amount of each shareholder's responsibility.

Power will be taken in the deed of settlement (with the consent of a meeting of shareholders) to extend the operations of the Company to Life and Marine business, should it hereafter be thought desirable to do so.

It is intended to call up £5 per share only, of which a deposit of £1 will be paid on application, £1 on allotment, and £1 at intervals of three, six, and nine months.

Prospectuses and Forms of Application for Shares may be obtained of George E. Seymour, Esq., 38 Throgmorton street, London; and Horsfall and Addison, Liverpool, the Brokers of the Company; or of the Solicitors; or at the Temporary Offices of the Company. A deposit of £1 upon each share applied for must be paid to the Company's Bankers previously to the application being sent in. This sum will be returned if no allotment is made to the applicant.

The Political Economist.

WHAT *MAY* BE IN AMERICA.

It is especially important for merchants, the success or failure of whose commercial enterprises so much depends on the correctness of the estimate they form of future contingencies, to consider and be prepared for *any* contingency which is not absolutely improbable. Now, in such a case as America presents to us at this moment, no result that is not impossible can be said to be improbable. There, perhaps, never was a conjuncture of such magnitude in which it was so hopeless to predict the direction which events are likely to take. The materials on which to form a rational guess are extraordinarily scanty and uncertain. It is not so much that *we* do not know the Americans, as that the Americans do not know themselves. From first to last in this matter, they have been singularly at fault in their conjectures and prophecies: we, on this side of the water, have, hitherto at least, been much nearer the truth in the expectations which we entertained.

There is nothing that should surprise us in this uncertainty, when we give the matter a little dispassionate consideration. The fact is, the Americans are *a wholly untried people;*—and till people have been *tried*, no one can pretend to say what they are, or what under any given circumstances they will do. They have never been *tested* by any great difficulty, any great danger, any great calamity: they have never been called upon for any sustained effort, any serious sacrifices, any prolonged endurance. They do not know, therefore,—nor do we—the possible reach of their virtues and their powers, nor the possible range of their vices and their weaknesses. They have never yet faced a really formidable foe. It will astonish and disgust them to be told this; but it is the simple truth. No one who reads the details of the revolution by which they won their independence, while full of admiration for their pluck and energy, fails to be utterly amazed at their success. The indescribable imbecility of their enemies was yet more wonderful than their own vigour. Against any English army and any English Ministry that have existed since the days of Lord North, they would not have had the shadow of a chance—as every one except themselves is now perfectly aware. And, moreover (be it said in passing), they are not what they were then; both their institutions and their men have degenerated frightfully; their *morale* has gone down almost as fast and as far as their power and prosperity have increased. In the short war of 1812, they fought bravely—behind walls and at sea; but the great feat of Andrew Jackson—for which they made him a hero and a President—was defending a walled city, made almost impregnable by cotton bags and riflemen, against an inadequately-provided invading force lodged in an unhealthy swamp. All their other contests have been against naked Indians and degenerate and undisciplined Mexicans: these were *raids* rather than wars, and though accompanied by individual risk, never involved any serious danger of discomfiture. Therefore we are undoubtedly warranted in saying—and we say it without wishing to throw the slightest slur on American prowess and courage—that till now neither Northerners nor Southerners have ever encountered a capable enemy or a real peril; and how they will behave in the face of such no man can foresee. They have gained their ends hitherto not by fighting but by bullying; they have bullied every nation in turn;—and their success in this sort of warfare has not only enormously enhanced their own conceptions of their military prowess, but has entirely blinded them as to the flimsy and *unproved* foundation upon which these conceptions rest. No one doubts that a regular army of Americans, well disciplined and well officered, would fight as bravely and as skilfully as any in the world; but how American volunteers will fight, hastily got together, utterly unaccustomed to obedience, without experience, and without confidence either in their officers or in each other, no one can venture to predict;—and the panic at Manassas Gap, and the subsequent behaviour of the defeated troops, warrant the very worst and most disrespectful misgivings on this head.

We are in equal uncertainty as to American Statesmen and American Institutions. They have never been tried in a storm before, and no one can tell how they will stand the strain. The leaders in Washington's time were gentlemen and men of education. The institutions in Washington's time were free, but not democratic. Since that time the country has gone through a course of unexampled and uninterrupted prosperity—demoralising assuredly, though not enervating. Laws and manners have changed to a degree which few persons have yet fully realised. The constitution has become an almost unmitigated *ochlocracy*. The masses are everywhere omnipotent; and the masses in most parts are only half educated, and in many parts are as ignorant as those of Europe and far more ruffianly. The men of thoughtful minds and lofty purpose, the men of noble sentiments and stainless honour, have retired from public life; and, naturally enough, as the work of politics became dirtier and rougher, have left it to dirtier and rougher men. The consequence, as every one is too well aware, and as even Americans themselves have repeated *usque ad nauseam*, has been that the Rulers and Legislators of the United States are, almost without exception, either the vulgarer and shallower men of the nation who share the popular faults and passions, or cleverer minds who flatter and obey them without sharing them—unworthy in the one case intellectually, unworthier still, in the other, from voluntary moral degradation. Now, how can such men be expected to meet a crisis like the present—a crisis which might try the ablest and the noblest spirits that ever directed the fortunes of a great country? How can men who have risen to power by low means be expected to use power for lofty purposes? How can men who are where

they are because they have truckled and temporised and cajoled and cringed and fawned upon the mob, now coerce that mob to its duty, or overawe it into obedience and order? Or how can men who are corrupt, or are believed to be so—or both—preach patriotism and purity and patient endurance and the noble spirit of self-sacrifice to a sneering and unbelieving crowd?—or expect a hearing if they do? Moral courage is more needed at Washington now than any other political virtue—the moral courage to speak unpopular truths, to face popular rage, and to resist popular delusions;—and when was such courage the common virtue of democracies?—and where, in this wide world, has this virtue, rare everywhere, been so utterly trampled out as in America?

Lastly, we know the real qualities of the American people as imperfectly as those of their army and their statesmen. That is, we do not know how they will come out under trial. There is plenty of sterling stuff in them, we may be sure, for they come of a good stock; but, on the other hand, their career has not been of a nature to develop the virtues most needed on an occasion like the present,—*viz.*, fortitude under reverses, submission to needful discipline, and loyal trust in the men who are to lead them; and their whole history as well as their recent conduct has displayed the very opposite characteristics. It would be idle to deny that the behaviour of the people on the occasion of the defeat at Manassas Junction, and since that discreditable occurrence, has given a great shock to the confidence of those who had formed high expectations of Northern capacity and vigour. There has been apparently an entire absence of all sense of shame and mortification, which is absolutely incomprehensible,—a sort of perverse pride in the very magnitude of their disaster and disgrace, combined with the usual and very ominous disposition to lay all the blame on their chiefs and their officers, and to take none upon themselves. The patriotism of the volunteers seems to bear an inverse ratio to their bluster. Without in any way wishing to detract from the extraordinary faculty which the Northern Americans have always shown for recovering and retrieving misfortune, for prompt and energetic organisation, and for ready lavishing of their immense resources,—the events of the last few weeks have begot a fear that the rottenness of the country in all that relates to administration and to political virtue has spread deeper and wider than has yet been believed. So much so that a doubt is beginning to be generally expressed whether there is confidence enough left in the heart of the people to induce them to trust sufficient power in the hands of any public man or of any administration;—whether even in the gravest crisis a Dictator could be found, or would be appointed, or would be obeyed if appointed;—whether the political corruption of which every one is conscious in himself, and which every one attributes to his neighbour, has not utterly destroyed the very sources of that mutual faith and loyalty without which the vastest resources are unavailing because no one will be suffered to wield them; and finally, whether the habit of what is there called self-government, but what we should call Lynch law, mob interference, lawless wilfulness, and reckless self-assertion, has not incapacitated the people for that generous, rational, legitimate obedience which is the saving virtue of armies and of nations in the hour of crisis.

Considering all these things, we are strongly impressed with the conviction that there is no degree of incapacity, confusion, feebleness, mismanagement, and thorough imbecility on the part of the Government at Washington, which is not *upon the cards*. We do not say it is probable. We should deeply grieve, for the honour of our common ancestry, to see it. But it would not surprise us; and we think that all men practically concerned ought to be prepared for it as one of the not improbable eventualities of the conjuncture. It is nearly certain that if the Secessionist General had known how complete was the demoralisation of the Federal army after their disaster, and had pressed on to Washington, he might have seized the Capital (and perhaps the Cabinet as well), and ended the war at a stroke. Almost equally certain it is that a second victory as complete, and following soon enough upon the first, will so disgust and dishearten the shouters for the Union that the contest will be abandoned on the instant. The people will then refuse to give any more supplies to a Government which they charge with incompetency or with treachery. The army will refuse to fight under Generals whose every movement they will denounce and whose heads they will demand. The party adverse to the war—always far more numerous in the North than the Unionist party in the South—will raise their voices and insist upon terms of accommodation;—and some day, with scarcely any notice, we may receive tidings that an armistice has been agreed upon and preliminaries of peace have been signed.

Observe: we do not say that so speedy and so ignominious a result to all the magnificent boasts and all the ferocious bluster of the Federalists is *probable;* but no one can say that it is impossible. No one, moreover, can fail to see the causes which, unless powerfully counteracted, may any moment bring it about. The last accounts from America, public and private, contain two indications of the unsoundness of the state of things which are by no means without significance. One of the most respectable of the Republican journals has a paragraph—bold enough, when we consider the conjuncture at which it appeared—affirming in plain terms that the war clamour in the North is greatly swelled and strengthened by the *contractors*, jobbing politicians and others, who are realising enormous plunder (as such men always can at such times) out of the sudden demands of the Executive for stores and works,—an assertion too probable in itself to need any confirmation. At the same time, we learn from a source which we can fully trust, that at New York a petition was being got up and was in process of signature by some of the most influential inhabitants, urging on the Government at Washington more pacific and conciliatory courses. *The Police* heard of it:—entered the office where the sheets were lying for signature, and *destroyed them all!* When to these facts we add others equally certain, and more generally known; *viz.*, that the merchants and manufacturers of the North are suffering severely—far more than has been publicly admitted—from the lack both of their raw material and of their usual customers;—that the moneyed men of New York are beginning to feel uneasy at the enormous and wasteful demands upon their coffers;—that the more sober and dispassionate thinkers—few perhaps, and silent amid the uproar, but neither extinguished nor uninfluential—are beginning to reflect and to remind others that after all the South are only fighting for that right to choose their own Government and their own co-mates which consistent democrats can deny to no people, and which despots could not withhold from eight millions;—and, lastly, that all are now conscious that no really noble or soul-stirring cause is in any way at issue, since the abolition sentiment has nothing to do with the quarrel, and the Protection tariff a great deal, and the mere lust of dominion and of empire more than either;—when we sum up all these considerations, we have influences enough in operation to render a sudden collapse of the Washington Government and the Federal war a very possible and a not very improbable event.

In any case, only one thing can, it appears to us, either effectually restore the fortunes or redeem the reputation of the North;—and that is such a general estimate, such a pervading and overwhelming conviction, of the gravity of the crisis and the greatness of the stake, as shall at once induce the best men of the country to offer themselves as Chiefs, and the people to accept them and to trust them, to endow them with the necessary powers and to obey them with unswerving devotion. But the signs of any such saving and redeeming sentiment are yet to seek.

To be added to these considerations is the not improbable contingency of a financial scarcity. The Treasury notes are already at a discount—the Western States do not seem ready to pay taxes—the propositions respecting the tariff are a mass of confusion—the proposed income tax bill is as yet indefinite and conjectural—the financial prospects of the Northern States in Europe are indefinitely impaired by the battle at Manassas Junction and by its possible consequences. It seems impossible that such a pecuniary should not aggravate such a political position.

THE PROSPERITY OF THE LONDON JOINT STOCK BANKS: ITS CAUSE AND ITS EFFECT.

In any other country but England the prosperity of the London Joint Stock Banks would be a principal subject of national pride. They are a money market of themselves.

We talk with respect and just respect of the money market of New York, yet the aggregate of the deposits in its banks at the last advices was only 21,079,784*l*, whereas those of the London Joint Stock Banks are as follow:—

	Deposits. £
London and Westminster	14,821,650
London Joint Stock	11,425,037
Union Bank of London	10,415,020
London and County	5,973,348
City	2,840,346
Bank of London	1,684,129
Unity	155,826
	47,315,356

But English vanity, though considerable on some old points, does not easily fix upon a new point. The marvellous growth of the London Joint Stock Banks is commented upon as if it were an ordinary financial fact; and the tone of the remarks which are made upon it is not unfrequently rather depreciating.

It is not, indeed, surprising that a good deal should be said against the Joint Stock Banks, for they have injured two powerful interests which have excellent means of circulating their opinions in "City articles" and financial writings. The London private bankers must have suffered from the rapid progress of their successful contemporaries, and from less apparent causes which we shall presently explain. Many of the brokers on the Stock Exchange have suffered as much or more. Under these circumstances, it is useful to keep in mind the true origin of the prosperity of those great establishments, and to estimate carefully its probable effects.

The cause of the success of the Joint Stock Banks is a very simple one. They supplied a capital defect in our monetary organisation. In England it has never been customary to pay interest on the floating balances of ordinary bankers. It has been tried indeed by some bankers under certain modifications, but has never as yet been very successful. The sums of money at the credit of such accounts seem to be too small and too fluctuating to yield an adequate profit if any interest is paid to the customer upon them. But the case is different with considerable sums which are temporarily held in a floating form, which are waiting for investment, or waiting for distribution, or held in suspense till their owners have decided what to do with them. On these it is well worth a banker's while to pay a considerable interest. They are important in amount; they are sure to remain for a fair period in the bank; and their number, taking the country as a whole, is already very large and increases every year. But before the foundation of the Joint Stock Banks in London it was not usual to pay interest on such sums. Very rich people went without the income, and others were driven to the very unsatisfactory expedient of buying Exchequer bills or other securities, which were necessarily of fluctuating value, and might be sold at a less price than that at which they were purchased. The Joint Stock Banks offered a better *practical* security for such moneys and a better interest. There is no loss of principal from fluctuation of selling value. As long as the bank is safe, the exact money deposited is certain to be returned upon the stated day, and the interest given is almost always higher than Exchequer bill interest. The progress of these banks is not, therefore, a matter for wonder. They were able to acquire legitimate credit by using satisfactorily, large sums of money which had before been used unsatisfactorily. They were able to bid high for money which was gaining little; they gave what is justly believed to be a good security for money which was before invested in securities of uncertain value and liable to be depreciated by political events; and it was most natural and desirable that their growth should be very continuous and very quick.

But it may be asked, is this great power of these large banks beneficial? We answer boldly, that it has been *proved* to be beneficial. The principal effect of the practice of allowing an interest upon sums deposited for moderately long periods is that there are a great number of such sums. A much larger amount of uninvested money is now held in London than used to be held there. It accumulates in the hands of the Joint Stock Banks, and they employ it in the support of any trading interest which happens to be particularly prosperous, and therefore particularly desirous of extending itself. By giving an interest on continuous deposits, we have accumulated a *generally available* fund which would otherwise have not been generally available. It might have been expended in foreign loans or foreign railways, or some similar way; but, however that may be, it would not have been suffered to lie in Lombard street at the disposal of persons who are anxious to use it in the best way in which it could possibly be used, in aid of that part of the community which satisfactorily proves that it can *make* most of it by being ready to *give* most for it. The importance of this transferable fund is, in the present state of our commerce, not to be overrated. During the last few years, as a whole, our exports and imports have augmented, as we all know, to an extent which no person, however sanguine, would have been bold enough to anticipate, and which is very remarkable even if we look upon it retrospectively.

	£
In 1854 our imports were	152,389,653
In 1854 our exports were	115,821,092
Employing together a capital of	268,210,145
In 1860 our imports were	210,648,643
In 1860 our exports were	165,670,653
Employing a capital of	376,319,296

being an increase in the capital employed of more than *one hundred millions*.

But this great progress has only been possible under one condition. It requires the ready command of a vast transferable capital. The course of commerce, as we all know, is this:—one branch of commerce is profitable to-day, another is profitable to-morrow; one is desirous of extension to-day, and another to-morrow cannot find the means of employing that which it very easily employed yesterday. We want a certain shifting sum available for the corn trade, for the American trade, for the Indian trade, whenever each of these is specially progressive; easily repayable by each of those trades when the momentary stimulus has ceased, and the need for an augmented employment of capital in them has passed away. This *changing* fund has been supplied by the great deposits in the hands of the London Joint Stock Banks and the London bill-brokers, and without the use of it, the commercial triumphs of the last few years would have been entirely impossible.

We hold likewise, though the opinion is perhaps unpopular, that the practice of giving interest on deposits has been beneficial, because it has given an increased sensitiveness to the London money market. The augmented number of changes in the rate of interest during the last few years has been frequently made the subject of grave censure, and it has sometimes been attributed by such censurers to the operation of Sir R. Peel's Act, or to the injudicious policy of the Bank of England under that Act. And in so far as Sir R. Peel's Act has induced the Bank of England to conform its charges to the mercantile community more accurately than before to the natural value of capital, it has certainly been instrumental in producing these numerous alterations in the rate of discount. And this is beneficial. It is not desirable that the rate in Lombard street should be low when loanable capital is scarce, or high when loanable capital is plentiful. If there is an accumulation of money to be employed in discounts over and above the bills, the rate of discount ought to go down. If there is less money than there are bills, it ought to go up. In so far as Sir R. Peel's Act has contributed to induce the Bank of England to look steadily to their legitimate and natural guide, it has achieved good. But, in so doing, it has been powerfully aided by the growing custom of giving interest on continuous deposits. If the Joint Stock Banks or the bill-brokers find they get fewer bills at any given rate than they want, they must lower that rate. They pay something for their money, and therefore they must employ that money in some way. If they cannot employ it at 5 per cent., they will employ it at 4 per cent., and so on. The rapidity and regularity with which changes in the rate of interest follow the natural changes in the value of loanable capital are now secured by the most potent possible machinery,—by the daily disposition of all holders of interest-bearing money to employ it at some rate or other, and not to give a higher rate of interest for it than is duly proportioned to the steady profit they can fairly and safely make of it.

A third effect of the Joint Stock Bank system is also unpopular, and is likewise beneficial. We mean its effect on

the Stock Exchange. In former times many bargains were "carried over" from account to account to the great profit of the broker who negotiated each successive series, but to the corresponding loss of the party to the bargain. If a purchaser wished to buy a certain quantity of Indian Five per Cents., and had not the whole of his money ready, he was obliged to postpone his payment to the seller of that security, to obtain at each settling day a new delay, and to pay a broker to get that delay for him. He had to pay not only interest on his unpaid purchase money, but likewise an indefinite addition of commissions and charges, which were very likely unintelligible to him, and which no one could calculate beforehand. In certain states of the market these charges were very considerable. Now, this is to a great extent, though not entirely, altered. A purchaser of Indian Five per Cents. who has not the whole of his money ready, pays what he has and borrows the rest upon the security of those Indian Five per Cents. from his banker. He has only to pay the market rate of interest on what he borrows: he could not hope to pay less, and he is not asked to pay more.

In some states of the stock market this alteration might be very important. If Consols were low, as during a Continental war they might be and would be, a very large sum might be procured upon them from Joint Stock Banks in London, far surpassing anything ever known in the old days of great loans. A large amount would be taken by a small capitalist; he would pay what little he had in hand, and he would borrow the rest on the security of the stock so taken.

In this way the large floating capital of the London market would in the present day come to the aid of the Chancellor of the Exchequer at a time of need, just as it habitually comes to the aid of the prosperous trader who wishes to enlarge his business. The necessities of the Government would be aided by the same instrument which assists the adventure of private persons.

On these evident grounds we are sure of the great benefits which these large banks confer on the public so long as they are well managed. That they are well managed now, their success from year to year certainly proves. But we cannot refrain from reiterating what we have so often said on the subject. So long as a certain number of quiet men of business watch its investments, and a responsible manager under fair supervision guides its routine, a bank, however large, may easily be safe. But everything depends on that manager and those few quiet men of business, especially on the latter. It is for the shareholders of the Joint Stock Banks, and for every one connected with them, to satisfy himself that they are such persons—that they are fit persons—and that they have on all needful matters due authority and sufficient power.

HUNGARY AND ENGLAND.

The Hungarian struggle has reached its crisis. Both Houses of the Diet have voted,—the Upper House of Magnates unanimously, the Lower House with only about six dissentients,—M. Deak's statesmanlike reply to the Emperor's rescript, and voted it without waiting to deliberate a single hour. The reply has now been published both in Hungary and in Germany. It is received in Pesth with the feverish delight of expectant martyrs waiting for the cruel consequences which they expect. It is received in Vienna with a howl of indignation that pure rebels,—for so the Germans think the Hungarians,—should venture to embody their rebellious resolutions in an address to the Crown. Nothing can be abler than the reply. M. Deak denies the fact that, since the publication of the Pragmatic sanction, the Hungarian nation has ever acquiesced in any but the *personal* union with Austria,—that it has ever resigned for a moment its right to control taxation and the movements of its army through its own Diet and Ministry. It declines absolutely to do so. Were it to recognise the Decrees of October and February last, summoning Hungary to send members to the Council of the Empire, it would abandon for ever its historical ground;—and for whom? For one who has for the last ten years never hesitated at any breach of the Constitution which would serve his purpose. Such conduct would be madness. The Hungarians, in their respectful but strong answer to the Emperor, simply say that they cannot and will not abandon their historical rights for any threat of suffering,—*that* for a time of great suffering they are fully prepared,—but that the constitutional liberties of their country are not so exclusively the property of the present Diet or generation that they can venture to dispose of them. "If it be necessary to "suffer," concludes this noble document, "the nation will "suffer, in order to preserve for a later generation the consti- "tutional freedom it inherits from its forefathers. It will suffer "without despondency, even as its ancestors suffered and "endured in defence of the rights of the country. For that "which power and force take away, time and favourable "circumstances may again restore, but the recovery of that "which the nation itself, out of fear of suffering, should "abandon, would ever be difficult and doubtful. The "nation, then, will suffer with patience, hoping for a "brighter future and confiding in the justice of its cause."

These are words which ought to find an echo in every Englishman's breast; but how does England receive them? Lord Brougham and Mr Roebuck have been already heard. From both of them came remarks on the value of the Austrian Empire,—on the necessity of supporting and strengthening it,—on the noble course which the Emperor has pursued in granting representative institutions to the various provinces of the Empire,—and by implication obviously calling upon Hungary to submit. We must say we regard it as a reproach to England that her statesmen,—her liberal statesmen,—and her liberal members of Parliament harp perpetually on this chord. Grant the full truth of it. Grant, for the sake of argument, that it may be truly desirable for Europe,—which we are not in fact at all prepared to admit,—to consolidate the different provinces of the Austrian Empire into a more perfect unity. Grant, too, — which is another inadmissible admission,—that the thing is feasible as well as desirable. What of this? Is England really incapable of viewing the Hungarian question from any point of view but this of political expediency? Is it absolutely beyond the possibility of our insular thought to consider what England would think it right to do in the same position,—whether she would sacrifice *all* her own historical liberties for considerations of European expediency and balance of power,—whether she would think for a moment of such matters or deem them worthy of any comparison with her duty to herself? And if, as we feel no doubt, England would be absolutely certain to claim a far higher importance for her duty to herself than for any expediency considerations affecting Europe at large,—is it creditable to our statesmen that they are so utterly blind to the same considerations on behalf of Hungary, as not only to withhold every sign of English sympathy from a nation that is assuming towards the Emperor an attitude for which the only parallel is to be found in our own English history, but also to say what is calculated, and perhaps even intended, to encourage Austria in her onslaught on Hungarian rights? Lord Palmerston, Earl Russell, Mr Gladstone, have each in succession taken pains to explain to Parliament that while they regret to see Austria still in Venetia, they would regret to see any risk to her Empire North of the Alps, and that they hope the differences between the Imperial Crown and Hungary may speedily be accommodated,—a wish that can have but one meaning. What right we have thus to judge the most strictly constitutional and historical struggle of modern times on principles such as these, we are quite unable to see. The right of Italy to constitute herself into a great nation is morally valid; but neither morally nor constitutionally is it near as indisputable as the right of Hungary to exact from the Crown the fulfilment of an express contract which every King of Hungary swears to fulfil.

This is the way in which England obtains her great reputation on the Continent for political selfishness. When her own liberties are concerned, she is vigilant enough and thinks of nothing else than the best means of guarding them. But let the question refer to the liberties of another nation, and instead of judging the case as she would judge her own, the first question she puts is as to the expediency of the result for her own interests. If the answer to this be not favourable, she puts no further question at all,—insists on viewing the matter in a broad European light, and does anything rather than as she would be done by. Thus it is in the case of Hungary. Our statesmen

think they see great danger to England from any encroachment of France or Russia on the Austrian Empire. They fear that such an encroachment would follow, if once Austria were weakened by the loss of Hungary. And seeing this, to all deeper and ulterior questions they resolutely shut their eyes. They do not *wish* to know that Hungary is really in the right,—is really acting with greater calmness, judgment, and moderation than even England in similar circumstances would show. For to know this would force them to lend her some sympathy and moral aid. They do not wish to lend her any moral aid, because they fear the *results* of her success. Can we complain that Continental politicians are never weary of denouncing our selfishness,—our different standards of approbation and disapprobation, according as our interests vary?—can we complain that they taunt us with loving Freedom only on self-interested grounds? We deserve such reproaches. We *look* on with perfect indifference at one of the noblest struggles which the world has ever seen,—only observing in a quiet aside to the tyrannical Government which is involved in it, that we hope she will soon be strong and united;—could we say in more explicit terms, 'Go in and win?' We cannot but hope that the perusal of M. Deak's address, and the report of the demeanour of the Diet in passing it, will awaken the conscience of the country, and rouse some of our better statesmen into a word of warm sympathy and admiration.

INDIAN FINANCE.

It is with great satisfaction that we observe that Lord Canning has called on the Local Governments of India for reports containing any suggestions of alterations or amendments which the practice of the past year has shown to be advisable in the details of the Income Tax Act, and *has distinctly repudiated all intention* of abandoning the principle of that measure. He has thus in some degree removed the unfortunate effect of the ill-advised observations in Mr Laing's Budget speech.

On the other hand, we regret to have to observe that the opium revenue will probably be far less than was expected. Mr Laing calculated that a chest of opium would sell for 1,750 rupees, but the present value is only 1,400 to 1,200. The consequence is a great loss of income to the Government, who is the actual producer of the article, since every reduction in price diminishes the profit, while the expense of production remains the same. The recent price of opium at Calcutta has been highly speculative; and though Mr Laing took what he called a "low figure," it will not be low enough.

We have great pleasure in publishing the following letter from an able correspondent, of great experience in India, confirmatory of the remarks in the article of last week. We have been thought to be too apprehensive in our views of Indian finance, but our correspondent evidently thinks that we have not been sufficiently so:—

TO THE EDITOR OF THE ECONOMIST.

SIR,—The statement of Indian finance in your issue of the 10th inst., is the only one yet published in England free from a conjectural, and therefore delusive, element. According to that statement the revenue for 1860 was nearly eleven millions short of the expenditure, and though the deficit was to be reduced in 1861 to 6,558,000*l*, and in 1862 to nothing, yet, as you justly observe, the reduction was contingent on anticipations which on other occasions have not turned out correct. The public is indebted to you for the warning, but you do not appear aware of the full force of your own statement. The habitual study of Indian finance *for the last twelve years* enables me to say not only that it is accurate, but that its accuracy is susceptible of demonstration on paper.

1. The only expedient by which the Indian Government propose to reduce the deficit is by reducing expenditure. They admit in their own statement that they anticipate no increase of income, the expected revenue of 1861 being *less* by 200,000*l* than that of 1860. Consequently to produce equilibrium they must by their own accounts have knocked off nearly eleven millions sterling from their annual outlay. Almost the whole of this economy, it is evident to every Indian, must have been effected in the military department, and the quasi civil police. Nothing else *can* have been reduced to an extent represented in millions.

2. You question whether so vast a reduction of military strength can have been effected; but I go further, and pronounce it, *primâ facie*, impossible. Let us look at the facts. The only military expenditures the Government have power to reduce are carriage, the number of European regiments, and the number of native auxiliaries,—the ordnance and staff expenditures being on the Indian system almost unalterable. The commissariat fluctuates of course, but only with the number of men to be provided for, and I have allowed for that. Well, then, we will assume that the Government have sent home, or are sending home, ten regiments of Europeans, nearly double the (as yet) accomplished facts. Each regiment costs—I am quoting an official return—including *all* expenses, 100,000*l* a year, and here is a million saved. There remains the reduction in natives—a matter of wages simply; for be it remembered you cannot dismiss *officers*. They can only be transferred from one duty to another, being covenanted servants and exempt from dismissal except for offences proved. Taking non-commissioned officers and men together, the annual wage of each sepoy is about 16*l* a year, which clothes and allowances may bring up to 20*l*. He has no food, and most Indian officers would call my average absurdly in excess of the truth. If, therefore, the Government of India have dismissed in 18 months 200,000 soldiers and police,—almost an impossibility,—the saving would still be less than four millions a year. I do not believe they have done anything of the kind, or that they dare dismiss that number except by a very gradual process; but allowing that they have carried reduction in numbers to that extreme point, there will remain a deficit of nearly six millions sterling. Where is that amount to be obtained? The public works can afford no further reductions, and if we allow a million more for the suspension of military buildings, reliefs, and every form of expenditure not absolutely essential to the daily work of administration, we shall still have five millions sterling to provide. Whence is it to come?

3. It cannot be borrowed from the railways, for their payments are already at an end, and Government are borrowing on their account. You seem to rely faintly upon the balances, which amount to 14,997,000*l*; but, like everybody else who trusts to an Indian statement of balances, you will be deceived. The facts are these. The balance is not a surplus, but only a cash account, to be reduced in this way. The expenditure of the Government of India is four millions sterling a month, to meet which they receive day by day the Customs, salt, and opium revenue, say a million a month. There remains three millions a month to be provided for three months,—*i.e.*, for the interval between the actual realisation of the quarterly payments of land revenue, and for a fourth month which must be allowed for the concentration of specie from the contributing into the spending districts. Twelve millions of the "balance" is therefore already pledged, and the remaining two millions is a real reserve; but, instead of being too large, it is a good deal too small. It is in fact less than the month's arrear of wages which the Government always keep due to their servants. The old Indian financiers, who never knew anything, but whose experience gave them a certain instinct, never thought themselves safe unless the "balances" equalled six months' expenditure,—a calculation which would compel Government at present to allow cash to accumulate to the extent of twenty-four millions, or nearly double the present return.

The deficit I contend *must* be met by a loan, besides which there will be the expenses on railway account. The eight millions to be raised this year is only a fourth of the sum which is to be raised before the works are completed, and which, as the Government of India stated in their last despatch on the subject, must be collected at the rate of about six millions a year. I look to an Indian demand for 1862 on our money market of about ten millions sterling.

Sir Charles Wood is in fact afraid to state broadly the extent of the demands he well knows must be made, and prefers to distribute them.—I am, Sir, yours, &c.,

ANGLO-BENGALEE.

SPANISH RAILWAYS.

A FEW years ago Spain was almost without a railway, either in operation or in progress. There was throughout the country neither government, political security, nor commercial confidence. The revolution had destroyed the principle of authority; the generals who conquered in the civil war had suppressed the liberalising influences of the revolution; and mutiny in the army and intrigue at the palace were represented at Madrid by the alternate malversation of profligate courtiers and aspiring filibusters. During the last few years this state of things has been insensibly changing. Spain has found herself, not perhaps under a master-mind, but in the hands of a Minister whose opportunity and strength of will were paramount to any other in the country. The domestic authority acquired by the military campaign lately conducted by the Chief of the Administration in person, was but the development of the authority which had previously enabled O'Donnell to plan the war. Meanwhile the Spanish public had grown sick of civil tumult. They saw the French growing rich under firm government, and themselves remaining poor under normal revolution. Thus the first symptom of re-established authority at the capital found a ready response in the desire of the people to employ their money and their intellect in the works of peace. One result of this altered national tendency is to be found in a great increase of imports, in a great increase of exports, and, presumptively, therefore, in a corresponding increase of production, and power of payment and consumption. So large a portion of this increase is acknowledged in the Spanish official tables to have been entered and cleared under foreign flags, that we need not ascribe the figures (for which indeed the returns of other States afford a rough guarantee) to any spirit of egotistical fabrication among the Spaniards. It is enough that it is acknowledged by themselves that their carrying trade is greatly in arrear of their productive and consumptive trade. It would be easy even now to express ourselves in language too explicit touching public confidence in Spain,—that is to say, touching the security of property, the duration of peace at home, and the common faith of the Administration. But the growth of railway enterprise here marks a great change. Fifteen years ago an English company was formed for the purpose of purchasing a considerable tract of fertile though ill-cultivated Crown land on the banks of the Guadalquivir, at such a price as would have enabled them to resell it to English emigrants at a rate of twenty shillings an acre. The British Foreign Office was applied to for a guarantee of the property thus to be transferred to the company, almost without consideration from the Spanish Crown; and on the inevitable refusal of the Foreign Office, the apprehension that the next Spanish Administration would repudiate the bargain of its predecessors, and oust the tenants in possession, dissipated the whole company! Such was the state of public confidence in Spain fifteen years ago.

It, therefore, indicates no slight progress in the interval to recount the bare fact that, according to the most recent authoritative returns, there are 985 kilometres, or about 650 miles, of the iron way already in actual working. Indeed, so lately as the period of the Crimean war, Spain possessed but the single line from Madrid to Aranjuez, which was supposed to have been laid down for the mere convenience of the Court. In addition to this extent of complete railways, there are others in progress which together run over 679 kilometres, or about 450 miles, and further concessions, or as we should say Acts of Parliament, have been passed to the extent of 4,000 kilometres, or in round figures 2,600 miles. Of course the State is the chief capitalist and guarantor. In such a country as Spain, railway operations are more than ordinarily expensive, and capital is even now more scarce than in other countries. The plan of these railways has been mainly formed by the Government, and in the interest of its own political centralisation. Madrid is studiously made the centre of the whole network. A glance at a map will indicate that lines of railway radiating from a common centre at the capital, and so drawn as to fall upon the principal cities, will traverse a great number of chains of mountains. The expense of tunnelling, and probably of cuttings, viaducts, and embankments, must inevitably be enormous. But not only was this expense such as to debar all but national speculation; the Government itself apparently could find the money only by vigorously prosecuting the sale of the lands of ecclesiastics and others, which the Ultramontane influence of the Court had before required them to suspend. Accordingly, in 1859, the Government demanded of the Chambers a credit of two milliards of reals, or 18,000,000*l* sterling, for the general prosecution of public works, either to be accomplished by their direct operation, or by means of grants to trading companies. This vast sum was to be supplied by a liquidation of the estates in mortmain, whether held by the Crown, the regular or secular clergy, the communes, the military orders, or the benevolent institutions. These lands had previously been sold in part by the laws of 1836, 1841, and 1855. But on the accession of O'Donnell, it was calculated by the Government that property enough remained in the hands of these bodies to realise four milliards of reals, or double the sum voted by the Chambers in 1859. It is no part of our present object to consider the moral defensibility of a gigantic scheme of impropriation. But it may be well to point out that the sums thus obtained profess to represent virtually so much addition to the public debt; for the State undertakes to pay 3 per cent. per annum in perpetuity to the institutions which it thus deals with as summarily as an Encumbered Estates Court. There stands, therefore, on the face of this arbitrary transaction, an increase of 36,000,000*l* sterling at 3 per cent. to the public debt, so soon as the public sales are complete. But whether the State is really acting in good faith, and designs to pay this annual percentage, is quite another matter. The procedure is certainly suspicious. We have just seen the French Government subsidising new railway companies; but that Government openly goes into the money market, forces no one, borrows of willing capitalists on its own credit, assures the lenders a 5 per cent. interest, and hands over their money to the struggling companies. This is a much simpler expedient. The Spanish Government, it is possible, may have chosen their cumbrous course because they have not had the credit necessary to float so large a loan. But it is clear that capitalists with money to spare exist; for they are paying in hard cash for the property which Government is selling in order to subsidise the railways. And the readiness with which the Executive have adopted this course certainly suggests a doubt whether the dispossessed communities can rely upon receiving their 3 per cent.

The Spanish railways at once in working, in construction, and in design, are supported by a variety of pecuniary arrangements. There is no uniform species of subsidy from the State. Indeed, eleven lines of railway appear to have been designed in some cases, and carried out in others, without public aid. These, however, are chiefly short lines, and their aggregate length amounts to 367 kilometres, or 240 miles. A proportion of nearly one-third, or about 75 miles of railway, without State assistance, is now, according to the last returns, in actual working. This is a fact which speaks well for the rising confidence in the country. But in the great majority of the lines, in which the State has contributed the chief capital, three different methods of assistance appear to have been recognised and acted upon by the Government. The more usual course has been to pay the companies once and for all so many reals per kilometre of their lines, the rate of payment varying according to the estimated difference in the expense of construction. Thus the highest rate that has been granted is 444,000 reals per kilometre, or about 4,000*l* per mile. This is the line from Burgos to Irun, at the foot of the Western Pyrenees, traversing a mountainous country. The lowest rate is 141,000 reals per kilometre, or about 1,300*l* per mile. A second course has been that of giving a guarantee of a certain rate of interest, as in the case of the Santander Railway; and a third, that of assessing a lump sum as either the presumptive expense, or the Government share, in the entire undertaking. The estimated expenditure to be defrayed by the Executive in the whole of the lines already conceded very nearly amounts to the four milliard reals, or 36,000,000*l* sterling, which the lands in mortmain are expected to produce. There is thus no appreciable surplus left for other public works; and probably the cost of the railways themselves will largely exceed the estimates. It is subject to a restriction of meaning that Spanish lines can be termed reproductive; for a thinly-peopled country will very in-

differently remunerate a Government for works more expensive there than in most countries, in spite of the abundance of timber and the cheapness of labour which prevail in Spain. But when a nation embarks in trade, she must be content with slow profits; and there can be no doubt that an elaborate network of railways will at length immensely enrich her even if she obtain from them no direct return.

Agriculture.

EVENTS AND PROSPECTS.

THE HARVEST.

HARVEST is now general throughout England, and during the past week a considerable breadth of wheat has been carried to the barns and stackyards, for the most part in good condition. In some, we may say many, instances there is so much grass amongst the wheat, arising from the foulness of the land and a thin plant, that another week in the field will be necessary to enable the farmers to stack their wheat in even fair order. The account we gave of the wheat crops seems to be borne out by the past week's experience. The crop is generally very thin, but the grain is good and well ripened. In some of the few cases in which new wheat has been thrashed we hear that the yield has not come up to the growers' anticipations, founded on the appearance of the uncut crops, though the condition and quality have been very good. This usually happens with a thin crop, a large yield being seldom obtained unless there is a full plant of straw. This fact has been urged by farmers against thin sowing, and there can be no doubt that if the sowing be so thin as to produce a thin plant, *i.e.*, in wheat sown in the ordinary way, the result will not be satisfactory. Reasonably thin sowing, however, by no means involves a thin plant, but simply avoids such an overcrowding of the plant as would prevent the full development of the grain. We do not now refer to the Lois-Weedon system, which when successful must make up by the increased length of the ear for the comparatively small number of plants on a given area. Taking the actual state and system of cultivation throughout the country, we expect to find the present wheat crops producing a low acreable yield. Oats, on the other hand, are coming down fuller and heavier than they were expected to do, although their appearance has all along justified high estimates.

From South Wales we receive very indifferent accounts, the rains having been heavy and incessant for six or eight weeks past. The non-improving landowners and farmers of that district will, it is said, find the present year as disastrous as 1860.

Our root crops have gone on improving during the past week, and the prospects for winter provender from this source are seasonably good.

The Royal Agricultural Society of Ireland, at the recent meeting held at Belfast, has adopted the plan of judging the stock in public. For want, however, of proper arrangements, the plan seems to have proved a failure. According to the report of the *Mark Lane Express*, instead of merely allowing the public to see the judges at work from a distance, the reporter found the judges "at work over the Shorthorns, with the owners and friends and managers of the animals quite as busy, or rather more active among them than the judges themselves. Everybody who pleased took a look and a touch, and straightway ingenuously avowed what he thought of it." It at last became so absurd that ropes were drawn across to keep the people off, but "still every now and then some gentleman, duly rosetted, in defiance of that order he was there to preserve, would grandly cross the line and walk up to the judges with something pertinent or impertinent to say about what they were doing." This indicates sad mismanagement. It is obvious that none, save the judges and their necessary attendants, should be suffered to come near the animals when under judicial inspection. The Irish show of Shorthorns was not a first-rate one, and none of the kinds of stock exhibited, except the pigs, were equal to former shows. The day, too, was very wet. The implement show, however, was larger and better than any previous show of the kind in Ireland.

A very good show of Shorthorns took place at the Newcastle-on-Tyne meeting of the Northumberland Agricultural Association. Of course some of the awards were a good deal criticised, but that is of small importance where the general class is good.

THE GAME NUISANCE AGAIN.

LANDLORDISM IN DORSETSHIRE.

PROBABLY few persons who pay attention to rural topics will have forgotten the lecture delivered to the Blandford Farmers' Club by the Rev. Lord Sidney Godolphin Osborne, on the relative duties of landlord and tenant. There the rev. lecturer broadly advocated "landlordism" as a sort of feudal superiority, which enables the owner of an agricultural estate to exercise over the occupiers of his farms direct influence and control; and asserted that it is a duty on the part of tenant-farmers to submit, amongst other feudal burdens, to game preservation on their land. It is true, he at the same time said that landlords seldom preserve game to such an extent as to injure their tenants. That, however, is a mistake, into which the advocates of landlordism are apt to fall.

We last week offered an illustration of game damage in some evidence given on a recent trial at the Hertford assizes. We now light upon the report of a county court trial in Dorsetshire which puts some of Lord S. G. Osborne's platitudes to the test.

An action was lately tried at the Wareham (Dorsetshire) county court, in which Mr Wm. Hopkins claimed to recover from Mrs Bankes, the widow and executrix of his late landlord, Mr Edmund George Bankes, 45*l* 10s for damages done to the crops on a farm at Studland, which Mr Hopkins had occupied as tenant to Mr Bankes. In 1852, Mr George Bankes was the owner of the farm, and Mr Hopkins entered on the farm as tenant from year to year under a verbal agreement only. The arrangement for the occupation of the farm was made with Mr Robson, the steward, save only as to the question of game, as to which the farmer was referred to Mr Bankes himself. He saw Mr George Bankes, and said to him, "A man cannot farm where there is a lot of game." To which Mr Bankes made the usual game-preserver's reply, "There is not much here, but I like a little for my friends; if the rabbits cause you any damage I will allow it." With that assurance Mr Hopkins entered on the farm. In 1855, Hopkins complained to Mr Bankes that the rabbits were doing him great injury, and asked to be allowed to kill them himself, when Mr Bankes hesitated, and then said "Well, you may." The next year Mr George Bankes died, and Mr Edmund George Bankes succeeded to the property. On the 22nd of July, 1856, the under-steward wrote thus to Mr Hopkins: — "I am desired by Mr Bankes to say he wishes you not to destroy any more rabbits on your farm at Studland. It is very probable that Mr Digby may reside at Studland ere long, who will wish to sport there. Mr Bankes will take care that the rabbits shall not injure your crops." That assurance was of course worth nothing. Game must be fed, and the crops on the farm on which it is reared will necessarily supply the food. Consequently Mr Hopkins sought a personal interview with his new landlord, Mr Edmund Geo. Bankes, and made several unsuccessful applications for that purpose. On the 14th of September, 1856, Mr Bankes sent by a gamekeeper a letter to Mr Hopkins, saying,—"Your desire to see me has probably some connection with the destroying the rabbits on the farm you rent from me. Should such be the case, I beg you distinctly to understand that I will allow no rabbit or game of any description to be killed on my property by any one but my authorised keeper, or those friends to whom I may give the shooting. At the same time I will guarantee that neither you nor any other of my tenants shall have any just cause to complain of loss suffered to their crops by game of any description." He added, his other tenants had pleasure in preserving game for him, and that if he, Mr Hopkins, wished an interview for any other purpose, the under-steward was to be seen daily at his office.

Such an epistle addressed to a farmer who had engaged to pay a full rent for his farm, and who employed his own capital in cultivation, may fairly be considered as adding insult to injury. And so the farmer treated it, for in reply on April 7, 1857, he wrote to Mr Bankes wherein he says:—"I have taken steps to have the damages assessed by two respectable persons, who have been on the farm from time to time, believing that your note sent by your (or it may be Mr Digby's) keeper in September last would obtain for me a deduction from the rent for the damage done.....It now rests with you to send any disinterested person to meet those before referred to, and fix the amount of damages. Indemnification may do for the past; but I know how unsatisfactory to both parties this always is, and by which the tenant is the loser, to say nothing of the worry and unpleasantness." After referring to the late Mr Bankes' consent, that the tenant should destroy the rabbits, Mr Hopkins added: "I have carefully watched all that has taken place since, and I plainly see that you and Mr Digby are determined to make a game preserve of this farm. I respectfully, but firmly, say I do not consider you had any right to wish me to give up the permission your father gave me. I hold the farm with no agreement. I need hardly remind you that the law, in the absence of any agreement to the contrary, gives the whole of the game and rabbits to the tenant. It is quite useless to expect anything like cultivation under such a system. No money deduction will satisfy any one who wishes to farm properly. I have, therefore, made up my mind at once to commence the destruction of both hares and rabbits; the former are numerous beyond anything I have ever seen here, and the latter must be trapped all the summer, or the destruction from both will be very much greater than the farm will bear." Mr E. G. Bankes had since died, and the action was brought against his executors. The jury at once gave a verdict for the full amount claimed. It is impossible to put the case in a stronger form than it was put by Mr Hopkins, when he said "no money deduction for game damage will satisfy any one who wishes to farm properly." Why do not farmers stir themselves, and resolutely refuse to take farms whereon the game is reserved? This game question is practically one of the most serious impediments to English agriculture at the present time.

Literature.

COMMERCIAL LITERATURE.

THE COTTON MANUFACTURE OF GREAT BRITAIN Investigated and Illustrated. With an Introductory View of its Comparative State in Foreign Countries. By the late ANDREW URE, M.D., F.R.S. To which is added a Supplement, completing the Statistical and Manufacturing Information to the present Time. By P. L. SIMMONDS, F.S.S., Author of "The Commercial Products of the Vegetable Kingdom," &c. In 2 Vols. With 150 original Figures. London: H. G. Bohn. 1861.

THE manufacturing and commercial changes that have taken place in the cotton world during the twenty-five years that have elapsed since the publication of Dr Ure's standard work on the Cotton Manufacture, have rendered a continuation of that work very desirable. Mr Simmonds has here supplied the want, leaving the original work intact. "The list of patents for improvements in cotton and machinery, and in the processes of spinning, preparing, winding, &c., has been brought down from 1836 to February, 1861." "The tables of exports of cotton manufactures have been also brought down to the end of last year." And "an Appendix of supplementary information gives a condensed account of the advance of the cotton trade of Great Britain to its present magnitude, furnishes many useful tables of imports, prices, stock, and sources of supply, and brings under review each producing and manufacturing country." The work has every appearance of having been carefully and conscientiously compiled, and will doubtless be extremely useful.

GENERAL LITERATURE.

SLAVERY AND SECESSION IN AMERICA; Historical and Economical. By THOMAS ELLISON, F.S.S., &c, Author of "A Hand-Book of the Cotton Trade." With Map and Appendices. London: S. Low, Son, and Co., 47 Ludgate hill.

THIS is an excellent compendium of the chief facts on the greatest subject of the day. It is divided into four parts,—History of the Rise and Progress of Slavery in the United States; History of the Secession Movement; A Comparative View of the Influence of Free and Slave Institutions; Emancipation. To these are added a supplementary chapter carrying the history of events down to last June, and an Appendix containing the Constitution of the United States, the Constitution of the Southern Confederacy, and several party documents and statistical tables, including the censuses for 1850 and 1860.

The events recorded in Parts I. and II. are but dimly and superficially known in England, and Mr Ellison's concise epitome (which is interspersed with occasional extracts from American public speeches) will be very useful. It is, however, almost wholly confined to the Congressional struggles about slavery, and leaves untouched many large and important parts of the subject, such as the rise of the Abolition Societies and their relation to the Free-soil party,—the various important legal decisions on slave questions, the passing of the Personal Liberty Bills in the North, and the gradual and fearful increase of lynching in the South. Mr Ellison's own view of the question is, that "slavery is a sin"; that emancipation should be gradual, but should be prepared for as speedily as possible; that Congress has no power to interfere with slavery in any State which chooses to retain it,—but, on the other hand, is not bound to protect the institution in the Territories. The one important point on which we differ from our author is the Fugitive Slave Law, of which he uniformly speaks in a tone which we greatly regret. He holds that, "however we may disagree with the idea of one man having the right of property in the person of his fellow-man, still the fact that that right is recognised by the 'Constitution' as existing in one part of the Union, demands that the other part should not be allowed to interfere with that right. The slave-owners alone are responsible for the sin, and they alone have the legal right to discontinue the evil."—(Pp. 115-16.) Now this may be plausible enough if the slaveholders are right in regarding the negro as (virtually) not being a man at all. But for those who maintain that he *is* a man, whose enslavement is a sin,—to treat the fugitive slave question as though the rights of Northern and Southern whites were the only ones concerned, is a fatal error. The inborn right which every man has to his own soul and body must necessarily take priority of the merely conventional arrangements about him which other men make between themselves for their own selfish profit. Society may sometimes, on cause shown, justly suspend a man's exercise of his rights over himself, when he has so acted as to forfeit them; but a society which legislates for certain men as though they were born *without* personal rights, inflicts a fatal wound on the sacredness of the social bond itself, which must wither from the root unless based on the sacredness of individual freedom. No community and no State can be lawfully bound to cut the very life-strings of society; and the Personal Liberty Bills are the noblest testimony which American society has given that, so far as the States which have passed those bills are concerned, the shameful and suicidal concessions made in the general Constitution shall be renounced by the separate Free States. That any writer who says, "that the negro has no right to be *held*, even, in bondage, we believe to be a cardinal truth" (p. 247), can yet believe that any "constitutional" compact ought to bind any man to be a slave-catcher for another, or to prevent any State from protecting the fugitive,—is a melancholy illustration of the warping influence which slavery exercises over minds naturally just, humane, and sensible, who have become so familiarised with its anomalies as to lose the full sense of their real character.

Having thus stated our only serious difference from Mr Ellison, we may pass on to the pleasanter task of describing the merits of his book. The Third Part is devoted to a comparison between the relative influences of Free and Slave institutions as exemplified in the Northern and Southern States. Such comparisons have been so often written that many English readers must be familiar with their general features; but there are some interesting facts mentioned by Mr Ellison which are probably less known, and of which, therefore, we will give a short account.

Among the causes of Southern retardation he mentions a considerable emigration from South to North. "According to the census tables of 1850, there were 609,223 natives of the Slave States residing in the North, against only 205,924 natives of the Free States residing in the South, showing a balance against the South of 403,299 persons! We are not without an explanation of this phenomenon." Dr Duffner, himself a (Virginian) slaveholder, said in 1847:—"Many of these multitudes who have left the Slave States have shunned the region of slavery, and settled in the free countries of the West. These were generally industrious and enterprising white men, who found by sad experience that a country of slaves was not a country for them. It is a truth, a certain truth, that slavery drives free labourers, farmers, mechanics, and all—and some of the best of them too—*out of the country*, and fills their places with negroes."—(Pp. 178-9.) Professor Hedrick, of North Carolina, gives similar testimony, saying that nearly one-half of *his neighbours*, friends, and kindred have left that State within his remembrance. He also says (quoting the census), "in 1850 there were 58,000 native North Carolinians living in the Free States of the West; nearly 3,000 in Indiana alone. There were at the same time 180,000 Virginians living in the Free States. Now if these people were so much in love with the 'institution,' why did not they remain where they could enjoy its blessings?"—(P. 179.)

The same degradation of labour which causes Southern labourers to seek the Free States, operates, of course, still more decidedly in turning from the South the tide of European immigration. Of course the Southerners maintain that it is the climate alone which keeps the immigrants away from them. But Mr Ellison gives a variety of facts from the census tables to show that the Southern climate is not necessarily injurious to European constitutions, and that "on the average of years the proportion of deaths to the number of persons living is positively more in the Northern than in the Southern States."—(P. 181.) He also quotes from Mr Darby, the surveyor and geographer of Louisiana, and from Dr Barton, of New Orleans, to show that (in the words of the latter) "the classes of diseases most fatal to the South are mainly of a '*preventible*' nature, and embrace fevers and intestinal diseases, and depend mostly on conditions under the control of man, as drainage, the removal of forest growth, of personal exposure, and hygiene."—(P. 183.) From Olmsted Mr Ellison brings evidence as to the large amount of hard labour actually performed by Europeans in the Southern States, and from Stirling he quotes the following noteworthy passage:—

> It is said white men cannot labour in a tropical climate. But the Southern States are not a tropical region, neither is cotton a tropical product. It flourishes only in the belt between the tropical and temperate zones. White men labour all the day long in Louisiana at the heaviest work. Nay, in Texas, the most southerly of the Slave States, cotton is even now produced by free (German) labour; and better cotton, too, than any grown by slave labour.....The rice swamps? some one says. And what then? The whole rice production of the United States is only worth some 4,000,000 dollars per annum. *That* is not a consideration on which to base a national policy. As to sugar, its days are already numbered.—(Pp. 183-4.)

Mr Ellison gives tables of the imports and exports of the Free and of the Slave States, from 1828 to 1859, from which it appears that "the import trade of the Free States has always been, in value, something like half as much again as the joint imports and exports of the Slave States. The large export trade of the South is owing entirely to the accident of cotton, and should the Slave States lose the monopoly of that culture they would cut just as poor a figure in respect of exports as they do now of imports."—(P. 200.) Mr Ellison says well that "under slavery, they could produce no other commodity, raw or manufactured, which would be in equal demand in foreign countries. *Under freedom* they might be able to consume their own cotton, and so enter into competition with England and the Continent for the custom of the world. Slavery exists on cotton, and could not exist on anything else, and cotton is dependent on the outer world; but the outer world, though much indebted to cotton in general, is not absolutely dependent on American cotton in particular."—(Pp. 201-2.)

In a previous division of his work (pp. 153-61), Mr Ellison discusses the prospects of cotton under Disunion, and shows how temporary deficiencies in the supply of American cotton were partially met (in the years 1853 and 1857) by increased supplies from other quarters. He goes on to say that "any *permanent* falling off in the American supply would be met with even greater certainty than the temporary deficiencies here noticed. All that the cotton-growers of India and Africa want is the certainty of a market for their produce."—(P. 158:).

Part IV., on "Emancipation," is not free from weak points, but it contains much that is excellent, and is a genuine attempt to deal justly with a great practical problem. Any such attempt by an American (as Mr Ellison appears to be) is welcome, however its details may be open to criticism.

A Sketch Map is prefixed to this volume, in which "Mason and Dixon's line" is marked from the Atlantic to the Pacific: the Free States are coloured blue, the Border Slave States pink, and the original Southern Confederacy yellow; the Territories being left uncoloured. This map greatly facilitates the English reader's comprehension of the details of the book.

HOUSEHOLD MEDICINE: containing a Familiar Description of Diseases, their Nature, Causes, and Symptoms: the most approved Method of Treatment; and the Properties and Uses of Remedies, including many new and valuable Medicines, with Directions for preparing them; and Rules for the Management of the Sick Room; expressly adapted for Family Use. By JOHN GARDNER, M.D., of the Royal College of Physicians, Edinburgh; Author of "The Great Physician," Editor of Liebig's "Letters and Lectures on Organic Chemistry," &c. With numerous Illustrations. London: Smith and Elder. 1860.

THIS work is not one that should be put into the hands of inexperienced persons; but by the well-educated, intelligent, and cautious, who can interpret and follow its directions with judgment, it may frequently be found serviceable. Perhaps the best parts of the book are those which relate to general health and preventive measures.

THE ENGLISH WOMAN'S JOURNAL. August. W. Kent and Co., Paternoster row.

THE ENGLISHWOMAN'S DOMESTIC MAGAZINE. August. S. O. Beeton, 248 Strand.

THE most noticeable article in the last number of the "English Woman's Journal" is its memoir of Elizabeth Barrett Browning. Necessarily slight in its nature, it is written with a true appreciation of one of whose genius and character Englishwomen are justly proud. An interesting sketch of M. Maitre's large Atelier at Dijon, and an account of the employment of the Nightingale Fund, are not beneath the average.

Less ambitious in its aim than its elder sister, the "Englishwoman's Domestic Magazine" is equally conscientious in fulfilling its assumed responsibilities. It furnishes its readers with abundance of pretty patterns of needle-work, an intelligible description of the fashions, and some fair tales.

THE ART-JOURNAL. August, 1861. James S. Virtue.

A VERY graceful and meritorious little picture, called "The Cottage Home," by a Manchester artist of the name of Smith; Turner's fine composition of "The Arch of Titus, Rome;" and a statue of Erin, by W. J. O'Doherty, form the subjects of the steel engravings of the "Art-Journal" of this month. The first of these works is in the Royal collection, the second in the Kensington National Gallery, and the third is being sculptured in marble for the Marquis of Downshire. The number contains, moreover, several very interesting illustrated chapters, among which we specially recommend "The Hermits and Recluses of the Middle Ages," "The Origin and Nomenclature of Playing Cards," by Dr William Bell, and the concluding chapter of the "Examination into the Antiquity of the Likeness of our Blessed Lord," which gives the portraitures that are extant in mosaic pictures.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

AMONG the many vexatious regulations to which the French merchant shipping was subjected was this one: that a French vessel arriving in a foreign port near France could not be despatched from that port on a new voyage without permission from the Ministry of Marine in Paris, which permission was never granted except on the condition that the vessel should be refitted and the crew reconstituted. But this system having been found inconvenient, the Minister a few weeks back ordered that vessels touching a foreign port might sail on a new voyage without coming into France, on the simple conditions that the crews should consent to go, and that the wages due to them should be paid. By a circular just sent to the Chamber of Commerce, the Minister announces that he is anxious to receive the opinions of shipowners on this measure before taking steps for making it definitive. He admits that they may have some objections to offer as regards the question of payment of wages, but on the whole he thinks his plan a good one. "By it," he says, "vessels fitted out for long voyages can traverse all the seas of the world to convey freights, which the shipowners can have prepared by their agents in foreign countries. The new system," he adds, "seems destined to become general, since England admits foreign vessels to take part in the intercourse between the ports of the United Kingdom and her colonies, and has thus opened to French shipowners a source of profit by enabling them to take in Great Britain all the freights they can procure."

Under the old Customs tariff, furniture, carpets, table and body linen, looking-glasses, kitchen utensils, agricultural implements, old porcelain, and various other articles belonging to foreigners coming into France, or Frenchmen returning home, were allowed to be imported at a duty of 15 per cent. *ad valorem*, provided they had already been in use, and were destined to be used again. But the Board of Customs has just decided that henceforth all such articles, with the exception of carpets belonging to such parties, shall be admitted altogether free of duty, subject to the condition that they have been and are to be used. The reason why an exception is made as regards carpets, is that if the permission were accorded to them, an abusive use might be made of it.

Permission has, by Imperial decree, been granted to such commercial, manufacturing, or financial companies of Spain as have obtained authorisation to exist from the Spanish Government, to exercise judicial rights in France. By another Imperial decree, the import into France of foreign lead, to be made up into balls, pipes, or shot, or to be rolled, is allowed free of duty, either by French or foreign vessels or by land, subject to the condition of the articles fabricated from it being exported.

The French Government, you are aware, is doing all it can to encourage the cultivation of cotton in Algeria, and one of the measures employed by it for that purpose is the grant of pecuniary rewards to producers. It has just decided that for all exports made a premium of 2f 75c the kilogramme shall be given for Georgia sorts, and one of 95c for other sorts; also that for the cotton sold to the Government (the latter is a regular purchaser) the premium given shall be 1f 92c the kilogramme on the former sorts, and 67c on the latter.

In my last, an account was given of the quantities and value of the goods imported and exported into and from France in the last three years. The following is an account of the shipping for the same period:—

IMPORTATIONS.

	Number of Vessels.			Tonnage.		
	1858.	1859.	1860.	1858.	1859.	1860.
French	10,535	10,422	10,675	1,586,396	1,628,284	1,663,615
Foreign	13,542	14,618	14,081	2,223,603	2,375,354	2,348,261
Total	24,077	25,040	24,756	3,809,999	4,003,638	4,011,876

EXPORTATIONS.

French	9,270	8,778	8,013	1,400,471	1,473,192	1,341,531
Foreign	10,696	11,657	10,429	1,482,816	1,563,136	1,502,635
Total	19,966	20,435	18,442	2,883,287	3,036,328	2,844,166

It is to be observed that the tables given last week referred only to what is called "Special Commerce," that is, to the imports made for consumption in France, and to the exports of French productions; whereas the shipping returns above are of "General Commerce," that is, of imports made both for home consumption and for despatch to foreign countries; and of exports which are both of French and foreign articles.

Subjoined is a statement of the value, official and actual, of imports and exports under the head "General Commerce," "official value" meaning an estimate by a fixed scale originally drawn up about thirty-five years ago; and the "actual value" the average of market quotations during the year:—

Annexed is an account of the markets:—

FLOUR.—At *Paris*, yesterday, the quotation was 76f to 82f the sack of 159 kilogs; American flour, 67f 75c to 73f 25c. The four marks were 77f 50c for the current month.

WHEAT.—Business at *Paris*, yesterday, was not important: new was at 47f to 49f the sack of 120 kilogrammes, and old at 45f to 46f. As to foreign, American was at 41f 50c to 44f 50c; Baltic and other sorts, 43f to 44f 50c. Of the provincial markets, 106 present a rise of from 10c to 3f 35c the hectolitre, 19 a fall of from 2c to 1f 75c; 14 are reported firm, 15 without variation, 8 calm.

COTTON.—At *Havre*, in the week ending Friday, the sales were 7,540 bales, and the arrivals only 178. The closing prices were only 1f higher for low New Orleans and Mobile, all the other quotations being unchanged: very low Orleans was consequently 100f the 50 kilogs, low ditto 113f, and very ordinary 118f. The stock on the 10th was 273,580 bales; same date last year it was 226,600, and in 1859, 78,030. On Monday and Tuesday in the present week the sales were not very large, and no change took place in prices.

SUGAR.—At *Havre*, in the week ending Friday, business was not very animated; however prices underwent but little change. 265 casks French West India went at 47f the 50 kilogs duty paid; 3,400 bales Reunion, from 50f to 50f 25c; 400 casks Havana, 34f in bond. The arrivals were about 7,000 casks. This week, French West India has been at 46f. At *Bordeaux*, last week, 110 casks Guadaloupe usine went at 52f; 7,650 bales Reunion at 48f 50c to 50f; 450 bales Mauritius, 46f 50c; 400 ditto gros grain, 57f. This week, a small lot of French West India has been sold; prices not stated. At *Nantes*, last week, 200 sacks Reunion gros grain went at 50f 50c; 163 ditto, 56f; a small lot of Guadeloupe usine, 64f 50c. At *Marseilles*, last week, nothing was done.

COFFEE.—At *Havre*, in the week ending Friday, the demand was active; the prices, especially of good qualities, were firm. 600 sacks Hayti Port-au-Prince, disposable, went from 77f to 77f 50c the 50 kilogs in bond; 300 ditto, for delivery, 77f; 4,350 sacks Rio, not washed, disposable, from 59f to 62f; 800 sacks ditto, for delivery, from 72f to 73f; 1,600 sacks Rio, washed, disposable, from 83f to 83f 50c. By auction, 1,100 sacks Hayti damaged were sold from 67f to 72f in bond. The arrivals were 4,300 sacks and some casks. This week, Rio has been at 68f to 75f. Some damaged Java has also been sold. At *Nantes*, last week, 1,727 sacks Java went at 107f. At *Bordeaux*, last week, some Mysore went at 110f; a small lot of Rio at 74f to 79f 50c; various small quantities of Guayra at 85f; a quantity of French West India, 137f to 140f. This week, a quantity of Mysore has been sold at 107f.

INDIGO.—At *Havre*, in the week ending Friday, only 19 chests Bengal were sold, and the prices were 1f 10c to 1f 20c the half-kilog above the estimates. The arrivals were only 7 chests from England. This week, a small lot of Bengal has been sold; prices kept secret. At *Bordeaux*, last week, 32 casks Madras, 89 Kurpah, and 46 Bengal were sold; prices not stated. This week, some lots of Kurpah, Velore, and Madras have been disposed of; prices not given.

HIDES.—Business at *Havre*, in the week ending Friday, was active, and quotations were firm. 305 Buenos Ayres dry went at 105f the 50 kilogs; 2,900 Buenos Ayres and Monte Video salted Saladeros, at 70f for oxen and 65f for cow; 644 Buenos Ayres salted Mataderos, 51f; 3,100 New York salted, from 41f to 42f; 1,928 New Orleans ditto, 40f 50c. The arrivals were about 13,800. This week, New York salted have been at 41f and 42f; Monte Video salted Saladeros, 71f.

WOOL.—At *Havre*, in the week ending Friday, business was insignificant. The sales were only 9 bales Monte Video, not washed, at 2f 50c the kilog, and 8 Bueno Ayres sheepskins, not washed, 1f 45f. The arrivals exceeded 1,200 bales.

TALLOW.—At *Havre*, in the week ending Friday, no sales were made, and the arrivals were 378 casks. This week, New York has been at 60f and 60f 50c the 50 kilogs. At *Paris*, yesterday, the 100 kilogs were 114f.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, disposable, was 86f the hectolitre; 3-6 Montpellier disposable, 86 deg., 115f.

Correspondence.

THE GRAND TRUNK RAILWAY OF CANADA.

TO THE EDITOR OF THE ECONOMIST.

SIR,—I believe that a sum of 15,400,000*l* is invested in the Grand Trunk Railway of Canada, and that this vast amount of capital will not return one shilling to the proprietors for the last six months: a fact so deplorable cannot be a matter of indifference to your readers or to yourself. It is now only too clear that the progress of Canada, however rapid, has not been so great as the projectors of the line anticipated, and it would seem that their views were shared by the Provincial Cabinet, but not by the Canadians themselves. The permission to pay dividends out of capital up to a certain date, contained in one (or more) of the Acts of the Canadian Legislature, is conclusive as to the expectations of the framers of that Act, and affords some support to the claims urged for further aid from the Province.

The present state of Canadian finance discourages us from relying upon assistance from that quarter; and independently of the deficit reported in the last budget, the Canadians of our time, poor and struggling, may, not unreasonably, decline to incur heavy debt and make great present sacrifices in return for benefits which will be felt more sensibly twenty years hence than at present. The various estimates of gross receipts and net profits have been successfully refuted, as I understand, by facts, and each committee of investigation gives a report more discouraging than the preceding one.

Allowing 10 per cent. annual interest on the floating debts, we have preference charges of 750,000*l* annually, and no remittances from Canada. To obtain increased receipts further outlay to a large amount is declared to be indispensable, and no means exist to raise money, because the property is so heavily mortgaged already. It is to be lamented that all parties interested should have been so thoroughly wrong in their calculations, but the various classes of claimants stand in very different positions. First preference bondholders, who would be paid if the net profits were 120,000*l* yearly, have much more reason to complain than shareholders, who would receive as dividend the surplus after payment of the enormous preference charges.

So long as the line is encumbered with debt it seems vain to expect any improvement, and there appears to be no remedy for *any* class of persons interested, except an early sale of the property of the Company. I leave these suggestions for the consideration of your numerous readers and your own, in the hope that if my views be correct this letter may tend to their practical application, and, if not, that you may suggest some better course to relieve some of those so deeply interested in and so deeply disappointed by the failure of that vast undertaking.—I am, Sir, your obedient servant,

FIAT JUSTITIA.

COMMERCIAL AND MISCELLANEOUS NEWS.

The annexed report is dated Calcutta, July 1:—Produce Market—In this market there is nothing to notice; former rates are steadily maintained. Import Market—There are signs of activity, and increased business has been doing the last few days. Government Securities—There is no improvement to report in Government paper; the transactions are extremely limited in amount, and prices continue to droop; nor is there any indication or probability of improvement in the demand. Money Market—Except in the bazaar, where there is still some stringency, money continues in limited demand, and can be easily obtained at Bank rates for good security. Further intelligence to the 8th of July states:—Imports—There is a slightly better feeling in our import market in so far as some Manchester goods are concerned. The demand for prints and woollens has not opened yet, and prices rule very low. Exports—Shippers at present are not disposed to operate to any extent, except at reduced prices. The principal business is in the direction of Europe and Mauritius. A moderate business is in progress for America. We hear of no fresh transactions for the colonies.

Advices from Bombay are to the 12th ult., and the following commercial news is to that date:—Imports—This branch of trade continues in a dull state, and there are no symptoms of revival in demand, notwithstanding the light stocks held by dealers. The temporary distrust existing in the native bazaar owing to the still unsettled gambling speculations in opium, along with the ample supplies in importers' hands, and heavy shipments on the way, as well as the present firmness on the part of holders, all combine in materially restricting business, while there is no noticeable alteration in prices. Cotton has somewhat given way, and the transactions of the fortnight aggregate a small amount of business. Seeds—Linseed is lower in value, while rapeseed maintains its position. Transactions, however, in all kinds are small, and stocks very limited. Freights may be quoted at 1*l* 10*s* to 1*l* 15*s*, and 1*l* for cotton and seeds to Liverpool, and 1*l* 2*s* 6*d* to 1*l* 5*s* to London.

From Madras, under date July 11, the following has come to hand:—Securities—Five-and-a-half per Cent., 1¾ to 2 prémium; Five per Cent., 4¾ to 4⅝ discount; Four per Cent., 18½ discount. Freight for England—Sugar, 2*l* per ton; cotton, 3*l* 2s 6d per ton. Interest on (Government) loans, 6 per cent. per annum. Money market easy.

The following communication is dated Rangoon, June 16:—Rice.—This market has experienced a further advance in prices since last mail. The weather up to the 10th instant continued very unfavourable for traders, and consequently little or no grain was arriving. Requirements were then rather urgent for some vessels with cargoes nearly completed, and rates rose to 90 and 95 rs for best Natsain, but they have now subsided again to 88 to 93 rs, with a downward aspect. A later report to June 29 says:—The trade in British goods has been very quiet, and sales of staples have gone on steadily, with little or no improvement in value. Exports.—Rice—Shortly after the departure of the last mail, prices for a day or two receded to 85 and 90 rs for best Natsain, and supplies were coming in satisfactorily. The market, however, has improved since then, and the quotation is now 86 to 91 rs.

By the last West India mail, we have received the following intelligence:—The weather at Demerara was wet and unhealthy. The canes on many estates had been injured by continued rain. Busines. was seriously checked. Importations of all descriptions were in excess and prices had generally receded. Produces was scarce, and prices nominal Tonnage was abundant. At Barbadoes the weather had much improved, the rain having abated. The crop was nearly all finished, but the yield was very indifferent, and scarcely worth reaping. The market was well supplied with all descriptions of imports. The cotton question still engaged attention at Jamaica. Applications for immigrants were on the increase among the planters. The market remained in an unsettled condition, and there was a falling off in business to the lowest demand. Accounts from the agricultural districts were more satisfactory. Coffee was scarce. Mountain sold in tierces at 47s; pimento, 12s 6d per 100 lbs; rum, 2s 6d in bond, 18s for proof; sugar, 14s to 18s.

We have received the following from Quebec, dated Aug. 2:—White pine continues to arrive freely. The sales are on a moderate scale, and prices may be quoted as last advised. Waney board pine is very dull of sale, the accounts from Liverpool being discouraging. Red Pine—Sales are occasionally made at about 9½d for 40 feet measured off. Elm—30 feet is held at 9½d, but no sales are reported. Oak—Prime Lake St Clair measured off is held at 17½d. Inferior may bought at 15d. Birch—No sales. Staves dull, at about 42*l* 10s for standard, and 13*l* for W. I. pun. Deals—Floated are all in the hands of one manufacturer, who is shipping to London. The stock of bright is increasing, owing to diversions from the U. S. markets, but the specifications in many cases are very inferior. Really prime lots still fetch 15*l*, 10*l*, and 5*l*. Coals—Stock reduced, but demand small. Salt almost unsaleable at any price, bulk was sold at 5d per minot.

At Rio, on the 25th July, coffee, good first, was quoted at 5.600 to 5.800 milreis per arroba. The shipments of coffee since the last mail amounted to 84,620 bags, of which 39,100 were for the Channel. Stock of coffee, 110,000 bags. Freight, 50s.

The *Moniteur* has published the following monthly debtor and creditor account of the Bank of France, made up to Thursday se'nnight. The corresponding figures of last month and of the corresponding period in 1860 are added:—

From Nicaragua, we learn that the first cotton, amounting to 30 bales, had been sent down to Panama. Some 50,000 lbs of seed had been distributed in the department of Chinandagua, and it was expected that next year's crop would be very large.

Accounts from the West Coast of Africa are to the effect that the palm oil season had turned out very successfully, and that it was estimated to be the finest known for some years past.

The operations of the United States Branch Mint in New York during the past six months show an increased movement as compared with the corresponding period in 1860. The deposits of gold bullion to July 1st, 1861, amount to 419,773 82 oz; the deposits of gold bullion to July 1st, 1860, amount to 313,988 76 oz; increase, 75,785 06 oz. Gold coinage to July 1st, 1861, 7,430,000 dols; ditto, 1860, 6,332,000 dols; increase, 1,108,000 dols.

Same time 1860	41	17	92

The market continues very firm, and holders have advanced their pretensions fully one-quarter of a cent per lb. The sales foot up 3,000 bales.

There have been no receipts since our last. Total import from 1st to 31st July, 99 bales; total import since 1st September, 431,065 bales. Export from 1st to 31st July, 2,360 bales, against 9,086 in 1860.

NEW YORK, Aug. 3.—The demand is fair, and prices have again advanced one quarter of a cent per lb, to which we conform our quotations. The sales comprise 5,000 bales, including 500 in transit. We quote:—

The business of the cotton market has been only moderate this week, most buyers having for the moment a pretty full supply. Sales were made a few days ago at a decline of ⅛d per lb from our last quotations; but a better demand has more recently arisen, and we can now make little or no change in the prices of American. Egyptian have barely supported former rates, except in the better grades. Brazil are without alteration. East India partook with American of the temporary depression, but are now at last week's level. The sales to-day are 8,000 bales. A quiet market, but firm. The reported export amounts to 8,620 bales, consisting of 4,050 American, and 4,570 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

The advices at hand from most of the manufacturing districts are of an unfavourable character. Both for home use and export, the business doing in goods has been trifling. In prices, however, no quotable change has taken place. The high value of cotton at Liverpool has induced considerable caution on the part of spinners in adding materially to their stocks. Iron and coal have continued in fair request, at full quotations.

MANCHESTER, Aug. 15.—For the past week, and it might be said for nearly a fortnight, this market has experienced an almost total absence of transactions. The Indian advices, together with the heavy exports thither for last month, have been such as to deter from operations, especially at the now advanced rates. Few other markets show promise of demand, heavy supplies having been sent forward to most, in anticipation of the present unfortunate position of manufactures, which is so entirely due to speculation on the scarcity of cotton. Besides, the want of American demand is beginning to be severely felt in the better classes of goods. We quote most of our staples a degree lower, with no buyers. Stocks are held by many of the wealthier spinners, who object to selling at a loss, whilst they see no prospect of cheaper production.

BRADFORD.—There have been more inquiries for wool, but few buyers, and the market must be reported as wanting in animation. There is but little change in yarns, either in demand or price. Machinery is getting to be better employed. There is a fair demand for the home consumption, and carded yarns for the German markets are being produced in considerable quantities. The fine weather has somewhat improved business in pieces. The warehouses have been rather busier, and the fancy manufacturers are now pretty well employed.

BELFAST.—An active demand prevailed for flax in Derry and Strabane, and previous prices were fully maintained. New brought 70s and 85s per cwt of 124 lbs. A fair amount of business in the home trade for flax has been transacted during the past week. The demand from England and Scotland has not been active. Further improvement in Continental demand has been reported. Stocks generally are not heavy, nor has any increase taken place. Prices without change. Some spinners seem unwilling to contract for future delivery at present rates.

LEICESTER.—A healthy tone continues to pervade the hosiery trade, although business cannot be said to be brisk. In some branches, however, there is a fair amount doing. Trade in the country districts is rather quiet, and many hands are engaged in reaping. No material change in the price of yarns, spinners being fairly employed. Wools are without much alteration.

NOTTINGHAM.—Nearly every branch of the lace trade is deplorably dull, and there continues to be no prospect of any immediate change for the better. The plain net trade was, perhaps, never at any former period so depressed as it is at the present time; cotton fancies are also dull of sale. There is also less doing in the silk branch, and indeed business generally has not been in so depressed a state for several years past. There is no improvement in the hosiery trade. Yarns are firm, at high prices.

LEEDS.—The woollen cloth markets have been of a satisfactory character, there having been a moderate attendance of buyers, who purchased in the aggregate a fair quantity of goods. The demand is chiefly for the home trade, but some sales of cloths for shipment for Canada continue to be made. Generally the woollen manufacture of this district is a shade better than it was a month ago.

ROCHDALE.—The flannel trade still continues quiet, but upon the whole there has been rather more business done, and there is a little better feeling as to the future business of the year. Prices are steady. In wools, operations have been limited, but last week's rates have been supported.

WOLVERHAMPTON.—There is rather more activity to notice in the iron trade of this district, and prices are well supported.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 14th day of August, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	26,391,980	Government Debt	11,015,100
		Other Securities	3,634,800
		Gold Coin and Bullion	11,741,980
		Silver Bullion	
	26,391,980		26,391,980

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,000,800
Rest	3,528,877	Other Securities	17,632,471
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	3 926,955	Notes	6,288,460
Other Deposits	12,092,801	Gold and Silver Coin	905,678
Seven Day and other Bills	725,776		
	34,827,409		34,827,409

Dated the 15th August, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,829,296	Securities	27,730,271
Public Deposits	3,926,955	Coin and Bullion	12,647,658
Private Deposits	12,092,801		
	36,849,052		40,377,929

The balance of Assets above Liabilities being 3,528,877*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£255,404
An INCREASE of Public Deposits of	88,192
An INCREASE of Other Deposits of	273,821
An INCREASE of Government Securities of	100,000
A DECREASE of Other Securities of	277,179
An INCREASE of Bullion of	287,212
An INCREASE of Rest of	8,425
An INCREASE of Reserve of	530,638

The above return shows a further addition to the resources of the Bank, but in some quarters is hardly considered sufficiently favourable to justify the reduction in the rate of discount. The increase in the reserve, however, is very large, and the circumstance that the augmentation in the bullion has not been commensurately great is attributable to the requirements of the harvest. Another increase is shown in the Government securities, while, owing to the moderate demand for money, the other securities have again fallen off.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 21,448,553	£ 21,215,770	£ 22 521,853	£ 22,343,149	£ 20 879,296
Public deposits	6,393,552	5,698,342	6,229,336	5,955,219	3,926,955
Other deposits	8,617,141	13 701,744	14,240,460	12,792,434	12,092,801
Government securities	13,464,216	10,879 168	11,209,668	9,804,273	10,000,800
Other securities	12,698 000	15,188 677	18,291,096	19,338,734	17,632,471

Average price of wheat	41s 4d	45s 2d	43s 11d	59s 6d	51s 0d
Exchange on Paris (shrt)	25 10 12½	25 10 15	25 7½ 12½	25 12½ 20	25 40 47½
— Amsterdam ditto	11 16¾ 17½	11 16½ 17	11 13½ 14	11 14½ 15	11 19 19½
— Hamburg (3months)	13 8¼	13 8 8½	13 5¾ 5½	13 6 6¼	13 10¾ 11¼

In 1851, new revelations of the atrocities of Italian despotism were appearing both in the foreign and British press. The French Assembly had just been prorogued. The accounts from the Cape stated that the Caffre war continued, but that fresh bodies of troops would be required to effect the subjection of the rebels. At home, there had been a slight diminution in the visitors to the Great Exhibition, owing to the commencement of the harvest.

In 1858, the other securities of the Bank were steadily running off, and the rate of discount in the general market was a half per cent. below the Bank minimum, notwithstanding the impending payment of half a million on the Indian debenture loan. The war in China was on the point of terminating. The Atlantic Telegraph Cable was still capable of transmitting messages, but not with regularity.

In 1859, the money market was very easy, notwithstanding great activity in the manufacturing districts, a considerable drain of silver for India, an impending loan of 12,000,000*l* for Russia, and an Indian loan of 5,000,000*l*. Large arrivals of gold from Australia were announced.

In 1860, the Indian Budget had been discussed in Parliament, and authority taken for the issue of a loan of 3,000,000*l*. The Syrian and Italian questions were exciting uneasiness, especially in Paris. Some small expeditions of Garibaldians had made a descent on the mainland of Naples. The advices from America described great enthusiasm to be prevailing in the British colonies during the progress of the Prince of Wales.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 4,080,859*l*; in 1858, a deficiency of 1,486,933*l*; in 1859, a deficiency of 4,050,636*l*; and in 1860, a deficiency of 6,546,300*l*. In 1861, the deficiency is 5,539,670*l*.

DISCOUNT AND MONEY MARKET.—The Bank of England yesterday reduced their rate of discount from 5 per cent, at which it was fixed on the 2nd inst., to 4½ per cent.

The money market had for some days been showing increased ease, transactions having been reported in exceptional cases as low as 4 per cent. At the Bank there was a nominal demand only in the commencement of the week, and an early reduction was consequently anticipated, but the general impression was that a change would be delayed till next Thursday. Since the adoption of this measure, the discount market has been rather tighter, especially this afternoon, and the rate in Lombard street was generally the same as at the Bank. Occasionally, however, choice paper is taken at a fraction less.

On the Stock Exchange this morning, loans on Government securities were in active demand, and the rate was as high as 4½ per cent. Later in the day, however, the usual charge was not more than 4 per cent.

The payment of the 1,000,000*l* Victoria railway loan, less the 5 per cent. deposit, was effected to-day, and chiefly caused the increased demand on the Stock Exchange.

The discount establishments have lowered their interest on deposits from 4 per cent. to 3½ for money at call, and from 4¼ to 3¾ with seven days' notice. The joint stock banks have also reduced their terms to a uniform rate of 3½ per cent.; the London and Westminster, however, in accordance with their usual practice, giving 1 per cent. less on sums below 500*l*.

Subjoined are the rates of discount on the principal exchanges of the Continent. At Paris the charge is slightly lower. At one period it was only 4 per cent., but, owing to the large number of bills offering on account, it is believed, of purchases of corn in the English market, a subsequent reaction has taken place:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4
Vienna	6	5½
Berlin	4	2½
Frankfort	3	2
Amsterdam	3	3
Turin	5	5
Brussels	3	3
Hamburg	...	2¾
St Petersburg	7	...

ENGLISH FUNDS.—Consols have been steady at a slight improvement, the general fineness of the weather and the reduction in the value of money being the chief favourable influences. Against these, however, there are still exchanges into other investments, and hence little sign appears of any marked rally. The markets generally remain overweighted with stock, the public being still unattracted in any appreciable degree by the comparatively low price at which Consols now stand. Compared with the past week, however, an improvement of ¼ to ⅜ per cent. has occurred, the last official prices being 90½ to ⅝ for money, and 90¾ for the account. After regular hours the tendency was less firm.

Exchequer bills were dull until to-day, when a slight improvement has been established, the March issue leaving off at 14s to 8s discount, and the June 4s to 1s discount. India bonds are again 2s higher, closing at 7s to 2s discount.

The India Five per Cent. stock has been in good demand, especially this evening, and the price of the old has advanced to 100⅝ to ¾, and of the new to 101⅛ to ¼, being a rise of nearly 1 per cent. Investments continue to be

made in this security to the prejudice of other Government stocks.

FOREIGN STOCKS.—A further advance took place in the beginning of the week in Peruvian descriptions, but it has not been fully maintained, the old Four-and-a-half per Cents., after marking par, being last done at 98½. The Uribarren bonds, however, are steady. Turkish Six per Cents. have relapsed, particularly the 1858 stock, on the announcement of a further large contemplated issue of caïmés. Equador Consolidated is firmer on the remittance from the Government towards the payment of the interest on the debt. Buenos Ayres stocks remain without recovery.

The following satisfactory communication has been received with reference to the Equador debt:—

Ecuadorian Commission of Agency, 11 Austin-friars, London, Aug. 14.

Messrs Gutierrez and Co. have forwarded to their consignee in London 2,000 quintals of cocoa, with instructions to hand the proceeds (about 3,600*l*), when sold, to the fiscal agent of the Republic towards the payment of the interest on the consolidated debt.

French Three per Cents closed this evening on the Paris Bourse at 68f 45c, showing another rise of fully an eighth. Little business is being transacted, but the market appears strengthened by the speech of the Emperor on the opening of the new Boulevard.

Subjoined is a list of the highest and lowest prices of *Consols* every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

	Consols, Money		Consols, Account		Exchequer Bills

RAILWAYS AND OTHER SHARES.—The railway market was further prejudiced this week by the announcement of the proposed dividend of the London and North-Western at the rate of 3¾ per cent. per annum, against 5 per cent. last year, and a further decline occurred. To-day, however, there was a recovery, the speculators for a fall repurchasing to close their accounts, the half-yearly dividends being now generally known and their effect seen on the market. Apart from these operations, there is also rather a better feeling from the lower rate of money and improved appearance of the harvest. The tendency at the close to-day was consequently towards increased firmness.

In the colonial market, Indian guaranteed stocks continue to improve. Canadian descriptions remain without change, except Grand Trunk, which shows an advance.

Foreign railways have been firm, Great Luxembourg being especially higher. Brazilian shares have also for some days been rising steadily, particularly San Paulo and Bahia. Lombardo-Venetian at one time advanced to 1 to ⅝ prem., but have since relapsed to ⅞ prem. American railway securities have slightly rallied.

A memorial addressed to the Brazilian Government, requesting a renewal of the power of converting Pernambuco Railway shares into Imperial Brazilian Government stock, now lies for signature at the office of Messrs P. Cazenove and Co. It appears that the English shareholders, in consequence of impediments interposed by the Government, have been practically prevented from availing themselves of the privilege, whilst the Brazilian shareholders have been allowed to exercise it to a very large extent. The memorialists argue that the power of conversion having been freely conceded by the Brazilian Government, and accepted by the Pernambuco Board, is morally, if not legally, as binding on the Government as any of its other engagements, and cannot be permanently withdrawn without serious damage to Brazilian credit. The difficulties which the Pernambuco Company have experienced as the pioneers of railway enterprise in Brazil, as well as the limited nature of the original guarantee when compared with the concessions accorded to the Companies more recently established, are alleged as pleas for the favourable consideration of the present request.

The miscellaneous market shows no feature of importance. The shares of the new Mercantile Fire Insurance are quoted ⅜ to ⅝ prem., and the Commercial Union ¼ to ½ prem.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

RAILWAYS.	Closing prices last Friday,	Closing prices to-day.

FOREIGN EXCHANGES.—The rates this week are higher, especially that on Paris.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and the movements in Indian rupee paper:—

Gold.—Nearly all the gold brought into the London market is sent into the Bank, that establishment having purchased about 252,000*l* since our last circular (8th instant): this amount consisted of the remainder of the gold ex Great Britain, and some considerable amounts from France and Constantinople. The arrivals have been:—The Ethiope, from Africa, with 10,000*l*; the Atrato, from West Indies, with 30,800*l*; the North American, from Quebec, with 30,800*l*. The shipments have been:—The Bohemian, for Quebec, with 27,000*l*; the Canada, for Boston, with 39,000*l*; the City of Washington, for New York, with 5,300*l*; the Oneida, to the Brazils, with 1,935*l*; the Ellora, to Alexandria, with 2,000*l*. The Australian mail brings news of some additional shipments of gold to England; the vessels now on the way are:—The Marco Polo, with 26,000*l*; the Sussex, with 127,730*l*; the Koh i Noor, with 476*l*; the Orwell, with 155,000*l*; the Water Nymph, with 203,000*l*; making a total of about 512,000*l*.

Silver.—The Atrato has arrived from the West Indies with 98,000*l*; a great part of this will not be available for the mail of the 20th, to Calcutta and China, until it has been refined. There is not much demand for export, and we quote the price as about 60⅜d per oz standard. The Oneida has taken 9,500*l* to the Brazils, and the Ellora 53,425*l* to Bombay.

Mexican Dollars.—There are but few here, and but little doing in this coin; the nearest price we can give is 59d per oz, with a quiet market.

Exchange on India, for banks' drafts on Bombay and Calcutta, is 1s 11¼d to 1s 11⅜d for 60 days' sight; Madras, the same. Bills with documents, 1s 11d to 1s 11¼d, Bombay and Calcutta; Madras, rather under these quotations.

India Government Loan Notes continue without change. We quote 5½ per Cents., 101½ to 102, and 5 per Cents. 94½ to 95.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9½d per oz std; bar gold refinable, 77s 11d per oz std; Spanish doubloons, 76s 6d to 77s nominal; South American doubloons, 73s 6d to 73s 9d per oz, last price; United States gold coin, scarce. Silver—Bar silver, 5s 0¼d to 5s 0⅜d per oz std; bar silver, containing 5 grs gold, 5s 0⅛d per oz std, last price Mexican dollars, 4s 11d per oz, nominal; Spanish dollars (Carolus) in demand, scarce.

About 52,000*l* in gold was bought by the Bank yester-

day, and 24,000*l* to-day, making a total of 76,000*l* since the date of the last return.

About 30,000*l* in sovereigns were taken from the Bank to-day for Lisbon.

The Suffolk has arrived from Melbourne with 4,036 ounces of gold, worth about 16,000*l*.

PUBLIC COMPANIES.—A meeting of the General Iron Screw Collier Company was held on Tuesday, when the report was adopted, and a dividend declared at the rate of 10 per cent. per annum free of income tax. It was mentioned that the operations of the past half-year have been satisfactory, the profit realised being 6,923*l*. In the last report it was stated that the Company's vessel Black Brince had been run into and sunk by the Liverpool steamer Araxes, and a suit was accordingly instituted to recover damages. The usual cross action was brought by the Araxes, and, after some litigation, judgment was given against the company. The cost on this account has been debited to the reserve, which has also been charged with the balance of the disputed debts of 1857-8. A loss of 1,000*l* by the failure of the charterers of one of the Company's ships has been placed against revenue. Since the last meeting, a contract has been executed for the construction of a new steamer of 900 tons burden, which will be provided for out of the funds in hand. Some discussion took place upon a proposal to declare a bonus, but it was ultimately determined to leave the question to the next half-year.

A meeting of the Worthing (South Australian) Mining Company took place on Monday, when it was stated that the prospects of the mine are satisfactory, and that considerable reserves of ore have been laid open. Practically any quantity can be raised, but more furnaces are required; as, until the ore can be reduced to metal, shipments to this country give little or no profit. It was consequently resolved to issue the 8,010 shares as preference capital for the purpose of erecting additional furnaces. In answer to a question, it was stated that no further capital is intended to be raised.

At a meeting of the Atlantic Royal Mail (Galway) Steam Company, on Wednesday, the report mentioned that the statements of Lord Palmerston in the House of Commons on the 6th instant amounted in effect to a distinct and positive assurance that the Government will restore the contract and subsidy if the Company can prove their ability to carry out the service. The Directors consequently call upon the shareholders and Ireland in general to subscribe to the new preference capital of 600,000*l*, and thus enable them to carry out the arrangement for ensuring a full and efficient fleet of ocean steamers. Active measures have already been taken to strengthen the ships and adapt them to the requirements of the Admiralty, for which purpose contracts have already been entered into. After some observations the report was carried unanimously.

A meeting of the Crown Preserved Coal Company has just taken place, when the report announced that preserved coal has been sold to the largest steam companies in the kingdom, and has given entire satisfaction, so as to induce a repetition of orders. New works have been completed, by which the production will be doubled, and at the same time the cost will be diminished. The accounts show a profit at the rate of nearly 9 per cent. per annum, but it was thought advisable not to declare a dividend at present.

At a meeting of the Pneumatic Despatch Company, it was stated that their system has proved both mechanically and scientifically a complete success. With regard to its commercial and financial character, the Directors have not yet been able to come to a definite decision as to the course to be adopted. There are several sources from which a large income is expected, especially the Post Office and the large railway companies with termini in London. Before the next meeting, the Board will probably have made its conclusive arrangements respecting the future operations of the Company.

A meeting of the East India Irrigation Company was held yesterday, when a report was presented by which it appeared that, after some long and difficult negotiations, the Government has conceded the question in dispute with regard to the profit the Company is entitled to claim, and a draft contract has been drawn up and forwarded to Calcutta for approval. This document is expected to be executed and returned at the earliest opportunity, and the preliminary surveys will then be commenced. The district that is to be brought into cultivation is very large and fertile, and especially adapted to cotton and corn. It is also known to contain large forests of teak.

At the Berlin Waterworks Company's meeting on the same day, the report was adopted, and a dividend declared of 1s 6d per share. The progress of the undertaking in the past half-year was stated to be satisfactory, although rather slow. The new houses connected with the mains is 154, and 177 more are being fitted with water services. Notwithstanding the severe frost during the last winter, no portion of the pipe system has sustained damage. The whole of the works have been and are now maintained in a thorough state of efficiency. The Directors have considered it inopportune to negotiate for the extension of their concession, but will shortly have a favourable occasion for doing so on the projected establishment of a system of sewerage at Berlin. A sum of 300*l* was voted for the remuneration of the board.

The Directors of the Agra and United Service Bank have announced an ad interm dividend of 2*l* 10s per share for the half-year ending in June, being at the rate of 10 per cent. per annum.

The dividend to be proposed by the Ottoman Bank at their ensuing meeting is at the rate of 8 per cent. per annum, with an appropriation of 3,000*l* to the reserve.

The Commercial Union Fire Insurance Company has been started, with a proposed capital of 2,500,000*l*, in 50,000 shares of 50*l* each. The first principles of the Company will be the establishment of an equitable classification of risks, as regards both merchandise and warehouses, and more liberal arrangements than are now obtainable upon floating and short-time policies.

FAILURES AND MERCANTILE EMBARRASSMENTS.—A first dividend of 3d in the pound has just been announced to the creditors of Mr J. A. Blaikie, who failed some time back with heavy liabilities at Aberdeen. A further distribution of like amount is expected.

At a meeting of the assignees and principal creditors of the estate of Mr W. R. Wagstaff, wharfinger, who failed last January, held at the offices of Messrs Cooper, Brothers, and Co., the accountants, on Wednesday, a resolution was passed to prosecute the claim of 150,000*l* against Sir M. Peto, for commission on the contract for the construction of the Sardinian "Littoral" Railway.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.40 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 6-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 427½ per mark, and the short exchange on London is 13.8¼ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 9-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 107½ to 108 per cent., which, when compared with the mint par

between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of *new* wheat at Mark lane, to-day, was moderately extensive, and the demand for it ruled steady, though not to say active, at from 56s to 66s per quarter. It was almost wholly comprised of white samples. Of old qualities, there was a good supply for the time of year, and, although there was a slightly improved inquiry for superior sorts, prices were quite 2s to 3s per quarter lower than on Friday last. Foreign wheat met a slow sale, and, in some instances, the currencies ruled the turn easier. Barley was dull, and *new* malting was obtainable at from 34s to 38s per quarter. Good and fine oats moved off steadily, at full quotations, but low parcels were 6d per quarter cheaper. Beans sold at former prices. *New* white peas were quoted at 40s; and *new* grey ditto at 34s to 36s per quarter, being reduced rates. Most kinds of flour were tolerably firm in price, but the amount of business doing was much restricted. This week's imports amount to 13,990 quarters of wheat, 2,280 barley, 38,130 oats, and 20,100 barrels of flour.

At Liverpool, this morning, wheat gave way 1d per cental. Flour sold slowly, and nearly all kinds of spring corn were a dull inquiry, at barely late rates.

The wheat trade at Alexandria, Aug. 3, was very firm, and prices showed an advance of 6d to 1s per quarter. Beans realised a similar improvement. Linseed was in limited supply, and changed hands at extreme rates. Wheat, private trade produce, sold at 29s 6d to 30s 9d; Beheireh do., 28s to 29s 6d; white do., 30s to 31s; do. Pasha's produce, 30s to 31s: beans, private trade produce, 25s 3d to 26s 3d; Beheireh do., 23s 10d to 24s 8d; do. Pasha's produce, 23s 9d to 24s 6d: barley, 16s 6d to 17s 6d; lentils, 23s 6d to 24s; linseed, Pasha's produce, screened, 43s 10d per quarter, free on board. Freight was quoted at 4s 6d to 5s for beans to the United Kingdom for orders; other grain and seed in proportion. To a direct port, 4s 3d to 4s 9d; by steamer to Liverpool, 3s per quarter.

The sales in the Liverpool cotton market have this week been small, say 46,000 bales, of which spinners have only taken 32,000

bales. Their large purchases a few weeks ago enable them to curtail for a short while their operations below their weekly wants. Holders act with confidence, and quotations are barely changed; only Surats have given way about ⅛d; the quantity on hand and floating is very large in proportion to the consumption. It is quite clear that spinners only very reluctantly go back to East India cotton, but the gradual reduction of the stock of American cotton must soon bring Surats into more extensive use, the position of American cotton becoming every day more precarious. The present stock would, without any alteration in the consumption, be exhausted in the beginning of December, and even before if the export demand remains so extensive.

The following is Messrs Briggs and Co.'s report of the cotton trade at Alexandria, under date Aug. 3:—The small quantity of cotton which appears in the market meets with numerous buyers. The sales for the past week are as follows:—83 bales sweepings to low ordinary, at 4½d to 7d; 96 bales ordinary to middling, 7.56d to 8.16d; 145 bales good middling to fair, 8.44d to 8.58d; 48 bales good fair to good, 8.80d; 13 bales good to fine, 9.86d per lb, free on board. Freights by steamer are at 3-16ths of a penny per lb in full.

The public sales of tea held this week have been rather extensive; nevertheless, they have gone off with increased animation, and, in some instances, enhanced rates have been obtained. By private contract, only a moderate business has been transacted, but prices have ruled firm.

The following intelligence in reference to tea and silk is dated Hong Kong, June 28:—

Canton Silk—Settlements of the new crop have been made to the extent of 20 to 30 piculs, at increased rates. It is reported that the second crop will be almost a failure. Quotations are as follows:—Loongkong, 410 dols; Kumchuck, 400 dols; Kowkong, 375 dols; re-reeled Kumchuck, 440 dols; Mahtow, 170 dols. Tea—One chop of country congou has been settled during the fortnight, leaving one chop on market. No arrivals have taken place, but musters of the new Oopeck are expected to be on the market in a few days. Scented orange pekoes are 1 to 2 taels lower, and scented capers may be quoted slightly easier. Tayshan congou continues to be quite neglected, owing to the high rates asked. Greens continue in fair demand. Sales are as follows:—Country congou, 1 chop; Canton-packed congou, 1,500 half-chests, at 18½ to 20 taels; Tayshan congou, 250 half-chests, at 12 taels; scented orange pekoe, 6,000 boxes, 22 to 31 taels; scented caper, 2,000 boxes, at 25 to 30 taels; Canton gunpowder, 1,000 boxes, at 17 to 23 taels; Canton young hyson, 5,000 half-chests, at 16 to 24 taels. Country Green Teas—Sales, 6,200 packages. Stock, 1,700 packages. Quotations:—Hyson skin, common to good, 20 to 24 taels; young hyson, medium, 28 to 29 taels; superior, 30 to 32 taels; fine to finest, 34 to 45 taels; hyson, medium to finest, 31 to 65 taels; gunpowder, fine to finest, 36 to 52 taels. Freights—To London, 3*l* per ton; to New York, 10 dols to 12 dols. Advices from Amoy to the 19th inst. Tea—Arrivals of the new crop amounted to 16,127 half-chests. No settlements had been made. An offer of 18 dols for the finest chop of orange pekoe had been refused. Foochow advices are to the 17th inst. Tea—Great eagerness was shown by buyers up to the 8th inst., when a few days of less activity occurred, owing to the vessels to be first despatched being provided with cargoes, and the heavy floods in the river, which rather impeded business. From the 10th to the 14th there was a decidedly easier feeling, and a downward tendency in prices, but the week closed with some considerable purchases at rates quite equal to the highest point. The opinion was very general that this season's crop will be found inferior to last, and the supply of fine and finest was decidedly small. None of these classes were in the stock. Sales since the opening of the market are as follows:—Congou, 48,200 chests, at 15 taels to 31 taels, short; pekoe, 670 chests, at 27 taels to 38 taels, short; scented teas, 2,500 boxes, at 24½ taels to 31 taels, short. Stocks—Congou, 24,000 chests; souchong, 4,200 chests; Oolong, 1,030 half-chests; pekoe, 1,030 chests; scented teas, 1,500 boxes. Five vessels have sailed, and a sixth is nearly ready. Shanghai advices are to the 18th inst. Silk—Settlements for the fortnight amount to 2,000 bales, making a total of 85,000 bales for the season. Stock estimated at 2,500 bales. From the total absence of good silk, quotations could only be given for the inferior qualities, being respectively 350 taels to 385 taels for Tsatlee, and 240 taels to 290 taels for Taysaams. No new silk had yet arrived, but it was reported that 430 taels had been paid in the interior for No. 3 Tsatlee. Total export of silk from China to Europe is 84,438 bales, against 68,669 last year, or an increase of 15,469 bales for this season. Tea—The only new feature to notice in the market is the arrival of four chops of new season's Oopeih from Hankow, which are of superior quality in make and liquor to those of last season. Further supplies may be expected shortly from that port. Purchases amounted to about 2,200 chests of Ningchow, at 23 to 25 taels; and 300 chests common congou, at 18 taels. Greens—A small business had been done at former rates, amounting to about 3,000 half-chests, received from Ningpo and resold there. 1,500 half-chests of Japan had also found buyers. Stock—Ningchow, 1,500 chests; Shanghai packed congou, 1,500 chests; flowery pekoe, 1,000 chests; country greens, 4,000 half-chests; Japan greens, about 3,000 packages. Freights to London 4*l* for tea, and 5*l* for silk. Total export of tea from China to Great Britain is 88,779,700 lbs, against 81,162,600 lbs to same time last year, showing an increase for this season of 7,617,100 lbs. To the United States the export is 25,453,700 lbs, against 30,482,000 lbs, or a decrease of 5,388,300 lbs for the present year.

Good and fine qualities of raw sugar have continued in steady request, and the quotations have been well supported. Inferior qualities, however, have sold heavily, at barely late rates.

The supply of coffee on offer has been large, and the trade have bought freely, at the extreme prices of last week.

The following is dated Colombo, July 17:—

The clearances outwards with cargo, since our last, have been considerable, viz.:—

PLANTATION COFFEE.

To Great Britain	cwts 395,411	against last year,	cwts	374,408
Foreign Ports	23,814	—	—	30,391
Australia and India.....	14,086	—	—	9,150
	433,311			413,949

NATIVE COFFEE.

To Great Britain.....	cwts 71,116	against last year,	cwts	75,669
Foreign Ports.....	50,052	—	—	67,269
Australia and India.....	6,326	—	—	2,376
	127,494			145,314

In rice, the dealings have increased, and a full average business has been passing in most kinds, at fully previous rates.

The Government have accepted tenders for 54,440 gallons of rum, and the market is firm, though by no means active, at full prices. Brandy commands further enhanced currencies.

The accounts from the Morea and the Islands respecting the crop of fruit being of a favourable nature, the trade there is in a sluggish state, and prices are with difficulty supported.

The public sales of colonial wool have been progressing steadily, as regards all good and fine qualities, but for inferior samples the biddings have continued inactive. In prices no further change has taken place beyond that already noticed, viz., of from 1d to 3d per lb compared with the previous prices. The sales will be brought to a close on the 27th inst. By private contract, very little is doing.

Hemp, flax, and saltpetre have changed hands to a limited extent, yet prices have ruled about stationary.

In the metal trade, the principal feature is considerable animation in the demand for spelter, at 17*l* 5*s* per ton, on the spot. Scotch pig iron has fallen to 50s 6d cash for mixed numbers.

From Calcutta, we learn that the crop of indigo was likely to turn out unsuccessfully. The market here is firm, but dealers only operate to meet actual wants.

Linseed oil is less active, at 31s 9d to 32s per cwt, on the spot. Rape moves off steadily, at 42s 6d to 43s for foreign refined, and at 40s 6d to 41s for brown. In other oils a very moderate business is doing. Turpentine is dull, and American spirits have declined to 48s per cwt.

Tallow has further declined in value. New P.Y.C. is now quoted at 45s per cwt on the spot; and at 45s to 45s 6d for January to March delivery. Town tallow, 46s 6d, nett cash.

"The feeling in trade circles," observes the New York *Shipping List* of the 3rd inst., "continues very much depressed, and the oppressiveness of the weather has a tendency to intensify it. In financial circles the aspect of things remains without perceptible variation. In money matters we have nothing to add to our previous remarks. Loans on call, with first-class securities, are easily effected at our previous quotations. First-class signatures are also easily accommodated. We quote:—

	Per cent. per annum.
Loans on call, stock securities	4 to 5
Do. bond and mortgage	6 7
Prime endorsed bills, 60 to 90 days	6 7
Do. 4 to 6 months.....	9 10
First-class single signatures	7 ...
Other good bills	... ...

The stock market assumed a more buoyant tone on Thursday, and though there was no great activity, the operators for a rise succeeded in realising somewhat higher prices than those current on Tuesday last. There was more activity yesterday, however, when nearly all descriptions experienced a further appreciation, and a good business was done."

The weekly Bank statement shows but little variation from last week. The banks were never so strong. Notwithstanding the fact that a large amount was paid into the sub-treasury last week, the specie shows a slight gain. The figures are as follows:—

	July 20.		July 27.			
	dols		dols			dols

Deposits	93,298,195	...	93,687,933	...	Inc.	389,738

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, July 31.—The market for State and Western flour remained steady, under a fair demand for consumption and export, at full prices, until yesterday, when the demand was less active, and prices declined about 5 cents on nearly all kinds. The sales for the three days are moderate, comprising 42,000 bbls. Canada flour remains steady, under a fair demand, at full previous prices. Southern flour is dull, but there is no change in prices. The sales for the three days comprise 4,200 bbls, including 650 bbls yesterday, at previous rates.

EXPORT from 1st to 13st July.

	1861. barrels	1860. barrels
Wheat Flour	280,658	222,748

The market for wheat has presented the same characteristics which have been observable in the flour market, the demand having been tolerably active at full prices until the receipt of the less

favourable advices, when the demand abated somewhat, and the market became depressed, while to effect sales to any considerable extent, holders would have been compelled to grant a concession. The sales for the three days comprise 490,000 bushels. Corn has been active, but prices have fluctuated somewhat, closing yesterday with considerable firmness at about our previous quotations.

EXPORT from 1st to 31st July.

	1861. bushels	1860. bushels
Wheat	3,023,962	1,419,887
Corn	381,791	177,386

NEW YORK, Aug. 3.—The flour market was firmer for shipping grades of State brands. The higher qualities of extras were unchanged. The recent concession in rates of freight led to increased sales for export. Canadian flour ruled firm for extra brands. Wheat was firm for good shipping lots of red, amber, and white, chiefly for export. The sales were to a fair extent, and embraced about 140,000 bushels. Corn was firm, and in good request, with sales of 125,00 bushels.

EXPORT from July 1 to July 31.

	1861.	1860.
Flour ...brls	280,658	232,748

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Harvest work having made considerable progress, most of the leading markets have been seasonably well supplied with new wheat in excellent condition. About 1,200 quarters have been disposed of here, at from 56s to 66s per quarter. The samples sold have weighed from 61 lbs to 66 lbs per bushel. Last year's wheats have met a dull inquiry, and, to have forced sales, a considerable reduction in price must have been submitted to. Foreign wheat has come freely to hand, and the currencies have ruled somewhat easier. Some remarkably fine new barley has made its appearance, and the rates have ranged from 35s to 40s per quarter. Foreign barley has been much neglected, but most kinds of malt have commanded full currencies. No change has taken place in the value of oats, in which the transactions have been on a very moderate scale. Beans and flour have been much neglected. New white peas have changed hands at 40s; grey ditto, 38s to 40s per quarter.

The accounts which have come to hand from nearly all parts of England state that considerable quantities of wheat and other grain have been carried in excellent condition, and that the crops generally give promise of a fair average growth. Barley is likely to turn out the largest crop on record.

In Ireland and Scotland, the crops are looking well; but, as yet, very little progress has been made in cutting. With some few exceptions, potatoes are looking remarkably well.

Throughout the Continent, the transactions in wheat have been on a very moderate scale, and the demand for spring corn has been far from active. The latest accounts from New York bring very little change in the value of either wheat or flour.

The supply of both old and new wheats at Mark lane to-day was tolerably extensive. For the former there was rather more inquiry, yet the trade for them must be considered heavy, at 2s to 3s per quarter less money than on Friday last. The latter, however, met a steady sale, at from 56s to 66s per quarter. In foreign wheat very little was doing, and, in some instances, the currencies ruled the turn in favour of buyers, more especially for American parcels. Barley was dull and cheaper, new malting being quoted at 34s to 38s per quarter. The demand for oats ruled heavy, and, in some instances, prices were 6d per quarter lower. Beans were scarce, and sold at previous rates. Peas were dull. New grey parcels were obtainable at 34s to 36s, and new white at 40s per quarter. The flour trade was dull; nevertheless, the quotations were fairly supported.

The trade in floating cargoes is thus reported by Mr E. Rainford:—Since the 7th inst. to last night there have been reported 38 arrivals off coast for orders, consisting of 18 cargoes of wheat, 15 maize, and 5 miscellaneous, viz.:—Wheat, 7 cargoes from New York, 1 Philadelphia, 2 Montreal, 3 Taganrog, 1 Odessa, 2 Marianople, 1 Berdianski, 1 Galatz; maize, 1 New York, 6 Ibraila, 4 Sulina, 3 Galatz, 1 Giurgevo; barley, 1 Sulina, 1 Marianople, 1 Odessa; beans, 1 Mazagan; peas, 1 Montreal. Several of these were previously sold. The business in cargoes afloat since this day week has been moderate, the demand continuing for France, but less active the last two days. The prices paid are:—Wheat, arrived, per 492 lbs (for the United Kingdom), Berdianski, 3 cargoes, at 52s 6d; Marianople, 53s 3d; Taganrog Ghirka, 48s 3d; Odessa Ghirka, 52s; per 480 lbs, Saide (for London direct), 34s 9d; for United Kingdom, red winter American, supposed 55s; prime red American (sold in Dublin), equal to 51s 3d; white American, 58s 6d; for the Continent, Milwaukee and Wisconsin, supposed 52s; W. spring, supposed 52s; on passage, per 480 lbs, for the United Kingdom, amber Milwaukee, 48s. Maize, arrived, per 492 lbs, for the United Kingdom, Galatz, 32s 6d, and a large cargo, 31s 9d; on passage, Ismail, 32s; for shipment in September, 7,000 quarters Galatz, 32s 6d; arrived, per 480 lbs, for United Kingdom, Ibraila, 31s 3d, 31s, and equal to 31s 9d; for the Continent, Ibraila, 32s 3d; on passage, for the United Kingdom, Ibraila, 31s 9d, and 31s; for shipment in August, 6,000 quarters Ibraila, 30s 11½d. Barley, on passage, per 400 lbs, Egyptian, 24s 6d, for London direct.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market remains quiet; crystallised descriptions have sold rather dearer, but prices of all other kinds are without alteration. A steady demand continues to be experienced for floating cargoes of Havana for the United Kingdom, but few inquiries are made on Continental account. The deliveries last week were only 4,544 tons, against 5,614 tons last year, and the stock has further increased to 78,994 tons, against 70,858 tons last year. The business in West India to yesterday amounted to 2,220 casks. 350 casks Barbadoes, by auction, partly sold at 32s 6d to 40s for brown to good yellow, and 100 hhds crystallised Demerara at 39s to 43s per cwt.

Mauritius.—5,900 bags all sold: low to fine soft brown, 29s 6d to 34s; half grainy, 41s 6d to 43s; and crystallised, 42s to 42s 6d per cwt.

Bengal.—733 bags all found buyers, Gurpatta date at 41s 6d to 42s, and fair colourly sirups at 45s 6d per cwt.

Madras.—About 750 bags native brown have sold at 30s to 31s per cwt.

Penang.—722 bags were partly realised at 34s to 41s for brown to fine yellow.

Foreign.—Four floating cargoes Havana have been purchased for outports at 23s 6d to 25s 9d for Nos. 9 to 12; also one of 450 casks Cuba

muscovado, at 22s 6d; also one of the latter description, 1,000 casks, at 22s 6d per cwt. for Havre. By auction, 1,170 hhds 670 bbls Porto Rico mostly sold at 32s 6d to 43s 6d for brown to fine yellow; 313 hhds Cuba muscovado at 33s to 37s for brown to good middling yellow. 240 boxes white Havana, in bond, realised 30s to 31s, and 250 bbls 3,900 bags brown Bahia were bought in at 32s to 35s 6d per cwt.

Refined is in rather better demand, and goods are not easily obtainable at last week's quotations of 49s to 50s 6d for common lumps to fair tillers.

MELADO.—400 casks sold at 22s 6d to 26s 6d; duty, 10s 4d and 12s 8d per cwt.

RUM.—A moderate demand, at previous rates. Some further business is reported in East India at 1s 6½d; and about 400 casks West India Leewards at 1s 7d to 1s 8d; and Demerara and Berbice, 1s 8d to 1s 10d per proof gallon.

COCOA.—Grenada is 6d to 1s dearer and in good request. Trinidad realises full prices. 890 bags Trinidad part sold at 50s to 66s for grey to fine red; Caraccas kind, 95s. 791 bags Grenada all sold at 50s to 51s per cwt.

COFFEE.—Market continues to be freely supplied, but all offered has been taken off at extreme prices for plantation, and an advance of fully 6d per cwt for native. 1,924 casks 681 barrels and bags plantation Ceylon brought 68s to 79s for fair ordinary to fine; 1,200, bags native 60s to 63s per cwt. 524 cases Neilgherry realised 70s 6d to 71s 6d; and a few cases fine Wynaad plantation, 82s to 83s. 7,830 bags Java from Macassar sold at 64s to 66s, fine to fine ordinary palish and brownish. A small parcel Costa Rica went at 68s to 68s 6d per cwt. A floating cargo of 2,850 bags good firsts has been taken at 47s for the Mediterranean. The Dutch Company's autumn sale will contain only 390,000 bags, against 557,000 bags in 1860.

TEA.—A better tone prevails. Public sales, offering 25,750 packages, were held on Tuesday and Wednesday, and nearly two-thirds sold; scented caper bringing ½d to 1d per lb advance. Common blackish leaf congou sold at 1s 1d; fine flowery pekoe, at 1s 11½d; some medium souchong, at 1s 4½d; and very fine Ping Suez gunpowder, 3s 4d per lb. A sale of 1,600 packages Assam is announced for next Wednesday.

RICE.—Rather a large business has been transacted in soft grain kinds, upwards of 40,000 bags having changed hands; Bassein, Rangoon, and Necrancie at 8s 6d to 10s; Java, at 13s to 13s 6d; Ballam, at 9s 6d to 10s; and white Bengal, at 10s to 11s 3d. 4,120 bags of the latter in public sale were partly sold 10s to 13s 9d for ordinary to fine. Two floating cargoes of soft grain have sold at 10s 4½d, open charter, quality guaranteed; and one arrived at 9s 10½d for a near port.

IMPORTS and DELIVERIES of RICE to August 10, with STOCKS on hand.

* The deliveries of duty-free goods for export are not given now and the total will be shown under the head of home consumption.

SPICES.—870 bags pimento in public sale were mostly taken in at 2½d. 720 bags Sumatra black pepper part sold at 3¾d to 3⅞d; 500 bags Trang brought 3⅝d to 3¾d per lb. Of white, 150 bags Singapore have sold at 5½d per lb. Ginger is steady. Cassia lignea is rather cheaper: 490 boxes part sold at 82s to 88s per cwt.

SALTPETRE.—Bombay is rather firmer. Bengal steady. About 4,500 bags have been sold: Bombay, refraction 58 to 31½, at 30s 6d to 31s 3d; and Bengal, refraction 8½ to 3 per cent., at 34s 6d to 36s 6d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to August 10, with STOCKS on hand.

SHELLAC.—Steady demand, at firm prices. Sales of good livery orange have been made at 9*l* 10s; native orange, at 9*l* 12s 6d to 10*l*; and D. C., at 10*l* 17s 6d per cwt.

SAFFLOWER quiet. A parcel of Bengal, offered by auction, was bought in at 4*l* 5*l* to 6*l* 15s per cwt.

CUTCH and GAMBIER are slow of sale; the former is quoted at 22s to 22s 6d for good quality; the latter at 15s to 15s 6d per cwt.

METALS.—Spelter has further advanced 10s to 15s per ton, sales having been effected at 17*l* 5s to 17*l* 10s per ton. Tin remains dull; notwithstanding the late reduction in price. Scotch pig iron has receded to 50s 6d cash for mixed numbers.

JUTE has experienced a better demand, and the public sales on Wednesday offering only 1,836 bales, an advance of 10s per ton was obtained: ordinary to good quality realised 12*l* 12s 6d to 18*l* 15s per ton.

COIR GOODS.—The only change to note is in yarn, which has sold readily at 1*l* to 2*l* per ton advance for fine qualities: ordinary to fine went at 18*l* 10s to 41*l* per ton.

LINSEED.—An extensive business has been transacted in Calcutta, upwards of 2,000 tons having been sold at 56s to 56s 6d c.f.i.; a portion for arrival. Bombay is quoted at 58s per quarter. Afloat, a cargo of Berdianski has been sold for the United Kingdom at 56s 3d delivered, and one of Archangel at 52s.

OILS.—Linseed sells at 31s 9d, being rather cheaper. Rape meets a good demand at 40s 6d to 41s for brown, and 42s 6d to 43s for refined. The common qualities of olive continue in request. Mogadore realises 49*l*; Gallipoli, 57*l* 10s to 58*l* per tun. Cocoa-nut dull of sale, at 43s 6d for Ceylon, and 44s 6d for Cochin. Palm is cheaper: fine obtainable at 42s 6d to 43s. In fish oils there is nothing doing.

TURPENTINE.—Spirit has receded to 48s. Rough is neglected: nominal value, 15s to 16s per cwt.

TALLOW continues to decline. Old P.Y.C. was yesterday quoted at 43s 6d to 44s 6d; new, for delivery last three months of the year, 45s; and spring delivery, 45s 6d per cwt, showing a general reduction of 1s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, August 12.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—Good grocery sugars continue steady, but inferior qualities have barely supported previous rates. 2,327 bags grainy Mauritius, in auction, realised 42s to 44s 6d; and 640 bags brown and yellow Havana, 34s to 39s per cwt. A floating cargo of Cuba muscovado has been sold for Havre, at 22s 6d per cwt. The business in West India has amounted to 890 hhds, making 3,111 hhds for the week.

COFFEE.—170 casks 106 bags plantation and 470 bags 69 casks native Ceylon sold at previous rates. 131 bags Costa Rica brought 69s to 73s for fine fine ordinary to middling.

SPICES.—497 bags of pimento partly sold at 2⅝d to 2⅞d per lb. 329 cases 58 bags Tellicherry white pepper were all sold 9¼d to 1s 1½d, one lot 1s 5½d; and 495 bags black at 4⅛d to 4⅝d per lb.

RICE.—There is still an inquiry for soft grain. Several parcels have sold on the spot at previous rates, and a floating cargo of Necrancie Arracan at 10s 4½d, with guarantee.

SALTPETRE.—1,000 bags Bengal, in auction, were taken in at 35s to 36s 6d, for 7⅛ to 7⅜ per cent.

METALS.—Scotch pig iron closes at 50s 7½d to 50s 9d. 150 tons spelter have sold at 17*l* 5s on the spot.

OILS.—Linseed, 31s 9d to 32s. Cocoa-nut, at the auction, sold at 41s to 42s 9d for fair to fine Sydney. 271 casks palm were all taken out, there being no demand.

TALLOW.—The market closes dull at 45s spot and last three months; and 45s 6d spring. Of 1,107 casks in sale, 361 sold: fine South American at 45s to 46s; Australian best, 42s to 42s 6d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues very steady. Treacle for the better qualities scarce. For export, some few sales have been made in crushed at 33s 6d in barrels. From Holland the accounts are very firm for crushed.

GREEN FRUIT.—More business doing than is usual at this period of the year. The sales of West India pine apples much diminished from landing in bad condition. Lemons improved in value; a parcel of Lisbon, sold by Kreling and Hunt at public sale, went at higher rates. Para nuts in good demand, with a daily decreasing stock. More inquiry for Barcelona.

DRY FRUIT.—Nothing doing in fruit. Reports of crops excellent.

ENGLISH WOOL.—Nothing doing. If sales are made, prices in favour of the buyer.

COLONIAL WOOL.—The sales will close on the 27th instant, the subsequent days having been withdrawn. Prices are without change.

FLAX unaltered.

HEMP.—Market steady, and a fair demand during the week at our quotations. The low price here, compared with those paying at St Petersburg and Riga, is now drawing the attention of buyers, as well as an expected short supply this season.

COTTON.—Sales of cotton from Friday, 9th August, to Thursday, 15th August, inclusive:—100 bales Surat at 6d for fair old Dhollera; 800 bales Tinnevelly at 5¾d to 6¼d for fully middling to good fair. The transactions have been limited and the market dull, the business being chiefly in Tinnevelly cotton at fully last week's quotations. 100 bales Surat have also brought full prices, and altogether the market closes steadily. Yesterday, 380 bales damaged and all faults cotton were offered at public sale; the following were sold at high prices:—140 bales East India, at 2⅝d to 5½d; 100 bales American, damaged by fire and sea water, 5d to 6d. Yesterday, the Bank reduced the rate of discount from 5 to 4½ per cent. P.S.—Market firm. Sales to-day, 100 good fair Tinnevelly, 6¼d; 200 fair Dhollera, 6d.

SILK.—Little or no alteration this week in the silk market. Trade continues extremely dull, last advices from China having no effect either way, prices continuing the same.

TOBACCO.—There has been more demand both for home trade and exportation, and a fair amount of sales effected at very full prices.

LEATHER AND HIDES.—Since last week's report of the leather and hide markets, nothing of much importance has arisen to warrant an alteration in prices, or to cause much variation in prospects. The supply of fresh leather at Leadenhall this week (notwithstanding the very favourable weather for drying) was small, but the buyers there were not numerous. During the past week, however, there have been considerable inquiries for leather; much has been sold; and thick English and foreign butts, as well as calf-skins of middle weights, are scarce, and in good demand.

METALS.—The metal market keeps steady, and the slight improvement noted last week is mostly maintained. Copper is very firm indeed, and in spite of an enormous stock of foreign copper of different kinds, there is even a chance of an advance in quotations of English. Iron continues to be uniformly dull of sale. Tin is inactive, but prices are maintained. Lead is unchanged. Tin plates continue to be neglected.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	48	6
Fat by ditto	2	5
Yellow Russian	47	0
Melted stuff	34	6
Rough ditto	19	6
Greaves	18	0
Good dregs	7	0

METROPOLITAN CATTLE MARKET.

MONDAY, Aug. 12.—The total imports of foreign stock into London, last week, amounted to 9,697 head. In the corresponding period in 1860, we received 15,057; in 1859, 10,622; in 1858, 9,518; in 1857, 8,922; in 1856, 5,028; and in 1855, 8,867 head.

The show of foreign stock on offer here to-day was large, and sales progressed slowly in all descriptions, at, in some instances, a decline of 2d per 8 lbs. From our own grazing districts the arrivals of beasts were seasonably extensive, for the most part in fair condition. All breeds met a dull inquiry, and for middling and inferior descriptions prices further gave way 2d per 8 lbs. The general top quotation was 4s 8d per 8 lbs. About 2,000 Shorthorns, crosses, &c., came to hand from Lincolnshire, Leicestershire, and Northamptonshire; 800 various breeds from other parts of England, 180 Scots and crosses from Scotland, and 160 oxen from Ireland. We were fairly supplied with English, but extensively with foreign sheep, and the mutton trade ruled heavy. Prime Downs and half-breds supported last Monday's currency, the top quotation for mutton being 5s 4d to, in a few instances, 5s 6d per 8 lbs; otherwise prices ruled in favour of the butcher, to the extent 2d per 8 lbs. The lamb trade was very dull, at fully the late decline in prices. The finest breeds sold at 5s 8d per 8 lbs. The demand for calves, the supply of which was moderate, was in a sluggish state, at late rates. Prime veal realised 4s 6d per 8 lbs.

SUPPLIES.

	Aug 13, 1860.	Aug 12, 1861.
Beasts	4420	4660
Sheep and lambs	24250	29280
Calves	257	288
Pigs	300	520

THURSDAY, Aug. 14.—*The supply of beasts on sale in to-day's market was moderate. The primest breeds moved off steadily, at full prices; otherwise, the trade was in a sluggish state, at Monday's decline in the quotations. We were fairly supplied with sheep, and the demand ruled inactive at late currencies. The top value was 5s 4d to 5s 6d per 8 lbs. Good and prime lambs were in improved request at extreme rates, but inferior breeds sold slowly on former terms. A few pens realised 6s per 8 lbs. Calves met a very heavy sale, and in some instances prices ruled somewhat easier. Pigs changed hands slowly at late rates.*

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	2	10	3	2	Prime Southdown sheep	5	0	5	4
Second quality *ditto*	3	4	3	8	Large coarse calves	3	4	3	10

Lambs, 5s to 6s.

Total supply—Beasts, 990; sheep and lambs, 11,440; calves, 410; pigs, 390.
Foreign supply—Beasts, 312; sheep 1,480; calves, 280.

NEWGATE AND LEADENHALL.

FRIDAY, Aug. 16.—Only moderate supplies of meat continue on sale here. Prime qualities move off steadily, at full quotations; otherwise, the trade, owing to the unfavourable weather, is in a sluggish state, and prices rule somewhat easier.

Per 8 lbs by the carcase.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Old meadow hay, 2*l* 0s to 5*l* 0s; new do., 2*l* 0s to 4*l* 0s; old clover ditto, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 10s to 5*l* 0s; and straw, 1*l* 6s to 1*l* 12s per load. Trade dull.

CUMBERLAND.—Old meadow hay, 2*l* 0s to 5*l* 5s; new ditto, 2*l* 0s to 4*l* 0s; old clover, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 10s to 5*l* 0s; and straw, 1*l* 6s to 1*l* 12s per load. Both hay and straw changed hands slowly, at our quotations.

WHITECHAPEL.—Old meadow hay, 2*l* 0s to 5*l* 0s; new ditto, 2*l* 0s to 4*l* 0s; old clover, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 10s to 5*l* 0s.; and straw, 1*l* 6s to 1*l* 12s per load. A slow demand.

HOP MARKET.

BOROUGH, Monday, Aug. 12.—The reports from those districts of the hop plantations which are favoured with bine are most favourable, having made, with the recent hot weather, great prorgess; but on the low grounds in the Weald of Kent and Sussex, the bine appears exhausted and incapable of any further effort. On the whole the feeling is more in favour of the advanced duty of 110,000*l* being realised. Our market is very inactive, and prices must be quoted from 5s to 10s per cwt lower.

FRIDAY, Aug. 16.—The accounts from the plantations are rather more favourable, and all kinds of hops meet a dull inquiry, at quite the above decline in the quotations. Duty, 110,000*l* to 120,000*l*. Mid and East Kent pockets, 80s to 200s; Weald of Kent ditto, 70s to 170s; Sussex, 65s to 130s; and yearlings, 110s to 200s per cwt.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, Aug. 12.—Since our last report, the arrivals of home-grown potatoes have been less extensive; nevertheless, most kinds have moved off slowly, but at the full prices of last week. There are scarcely any foreign potatoes on offer. Shaws are selling at from 60s to 70s, and Regents 75s to 100s per ton.

FRIDAY, Aug. 16.—Only moderate supplies of home-grown potatoes continue on sale, and the demand for them rules steady, but by no means active, at from 70s to 80s for Shaws, and 75s to 100s per ton for Regents.

COAL MARKET.

FRIDAY, Aug. 16.—Wall's-end: Haswell 18s 6d—Braddyl's Hetton 17s 6d—South Hartlepool 17s 3d—South Kelloe 17s 9d—Heugh Hall 17s—Kepier Grange 17s 6d—Kelloe 17s 9d—Eden 17s—Tunstal 17s—Acorn Close 17s—Bell's 16s 3d—Tanfield Moor Butes 12s 9d—Hartlepool West Hartley 15s 9d—Lambert's Hartley 16s 6d. Ships at market, 67.

IMPORTS OF FOREIGN AND COLONIAL WOOL.

COLONIAL and FOREIGN WOOL imported into London, Liverpool, and Hull from Jan. 1 to July 31, 1860 and 1861, and the total imports, including Bristol, Leith, Grimsby, and Hartlepool.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 3rd of August amounted to 603,595*l*, and for the corresponding week of last year to 598,130*l*, showing an increase of 5,465*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 289,400*l*, and for the corresponding week of 1860 to 286,616*l*, showing an increase of 2,784*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Aug. 12.—The railway market derived support to-day from the fineness of the weather and the improvement in Consols, but still remained dull in character. Compared with Saturday, however, an improvement of about a half per cent. was shown in Great Western, North-Eastern descriptions, and Great Northern, and of ⅛ to ¼ in most of the other leading stocks. Business was very limited. No change of importance occurred in Indian or Canadian stocks. In the foreign market, Brazilian descriptions improved. Lombardo-Venetian were also higher, at 1 to ⅛ pm. In American securities, Erie shares advanced to 23¼ to ⅜ and Illinois Central were steady at 39½ to 39¼ dis. Mines were in little demand and occasionally showed a reduction.

TUESDAY, Aug. 13.—In the railway market to-day the principa feature was a fall of nearly 1½ per cent. in London and North-Western other descriptions being also prejudicially affected. Great Northern declined 1 per cent., the supply of this stock having increased; Midland, Great Western, and South-Eastern, ½; and Lancashire and Yorkshire, North-Eastern stocks, and Caledonian, ⅜ to ⅝. Sheffield exceptionally improved. The market was especially flat at the close. In the colonial market, East Indian guaranteed stock improved to 100 to ½, and Great Western of Canada shares to 10 to ⅛. The chief alteration in foreign railways was another rise in Brazilian descriptions. Lombardo-Venetian were also steady, at 1¼ premium. In American securities, New York Central bonds marked 93, being rather better. Mines were dull, at an occasional decline. In joint stock banks, City shares were quoted higher. In miscellaneous descriptions there was a reduction in Red Sea Telegraph.

WEDNESDAY, Aug. 14.—The railway market was dull during the greater part of the day; but just before the close a general improvement took place of ¼ to ⅝ per cent. The present quotations, however, were for the new account at the end of the month. Midland, Lancashire and Yorkshire, and Sheffield showed the principal rise. The continued fineness of the weather appears to have chiefly influenced the market this afternoon. In the colonial market, Grand Trunk of Canada stock improved to 18⅞ to 19, while Great Western shares were less steady at 9⅞ to 10. Indian guaranteed descriptions continued firm. Foreign railways were fairly suportped, Bahia and San Paulo in particular exhibiting a further rise, Lombardo-Venetian, on the other hand, relapsed to ⅛ premium. In American railway securities, Erie ordinary and preference and Illinois Central advanced. No change of importance occurred in mines or joint stock banks. In miscellaneous descriptions the stocks of the various dock companies were in more demand, excpt that of St Katharine, which is qoted lower.

THURSDAY, Aug. 15.—The railway market opened heavily, but afterwards improved on the reduction in the Bank rate. Later in the day there was again a tendency to flatness on the announcement that the proposed dividend of the London and North-Western was at the rate of 3¾ per cent. per annum against 5 per cent. last year, but towards the close the market again rallied, Midland being especially firm. In most of the leading stocks, compared with yesterday, an average improvement of about ½ per cent. was shown. In the colonial market, Indian guaranteed stocks continued to improve. Grand Trunk of Canada was also higher at 19 to ½, while Great Western shares were quiet at 9⅞ to 10. The principal movement in foreign railways was another rise in Bahia and San Paulo. Lombardo-Venetian also improved to 1 to ¼ prem. American securities closed without alteration. Mines were very inactive, but generally firm.

FRIDAY, Aug. 16.—The railway share market was generally firmer. Great Northern stock rose 1 per cent., and several of the other heavier lines ¼ to ⅜. South-Eastern was flat. London and North-Western stock was quoted 91½ to ⅝; Great Western, 67½ to ¾; Midland, 123½ to ¾; Lancashire and Yorkshire, 108½ to ¾, ex div.; South-Eastern, 80 to ¼; Caledonian, 100¾ to 101¼; Eastern Counties, 47¼ to ¾; and Great Northern, 106½ to 107½. Lombardo-Venetian Railway shares were rather flatter, at ⅛ to 1 prem. Grand Trunk of Canada and Great Luxembourg railway shares advanced. In mines, a moderate business was doing, at about previous rates.
